The Price Current-Grain Reporter

Exponent of Trade Interests in Grain, Hay, Crops, Provisions, Live Stock, Etc.

VOL. LXXXII. No 1 WEEKLY | CHICAGO, JULY 2, 1919. | $3.00 A YEAR. SINGLE COPIES 10 CENTS

BUSINESS AND TRADE CONDITIONS

THE Peace Treaty has been signed, and leading German editors, running true to form, are vicious in their comments. That was to have been expected. As a class there is not a more contemptible creature than the average editor of a German daily paper. The influence of Kaiserism in political and social life was thoroughly demoralizing, for it developed a most pernicious form of sycophancy which found eager verbal expression through the subsidized newspapers, and German newspaper editors developed the habit of seeking salve for the itching palm. Since the Kaiser ran away he has simply transferred his servility from William II to his new masters, the momentary leaders of the mob. The German is a bad loser, and the people of course are sore as well as tired. The remnants of the old military class are not likely to die easily. They are great braggarts. They will talk viciously for a long time to come; and it is of course true that mere poverty is no restraint upon war—we can see that in Mexico; but unless the dynasty can be revived there will be no real incentive for the Germans to go to war, provided the economic burdens laid on them as a people are no greater than are provided by the terms of the instrument itself. While most wars have been based on economic expansion and the antagonisms of rival peoples, no matter what the ostensible cause recorded in the archives, kings have used the prejudices and animosities so engendered for their dynastic purposes and precipitated wars which have resulted in dynastic aggrandizement at the expense of the people. But the dynastic interests of the Hohenzollerns having been removed, there is no substantial reason why, after the present sores of the world are somewhat alleviated by time, these economic differences cannot be adjusted sufficiently to keep the peace of the world.

The appeal of the President to the United States to accept the Treaty as a whole, has therefore a rational sanction; and in considering this appeal the assumption is entirely warranted that the world does long for peace strongly enough to take the greater part of the apparent danger out of the objectionable Article X which makes it the duty of the nations composing the League to guarantee the integrity of their associates' territorial boundaries from ravage by war. There has not been a better analysis of the cause of war than a communication to President Wilson in February, 1915, by the Reform Club, wherein it was said, after analyzing the economic causes of the late war, that "The desire for commercial privilege and for freedom from commercial restraint is the primary cause of war. . . . Commercial relations promote international good will. The great obstacle to this tendency is the method by which industrial competition between the citizens of different states is carried on. Each state attempts to receive some exclusive privilege for its citizens, instead of insisting upon world-wide equality of opportunity—the open door. Like other vices war is promoted for selfish gain. To protect their privileges certain interests advance the theory of the economic rivalry of states [which does not exist.] They seek to arouse a chauvinistic enthusiasm based on false inferences to strengthen the mediæval theory of exclusive trade relations, which is only slowly yielding to economic forces." It is more the delusions concerning international trade than the actual conditions encountered in that trade which is the source of dangerous international jealousies and fears. Trade itself is beneficent; it is only because certain individuals or interests may find competition inconvenient to them, that, because they know what they want while the many do not know, they see to it that governments take part in contributing to the trade irritations resulting in antagonisms which eventuate in war. The war has eliminated the dynastic disturbers; it faces now the delusions concerning trade which in part at least must be removed before any permanent world peace can be hoped for. This is the delusion which makes the German editor the reptile who declares in advance that the treaty though written on parchment is only a "scrap of paper," and that their children shall be taught the religion of revenge.

The function at Versailles on Saturday has provided a way for the world to return to sanity but this it will again achieve only through labor—work, which in view of the tremendous destruction of capital in the form of consumable goods and investments in factories, farms, mines and homes, must be almost as unremitting, though with a different end in view, as it was through the awful years of the war. The state of prices the world over is the plainest indication of the great scarcity of consumable goods and the slowness with which the wasted surplus on hand in August, 1914, is being replaced. Indeed, those reserves are not being replaced, for consumption is in some respects heavier than ever. Converting the working men's money wages into terms of consumption, which is all that wages mean, we find that class consuming more than ever before, yet with shorter hours and the slacker spirit when at work, they are not producing as much as they are consuming. We have in mind the continent of Europe more particularly, but this affects prices on this side because in the present material condition of Europe this country is the reservoir from which capital in the form of commodities needed in Europe must be supplied. Russia set the pace for Continental workmen, and the delusion has invaded England also. When the Russians became tired of fighting, the German propagandists told them they could enjoy the better life which all are striving for by simply to stop fighting and seize the properties held by the aristocrats, capitalists and landlords and dividing it among themselves. They did it. Production stopped or was carried on only in soviet workshops (like the nationalized workshops in Paris in 1850—shops from which our modern I. W. W. communists have plagiarized their shop steward idea, and which then vainly endeavored to solve the present day labor problem of how with less work a man may secure a larger income, and which had to be suppressed became next to nothing was produced in them) and the world sees the civilization of Russia dying today because her people have followed a delusion and are not producing the necessaries of civilized life. All continental Europe, before its states may be expected to function as usual as civilized communities, must resort to the expedient used in Finland and in Winnipeg to suppress industrial anarchy.

The bourgeoisie, the despised "middleclass" so-called, and those working men who own property and are still sane must take over the strikers jobs and restore order by force—must stop philosophizing, dismiss their high-brow dilettante social-reform agitators and begin again to produce and to save. Everywhere men who do not understand what wages are or where they come from are demanding shorter hours and higher wages, whereas true prosperity, individual and national, does not consist in high prices for goods or services but in an abundance of things so that everyone can have his share. Labor the world over, though demanding a larger share of things for itself, is not producing enough to go round; wherefore as the price list shows, the consumers of the world as drifting toward one grand scramble for the things that each must have, but which day by day are becoming scarcer. There is also the world wide belief, as Mr. Geo. E. Roberts recently told Iowa bankers, that each industry belongs to the particular people engaged in it, regardless of the rest of the community. The hod carriers of Chicago on Saturday last demanded a wage of a dollar an hour for their services; and elevator "boys" in the same city rightfully complain that their rents are exorbitantly high. The ship builders at Toledo on June 25 smashed street cars as a protest against paying higher fares necessary if street car men are to have higher pay. The tendency of all this, as Mr. Roberts points out, and which indeed is evident enough when called to one's attention, has been to "divide society into warring groups and classes whose interests would be in conflict."

Workingmen have been told by politicians and sentimentalists and social revolutionaries that the "better life" is to come as a result of the war, contrived somehow so that with fewer hours' work everyone is to fare better than he ever did before the war; but none of these have told the working man that there must be more consumable wealth produced from day to day in proportion to the capital involved and labor employed, if all or even the laboring class itself, are to fare better, since the ability to consume freely depends quite as much on the efficiency and faithfulness of the workers as it does on the managerial efficiency of directors and the sufficiency of the capital employed. The first lesson, then, that the world must learn of the sequel to the function of last Saturday is to be peace and prosperity is that "There is no security for civilization except as natural laws which govern production and distribution of wealth and make for the evolution of society are understood" by everyone.

Exports continue in enormous volume, the records for May being summarized as follows (exports including exports of foreign merchandise):

	Imports.	Exports.	Excess exports.
May, 1919	$328,937,000	$606,382,000	$277,445,000
April, 1919	272,956,000	714,513,000	441,557,000
May, 1918	322,852,000	550,924,000	228,071,000
July-May, 1918-19[1]	2,802,863	6,308,319	3,505,456
July-May, 1917-18[1]	2,685,305	5,435,911	2,750,606

The statement of agricultural exports for May and eleven months since June 30, 1918, appears in another place. In the light of these figures one can but wonder that intelligent men continue to grope about for the reasons for high prices. An excess of exports is not necessarily a sign of wealth; it may mean in certain cases a sign of poverty, as when Egypt was drained of exports to pay the Khedive's scandalous debts; but in our own case at this moment it means that all our surplus is being sent abroad and little coming back. We are dividing our surplus with the needy of Europe and are paying European prices at home for the privilege of playing Sir Bountiful abroad. There may be no objection to the generous work, but we must protest at the politicians making use of it as camouflage for sinister purposes or to throw further bureaucratic or Trade Commission controls about business generally.

From all parts of this country come reports of increasing business activity with fine prospects ahead

452783

in view of the signing of the Treaty and the wonderful outlook for the season's crops. Industry is apparently resuming on the Continent in spots where labor is still sane. Foods, however, continue to advance, *Bradstreet's* index on Saturday standing at $5.11 vs. $5.07 the previous week and $4.29 a year ago.

THE BALANCED RATION

THE slump in the price of beef cattle during the past several weeks has crowded the farm papers with feeders' complaints that "feeding doesn't pay," although side by side with such bewailings one may often find in the stock papers the enthusiastic self-congratulation of feeders who did make it pay. Reading between the lines will in most cases reveal the fact that the difference in results is due to the difference in location, accessibility to roughage and in the men and their skill in the handling of purchased feeds. The animal has itself no more respect for $1.80 corn than it has for 50c corn. Corn is corn to the animal and that is the end of it. But that is not the case with the feeder for profit. He must get results that may or may not square with $1.80 corn and a falling cattle or hog market. Then it is that the balanced ration of the feed manufacturers comes into play. It is the business of the latter to keep to the feeder's side of the game, in order to equalize the price of the feed to the price of the product on the hoof and do it, so far as is possible, by the use of industrial by-products in combinations which the feeder himself could not make with equal economy.

The balanced ration for an animal is one in which digestible protein and carbohydrates are present in proportions best suited to the needs of the particular animal. Animals use these in fairly definite proportions. It is probable that if the proper materials were accessible to the animal it would feed itself about as its needs would be, just as a man does; but the economies of the feeding game are beyond the animal. The necessary constituents of the feed must be there and the appetite of the animal, especially the hog, must be catered to so that he will absorb all the bone and the fat producing feed he is able to assimilate without waste of feed, but it must be as low-priced as conditions will admit and be consistent with the results desired. When the materials are high in price farm mixtures are almost invariably uneconomical because it is not possible to utilize economically in that way materials that the manufacturers can and do use. Moreover, while the station men will work out the scheme of feeding *per se*, it almost invariably follows that when it comes to the commercial side of the process with high priced feedstuffs, the successful feeder is the one who relies upon the feed producers to supply him at a price with products which are compounded to meet every requirement of the feeder's business, be it to make milk, beef, or fat hogs or to breed for the feeder markets.

THE FERTILIZER QUESTION

IT IS manifest to all who study the matter that the future of farming in this country, especially in all the older agricultural states where heretofore their use had been thought unnecessary, will depend on the use of fertilizers. Seasonal good crops on good land may be increased by their use. The subject itself is a new one both to farmers and to the farmers' suppliers in those states, so that both have been groping more or less, uncertain what to do, and this condition has not been relieved much by the uncertainty and indecision of the agricultural experts at the stations, who seem to have agreed not to agree upon all their recommendations; at any rate, they don't agree upon anything long. This has led to the organization of the Soil Improvement Committee of the National Fertilizers' Ass'n, a committee which in order to get some kind of definite publicity action has had in its employ a corps of men who are quite as competent as the station experts to pass on fertilizer problems and are in some ways more dependable, because they have less of the academic habit of indecision—the habit of puttering much and getting nowhere "to stay put," and more of the business spirit of doing something that means directness. As this committee is supplied with fertilizer literature which embodies the last word to date of the science, which is available for widest distribution and which is absolutely impersonal, advocating the use or sale of no one maker's brands or peculiar output, dealers who are interested, and every grain dealer should be interested, would do better to get into touch with the Committee at Chicago or Baltimore before attempting to engage in any publicity campaign rather than depend on the experiment stations only. The latter are not to be ignored, but like all Government commissioners, bureaus, etc., they take their time about everything and never quite reach goal in a business sense.

ARGENTINE CORN

THE reader of this paper has been kept pretty well informed of the fact that Argentina has more corn than it knows now what to do with. The *Times of Argentina*, a dependable, commercial newspaper of Buenos Aires, has told the world this fact repeatedly and how the government had by fixing minimum export prices to benefit the grower thus temporarily prevented its sale at such prices as the world would pay. The result is that corn is now being burned for fuel in Argentina. Some little of this corn has been coming to the United States but the amount has been very small. The venture of the Chicago *Tribune* that the Corn Products Company "has received over 1,000,000 bushels of Argentine corn so far" is not supported by the official records of imports, which show only 136,621 bushels of that corn imported in the ten months July-April, 1918-19, and only 217,000 of corn from all sources. The enthusiastic efforts of certain political farmers to entirely bar Argentine corn out of this country has a rather ridiculous and peculiarly selfish look, especially when the industries that use it have as great difficulty of getting American as they have the Argentine, and have to pay about as much for the latter as for the former, the imports having had not the slightest effect on American prices.

SOUTHERN CORN PRODUCTION

THE acreage to corn this year will be estimated by the Bureau of Crop Estimates as of July 1 and will be published July 9. It is generally believed that the total area will show a decrease from last year. Mr. Wells's estimate herein two weeks ago rather took the trade by surprise but it is pretty well supported by similar reports published herein this week. The figures of two weeks ago were put out with some diffidence and the compiler would not feel badly if they should be found by the Bureau of Crop Estimates to have been excessive. Goodman's reports suggest a shrinkage of 4,000,000 acres in the surplus states.

There is some hope than the Southern acreage will offset the Northern shrinkage; and this is not unlikely, seeing that the cotton prospect is bad. In Alabama the boll weevil is playing havoc with the crop and the wet weather also has done its share. *The Chronicle*, New York, makes a private estimate of only 38,045,000 acres compared with 41,107,400 in 1918, a decrease of 7.4%. This acreage should go into corn and perhaps will, as corn in the South can be planted as late as July 4 and mature. Should this additional acreage go into corn, it would about offset the shortage estimated by Mr. Wells in the surplus states of the North.

But even so, the effect on the commercial supply of corn would be slight. In the first place, the South has next to no facilities for moving corn in commerce. The amount therefore which leaves the counties where grown is quite small. In Georgia in 1917 it rose to 8% from 3 in 1914, but declined in 1918 to 6%; South Carolina only 3%; Mississippi did better in 1917, with 16%, but shipped only 8% in 1918; Louisiana 4%, Texas 1% and so on. But with the increase in the number of hogs in the South, and the number is steadily increasing, there can be no expectations of much more commercial corn from the South to relieve the demand for the Northern supply. In eleven Southern states, not including Texas and Oklahoma, the hog population on Jan. 1 increased from 13,465,000 in 1914 to 18,524,000 in 1919, a gain of 5,059,000 or nearly 38%. Even when Southern corn is in surplus, except when it is immediately adjacent to the Southern consumer and may there be easily moved, Southern buyers find it more convenient and economical to buy Western grain.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the receding week and corresponding time last year, here assembled for ready reference:

	June 28.	June 21.	June 29, '18.
Wheat—			
Primary receipts	1,49,000	1,736,000	1,641,000
Primary shipments	1,43,000	1,863,000	263,000
Receipts since July 1	434,61,000	432,492,000	176,358,000
Visible	8,81,000	11,387,000	785,000
Available, June 21	12,05,000	14,568,000	2,247,000
Canadian vis., June 21	10,56,000	11,256,000	8,669,000
Exports, U. S.	11,83,000	8,406,000	2,928,000
Exports, world's	18,65,000	14,101,000	7,478,000
Corn—			
Primary receipts	3536,000	3,587,000	4,939,000
Primary shipments	2069,000	2,541,000	2,517,000
Receipts since Nov. 1	13,218,000	130,682,000	212,670,000
Visible	4,038,000	4,336,000	11,487,000
Exports, U. S.	.....	96,000	448,000
Exports, world's	2,177,000	1,711,000	516,000
Oats—			
Primary receipts	5,398,000	5,640,000	5,697,000
Primary shipments	3,578,000	4,347,000	2,983,000
Receipts since Aug. 1	7,157,000	271,759,000	314,482,000
Visible	18,094,000	15,635,000	13,227,000
Exports, U. S.	1,741,000	2,301,000	1,766,000
Exports, world's	2,019,000	2,866,000	3,462,000
Cattle—			
Receipts, 6 markets	164,000	159,000	150,000
Shipments, 6 markets	55,000	56,000	40,000
Hogs—			
Receipts, 9 markets	571,000	640,000	518,000
Shipments, 9 markets	173,000	146,000	147,000
Sheep—			
Receipts, 16 markets	*261,000	255,000	263,000
Shipments, 16 markets	*90,000	77,000	94,000
Hog Slaughterings—			
For the week	651,000	755,000	574,000
Since Mar. 1, 1919	11,094,000	10,443,000	10,442,000
Exports—			
Meat, lbs.	47,184,000	50,309,000	11,882,000
Lard, lbs.	17,283,000	22,102,000	11,231,000
Livestock prices, Chicago—			
Cattle	$13.65	$13.50	$16.00
Hogs	20.80	20.40	16.55
Sheep	8.75	9.30	12.00
Lambs	12.25	14.30	16.25
Hogs, av. wt., Chicago	233	232	237
Closing prices—			
Pork, July	$51.50	$51.75	$43.80
Lard, July	34.07½	35.22½	25.50
S. R. Sides, July	27.80	28.22½	23.40
Corn—			
July	$1.77⅞-78	$1.82-½	$1.47⅞-48
September	1.75⅝-¾	1.76⅛-⅜	.....
December	1.53⅝-¾	1.52½-¾	.....
Oats—			
July	$0.68¾	$0.71⅜-½	$0.73-⅞
September	.68½-⅝	.70¾-⅞	.....
December	.69¾-⅞	.71¾-⅞	.....

†Canadian northwest stocks omitted.
*Pittsburgh missing.

FROM AUSTRALIA

OUR correspondent in Sydney, N. S. W., has a peculiarly interesting letter on another page of this week's paper. Australia is in a class by herself and is worth studying. In about a fortnight another article in the form of an interview with an engineer recently returned from that continent, will appear in these pages, with some unusual illustrations. It may be hinted in advance that it is probable that all of the accumulated stocks of wheat during the past three years, which is still suitable for human consumption, will have been moved to Europe by the British government before the bulk of our American wheat of 1919 crop will be ready to be exported or will be called for.

EDITORIALETTES

THE working out of the oats grades under the standard rules is beginning to tell its own story, as will be seen by the report handed us by the Adolph Kempner Co., published on another page.

THE hay convention at Detroit is the next big trade event, taking place this month. Detroit is the ideal convention town, and all the hay men hope this year's convention will be the record breaker.

The Price Current-Grain Reporter

Published every Wednesday by the
Price Current-Grain Reporter,
912 Webster Building.
327 So. La Salle St., Chicago, Ill.

J. CARVER STRONG,
Treasurer and Manager.
EATON G. OSMAN,
President and Editor.
GEO. A. WELLS,
Vice President and Contributing Editor.
H. A. SHEPARD,
Secretary and Advertising Manager.
L. A. KOCH.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports on crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell of its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, JULY 2, 1919.

GRAIN TRADE REVIEW

A decrease of around 5,000,000 acres in corn is expected to be shown by the Government July crop report, with the possibility that the final returns next December will show a further reduction. The greater part of the reduction is expected to be in the states of largest production, and will be offset to some extent by the increases in the Southern States. The condition is believed to be somewhat below normal for this season, as there are some parts of the corn belt where weather has been decidedly unfavorable. It is to be noted, however, that the territory which ships the most grain has the best prospect this year; and it is the amount that arrives at terminal markets that determines the price of the crop.

Crop conditions are decidedly spotted. Some points would be benefited by rains while in others dry weather is wanted. Southern Minnesota, eastern South Dakota and part of northwestern Iowa are suffering from too much moisture and weeds are growing much faster than the corn. There is a distinct dry area in the Canadian northwest and in western North and South Dakota and Nebraska and in the Rocky Mountain States. In some parts of Montana this will make the third year in which crops have been materially cut down by drought and many farmers will have to go out of business. Considerable loss is expected throughout the dry territory unless rains come shortly, but the bulk of the crops there are wheat, oats and other grains, very little corn being raised.

Under such conditions active markets for all grains are to be expected, with erratic price movements. The private reports have been predicting a dry and hot summer and temperatures over a good part of the corn belt have been well above the average for this season for some weeks. The warmth was very beneficial, however, as the corn crop was planted late, and the latter has been about made up, so that much grain will be laid by before July 1. Cultivation has been rather thorough, although not as frequent as last year, due to the rapid growth of late.

Liquidation was on in the July, and that delivery worked to a smaller premium over the September. Scattered longs without licenses sold out, and the offerings passed into the hands of shorts and of cash houses and industries. The latter took liberal amounts in store the past week at Chicago, and while there are rather independent for supplies for a time, they promise uneasiness for the shorts. Corn has been posted as out of condition and many cars received have arrived at elevators heating. The same applies to grain held in interior elevators, and also to some in transit. Those in a position to know say that the high oil content is responsible for the poor keeping quality. Not infrequently No. 2 grades have gone out of condition in a few days. The European situation is regarded as bullish, but the extremely high prices prevailing in this country prevent export business, while the shortage in ocean room checks Argentine shipments. Prices in the latter country have advanced rapidly of late, with some buying by the American speculators. Drought in western Europe, while relieved to some extent, caused some damage to feeding grains there, and import requirements have been increased.

Expectations are that there will be plenty of oats to go around, although there is practically no chance that the yield will be as large as last year. There is a rather general complaint as to the crop at the present time, and with the Texas harvest delayed by wet weather the South has commenced to buy in more northern markets. This will take considerable grain away from Chicago and other points. At best the South prefers the Northern grain. Supplies in sight are sufficient for all requirements and are in excess of last year's. Scarcity of ocean tonnage prevents a liberal export business, and there is also some difficulty in securing permits to ship oats to the seaboard. France has been hard hit by drought, and unless there is relief by rains in parts of the American and Canadian northwest heavy damage may result there.

New wheat has commenced to move on a small scale in the Southwest. St. Louis received its first car from Arkansas, which graded sample on account of heating, and sold at auction at $2.18. Goodman's report suggests that while the final yield of winter wheat may be around 900,000,000 bu. there will be much damp grain, which must sell on its merit, rather than on the Government price. This, however, means that shippers will secure all their grain is worth, as a committee of the trade in the various markets will determine the discount under the guaranteed figure. In no case can it be above the price of No. 3. Spring wheat condition has been lowered as the result of drought in the western part of the Northwest and by wet weather in some parts of the eastern sections. The heaviest losses have been in parts of Alberta and Saskatchewan. Black rust has been found at numerous points in the Dakotas and Minnesota, but it is too early to determine whether damage will be done or not. The crop is late, and unless weather conditions are favorable for growth the rust may develop to a point where heavy losses will result. The world's wheat situation, regardless of any damage to the spring wheat crop in North America is regarded as distinctly bearish, as there will be so much grain in this country that ocean room cannot be secured to move it during the new crop year.

Grain Market Summary.

Primary receipts of wheat, corn and oats for the week follow:

	June 28, 1919.	June 21, 1919.	June 29, 1918.
Wheat	1,419,000	1,736,000	1,641,000
Corn	3,536,000	3,587,000	4,939,000
Oats	5,398,000	5,640,000	5,697,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1918-19.	1917-18.
Past week	10,353,000	12,277,000
Preceding week	11,063,000	10,733,000
Since July 1	966,600,000	744,233,000

Liquidation was on in July corn, scattered longs selling freely as the result of grain getting out of condition in public elevators, and also to the regulations which prevent any one from taking a delivery unless they have a license. There was also selling of July and buying of September, and the difference between the two deliveries narrowed considerably, being only 2¼c at the last against 6⅛c the previous week. Crop reports were more favorable, and sentiment somewhat bearish. Prices had a range of 6@6½c for the week, and closed with July 4½c lower, September ⅝c lower and December 1c higher.

July oats have practically lost their premium over the September, and at one time sold at the same figures as the latter, although finishing ⅛c over. Liquidation was on in the near delivery and it closed 2¾c lower, while September was off 2¼c and December 2c, the finish in all cases being well toward the low point. Sentiment was bearish, as crop reports showed improvement, and there was some rain in the Canadian Northwest which had been complaining of dryness of late.

Cash wheat markets have been very quiet, with small receipts. Millers have taken a few cars, but on the whole they are disposed to go slow and buy only as they can sell flour. The movement of the new wheat crop is getting under way in Texas, Oklahoma and southern Kansas, and is expected to be available in fair volume within a week or two. Flour prices are expected to decline somewhat. At the moment the trade is marking time. Quality of the new crop from the Southwest promises to be rather unfavorable, with a relatively higher moisture content than was the average from the 1918 yield. Range of prices for the past week follows:

	High.	Low.	Close June 28, 1919.	Close June 21, 1919.	Close June 29, 1918.
Corn—					
July	$1.83½	$1.77	$1.78	$1.82½	$1.47½
Sept.	1.78⅝	1.72⅝	1.75¾	1.76⅝	.....
Dec.	1.56½	1.50	1.53¾	1.52¾	.....
Oats—					
July	.72⅛	.68¼	.68¾	.71½	.72⅛
Sept.	.71⅝	.68⅛	.68⅝	.70⅞	.....
Dec.	.72¾	.68⅜	.69⅞	.71⅞	.....

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	4,048,000	539,000	4,992,000
P. receipts to June 28	277,273,000	314,462,000	286,759,000
P. shipments to June 28	216,802,000	235,470,000	250,078,000

RAINS IN NEW SOUTH WALES

Reviving Rains in Australia—The Problem of the Accumulated Wheat—Damage by Rain and Insects—Unfit for Use.

By W. S. RENDALL.

SYDNEY, N. S. W., June 3, 1919.—[Special Correspondence.]—The month of May leaves a pleasing record of meteorological conditions, especially in the state of New South Wales, featuring the "Breaking of the Drought." During the period referred to no less than 30 inches of rain fell in the Sydney district. Otherwise the rainfall has been pretty general, including the inland northern and western grain areas, while on the northern rivers floods have done considerable damage, both to crops and to stock. The parched and dusty interior will smile with new verdure in a few weeks' time, and although it is late in the season, farmers are hastening their tillage of freshly watered lands. The area under crop this season will be smaller than last, as in many places it is too late for sowing. A revival in pasture will materially assist the primary industries of the country and prepare for an increased export of commodities as soon as tonnage is available. Many parts of New South Wales have been languishing for moisture for 18 months or more, while in places the absence of rainfall has hampered production for the past four years. A good season, however, will quickly recuperate the man on the land for these lean years.

THE ACCUMULATED WHEAT PROBLEM.

The all-absorbing topic in grain circles is, what to do with stocks of old wheat. While the rainfall will undoubtedly prove a blessing to producers in the near future, it means the further spoliation of wheat stacked in the country. Flood, fire, mice, weevil and other pests have one and all done their best to decimate existing stocks, while the want of transport from the country, deficient rolling stock and disabilities for handling, to say nothing of the absence of tonnage to carry away our mighty pile of grain, have left farmers in a perilous position.

The Pool controls the bulk of the wheat in the Commonwealth; in fact, it holds the entire stocks, with the exception of that held by farmers for seed. The government manipulation of grain stocks has proved a magnificent failure. Opportunities for export by private enterprise, especially in the earlier period of the war, were thwarted and the result is that the Pool's finances stand with a debit of £19,056,000 sterling today. With the recent rainfall, many farmers who are unprovided with seed wheat will have to turn to maternal governments to nurse them till the next harvest is nigh. Both government officials and wheat factors are hoping that the incoming troop ships will carry away a large portion of accumulated wheat stocks. Other producing industries are also waiting to unload wool and other products, so that wheat will only claim portion of the available tonnage promised.

TAINTED WHEAT.

Old stocks of wheat have, from the causes referred to, become so infected and tainted as to become unfit for human consumption. Men handling this wheat have been infected with disease and much of the ill-conditioned grain is being used for stock-feeding. Holders of this inferior grain, in order to "save their faces," have made displays of bread made from 1916-17 wheat, in order to show that it is still good and wholesome. Others have resorted to mixing the old grain with new in order to hide its defects. These efforts only go to show that the trouble is with us and that it has to be met and dealt with. If this old grain is not fit for consumption in Australia it certainly is not good enough for export. Oversea markets would do well, in buying Australian wheat, to get a substantial guarantee that they get breadstuffs of later production.

BULK HANDLING.

So far, the efforts being made from time to time have not resulted in anything practical in the way of handling wheat in bulk. Some storage has been provided but no advance has taken place in the provision of either land or water carriage of grain other than in bags. It looks as if the time is not far from ripe for the practical development of a system which is highly necessary for the betterment of the grain industry in this country. No doubt grain can be produced in Australia in enormous quantities. Both science and experiment have done much in producing rustproof and drought resisting wheats. The latter is an important feature in those great areas of millions of acres, where rainfall is intermittent and uncertain. So far our industries have only skirted the fringe of this great continent. The present rainfall demonstrates that there is plenty of moisture if rightly conserved. But while there is no limit to possibilities in this connection, all efforts to satisfactorily prosecute the industry must necessarily prove futile as long as we garner our grain in bags and stack the bags in the open to court rot and disease. Our governments, unlike your more progressive industrial pioneers, only come along after private enterprise has created produce for roads and railways to carry. An Australian government would not build a railway to the most fertile patch in the country until settlers had made it a prospectively paying venture. It is the same with the bulk handling question. Farming has reached its limit in the matter of carrying grain in bags and until a better system is devised the industry must lack expansion. The great difficulty in procuring sacks in seasons of plenty and the prohibitive prices for jute in later years have made a new system compulsory. So long as our railways are under State control so long will these evils of industrial stagnation continue.

THE UBIQUITOUS RABBIT.

No matter what happens, the Australian rabbit holds his own. Industrial unrest, strikes, flood, fire or drought come and go but "Bunny" flourishes without let or hindrance. Tens of thousands of pounds sterling have been spent in attempts to rid the land of this destructive rodent. Returned soldiers have come back with experiments in "poison gas," but the rabbit survives. Among the many schemes devised for the spoliation of the rabbit is a new suggestion to prohibit trade or export in rabbits or their products. Bunny has been dried, canned, skinned, converted into sausage and small goods, used as manure or burnt at stake, but his millions do not diminish. The rabbit will thrive in myriads where sheep or cattle cannot exist. The rabbit's wants are few and his capabilities of reproduction "without visible means of support" are surprising. Hitherto the fact that rabbits will thrive where other stock will die had made the rabbit industry a blessing in disguise. Farmers and squatters, however, have not benefited so much from the trapping and export of rabbits as have trappers and those engaged in handling the rabbits' meat and skins. The wholesale poisoning or rabbits has resulted in the destruction of bird life and the abnormal increase of insect pests which birds previously kept in subjection. The question, therefore, is a very complex one and the side issues on the rabbit questions are involved. Rabbits could be cultivated on specially enclosed areas of poor land with great profit but the laws of the country penalize anyone keeping a rabbit in captivity. The fur trade alone has enormous possibilities and the cessation of export would destroy many avenues of trade and bring disaster on a class of producers and traders who have found solace in "Bunny" when all else has failed.

THE PRICKLY PEAR.

Here we have another serious pest, especially in the northern parts of habitable Australia, which gives promise to enterprising treatment and manufacture, the prickly pear cactus. Tens of thousands of acres of good land, covered with this remarkable growth, have defied all attempts at its eradication. The plant yields a large percentage of spirit; it can be converted into valuable cattle fodder; its fibre can be made into cordage and the refuse into fertilizer. It is one of the many items that figure on the list of future industries and the prickly pear will grow and flourish where all else will wither and die.

INDUSTRIAL UNREST.

Australian labor lost over a third of a million pounds sterling last year in strikes. The strike weapon has injured this great country worse than the war. Last year was a "good year" for employers as compared with the previous twelve months, when 4½ million days were lost in labor and 2½ million pounds sterling in wages. This in a country with a population of less than five millions is simply appalling. Labor is paid higher wages in Australia than earned by professional men of brains and ability. All men come under the same category in the dictatorship of unions. When employers refuse to grant extortions, benevolent governments come forward to excuse defaulting workers and penalize capitalists. Employers are tied hand and foot to awards and agreements, but workers evade the laws with impunity, refuse to pay fines and hold an unoffending public at bay in impudent defiance. Farmers have at length risen to a recognition of the necessity for nominating their own candidates for election for parliament, regardless of party or political creed. Despite this shocking condition Australia is wonderfully prosperous. A good season gives unlimited wealth for political extravagance and enables an overtaxed and burdened public to foot the bill, bear a 50 per cent increase in the cost of living—and look pleasant. How long will it last?

WELLINGTON FLOUR MILLS CO.'S TANKS.

There are many notable and representative plants over the country and we do not suggest that the Wellington Flour Mills of Wellington, O., are peculiarly perfect, but it is our privilege to submit certain details of their equipment which are of more than ordinary interest and which may help those erecting such properties for the new crop movement to save some steps and considerable money. It is no time to spend money extravagantly on elevators, mills and feed plants. Materials and labor are "sky high" and enlarge

WELLINGTON FLOUR MILL CO.'S STORAGE TANKS.

the permanent investment needlessly. So the excellent results produced in this well located Ohio plant, a secret which we cannot of course pass on to other subscribers, is indicative of the well thought out installation of machinery and in the general operation of their property.

The attached engraving chiefly illustrates their "brand-new" tile grain storage tanks, of which they are justly proud, and the equipment for which was furnished and the erection handled by J. M. Preston Co. of Lansing, Mich., specialists in tile tank construction. The building material does not crack nor sag, is fireproof and being hollow prevents moisture and heat movement and admirably fulfills its purpose.

These storage tanks are 81 ft. high to the crown of the roof, to which is attached a 40-ft. steel flag pole from which Old Glory may be seen in good weather for miles around. The tanks consist of two singles for storage purposes, with the center portion used as a workinghouse. This portion contains a 1,600-bu. elevator leg and the latest model Richardson Type-registering Automatic Scale, man lift as well as steel ladder and car unloader. The tanks are so arranged that all grain entering or leaving them must necessarily pass over the automatic scale and be weighed. The grain can be passed from the mill to the storage tanks or *vice versa* in one continuous operation, the power being furnished by the motor located in the dog-house on top. The entire operation is controlled from the switchboard in the engine room. The tanks are equipped with thermometers, one in the center of each, so that the temperature of the grain can be read at intervals of every five feet in height.

Adjacent to the tanks is a 200-bbl. long system flour mill and the owners operate in addition a 300-bbl. corn meal mill, a 200-bbl. self-rising pancake flour department and a 40-ton per day capacity feed mill.

The Wellington Flour Mills, whose personnel comprises C. U. Rechsteiner, president; L. G. Bradstock, secretary-treasurer, and B. E. Sigler, superintendent, also maintain a seed department for the cleaning, conditioning and grading of all kinds of seeds, and are also recognized as shippers and buyers of hay and grain in car lots.

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to June 28, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	45,875,000	63,824,000
Milwaukee	3,868,000	9,575,000
Minneapolis	5,479,000	13,460,000
Duluth	25,000	163,000
St. Louis	15,946,000	19,666,000
Toledo	958,000	1,842,000
Detroit	1,330,000	3,043,000
Kansas City	14,475,000	26,124,000
Peoria	15,690,000	25,339,000
Omaha	17,641,000	35,715,000
Indianapolis	12,931,000	13,919,000
Total	134,218,000	212,670,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	June 28, 1919.	June 21, 1919.	June 29, 1918.
Chicago	1,275,000	1,229,000	1,985,000
Milwaukee	77,000	146,000	130,000
Minneapolis	77,000	70,000	306,000
Duluth	.....	.....	.....
St. Louis	581,000	484,000	411,000
Toledo	16,000	25,000	41,000
Detroit	24,000	26,000	37,000
Kansas City	330,000	350,000	381,000
Peoria	472,000	460,000	628,000
Omaha	409,000	544,000	589,000
Indianapolis	275,000	253,000	431,000
Total	3,536,000	3,587,000	4,939,000
Shipments	2,069,000	2,541,000	2,517,000

Fall Fertilizers Should Be Cheaper.

Department of Agricultura, the Bureau of Information, says that farms of the Southern states should obtain their mixed fertilizers for the fall season of 1919 at an average price about 30 per cent lower than the price which prevailed for the spring season this year. Prices being based upon delivery in 200-pound bags.

The Letter Box

Crops Excellent.

Price Current-Grain Reporter: Crop conditions here are excellent.

No building going on at present.—*J. H. Donaldson, Mgr., Winter, Truesdale & Ames Elevator Co., Campbell, Minn.*

Fine Crops.

Price Current-Grain Reporter: We are having fine wheat and oat crops here, oats running about 40 to 60 bus., wheat from 10 to 25, the wheat testing mostly 60 lb. to the bushel. We have been threshing since about June 20.—*Sayle Grain Co., Commerce, Tex.*

Elevator Sold.

Price Current-Grain Reporter: The elevator of J. J. Obermyer at Kouts, Ind., has been sold and possession given to Chas. Ray on June 1.

The outlook for wheat hereabouts is good; corn is doing fine but oats are only fair.—*Chas. Ray, Kouts, Ind.*

New Firm Organized.

Price Current-Grain Reporter: Having bought a half interest in the elevator here the firm name hereafter will be Hickman & Kellar.

Wheat will be light this year owing to the late freeze.—*E. Hickman, Corydon, Ind.*

Oats Ready to Move.

Price Current-Grain Reporter: There are two elevators at this place in good condition and need no repairs this season. Will have a bumper oat crop in for shipment in about ten days. Do not raise much wheat in this section.—*Monarch Mill & Elevator Co., A. D. Hughes, Checotah, Okla.*

Texas Corn Almost Ready to Move.

Price Current-Grain Reporter: The Brownsville country in the Lower Rio Grande Valley of Texas will have about 1,500 cars of new crop fancy white milling corn which will begin moving about July 20th, and sixty cars milo and kaffir which will begin moving July 10. We shall be glad to receive inquiries.—*E. R. T. Howard & Co., Brownsville, Texas.*

New Manager at Memphis.

Price Current-Grain Reporter: We wish to announce that Ernest C. Merton, formerly sales manager for some of the northwestern and mid western mills, including H. C. Cole Milling Co. of Chester, Ill., is now associated with us as manager of our flour and feed department.—*John T. Leonard & Sons, Memphis, Tenn.*

Will the Reader Reply?

Price Current-Grain Reporter: I noticed on Page 1257 of your REPORTER, a reference to the cost of unloading cars of grain. Being interested in the art of unloading cars more quickly, I hope there will be some expression from your readers as to their actual cost per car of unloading and whether a price of $50,000 would be reasonable for such an equipment.—*H. Richardson, care Richardson Scale Co., Passaic, N. J.*

Crop In Arkansas.

The Price Current-Grain Reporter: The recent favorable weather after our long continued wet spring is having a beneficial effect on crops in this section. Corn and cotton are improving very much, and are being thoroughly worked out. It seems that there has been an improvement of at least 20 per cent in the condition of these two crops the past two weeks. Wheat and oats are being harvested.

Our peach crop is unusually large, and of fine quality. Cantaloupe and water melon acreage about normal.

There is a good hay crop through this section. Pastures are in fine condition. With continued favorable weather we should harvest almost normal crops of cotton and corn.

The stock of garden seed being carried over by seed merchants in the South is slightly above normal. The stock of grass and forage seed being carried over slightly below normal—*Arthur G. Lee, Fort Smith, Ark.*

Building Dwelling House.

Price Current-Grain Reporter: We have purchased a two-acre tract at Blackland and have moved a dwelling house on it and are fixing up the place for our buyer at that point to live in.

Only 10 per cent of old corn is in farmers' hands hereabouts. The growing crops look fine, wheat however is badly down and damaged from recent wind storms and rain. Oats will probably be somewhat below a normal crop.—*B. B. Farmers Cooperative Elev. Co., Boody, Ill.*

Big Car of Corn.

Price Current-Grain Reporter: Your readers may be interested to hear of a very large car of corn which we unloaded at Argo on the 19th inst.: Car NYC 125326, containing 140,840 pounds corn, or 2,515 bushels, for which we issued check to the seller for $4,425.90. We do not know that this is a record by any means but certainly is a good-sized car of a valuable commodity.—*Corn Products Refining Co., F. G. Coe, Mgr. Grain Dept., Chicago, Ill.*

Crops Not So Good.

Price Current-Grain Reporter: There are no changes to be made here this season except that we put a man-lift into our elevator last fall.

The crops at a distance look to be excellent, but I am afraid these heavy dews we are having at night and very hot days will cause rust and damage the wheat and oats. I will be very much surprised if the wheat and oats will turn out half as good as it looks.—*O. A. Talbott Co., by E. J. Moore, Beaconsfield, Ia.*

Price of Clover Seed.

Price Current-Grain Reporter: Looking over my files I find a letter from your H. A. Shepard, advg. mngr., dated Jan. 23, 1919, predicting higher prices on clover seed and calling attention to your facilities for gathering data on factors which influence the market and your special service to the trade in this direction.

On the date of your letter clover seed was $24.27½; and it will perhaps be pleasing to know that your prediction that seed would reach $28 to $30 by early spring was realized as early as March 18 when the market closed at $28. It reached $30 on March 27 and the high point was $31.25 on March 31.—*Carl Bryant, Toledo, Ohio.*

Wheat Movement Slow.

Price Current-Grain Reporter: The movement of wheat is not starting anything nearly as we expected. This is due to the rains that have delayed the harvest but practically all of the wheat in southern Oklahoma has now been cut and probably 25 to 30 per cent has been cut in northern Oklahoma.

No hard wheat is available yet for quick shipment but a few shipments of soft wheat have been made from points in southern Oklahoma. The quality of our wheat will be nothing like as uniformly good as was the case last year.

Very few contracts have been made up to date (June 26) as there is very little demand except for early shipments and such commitments responsible shippers will not make on account of the unsettled weather.—*J. J. Stinnett, Oklahoma City, Okla.*

Starting a New Business.

Price Current-Grain Reporter: Herewith my check in payment of a year's subscription. For a number of years I have been connected with the Bancroft-Marty Feed & Produce Co. as manager. In April I sold my interest in that firm and have organized the Trinidad Grain Co. As soon as an elevator can be built and the machinery installed we will do a wholesale business in grain, flour and probably hay. We now expect to be ready for business not later than Sept. 1. Up to the present time crop prospects are good.—*E. P. Conger, Trinidad, Colo.*

Illinois Corn.

Price Current-Grain Reporter: Much of the corn crop here will become too large to cultivate by July fourth and most of the balance a week later. Mr. Farmer will certainly be a busy man for many weeks ahead laying his corn by, attending to the harvest of small grains and grasses; one can hardly pick a time soon that he could possibly give in hauling any grain to market to speak of. Present prospects are for a good corn crop.

Regarding the growing oats we can only repeat our former statements that the yield will be less and acreage smaller than for two years past. Fortunately automobiles do not eat oats and we do not need so many as formerly.—*H. I. Baldwin & Co., Decatur.*

Thanks for Compliment.

Price Current-Grain Reporter: I want to compliment you on your Year Book, copy of which we have just received. It certainly contains some very valuable information and everybody in the grain trade interested in grain and provisions should have one.—*Aubrey Hawkins, Richmond, Va.*

Good Local Meetings.

Price Current-Grain Reporter: For your information will say that we have just concluded a series of local meetings throughout the State of Missouri, all of which were largely attended and successful from every standpoint. We have taken in a good many new members and our Association is steadily forging to the front.—*M. U. Norton, Sec'y., Missouri Grain Dealers' Association, Mexico, Mo.*

Moved Office.

Price Current-Grain Reporter: This is to advise you of the removal of our office from 513 Wells Bldg. to 821 Railway Exchange Bldg., Milwaukee. Will you kindly change our name on your mailing list?—*W. H. McDonall, Grain Supervisor, Bureau of Markets, U. S. Dept. of Agriculture, Milwaukee, Wis.*

COMPARATIVE MONTHLY AND YEARLY EXPORTS OF WHEAT.

The following table, compiled by THE PRICE CURRENT-GRAIN REPORTER, from Treasury Department statements, shows the monthly and yearly exports of wheat, including flour, from the United States, and the yearly exports for Atlantic and Pacific ports separately, for the years indicated:

	1918-19.	1917-18.	1916-17.	1915-16	1914-15.	1913-14.	1912-13.
July	10,951,000	8,429,000	10,583,000	11,649,000	30,174,000	12,967,000	3,008,000
August	15,496,000	9,739,000	14,919,000	20,439,000	27,618,000	28,348,000	8,910,000
September	28,347,000	7,182,000	18,160,000	26,301,000	31,436,000	17,513,000	16,987,000
October	24,441,000	11,418,000	16,131,000	23,769,000	25,664,000	13,111,000	20,600,000
November	21,989,000	10,615,000	19,006,000	19,264,000	25,897,000	9,617,000	16,135,000

MEETING OF TRI-STATE GRAIN DEALERS' ASS'N., MINNEAPOLIS

A representative gathering of the country grain shippers of the states of Minnesota, North and South Dakota attended the annual convention of the Tri-State Country Grain Shippers' Association, held at Minneapolis last week. In connection with the meeting there was a very interesting machinery exhibit, where grain cleaners, manlifts, grain driers, elevator supplies and equipment, auto-truck dumps, etc., were on exhibition and in operation. This little exposition gave many of the visiting dealers an opportunity to see at first hand much equipment that would be of value to them in their plants.

After the usual address of welcome by the mayor and the response in behalf of the association by President A. E. Anderson, the talk dwelt upon the value of associations and their work and cited a case where the Tri-State Association took up the matter between a railroad company and an elevator company who had had trouble over the elevator site and the value of the lease. He said the company appealed to us for moral assistance as we found their case and to help them. We appointed a legislative committee which went to St. Paul and asked that a law be passed giving authority to the Railroad and Warehouse commission to decide what should be just compensation for leases. The bill was passed. The railroads wanted more than the property was worth.

"The prime object of our association is to come to the assistance of each other and we come to the meeting to learn and hear the experiences of others."

ON FEDERAL GRADES.

R. C. Miller, Federal Grain Superviser for the Northwest made an interesting talk on "The Value of the U. S. Grain Standards" from which the following is taken:

The grain trade in the United States is in the main very much in favor of having a definite and permanent system of grading which does not change from year to year regardless of the crop conditions. The supply and demand, and other conditions will take care of the price of the grain even though there be less No. 1 and No. 2 in some years than in others. Furthermore, it is not desirable to have too wide a range in the character of the grain described in a grade. The higher grades should represent premium grain and receive premium prices as compared with the grain of inferior quality which falls into the lower grades.

The problem of establishing grades for any given locality, such as a market or a state, is necessarily a much simpler one than the problem of establishing uniform standards for all the varieties and classes of grain grown in the United States. Certain localities have special problems, such as presence of obnoxious weed seeds, wild vetch (wild pea), corn cockle, kinghead, etc., or cereal grain such as rye or barley in wheat, but represent only a very limited section of the country. Taking into consideration the number of different grain producing sections, it is readily seen that in 48 states a great number of problems of grain grading arise and are very difficult of solution.

First, absolute necessity of obtaining an accurate, average sample of the load of grain for the purpose of obtaining correct inspection. Unevenly loaded cars add to the difficulties of obtaining correct samples, and tend toward controversy; therefore, country shippers are increasing the hazard or tendency to discontent when they do not so far as possible load cars evenly.

Heavily loaded cars, or overloaded cars, also raise the question of uncertainty of correct sampling, inasmuch as the grain samplers cannot obtain grain from the bottom of the cars. If cars are not properly trimmed or leveled off when loaded, the grain under the high parts of the car may not be correctly sampled and lead toward controversy.

The Department of Agriculture, through its Bureau of Markets and the various offices of federal grain supervision, is very desirous of the fullest co-operation of the grain trade and of the grain producers in connection with the handling, marketing and grading of grain. Constructive criticism and full-hearted co-operation is welcomed by the Department in its work. Questionable methods and incorrect grading should be brought to the attention of the proper officials in the right spirit in order to most quickly and satisfactorily attain uniformity and correctness in grading grain.

There has been at different times considerable dissension among certain interests in the United States and comparisons have been made of the various systems of grain grading. Due to the nature of the systems in vogue heretofore, it has been practically impossible to justly and honestly make fair comparisons for the various numerical grades established under the different systems. Frequently the comparisons became obnoxious, or at least provocative of controversy, and no good end is gained by such methods.

Under the grain standards act, the Secretary of Agriculture and officials working in connection with the federal grain supervision, have absolutely no connection with price fixing. There has been considerable complaint during the Government control of grading and distribution of grain of the prices received for grain according to the grade assigned. Under normal conditions, regardless of the grade assigned to grain, prices may vary according to the supply and demand, and to the general market conditions or the intrinsic value of the grain itself. For instance, smutty wheat of high quality otherwise, may at one time be discriminated against due to the fact that there is a large quantity of wheat which is not smutty available for the use of the millers or other grain trading concerns. However, should there be a small supply of wheat of any character, the high quality wheat of smutty character might receive scarcely any discount under the same quality of wheat which is not smutty.

Ralph Brown, also of the Department of Agriculture, Bureau of Markets, who makes his headquarters at Washington, was present and gave a talk and demonstration on the use of testers, sieves, etc., and the application of the Federal grades, which was of much value and assistance to the country shippers. He stated that the country shipper should probe every wagon load and car load, and as the grade secured that depended on how careful he wanted to grade the grain he handled. He told of the various steps necessary in determining the grade; first, the obtaining of the dockage by the use of the sieves, finding the test weight of the sample and how to use the stroker in having uniform weight in the center without stacking; also the way to determine the moisture content and to find out whether the kernels were damaged by heat or otherwise and of the foreign material that might be contained in the sample other than dockage. He said where the country shipper has time he should make the tests and determine the grade, and this would enable him to know what the determining factor was in the grade, and during the rush it would only be necessary to test for that determining factor only. He advised mailing samples occasionally to the Bureau to get a certificate so as to check up on the work.

MR. JACOBSON OBJECTS.

O. P. B. Jacobson of the Minnesota Railroad and Warehouse Commission took exception to the statement made by Mr. Miller as the reason for the establishment of the Federal grades, Mr. Miller having stated that it was due to complaints of foreign buyers. Mr. Jacobson did not think a shipper of this country should be penalized for grain spoiling on the water. He said that the elevator man was entitled to everything he earns in cleaning grain because he earns it and that the grades have nothing to do with the price fixing and that the Federal grades were not satisfactory to either the farmers or the dealer and that the trade would rather have the old Minnesota grades. The lowering of the grades from the Bureau of Markets trades was not necessary as far as we are concerned, as foreign buyers are willing to take Minnesota grades and we can put the old Minnesota grades into effect if we do not get a square deal.

The Friday Session.

A. D. Sibel of the Dairy and Food Department told of a new bulletin on the feedstuffs law which had just been passed in Minnesota by the legislature and that to sell feedstuffs in Minnesota it was not necessary to take out a license.

I. C. Cuvellier, editor of the *Coal Dealer*, spoke on what the coal situation has in store for country dealers. He thought the situation was serious and advised all grain dealers who handle coal to take the necessary steps to stock up at once.

E. G. Pratt, of the Republic Coal Co., in speaking on the same subject said: "If you are in the coal business you should put in your stocks. The production has been reduced 50 per cent. The situation is serious. The car shortage is bad and the dealer who recognizes the situation will be in a position to make a speculative profit in his business."

Dr. Cushing, formerly editor of the *Black Diamond*, spoke on "Our Duty to Supply our Allies with Coal." He said they would have a shortage of about 8½ per cent of our production. We are facing a shortage of cars for coal and confronted with the biggest crops we have ever had to move which means congestion.

Frank L. Carey, zone agent for the fourth district, told the dealers of the United States Grain Corporation plans and policies for handling the 1919 crop. He said in part as follows:

Mr. Carey reviewed the work of the Grain Corporation to date, with which the reader is more or less familiar, from published remarks of other zone agents in these columns. As to handling the 1919 crop, the salient points of the address will be found in the following paragraphs:

The contract with the grain dealer prescribes that all wheat shall be marketed with only a reasonable handling charge. Machinery will be set up to care for disputes arising over the grading and pricing of wheat at country points.

DEALERS AT THE TRI-STATE GRAIN CONVENTION, MINNEAPOLIS.

The contract will provide for the payment of storage to country elevators for carrying grain back in the country, when cars are not available for a reasonable turn-over. That reasonable turn-over has been considered 20 per cent of wheat in the house. A policy has been decided upon of advancing premiums in the terminal markets, which will take the place of storage; that is, if the premiums are advanced in the terminal markets then there will be no storage, but the contract provides that storage will be paid before premiums start and later, if premiums are discontinued at terminal markets.

You must bear in mind that premiums cannot be advanced to a point that the movement of grain below the maximum capacity of the terminal elevators to handle will be retarded. If the present crop is materialized, the terminal elevators at interior points as well as at seaboard terminals will be taxed to their maximum during the entire year.

I know you people are all vitally interested in the development of this Northwest and if you will permit me, I will for a moment discuss a matter which is of great interest to this entire section and especially to the grain and milling trade. In my opinion, it is a most important subject for you to consider and it is surprising how little has been said about it.

I refer to the further development of the Great Lakes, which, when fully completed, will furnish a means of transportation for the products of this Northwest. The railroad problem is a problem standing entirely by itself and I do not care to enter into a discussion of its various phases. We have seen a 25 per cent advance in freight rates to the East and those in charge of our railroads are asking for a still further advance in order that those roads may be maintained in an efficient condition. This advance in freight rates means to the Northwest, a movement away from the great Eastern markets.

A remedy for this condition Mr. Carey found in the development and use of a Great Lakes and St. Lawrence River route. He concluded:

Gentlemen, I have now been connected with Governmental work for the past two years and I had hoped, with the closing of the present crop that I might be relieved of that responsibility and return to my own business. The endorsement of the work done by the Grain Corporation was so unanimous that practically none of the organization could see their way clear to retire. Practically the entire organization who started this work two years ago are still held together and will carry the work through the coming year and we hope, to a final conclusion at that time. The grain and milling trade in the Northwest have given me the very best of support at all times and I ask of you a continuance of that support. I assure you that it shall be my aim during the coming year to make the burdens of Government control as light as possible.

Theo. Wold, governor of the 9th District Federal Reserve Bank of Minneapolis, made a most interesting talk on the financing of the grain crops of the Northwest.

Saturday Session.

A. P. Husband, secretary of the Millers' National Federation, made an interesting talk on "Milling our Wheat at Home" from which the following is taken:

Mr. Husband called attention to the fact that the Guaranty Law of March 4, 1919, provides as between wheat and flour to be handled by the Grain Corporation, preference "shall" be given to the exportation of flour, except where the public interest would be, in the judgment of the President, that is to say the Wheat Director, injuriously affected thereby. The use of the word "shall" therefore leaves no option with the Wheat Director in the matter, except in consideration for the public interest. This provision, Mr. Husband considered to be entirely in the best interests of the country at large.

In the first place, the milling capacity of the country is very large and the investment in proportion, there being a daily grinding capacity of over 912,000 bbls. The production last year of flour all told was 116,000,000 bus.; so that the milling capacity of the country is 2⅓ times the flour output in its best year; wherefore unless pressure is brought to bear to increase the export of flour rather than of the grain many mills will necessarily be idle. There is also the consideration due to labor which at a time like this should be employed wherever possible. A third consideration is the reduction in the price of flour that would result, for although the price is more or less fixed by the price of the grain still a keen competition can be relied upon to force reductions in the cost to be reflected to the domestic consumer in the price of flour.

Further points in favor of the program named is the increase in the volume of available feeds and the reduction of their price. The value of mill feeds to the dairy and stock feeding industries is not to be disputed; but as the price of mill feed is regulated entirely by the supply and demand, the increased activity of the flour mills would of course be reflected in increased production of mill feeds and a corresponding decrease in the price. Under all normal conditions there has always been maintained a price relationship between mill feeds and other feeding stuffs and the increased production of mill feeds would therefore have a tendency to reduce the cost to the farmer of all other feeding stuffs. The influence of this condition of course is obvious upon the production of dairy products and of their price.

The program also involves the retention of the soil values through the use of the mill feeds, which in turn would have its reflection on the prices of manufactured fertilizers which in part the soil values of the mill feeds would offset. Mr. Husband called attention also to the economy of this program in the saving of railroad and ocean tonnage.

Approaching the question of handling the crop, Mr. Husband said it would appear as if the milling program would be an important factor in the solution of this problem. The crop to be expected this year is approximately 1,100,000,000 bus., as the minimum, of which Mr. Barnes anticipates a call upon America of 410,000,000 to 460,000,000 bus., the largest previous export movement from this country having been 332,000,000 bus. from the crop of 1914. Should this demand materialize, it will require careful supervision of all markets and means of transportation to put the quantities through our ports without congestion. Storage facilities of the country for all grain are approximately 570,000,000 bus. At least this amount, Mr. Barnes anticipates, can be stored in the country without interfering with normal flow. As at least 170,000,000 to 180,000,000 bus. represents the normal flow of other grains, it is probable that not exceeding 400,000,000 bus. of wheat can be stored at any one time in the United States; wherefor the obvious desirability of running as much of the wheat through the mills as possible in order to avoid congestion of the storage facilities.

Mr. Husband concluded as follows: "We have reason to believe there has been no change in the attitude of the farmers and dairymen as to the necessity of abundant supplies of mill feeds at low prices; yet, at the Trade Conference, at New York on June 11, a statement was made by a representative of a farmer's publication that the farmers were backing a movement to have the Government erect additional grain elevators at seaboard, thus facilitating the movement, for export, of wheat, carrying with it the feed which they so much desire. We submit they might better devote their energies toward creating a sentiment in favor of the Government insisting upon the railroads and steamship lines providing adequate storage facilities and modern equipment for handling flour for export, and thus help to retain in this country the mill feed that would result from increased activity of the flour mills.

"As you are probably aware, there is but one purchasing agency for export flour, and hundreds of millers have been competing for the business offered. A number of leading millers from several sections of the country are now contemplating the organization of a corporation for the sole purpose of exporting flour. This organization will be effected under the provisions of the Webb Act, which was passed by Congress to encourage the exportation of American manufactured products. It is confidently expected that the new organization will be of great benefit to the milling industry of the country and will be able to successfully meet the peculiar condition under which the export flour business of the country is to be handled during this crop year.

"Since the passage by Congress of the Act of March 4, 1919, giving preference to flour over wheat in export, we have been trying in every way to create a sentiment favorable to the exportation of flour, by soliciting the interest of Government officials, including railroad and Shipping Administrations, as well as farmers' organizations, in an effort to have the wishes of Congress carried out. We feel that American farmers and grain men should second our efforts; the farmers, particularly, should be interested in bringing this about; and it is hoped that your organization will see the justice of our position and assist in whatever way seems best to you, in accomplishing this end."

CAR DISTRIBUTION.

O. P. B. Jacobson of the Minnesota Railroad and Warehouse Commission, spoke to the dealers on "Car Distribution, Car Shortage and Grain Facilities." He spoke in part as follows:

In order to handle the crops this year, the railroads will have on hand not only a supply of cars but a fair distribution of them and a quick release to avoid congestion. There has been a law passed which requires cars to be divided equally at each station until each shipper gets one car, then the balance in proportion to the amount of grain handled. It will be hard to get shippers to handle or export grain. The transportation system of the country is in bad shape. It would facilitate matters if the railroads, whenever they received a full freight car from one road, would return to this road an empty or full car to take its place so as to have an equal pro rating of cars. This was opposed but we hope when the railroads are returned to their owners that some arrangements will be made regarding car distribution for the benefit of the shipper. While we believe the cars should be distributed on present requirements for we know crops vary in size, however, every locality should be treated alike. A car shortage and congestion is due to lack of storage facilities at the seaboards, but if we had proper grain

DEALERS AT THE TRI-STATE GRAIN CONVENTION, MINNEAPOLIS.

storage facilities at the seaports, it would solve the problem. On the Atlantic Coast we only have about 10,000,000 bushels of actual storage while we should have 100,000,000. However, proper bills will be introduced in the legislature to have proper facilities for handling grain at the seaboard and the bill will be backed by the Minnesota delegation in Congress. If you ever fail to get cars when you need them, ask us and we will take care of your interests. We are your servant and here to do our duty.

ON INSURANCE.

B. P. St. John of Worthington, Minn., in speaking on "Should the Association Have an Insurance Company?" stated: You dealers are entitled to the lowest rate of insurance that can be obtained. The greatest risk in insurance is the moral hazard. The members of this association are good citizens and grain men and entitled to the best rate of insurance possible. We think the grain men as a class should carry their own insurance. The stock companies cost 50 per cent to operate, 20 per cent is for commissions, heavy salaries, rents and some profits to the stockholders. The balance is to pay the losses. A number of country grain men some years ago formed a mutual company and we assessed ourselves on board rates. The first year we had no loss and only 5 per cent went for expenses. Up to this time we have received back in cash or premiums 52 per cent of the board rates. Our losses have been 32 per cent, our expenses 8 or 10 per cent. We have a surplus of $20,000 to draw on in case we get losses in excess of our average.

Should the Tri-State Grain Dealers' Association have a mutual company? The Western Grain Dealers' Association have one and every member should be privileged to share in the saving effected. You should have a good selection of risks and if your association should think best to organize an insurance association, we would not oppose you but would like to have you take out your policies with us. We confine our policies strictly in country elevators and as treasurer of the organization I invite you to come to us for your insurance. We insure farmers' elevators where they do business on a profit sharing basis and are recommended by our members.

ON CLAIMS.

R. E. Jones of Wabasha, Minn., read an interesting paper on "Our Experience Collecting Freight Claims." He said in part as follows:

All the Claim Departments are divided into two general classes—"Overcharge in Rates and Weights" and "Loss and Damage." with about twice as many loss and damage claims on hand unpaid as rate and weight claims. The "Overcharge Rate and Weight Claims" are usually simple and easily adjusted; and we pass along to the "Loss and Damage Claims," which are more complex and difficult to settle.

At present the rules governing claims are prescribed by the Government Railway Administration, which contain many modifications from the pre-war customs and rules, and many or most of which are not satisfactory. A better railway administration is generally called for. The shipper also finds that all railways are not alike in interpreting and applying the present rules. Claims based on the hammer test and on leaky side doors and spilling over side doors are now not favored by the Government Administration. One railway claim department will turn down all such claims absolutely, another will observe the spirit of the rule better and go into the actual merits of the claim. One day a string of cars came down our sidetrack on a "Y." A block and a half away a car was noticed leaking grain in a small, continuous stream. The car was spotted at our elevator; it was found not leaking, nor had it apparently leaked for several car lengths away from the elevator. Our foreman applied the hammer and found the leak, and the barley ran again but stopped when the hammer stopped. Cars will leak when moving and stop leaking when at rest.

Leaky doors of any character are now considered by some railways as "faulty coopering" and the claim "respectfully declined," whereas, for years, where lumber is furnished, the lumber is largely culls with more or less rot, and hard woods that warp easily, and the shipper is about in the same predicament in making side doors as the ancient Israelite when he was compelled to make bricks without straw.

Now as to grain spilling over the side doors, which the present Administration rules as "faulty cooperage": If you will take a small car shaped box and partially fill it with grain and strike it hard on the bottom at the end you will find the grain is thrown and heaped up and over the edge at the middle. Strike it again and the grain levels down. Strike it again—up it heaps and over the edge at the middle. Try this with a cigar box. This illustrates what a car of grain will do when improperly handled by violent bumps. The grain on the surface is thrown together like two clashing waves and over the top it goes, unless the side doors are built to the roof. If there were a hole in the roof, the grain with some of these bumps or collisions would be thrown thru the roof. It is quite difficult for the shipper to cooper his car to meet or stand up under other than the proper handling of that car.

The federal control of the railways appears in too many instances (of which the ones mentioned are only types) to lose sight of the other fellow—lose consideration of the shipper. The rule too often violates the common law merits of the case. The carrier is judge and jury in its own controversy—"too damn much two-sided," as was expressed by an old German friend.

A probable correction to this whole matter lies in the Cummins Bill, S-5284, which will be before the next session of Congress and which seeks to restore to the Commerce Commission and to the courts power over all the activities of the railroads. It is believed that more justice and fairness and better service will be imparted to the patrons of the railways by the Commerce Commission than by the present Administration.

One of the worst complaints among grain men is the aggravating delay in the investigation and settlement of claims. J. H. Howard, manager of claims and property protection section, states in the "Traffic World" of June 14th, 1919, that "there should be few unsettled claims of a greater age than four months," and that "freight claim agents will immediately take inventory of all such (unpaid) claims with a view to giving them special attention and take like action on the first of each month thereafter." I am extremely sorry to be compelled to say that these directions are studiously observed more in the breach than in the observance. Claims get pigeon-holed and pegged and then are extremely difficult to get resurrected. With one railway we now have practically all of our 1918 "loss and damage" grain claims unsettled. No reply to us was given to these at all, until a call was made at the main office in Chicago in May. Later we received letter that a representative would soon call at Wabash to adjust all these claims. He hasn't called yet. We have another bunch of "loss and damage" grain claims beginning in October, 1917, with all of 1918 and up to April, 1919, amounting to about $2,000. No reply whatever to these until May, 1919, when the Claim Department sent up a representative and made a satisfactory settlement, which figured about 85% of the original amount (we have a number of "measurement" claims) but without interest. This settlement was made in May, no payments, however, received as yet. These claims began in 1917 and the bunch consists of all the claims of this class we made in this period. And yet Mr. Howard states that "there should be few unsettled claims of a greater age than four months."

We have one "loss and damage" cabbage claim dated March 28th, 1918, amount, $245.80, which lay dead until a call was made at the freight claim department in Chicago the first part of last May. It was then settled in full, but without interest, payment, however, not yet received. Another cabbage claim, December 9th, 1918, $272.34, lay dormant until about six weeks ago, when an offer of settlement was made at $196.69, which we accepted. Payment not arrived

If the Cummins Bill aforementioned has promise of better service to the public, as I believe it has, then the grain shipper should get busy on the support of this bill.

Questions may be asked if attention has not been asked by mail to these inattentions. We can reply with one instance. On May 29th we wrote for attention to above mentioned claim, $245.80, of March 1918; no reply. On June 3rd we wrote again; no reply. On June 9th we wrote again; no reply. On June 16th we wrote again—a mild letter; no reply. Really one can keep in good temper a long time with the claim department, for when a personal call is made and altho every desk is found extremely busy yet every courtesy is extended and immediate attention is given to matters in hand, and one is piloted through with despatch, with frequent satisfactory accomplishments. But personal trips to Chicago are expensive in money and time. They should not be necessary. The Claim Department is one activity of the railway which can profit by improvement. It is assumed of course that these experiences are largely the experiences of grain shippers generally, or at least to an extent that warrants the recital of this list of complaints.

It should be said, however, that measurement bulk grain claims cannot safely be adjusted until a cut-off is obtained, during the season or at the close of the season. While it is true that a single separate cubic foot of grain that costs even weight with bushel weight will weigh practically four-fifths of a bushel of that grain, yet this rule will not correctly apply to a car load of grain, because of what is called "density." Grain packs more in a car load than in a bushel measure. So that the tonnage is greater per cubic foot in a car load of grain than same grain in a standard bushel measure. The rule of "one-fifth off" will not correctly apply because of this fact of "density." A little book entitled "Miller's Scales" gives tables for weights of car load measurements of the different grains and of the varied tests wherein this item of "density" is fairly correctly covered. Extreme care should be taken, however, in obtaining measurements so that they are practically absolutely correct.

The Government Administration prescribes on coal claims a deduction of 2% on bituminous coal and 1% (we believe) on hard coal. Whether this be correct or not we are not prepared to say. But when the Government Administration arrives at "2% off" on bituminous by assigning 1% to moisture loss and 1% to variation in scales it is wrong, as to scale variation. Two standard scales, working freely, in proper condition and in balance, will not practically vary any more than two yard sticks. A car of coal, were all its conditions equal, should and would read practically same scale weight in the center of Minnesota as in the center of Illinois.

We must not close without sadly confessing that many claims, to speak it mildly, without merit, are presented and pressed for settlement. The shipper sometimes has a flaw in his honesty. This naturally has led the Department to approach claims that are at all complex with an attitude of suspicion and unfairness, irrespective of apparent merit.

Bad record cars with "measurement claims" particularly are discriminated against. No disposition to settle at better than 10% to 25% of claim irrespective of how well the claim may be verified by the "cut-off." Claims having Chamber of Commerce bad record reports have been turned down because no bad record could be found on railway reports. Because one did not notice a leak which another did is not good ground to turn down a claim.

Personally, the freight claim agent is a keen, intelligent, courteous gentleman. The Freight Claim Department, however, in the game of efficiency and service to all concerned among the many other activities of the country, may make 1st, 2nd or 3rd base frequently, but its record on the score is not, nor ever has been, conspicuously high.

ON INSPECTION FEES.

Mr. Jacobson was called on to explain why they now charge more for inspection fees than they used to. He said that when the Federal grades were passed they required more inspection. An inspector under the old system could inspect 50 cars while under the Federal grades only about 15, so expenses went up and fees had to go up and that it was found necessary to raise the fee to a dollar, but that it might be lowered to 50c with a big crop this year.

Chas. Quinn, secretary of the Grain

DEALERS AT THE TRI-STATE GRAIN CONVENTION, MINNEAPOLIS.

Dealers' National Association, was in attendance and when called upon to address the dealers told of the work and the activities of the National organization.

Sec'y J. H. Adams in making his report told of the activities and growth of the organization during the past year, of the work being accomplished and outlined the work for the future.

The resolution committee presented the following resolutions which were adopted:

RESOLUTIONS.

Whereas, Congress has recognized the sound national economic policy of giving preference to flour over wheat in export trade, and in the Wheat Guaranty Law of March 4, 1919, has specifically directed that the policy shall be adopted, except when, in the opinion of the president, the public interest would be injuriously affected thereby; and

Whereas, The advantages to this country by the milling of additional wheat for export are apparent, as such a policy would not only increase the activity of American flour mills, but would increase the amount of mill feed produced, resulting in lower prices of dairy products; and

Whereas, The storage facilities and flour handling equipment at ports of export are obsolete and inadequate for the conduct of modern business; therefore, be it

Resolved, That this convention of Tri-State Country Grain Shippers' Association give its unqualified endorsement to the policy of exportation of flour rather than wheat and urgently request government officials in control of the matter to do everything in their power to further the exportation of flour, and that immediate steps be taken to improve the flour storage facilities at seaboard and equip same with modern flour handling and loading devices; and be it further

Resolved, That copies of this preamble and resolution be sent at once to the wheat director, director general of railroads, chairman of the shipping board, members of the cabinet, and to senators and members of the house of representatives from Minnesota, North Dakota and South Dakota, as reflecting the views on this important matter, of the country grain shippers of the states named, as represented in the Tri-State Country Grain Shippers' Association.

The Return of the Railroads.

This association favors the return of the railroads to their owners as soon as adequate legislation properly safeguarding and protecting the rights of the people during the period of reconstruction and for the future can be enacted by congress.

We further favor the restoration to the state regulatory bodies of all authority, powers and functions enjoyed by them under state and federal laws prior to the period of government control, except insofar as this may be inconsistent with the general plan of reorganization which may be adopted. We further favor the enactment of legislation to specifically define the powers, authority and functions of the commerce commission and the state regulatory bodies.

County Agents.

Whereas, It has come to the attention of the members of the Tri-State Country Grain Shippers' Association that there seems to be a disposition on the part of the Department of Agriculture to assume an attitude which is apparently being carried down through its different departments, in regular order, even down to the county agent of different counties of our states, whereby these county agents have deemed it a part of their duties to assume the function of middlemen and tradesmen, much to the detriment of such members of these communities as are engaged in different lines of trade distribution and commerce.

We, as an organization, wish to protest against this tendency to use the county agent as a destroyer of organized and legitimate business.

We grain dealers hold that we all pay taxes and lend encouragement to all the county agents' proper activities toward all matters that tend to stimulate the production and the welfare and harmony in these rural communities. The county agent is a public servant and no government should tax the whole community to carry on activities that are to the detriment of grain men, livestock dealers, or any other particular class of legitimate, necessary and recognized trade or business of such community. The war has demonstrated the fallacy of state or government ownership or control of business. It is only necessary to point to the present railroad deficit under Government management of $1,200,000,000, brought about inside of two years. Even in the face of an advance of 25 to 75 per cent in freight rates. And the railroads of the United States today, in practically a wrecked condition, as to equipment, condition of trackage and disorganized labor. Not much better can be said as to the telephone control. These items alone should convince any people that the United States is not yet ready for state proprietorship and state socialism. The war has demonstrated that the country business man has been and is a vital factor when the real test comes, producing and conveying to his government the support of his community en bloc in time of great stress. The members of this Tri-State Country Grain Shippers' Association point with pride to their record in war activities. Their sons were in at the death

We as an organization and as individuals are and have been warm supporters of the county agent idea, with its functions properly applied to the betterment of agriculture, as it should be, and not as a community disturber or destroyer of legitimate business.

We invite the support of other trade organizations, both national and state, to assist in impressing on the authorities at Washington the purport of these resolutions, and we instruct our secretary to convey copies of this protest to similar trade associations and to the National Grain Dealers' Association for such further action as their judgment may find proper.

Election of Officers.

The election of officers and directors resulted as follows:

President, A. E. Anderson, Cottonwood, Minn.; first vice president, W. M. Jones, Grand Forks, North Dakota; second vice president, Otto M. Nelson, Hills, Minn.; third vice president, E. Blankenberg, Henry, North Dakota; treasurer, H. R. Wallin, Marshall, Minn.; secretary, J. H. Adams, Minneapolis, Minn.; board of directors, three years, B. P. St. John, Worthington, Minn.; R. E. Jones, Wabasha, Minn.; A. H. Betts, Mitchell, S. D.; J. A. Richart, Sisseton, S. D.; two years, Nils R. Tackland, Dayton, N. D.; A. E. Anderson, Wabasha, Minn.; T. F. Dahl, Minneota, Minn.; J. F. Connor, Nortonville, N. D.; one year, August Evert, Kennedy, Minn.; B. D. Bascome, Clark, S. D.; Fred Zieske, Greenwald, Minn.; Sam Folkson, Milton, N. D.

The Banquet.

The Minneapolis Grain Commission Merchants Association gave a very nice banquet at Donaldson's Tea Room to about 300 guests on Friday evening. Many interesting talks were given and a most enjoyable evening was spent.

Convention Notes.

The sessions were held in the Armory and the machinery exhibit in the Annex. There were a large number of exhibitors, among them the Strong-Scott Mfg. Co. showing a drier, man-lift, feed mill, etc.: Northrup, King & Co. had an exhibit of seeds as did also the Albert Dickinson Co. and Minneapolis Seed Co. Grain cleaning machines were exhibited by the Huntley Mfg. Co., Twin City Separator Co., Fosston-Carpenter Co., J. L. Owens Co. and Richardson Grain Separator Co. Other exhibitors were the G. F. Olson Printing Co., Northwestern Feed Co., Toledo Scale Co., Minneapolis Paper Co., U. S. Dept. of Agriculture, Wells Sales Co., W. S. Nott Co., C. A. Courtney, showing the Kennedy car liner: L. Beuge showing the Hedstrom automatic truck dump; T. E. Ibberson, R. R. Howell & Co., feed mills and elevator supplies; International Sugar Feed Co., Russell Miller Milling Co., The Cuthbert Co., General Service & Supply Co., Kewanee Implement Co., Guarantee Typewriter Co., Inc., Lake Crystal Mfg Co., Telsall Bookkeeping System, Cargill Commission Co., The Trapp Automatic Dump, the Automatic Combination Truck Dump with working model, Fairbanks, Morse & Co., the Columbian Feed Governor Co., American Agricultural Chemical Co., Electrical Machinery Sales Co., besides which were various trade publications and coal companies with their booths.

Milwaukee Was There—The Milwaukee Chamber of Commerce surely has some booster committee, 30 members of which came in a private car en masse to the convention and made their headquarters in the lobby of the West Hotel. They distributed canes with pennants which were eagerly sought by the shippers who were fortunate enough to be able to secure one before the supply was exhausted. Each booster was recognized by a large celluloid button heralding the fact that he was from Milwaukee and a booster for his market. The committee represented the Milwaukee commission men and all elevator interests.

Sec'y Adams deserves great credit for his untiring work in securing such an excellent exhibit of machines and supplies and bookkeeping systems, together under one roof for the benefit of the country elevator men.

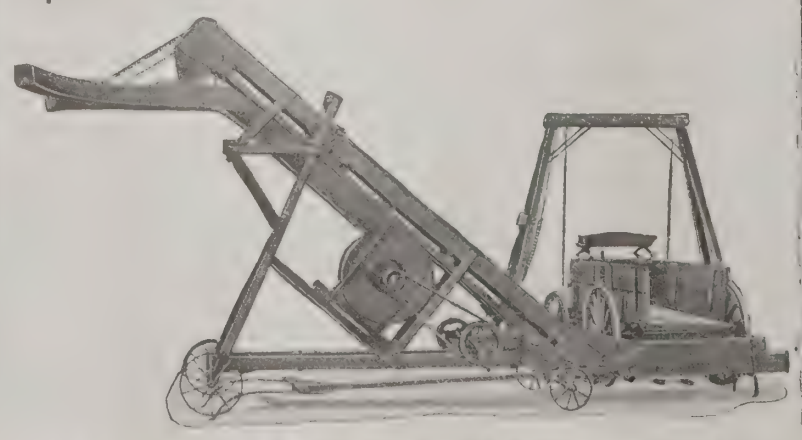
GULF PRICE OF WHEAT.

The price of wheat guaranteed by the Government has been increased to $2.30 a bushel at Galveston and New Orleans, it was announced on June 27 by Julius H. Barnes, United States Wheat Director. The advance in price was effected by the signing of an executive order on June 25 by President Wilson in order to stimulate shipments of wheat to the Gulf terminals. It was said that a larger supply of ocean tonnage at these ports than had been anticipated would be available. No other changes in the guaranteed price at the various markets covered by the guarantee proclamation of September 2, 1918, are contemplated and the price at Pacific Coast ports guaranteed at $2 in that proclamation will continue to be made effective on that basis.

For quick returns use our Market Place Department, Page 5, for wants and sale announcements.

Store Grain in Safety

Preston Lansing Tile Grain Bins



YOU can't burn vitrified clay. That's the big advantage in Preston-Lansing Tile Grain Bins. They are indestructible. Fireproof, rat-proof, moisture-proof; first cost only cost.

"Ship-lap" joined blocks and twisted steel reinforcing provide for walls of enormous strength. Here's an investment that means permanence and satisfactory service—as well as safety of grain. Write for special folder. Ask about our engineering service.

The block used in Preston-Lansing Grain Bins. Note the deep grooves in top and bottom for extra thick layer of cement.

J. M. PRESTON CO.
Dept. 330 Lansing, Mich.
Factories in Uhrichsville, Ohio; Brazil, Ind.; and Ft. Dodge, Iowa

$60.00 A CAR PROFIT

Load EAR CORN and Loose Grain into Railroad Cars Without ANY Scooping in Car or Wagon. Stationary and Portable Types.

The Portable type shown in the illustration and the Stationary types for installation in elevators are fully shown in our booklet "$60.00 A CAR PROFIT," which will be mailed free upon request. Any of these outfits will load every car to full capacity without scooping in a dirty, dusty car. They handle EAR corn as well as loose grain of all kinds. They CANNOT injure the grain as grain does not pass through fan. If your elevator should burn down you can use a portable outfit and keep your business until your new elevator is built. Capacity 1,000 to 1,200 bushels an hour. Portable outfits can be used to fill corn cribs and granaries. Different from any machine you have ever seen. Furnished complete with power if desired.

30 DAYS' FREE TRIAL

Write for the booklet and our trial proposition today
A post card will do it. It may pay you.

MAROA MANUFACTURING COMPANY, PC Dept., MAROA, ILL.

MAY EXPORTS.

The following statement of exports of domestic breadstuffs, cottonseed oil, meat and dairy products from the United States was completed by the Bureau of Foreign and Domestic Commerce, Department of Commerce, June 24 (000 omitted):

	May,		Eleven months ended May,	
Groups.	1919.	1918.	1919.	1918.
Brdstuffs	$96,998	$60,240	$836,438	$578,767

Min. oil, gals.	2,285,286,018	2,452,766,942	2,483,591,093

REDUCTION IN DEMURRAGE CHARGES.

The Transportation Department of the Chicago Board of Trade is advised that the director of the Division of Traffic of the Railroad Administration has approved a reduction in demurrage charges, to become effective July 20, 1919, on the following basis: After the expiration of free time—$2 per car for each of the first 4 days; $5 per car for the fifth and each day thereafter. The average agreement will apply on inbound loads separately and on outbound loads separately, but no credits *will be* allowed to be transposed from one operation to the other, each being treated entirely independent of the other. The number of credits recoverable under the average agreement will be four and the method of computing the debits and credits and of making allowances for holidays will be the same as in effect now.

GOODMAN'S REPORT.

Winter wheat condition July 1 91.4, vs. 98.9 last month and Government 94.4, indicating a crop of 863,178,000, and comparing with Government estimate last month of 893,000,000. Reports on yields are running above condition and indicating crop around 900,000,000. Harvesting generally was under adverse conditions and threshing slow. Yields show wide variation and there will be a great deal of wheat under contract grades.

Spring wheat condition 85.9 vs. 94.4 last month and Government 91.2, indicating crop of 337,000,000 bushels. Rapid deterioration is reported in the Rocky Mountain states. North Dakota complains of grasshoppers doing wide damage.

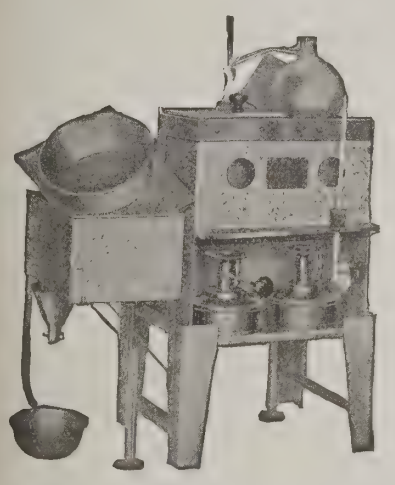
Canadian crop of three provinces 78.9 vs. 95.8 last month.

Oats condition 87.5 vs. 91.5 last month and Government condition of 94.9. Indicates crop of 1,415,000,000 vs. Government estimates of 1,446,000,000 last month. General complaint in important states of grain not filling well.

Corn acreage 95.6 per cent of last year's revision or a total of 102,796,000, vs. 107,494,000 as finally determined by the Government last year. Condition 82.5 vs. 87.1 last year and five-year average of 83.4. Acreage and condition indicates crop of 2,688,115,000 vs. 2,987,000,000 on last year's revision at this time. Conditions favorable except in the Cotton States east of Texas.—*P. S. Goodman.*

SNOW'S REPORT.

The Snow-Bartlett Frazier report for July 1 makes acreage of corn 100,930,000 acres upon the basis of the Government estimate of 107,494,000 harvested last year, a decrease in area of 6,500,000 acres. The condition is reported at 85.2 against a 10-year average of about 84. This makes a crop indication of about 2,735,000,000 bus., against 2,583,000,000 harvested last year.



Condition of oats 89.5 against 93.4 last month. The decline is uniform in the principal states. Such a decline during June is usual, amounting this year to 3.9 points and last year to 5.4 points. The par value of condition increases sufficiently this month to offset the loss in condition, so that the indicated crop at this date is 1,460,000 bus., or the same as forecasted a month ago.

Winter wheat shows a decline of 5.7 points standing at 90.4 when harvested. The crop indication is for a total of 880,000,000 bus.

Spring wheat condition 87.9 against 95.5 last month, the loss centering largely in Montana and North Dakota. The indicated crop is 340,000,000 bus. Apprehension of black rust is very general, as weather conditions have favored its development, but I have no data that warrants a definite statement of its serious presence at this time.

Washington reports that Chicago and other packers have offered to repurchase 143,000,000 lb. of army surplus meats at a price of 25 to 50 per cent of that at which they sold the meat to the Government. These bids, however, were rejected.

Wet Wheat Mr. Grain Dealer may mean big losses if you have not provided for Moisture Testing.

Seven years of ever increasing confidence in

SEEDBURO (Trade Mark) QUALITY

Official Brown Duvel Moisture Testers and other grain grading equipment has made the Seed Trade Reporting Bureau the best known manufacturer of correct grain grading equipment. Every article made of the very best material, strictly in accordance with specifications and rules laid down by the Government.

When you see the SEEDBURO (Trade Mark) label on grain grading equipment you *know* it's the Standard, correctly made—you know it's *right*. The old story of "just as good" has been the cause of many enormous losses. There is no "just as good" as SEEDBURO equipment, manufactured by the Seed Trade Reporting Bureau.

The SEEDBURO (Trade Mark) Official Brown Duvel Moisture Tester (for whole or ground grains) is the only standard tester approved by the Government. It is being used by Government supervision offices, Grain Inspection Departments, Mills and Elevators from coast to coast. Made in sizes of 1-2-4-6 tests at a time, heated by alcohol, gas or electricity.

Look Sharp!—Be sure it is "SEEDBURO"

Dockage Sieves for Wheat and Oats Government Specifications

Made throughout of aluminum, 13 inches in diameter telescoping, only two pieces of metal are used, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight, and will not rust. Set consists of

Scalper Sieve, round perforations, 12/64 inch.
Buckwheat Sieve, triangle perforations, 8/64 inch.
Fine Seed Sieve, round perforations, 1/12 inch.
Chess Sieve, slot perforations, 4½/64x½ inch.
Solid Bottom Pan.
Price $8.00 for complete set.

Special "Four-in-One" Scale No. 14

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weighs for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made satisfying these many needs.

Effectively used in connection with grain sieves described herewith.

Quick breaking and guaranteed accurate. Will do the work of four ordinary scales designed especially to satisfy any one of the above needs and at the small price of one. Used by thousands of country shippers, receivers and grain men everywhere.

Price with weight per bu. cup, $23.00.

Crop Reports

Compiled by GEO. A. WELLS

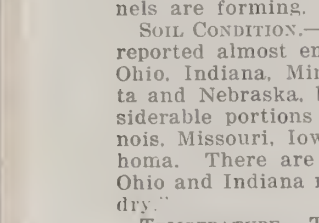
Crop conditions continue favorable and there are no serious critical conditions of importance. The weather has been favorable for corn and although the season has been wet and late to some extent, the corn fields, except bottom lands, are being cultivated and the seasonable growth condition is nearly normal. The winter wheat is approaching harvest with heavy straw and there will be some depreciation on account of lodging. The oats do not appear to be as uniform and vigorous in growth as the winter wheat, and we are approaching the critical time in the growth of that crop; however, having had so much rain, it is reasonable to expect that we will have dry weather while the oat crop is maturing and escape the disastrous results that come from rain and heat when the oat kernels are forming.

SOIL CONDITION.—The soil condition is reported almost entirely "favorable" in Ohio, Indiana, Minnesota, North Dakota and Nebraska, but "too wet" in considerable portions of the states of Illinois, Missouri, Iowa, Kansas and Oklahoma. There are a few localities in Ohio and Indiana now reporting as "too dry."

TEMPERATURE.—The temperature is reported as "favorable" with few exceptions in practically all of the surplus grain states.

THRESHING OF WINTER WHEAT.—The threshing of winter wheat as reported will begin in Oklahoma, Kansas, Missouri and Illinois about July 1 and in Nebraska, Iowa, Indiana and Ohio, July 10 to 15.

WINTER WHEAT.—The growth condition of winter wheat continues exceedingly "favorable," the flat average of reports received this week being only about two points below the flat average of two weeks ago. The growth condition of winter wheat according to the average reports of our correspondents from each of the surplus states this week is as follows: Ohio, 104; Indiana, 97; Illinois, 97; Missouri, 86; Nebraska, 105; Kansas, 99, and Oklahoma, 93.



SPRING WHEAT.—The growth condition of spring wheat is now reported in Minnesota at 93 as compared with 95 two weeks ago and North Dakota 96 as compared with 93 two weeks ago. Reports for South Dakota are missing.

OATS.—The flat average of the growth condition of oats as now reported is two points less than reported two weeks ago and the reports just received from correspondents as to growth condition are as follows: Ohio, 87; Indiana, 90; Illinois, 83; Missouri, 87; Iowa, 92; Minnesota, 95; North Dakota, 96; South Dakota, missing; Nebraska, 98; Kansas, 98, and Oklahoma, 96.

CORN.—The flat average of the reports received this week on the growth condition of corn is three points better than reported two weeks ago, indicating an improvement in the growth condition of this crop which is quite apparent as the fields have been cultivated and the weather turned warm, affecting rapid growth. The growth condition as now reported by each state is as follows: Ohio, 88; Indiana, 96; Illinois, 88; Missouri, 68; Iowa, 90; Nebraska, 85; Kansas, 82, and Oklahoma, 87.

LOCATION KEY.

Explanation.—In order to give the reader an intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

ACREAGE OF CORN.—As stated in our report two weeks ago, there appears to be a material reduction in the acreage of corn as compared with last year, and while our reports on the comparative acreage for each of the states with last week varies slightly the flat average of the reports received this week is practically the same as two weeks ago.

Basing the acreage of corn planted last year at 100, the percentage comparison of the acreage planted this spring as reported by the correspondents this week is as follows: Ohio, 95; Indiana, 95; Illinois, 90; Missouri, 71; Iowa, 91; Nebraska, 88; Kansas, 71; Oklahoma, 85.

General Reports.

The following general reports as to crop prospects and particularly in regard to unfavorable or critical conditions affecting wheat, oats and corn are as follows:

OHIO.

Upper Sandusky (4): Wheat never better; oats full average. Corn in fine condition now, but it needs rain now.

Sidney (2): Prospect for all crops are well up to an average. Of course, there are local spots, as is usually the case, that do not measure up, but on the whole we are satisfied with crop outlook.

Xenia (3): Wheat badly down and with the excessive rains, this part of crop is total loss.

Eaton (2): Prospects good for corn; oats fair; wheat good.

Camden (2): Some wheat lodged. Oats large, but will be spotted as to quality. Corn making a remarkable growth. Temperature too high for oats, which will be a short crop.

Bryan (1): Oats are very short and heading acreage short. Corn making rapid strides in growing and believe if present weather conditions continue for two weeks corn will have obtained a normal growth.

Portsmouth (6): Cutting wheat now. Threshing in about ten days, as raining now. Rain for two days and nights steady and still raining.

Middletown (3): Some wheat in lowland down; with favorable weather there will be a very large crop of wheat harvested. Corn has made wonderful growth in last two weeks.

Lima (1): In sections where there was enough rain all crops are excellent. Many corn fields are in very bad condition for want of rain.

Greenville (2): Owing to recent rains and wind, considerable wheat lodged. There is some fly in wheat here, but not very serious.

Rockford (1): Wheat will be ready to cut next week. Oats just heading. Corn has been well plowed; has made excellent growth.

Bucyrus (4): Just now, June 25, the prospects are quite good for maturing wheat, oats and corn, but in this locality wheat, oats and corn suffered very materially by being hit with two very severe hail storms.

Agosta (5): Corn about two weeks late. Wheat lodged account recent storms, but don't think will affect yield unless turns wet.

INDIANA.

Frankfort (2): Wheat, corn and oats crops prospects fine.

Tipton (5): Weather conditions extra good, hot and just about enough moisture.

Monticello (1): The general outlook for all crops are as favorable as ever known in this locality except oats, which are yellow and short. But good rains are now falling, which we trust will improve conditions.

Rushville (8): Weather just right and crops never looked better.

Princeton (3): Extreme hot weather and heavy rains in localities have reduced wheat prospects to 50 or 60% and brought corn forward in excellent condition to 100%.

Kentland (1): Very favorable except oats are a little short.

Wabash (4): Corn making good growth, but about 10 days late. Oats doing well. Wheat, some complaint as to appearance of smut ny and red rust. Can't tell at this time whether real damage lasts.

South Whitley (7): Weather has been too hot for wheat, but about right for corn. Oats are heading, some are short. Corn is small but is doing fine.

Winchester (8): Army worm doing some damage, mostly to rye. Corn good stand, very uneven and short. Oats fair, clover and hay very weedy. Hay crop not over 60% average crop. Hog crop large. Farm labor scarce.

Angola (7): No unfavorable reports or conditions. Some corn and oats were planted late, but with plenty of rain and hot weather all crops promise excellent results. Corn generally clean and perfect stand.

Waveland (2): It has been a little dry and hot until this A. M. We are having a nice gentle rain. Timothy hay crop short, clover a little short and weedy.

Lawrenceburg (9): Wheat ready to cut and down badly and weather a little damp. Corn growing nicely but two weeks late.

ILLINOIS.

Belleville (3): Getting lots of rain and hot weather, so we got lots of shrivel grain. Wheat 50% cut so far. Some oats lodging. Some corn down and very weedy. Too wet in corn land. Raining again now.

Decatur (5): Wheat and corn good. All complain oats condition. Bidding $1.75 to farmer for old corn, not much back but held for $2.00. Heavy rain all Sunday, 22d, night.

Highland (6): Been getting rain almost daily. About three-fourths of wheat cut, but prospects not favorable for dry threshing.

Ashland (5): Wheat about ready to cut and ground too wet. Prospects for an unfavorable cutting season.

Odell (7): Some places little too dry. Oats have not done well for two weeks. No wheat cut. Will not be threshed before August 1.

Sidell (8): Weather past two weeks has been too hot for wheat and oats but has turned much cooler with rains in past two days. Corn making excellent growth and fields well cultivated.

Princeton (4): Oats are very short but are improving some. Looks like a short crop in this locality. Corn growing rapidly but little labor.

Rantoul (5): Crop prospects good. Little wet but all O. K.

Ashton (4): Hot weather the past ten days may have injured spring wheat and oats. Corn has made excellent progress.

Mattoon (8): Winter wheat condition excellent. Spring wheat and oats fair. Corn looks well. No signs of worms or bugs.

Marshall (8): It is decidedly too wet for harvesting wheat. If rains continue much wheat will go to waste in fields; ground too soft to run binders.

Pocahontas (3): Wheat receiving too much rain. Some down and wasted. Oats doing well. Corn delayed both in planting and cultivating owing to wet weather.

Rockport (2): Wheat and corn in fine shape. Still planting corn. The weather has been very hot for oats.

Earlville (4): Some reports of army worm destroying hay, wheat and corn.

Wenona (4): Oats look poor, yellow leaves and too short.

Lostant (4): Wheat, corn and oats are all looking fine here and promise abundant crop if nothing happens from now on.

MISSOURI.

Carrollton (2): We are having too much rain for binders. Fields are soft.

Marionville (3): Threshing of wheat will begin about July 15. Acreage of corn planted 75% of last year. Wheat about all in the shock. Yield not so big as formerly counted on.

Elsberry (8): Wheat lodged very much from recent wind and rains. Corn doing fairly well. Acreage smaller. Oats doing only fairly good.

Charleston (9): Continuous rains very damaging to wheat. Not over 50% prospects for wheat crop indicated ten days ago. Wheat threshed light test and grain. Corn prospects even worse.

Chillicothe (1): Weather too wet for wheat. Some rust and blighted heads.

Bethany (1): Too much rain. Must have clear, hot weather. Corn looking good but late.

Salisbury (4): Our wheat is in bad shape. Blown down. Too wet to cut. Corn growth is retarded and weedy. Oats in good shape.

Sedalia (5): Wheat damaged, too much rain. About 20% of the wheat crop cannot be saved. Too wet to work corn. Oats poor, can't have over half crop and very poor quality.

Columbia (5): Too wet. Wheat being cut but corn will be big yield.

Lamar (3): Too much rain to harvest wheat crop. Some little complaint about rust in oats. Wet weather interfering to get all corn planted as anticipated. Quite a percentage of corn very weedy on account ground being too wet to cultivate.

Clinton (1): Constant and damaging rains has damaged wheat prospect 30% more in past ten days. It has also prevented entire planting of corn and has prevented farmers from properly caring for corn that was planted.

Higginsville (2): Threshing will begin about July 1; with favorable weather most of wheat will be cut this week.

IOWA.

Oakville (9): The temperature is just a little too hot for the wheat and oats but is O. K. for corn. Corn is growing fast.

Osceola (6): Small grain prospects materially reduced the last ten days on account too much moisture. Corn acreage shrinking, 75% good and 25% poor and weedy.

Lowden (8): We do not look forward to a good crop of small grains, the ground is packed solid from excessive rains and grain does not seem to do well. Corn fine color. Have not had rain for some time. It would benefit all.

South English (9): Crops are fine generally. The oats are rather short. Most of the corn will be laid by by the 4th of July.

Guthrie Center (2): Corn is short and weedy but growing fast. Some rust in the wheat and oats.

Jefferson (5): Corn doing fine. Some a little grassy but will be cleaned this week. Prospects very good.

Williamsburg (8): Farmers report much winter wheat blown down by late rain storm. All look for light oat crop and hot weather.

New Sharon (5): Corn will have gained the two weeks late by July 1. Weather ideal for corn but too hot for wheat and oats, both are rank and heavy but extreme heat against proper maturing.

Indianola (6): All wheat damaged some. Wheat on rich ground down badly and on low bottom land hurt by water.

Marcus (1): Small grain suffered badly from hot winds.

Wright (5): Quite a few fields of corn and oats showing effects of wet weather. Some wheat badly lodged. Rather hot for small grain.

Belmond (4): General condition of crops very good. Corn weedy and too wet to get into it to do it much good. Oats on high ground very rank, some pieces lodged a little.

Washington (8): The wheat growth has

CASH PRICES FOR GRAIN.

Following is a statement of the we ekly range in cash prices for grain as mentioned in the leading markets of th e country for the week ending June 28:

CORN—	CHICAGO.	ST. LOUIS,	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.

June Corn Future—June 19, $1.78½@1.81.

been so great that some of it will probably not fill properly.

Henderson (3): Prospects at present are good for wheat, corn and oats. Army worms have caused some damage, not serious.

Spencer (1): Excessive rains. Corn very weedy. Much drowned out in low places. Oats heading out. Very rank, dry weather needed to avoid rust. Very little of 1918 crop left of oats and corn.

Corydon (6): Hot weather with too much moisture has damaged both oats and wheat while they are filling; corn and meadows doing extra fine.

Kirkman (2): We are having bad wet spells here for the last two weeks and corn is getting weedy. Wheat and oats are lodging but this morning it looks as if it was clearing up. Corn is growing fine, having a good race with weeds.

Spencer (1): Good prospects if it quits raining and does not bring hot winds.

Clarinda (4): Will be cutting wheat about July 1.

Keokuk (9): Heads short. Heavy stand and will have our usual yield of wheat, but will probably be rather light test. Army worms bothering some.

Hull (1): Crop prospects are good. Drove over 80 miles of country yesterday and crops are looking fine as corn is bigger than last year and plowing for second time will be done this week.

Hull (1): Crops are looking fine.

Clemons (5): Too much rain and too hot for wheat and oats which are badly down. Corn is growing fast and if farmers can get to plow for ten days will make a big change.

Coburg (3): Condition good. Weather clear and warm. Corn making rapid growth. Wheat ripening fast and filling, too. Oats and spring wheat looking fine. Winter wheat harvest about July 1.

Whitten (4): Crop prospects fine. No wheat in this territory.

Hamlin (2): Army worms are getting bad here.

MINNESOTA.

Lowden (6): The outlook here is fine so far for big crop of grain. Wheat, oats and barley look fine. Corn also looks good. It was weedy but the weather is dry now so by plowing it cleaned out the weeds.

Warren (1): Prospects for all crops very favorable though perhaps growth has been a trifle too rapid due to plentiful moisture and unusually warm weather. However, all crops have a good color.

Pipestone (3): Too wet and hot for small grain. Too wet to cultivate corn.

Hutchinson (6): Too much rain for corn. Lots of fields have not been touched yet with plow. It is too early to say what it will do to small grain.

Albert Lea (6): We have had a great deal of rain but drove 50 miles yesterday (June 23) and found corn a foot high, stand almost perfect and farmers have been able to plow their corn fairly well. Small grain stands heavy and if it lets up raining prospects are for a big crop.

Donnelly (2): We had quite a heavy rain Saturday, another one yesterday with a cyclone to the northwest of us. Did considerable damage.

Henderson (6): Too much rain for all crops. Winter wheat showing plenty of red rust. No doubt but spring wheat and oats will be similarly affected. Corn very weedy, too wet to get proper cultivation.

NORTH DAKOTA.

Carrington (5): Crop conditions now are fine for everything except rye, and it was damaged by drought and heat the first part of June.

Sogswell (9): Have had several very hot days, heavy dew with hot sun in morning. Liable to cause rust but no signs of it yet. Favorable conditions from now on will produce a good crop of everything. Corn is fine.

Langdon (7): Conditions are perfect. We have had fine rains. All crops forging ahead rapidly. Spring wheat will be heading by July 1. We look for an early harvest. Only danger now is rust or blight.

St. Thomas (7): Spring wheat very good at present. Oats, barley and flax 100% compared with last crop. Weather very favorable for all grains. Winter rye is about 60% of a crop. It is very thin.

Great Bend (9): Condition looks fully as good as last year but the rapid growth of the stalk and the firing up to production is the guess.

SOUTH DAKOTA.

Bridgewater (8): Soil too wet. About 30% corn under water or drowned out.

Canton (9): Large acreage of corn destroyed by continued rains and the inability to cultivate. Some oats lodging and being cut for hay.

NEBRASKA.

Neligh (7): The last week was very hot but rains and cooler make conditions good.

Schuyler (7): Plenty of moisture here, but as soil is somewhat sandy not too much moisture. Corn two weeks late.

Harvard (9): Farmers complain of army worm working on the alfalfa and corn.

Fairmont (9): Corn is weedy, needs cultivation. A few days more sunshine will give farmers a chance to put fields in good condition.

Beatrice (9): The stand of corn has been cut down badly by worms. An injury probably of 20%.

Nebraska City (9): Rust and heavy rains when wheat in blossom we think have caused some damage to wheat. Oats and spring wheat very backward. Corn very uneven, some waist high, some only few inches high. Quite a little replanting due to cut worms and rain.

Humphrey (8): Many corn fields had to be replanted. Cut worms doing damage. Rust in wheat and oats.

Orleans (6): All conditions now favorable for largest crop of everything ever grown here.

Roseland (9): Wheat is coming fine now with favorable weather hereafter. Some wheat slow in heading.

Superior (9): Crops promise large yields and grain will be good quality if weather favorable. Corn a little late but weather ideal and is growing fast.

Swanton (9): Some wheat fields have a good many white heads, other fields spots of rank growth which is badly tangled. On the whole, prospects good.

Superior (9): Everything is extra good. Wheat and other small grain ripening fast. Corn about two weeks late but coming fast.

Belden (9): All crop conditions fine at present, only corn unusually weedy on account of not being able to cultivate soon as should have.

KANSAS.

Oberlin (1): Extreme heat is cutting wheat short somewhat.

Logan (4): The weather is quite warm and all grain is ripening very fast. Barley and rye harvest will begin last of this week. Wheat harvest July 4.

Schroyer (7): Ten days or more since any rain. Extremely hot for this time of year. Some local showers around us. Will be a good deal of shriveled wheat.

Waldo (5): Threshing will begin about July 15-20. Twenty-five per cent corn put out. Favorable weather from now should give us a normal yield. Some damage from rain.

Mahaska (4): Extremely hot. Getting dry account ground baked dry and hard with too much rain past month.

Wichita (6): Wheat being cut. Corn a little late but clean.

Madison (9): Harvesting wheat now in full blast. Oats look fine. Corn looking the best. Alfalfa and prairie hay harvest in full blast.

Hillsboro (5): Wet weather has cut crops down from 10 to 30%. On account of being unable to get in the fields there is only about 65% corn planted.

Uniontown (9): Weather has been too wet for harvesting wheat. Harvesting is going on between showers. Some corn is 3 to 4 feet tall. Some are just planting.

Seneca (7): Wind and rain on low ground damaged wheat by blowing it down. Overflow of river has ruined some fields to what extent I cannot determine.

St. John (7): Have not had any rain to speak of for a week. The hot weather is killing the worms and ripening the wheat. Harvest labor plentiful. Wheat cutting has started.

Pleasanton (8): Showers almost every day keep the fields so wet farmers are greatly delayed with harvesting. Wheat and corn fields are very grassy.

Osage City (8): Everything right now is favorable to the largest crop of wheat we have ever had. Oats are splendid and will make a big yield. Corn acreage is very small and it is very late.

Junction City (7): Harvest begins today.

Belleville (4): Wheat growth too rank. Some badly lodged. Cut worms or army worms have worked bad on corn. Fifty per cent of corn was replanted and now is very poor stand.

Neodesha (9): A rain every day followed by a sultry, foggy condition has been very unfavorable for all crops. Wheat fields are dead ripe and too wet to harvest. Corn needs plowing, weeds everywhere.

Minneapolis (4): With chance of considerable acreage to follow wheat on stubble.

Athol (4): The prospect was never better.

Oswego (9): Have had too much rain. Wheat very heavy straw but I fear not filled well. Will not have near the yield estimated a month ago. Look for considerable damaged wheat as but three-fourths of it is cut.

OKLAHOMA.

Enid (4): Weather too wet for wheat harvesting. Wheat falling account too wet and too ripe. Favorable for the growth of corn.

Altus (3): First dry day.

Cordell (2): An unusual amount of moisture has prevented harvesting of wheat and oats. General outlook, however, good, above average. Some destroying insects.

Geary (2): Threshing should begin by July 1. Should wet weather continue threshing will be delayed still further.

Miami (7): Too wet for much cutting of wheat. Oats commencing to ripen. Some wheat and oats down. Corn backward.

Kingfisher (4): Not much corn planted last or this year. Corn has not done much for five or six years.

Marshall (5): Too much rain for cutting wheat and the plant falling down rapidly.

Enid (4): Wheat about half harvested and in bad condition account wet weather.

NORTH DAKOTA.

Blabon (7): We have been having too much rain. Unless it turns dry and cool now we will be in danger of black rust or the wheat in a heavy growth, but as it will not head out for ten days to two weeks it may be dry and cool by that time.

Voss (7): There is talk of black rust, but cannot say, as I had no time to look it up. The weather was good for its spread last week, but it is cooler now.

SOUTH DAKOTA.

Mitchell (8): Too wet to plow corn. All corn very weedy.

Flandreau (8): Wheat vigorous, good color and fair prospect. Oats vigorous, good color, except (yellow) low spots. Straw rank but short. Early oats heading. Fair prospect. Corn, fair stand, healthy vigorous plant, but some fields very weedy owing to excessive rains. Cultivation delayed.

Dell Rapids (8): All crops look fine. Never was a better prospect. Some wheat doesn't look just right.

Clark (7): Wheat growth is too fast, with a sprinkling in low places of some black rust on the spring wheat. Barley seems to be all right.

Hurley (9): Too wet. Too hot. Some corn not plowed the first time. Grain rusting.

KANSAS.

Hoxie (1): Corn backward and late, but doing fairly well.

WESTERN GRAIN DEALERS MUTUAL FIRE INSURANCE COMPANY

HAZARDOUS CONDITIONS

This is the season of the year when country grain shippers usually make repairs on their elevators preparatory for the handling of the next crop, and we urgently suggest attention to the following hazardous conditions, namely:

Windows:—Broken or open. **Doors:**—Out of order; no fastenings; not locked at night. **Siding:**—Openings in, or warped away from wall. **Roof:**—In bad condition. **Foundation:**—Openings in. **Cob Room:**—Not closed, or husks and dirt allowed to accumulate. **Dust Room:**—Accumulation of dust and dirt. **Pulleys:**—Wooden. **Gasoline Engine:**—On wood floor; gasoline leaking; torch ignitor; gravity feed; improper method of starting engine; supply of gasoline too near engine or not properly protected; accumulation of oil and dirt about the engine. **Electric Power:**—Not properly installed or neglect in use of. **Dust and Dirt:**—Accumulation in elevator. **Weeds and Trash:**—Allowed to remain around elevator. **Chimney:**—Defective. **Stove:**—Floor, walls or ceiling not protected. **Oily Rags or Waste:**—Thrown about the premises. **Bearings:**—Not oiled, allowed to become dry and heat. **Wooden Spittoons:**—Cigar stubs thrown in. **Lights:**—If electric, not rightly installed or protected. If lanterns, carelessly used.

The correction or elimination of all such hazards will materially reduce the danger of fire, will reduce the cost of insurance, and avoid serious loss.

F. D. MILLIGAN, Chairman, Executive Committee
GEO. A. WELLS, Secretary
716-720 Hubbell Building, Des Moines, Iowa

KANSAS REPORT.

The State Board of Agricultnre on June 27 issued its June report on crop conditions in Kansas as found Saturday, June 21. It says in part:

This year's Kansas crop of wheat, including both winter and spring wheat, will amount to 229,665,000 bushels.

The production of winter wheat is now placed at 229,217,000 bushels, or an average yield of 19.8 bushels per acre. This is a decrease of nearly one-third of a bushel in the acre-yield reported in May, but a gain in aggregate yield of 11,000,000 bushels because of increased acreage as revealed by the official returns of assessors which have been received by the Board in the past month.

The condition of the state's winter wheat is given as 92.4 per cent, based on 100 as representing a satisfactory situation. In this canvass special attention was given to damage from wet weather. There has been considerable, more or less in practically every county of the state, but principally from lodging and the breaking down of wheat, the greatest damage having been sustained in the north-central counties of Ottawa, Lincoln, Mitchell, Ellsworth, Cloud and Saline, and in the southeastern counties of Coffey, Franklin, Lyon, Wilson and Chautauqua.

OATS.—Based on assessors' returns received, the state's acreage is approximately 1,565,000 acres; prospective yield estimated at 52,416,847 bushels. Last year's oats crop amounted to 50,482,487 bushels.

RYE.—Estimated acreage, 287,000 acres, which will probably yield 5,404,000 bus.; 2,257,000 bus. last year.

BARLEY.—Estimated acreage, 513,000 acres; indicated yield, 16,666,300 bus.; 5,737,000 bus. in 1918. This crop is grown principally in the western counties, the chief producers being in the Northwest.

CORN.—It has been too wet for corn in the principal corn-growing territory and until lately too cool everywhere. It was necessary to replant probably one-third of the corn acreage because of a superabundance of water and to a lesser extent because of damage from cut worms. Corn is late and backward. The weather of the past week has brought marked improvement and cultivation has been pushed. On the estimated acreage of 4,385,000 acres of corn the average condition is given as 75.4 per cent, based on 100 as representing a good stand and development.

Kansas Report on Feed Crops.

The Kansas State Report of June 27 among other things says:

THE SORGHUMS.—Indications are that the acreage devoted to the sorghums will be considerably less than in 1918. Planting was not entirely finished at the time of this canvass.

ALFALFA.—The first cutting of alfalfa amounted to 1,625,000 tons, or an average of 1.32 tons to the acre. A large proportion, possibly 50 per cent, of the hay was damaged by rain. Weather has been favorable for growth of the second cutting, but a great deal of injury has been inflicted by the variegated cut worms, while grasshoppers are also causing more or less damage in most of the counties of the western half of the state. It is estimated that these two pests have damaged the second cutting 40 per cent. Cut worms have in not a few cases caused a total loss of at least one cutting.

PASTURES AND MEADOWS.—Pastures are uniformly excellent. Meadows give promise of yields of hay averaging 1.17 tons to the acre, and of a total production of 1,186,000 tons, as against 694,000 tons last year.

A dispatch from India says distress is spreading from the Bangura district of Bengal, owing to the high prices and contraction of credit and charity.

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

The receipts and shipments of oats for the month of June were the best on record and dealers report an increased demand for immediate shipments.

Sergt. Mike Shanahan wired that he had arrived at Charleston, S. C., from France on the 21st and expects to be back inspecting grain for the Board of Trade by the 1st of July.

The harvesting of wheat in this section is about two-thirds done. Threshing has started and samples of wheat brought to the inspection office the past week tested 13.4 moisture and weighed 59 pounds. Quite a little wheat is reported down and the machines are unable to cut.

The Cairo Board of Trade weighing department has had all the scales in use by the members of the Board of Trade tested by one of Fairbanks-Morse & Co. experts, Mr. M. Moreheuser, and the report made was very gratifying to the weighing bureau, as all scales were found in first-class condition.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Country reports on oats are to the effect that they have showed some improvement during the past week.

Oats receipts, 9 cars, with market quoted unchanged to ¼c lower with fair demand. No. 2 white, 68½@68¾c; No. 3 white, 68c.

The Peoria Board of Trade Goodfellowship Club held their first annual picnic Saturday afternoon on the grounds of Ye-Olde-Tavern.

Peoria cash market showed some weakness at the close Saturday for white and yellow corn, while the mixed grades remained unchanged. Demand was fair at the decline, industries taking the greater part of the offerings. Considerable corn has been purchased the past few days by the Corn Products Co. for their Granite City plant. Saturday's receipts were 45 cars. Sales as follows: No. 2 white, $1.79@1.79¼; No. 2 yellow, $1.78; No. 3 yellow, $1.77. No. 2 mixed, $1.77½; No. 3 mixed, $1.77½. No. 6 mixed, $1.73; sample, $1.55@1.68.

Wheat harvest is on in full swing in Peoria County and surrounding districts. The yield is not expected to be so great as was anticipated a few weeks ago, which is mostly due to the attack of the scab, a fungus disease which made its appearance during the past two or three weeks. The extent of the damage will not be apparent until the crop is threshed. With the increase of acreage the total crop for this district will be a large one, but the amount per acre expected the first of June, when conditions were the best ever known, will no doubt fall short, due to the recent insect and fungus disease.

NASHVILLE.

John Leiper, Correspondent.

Corn meal continues quiet. Southeastern mills quote bolted corn meal $4@4.30 per 100 lbs. f. o. b. Ohio River points. Mills with capacity of 111,000 bus. reported output last week of 20,671 bus.

Receipts of grain at Nashville last week were 118 cars. Stocks at the end of the week were: Wheat, 107,000 bus., decrease 2,000; corn, 213,000 bus., decrease 38,000; oats, 188,000 bus., decrease 1,000.

Cutting wheat is practically over in Tennessee. Rains delayed threshing to some extent last week. The movement of new wheat is expected to get under way this week. The latest reports confirm recent claims of damage to the crop, and some sections report the production will not be over 75 per cent of the forecast of sixty days ago.

Flour mills are waiting for new wheat, and demand is quiet, as buyers are also waiting for prices to be established. Old wheat flour is quoted at Nashville mills as follows: High grade patents, $11.75; 100 per cent flour, $11.35. Some contracts have been made for new flour 50@75c lower than old crop prices for July delivery. Southeastern flour mills with capacity of 190,170 bbls. reported output last week of 40,745 bbls. The preceding week mills with capacity of 204,030 bbls. reported output of 64,353 bbls.

Only moderate demand is noted for corn and oats, trade having quiet tone last week. Corn continues to sell at the highest level of the year, and oats are strong. Dealers are not taking hold of Texas and Oklahoma red oats, which are offered for July shipment at 72½c, being inclined to wait for developments. Wheat prices are not established. Quotations: Wheat—Nominal. Corn—No. 2 white, $1.95@2; No. 3 white, $1.92@1.97; No. 3 mixed, $1.90@1.95. Oats—No. 2 white, 78½c; No. 3 white, 78c; No. 3 mixed, 77½c.

Foreign Grain Freights

Grain Forwarding

NEW ORLEANS, LA.

OMAHA.

Leigh Leslie, Correspondent.

The Omaha Grain Exchange will be closed Friday and Saturday, July 3 and 4.

Carl A. Houlton, who has been the Flanley Grain Company's wheat and rye salesman in Omaha, has gone to Milwaukee to manage the company's office there.

The movement of grain to this market has been very light in the last week. The bulk of the receipts have been of corn. There has been a good demand for all grain at relatively high prices.

E. Oswald of Omaha and J. Delaney of Ulysses, Nebr., have formed a co-partnership and will do a general cash grain business here under the name of the Oswald-Delaney Grain Company. This company succeeds the E. Oswald Grain Company.

The Rothschild Grain Company has succeeded the Fisher-Rothschild Grain Company in this market. C. V. Fisher of Kansas City retires from the business. The officers of the new company are Emil Rothschild, president; Abe Rothschild, vice-president; Julian Scott, secretary-treasurer. The company will do a general merchandising and consignment business. Emil Rothschild and Julian Scott will look after the Omaha end of the business, while Abe Rothschild will do the track buying and separate the company's country elevators from Atlantic, Iowa.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

W. H. Bailey left for a three weeks' fishing trip in northern Minnesota the last of the week.

A. J. Jenkins, formerly in the local office of the Updike Grain Co., has accepted a position as representative of the L. C. Button Grain Co.

B. J. Dodge, of the McCaull-Dinsmore Co., was a visitor on the floor the first of the week. Ben just returned from 12 months' service overseas.

E. W. Boyes, head of the accounting department of the Godfrey-Blanchard Grain Co., was in Sioux City the first of the week, opening a set of books for the firm

Those who attended the Tri-State Country Grain Shippers' Association at Minneapolis were Ed Kayser, L. C. Button, E. Sullivan, F. H. Huntting and W. H. Shepard.

F. B. Bowes, president of the Illinois Central Ry., and W. S. Williams, superintendent of this division, were visitors last week. Mr. Bowes and Mr. Williams inspected the elevators being constructed in the Floyd Valley during their visit and stated that they saw no reason why Sioux City should not be a large grain center

The Martens & Ketels Milling Co. will more than treble its present storage capacity by putting up two tanks 80 ft. high and 18 ft. in diameter and a receiving house 30 ft. by 30 ft. and 112 ft. high. Reinforced concrete will be used throughout in the construction. Work was started the first of the week. The Younglove Construction Co. has been awarded the contract.

TAMPA, FLA.

Leonard Selz, Correspondent.

All of our dealers are preparing for inventory tomorrow and Monday and there is but little activity in the way of buying in any line. Inventory finds the Tampa trade with fair stocks of everything. After July 1st it is anticipated that buying will become more active.

R. W. Miller, president of Miller-Jackson Grain Co., is at his desk again after some time spent in the Carolinas. All of the trade welcome Mr. Miller's return, but it may be expected that during the fishing season he will be marked "absent" from time to time during the summer months.

Corn is moving slowly and there were but few sales consummated during the past week. No. 2 yellow is offered at $2.11 per bushel, sacked, delivered. Bulk No. 2 yellow at $2.05. The Florida crop of corn is making a splendid showing this year with largely increased acreage; in fact, the crop looks better this year than at any time since Florida began raising corn to any extent.

Local dealers are showing interest in the prospective movement of Texas red oats, but up to this time no quotations have been offered this market. Inquiries to Texas shippers bring forth the response that Texas oat growers have their ideas at a high scale, the growers figuring that they ought to have 3c per pound at least for their oats. There must be a reasonable differential between the white and red oats in this territory, otherwise there will be no red oats handled here. No. 3 whites are quoted freely at 88½c to 89c; No. 2 whites at 91c per bushel, sacked hundred, delivered Tampa. Receipts, 27 cars.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Bulk No. 3 white oats have been offered at 78c delivered. Dealers are bidding about 76½c delivered, and while the future options have shown weakness and a lower tendency, interior shippers appear to be disregarding the weakness in Chicago and are holding rather firm. Sacked oats quoted at 82¼c delivered and bids of 81½c have been submitted and declined. The oat demand should be decidedly better, but the cheapness and the good quality of this feed do not seem to be attractive.

The weakness of the corn market in Chicago has caused interior shippers to lower prices somewhat and No. 2 yellow corn is offered for shipment at $1.92 delivered New Orleans on outside terms and $1.94 delivered New Orleans on New Orleans weights and grades. Outside terms on corn is given very little consideration, for the reason that New Orleans terms and the discount for off grades are always more profitable and advantageous to all concerned. The demand for corn is not active and offerings are about as free as the demand is good.

DETROIT.

John Barr, Correspondent.

Rye in this market has not shown the life reported in other places. There has been neither milling nor shipping demand and the close was easy at $1.45 for cash No. 2.

Members of the Board of Trade who have made recent trips through Michigan say crops never looked better. Oats are not so far advanced as they might be, but they are not in bad condition.

Beans are slow again. There was an increase in buying a week ago, but it came from only a few canners and was easily satisfied. For several days trade has been slow and the market is quoted easy at $7.15 for immediate and prompt shipment for cwt.

The corn market is dull and easy. Trade amounts to almost nothing and is all local. Shippers have not troubled this market in months. Prices are a little lower at $1.83 for cash No. 2, $1.85 for No. 3 yellow, $1.83 for No. 4 yellow, $1.80 for No. 5 yellow, $1.77 for No. 6 yellow and $1.86 for No. 3 white. Receipts have been small all week.

A moderate demand from local consumers held the oats market steady until the close of the week, when there was a decline of ½c. Total trade was not large and the supply was sufficient to meet the needs of consumers. Shippers were not in the market. The close was steady at 72½c for cash No. 2 white, 72c for No. 3 white and 71c for No. 4 white.

Detroit millers are not buying wheat. They report no demand for flour. There is a general tendency to hold off and get along with as small supplies as possible in the belief that there will soon be an important decline in prices. Millfeeds are a little higher in some cases and buying in small lots has been active. No consumer is taking more than needed for immediate use. Wheat is quoted at $2.40 for cash No. 2 red, $2.38 for No. 2 white and No. 2 mixed.

DULUTH.

S. J. Schulte, Correspondent.

Application has been made for transfer of the Duluth Board of Trade membership of J. M. O'Gorman to George Dion of the Hallet & Carey Co.

George Palmer Harbison, former floor man with A. D. Thomson & Co., was given a hearty reception on his appearance on the Board of Trade one day last week, after eighteen months military service with the Engineers' division, and with a motorcycle corps at the French front.

N. C Clark, cash buyer for the Cargill Elevator Co. here, has become a grandfather, though he is still quite youthful in appearance. A young girl arrived at the home of his daughter, Mrs. Coventry, one day last week, and on receipt of the news members of the board enjoyed the smokes at "Nate's" expense.

Rye was under pressure again on this market during the week. With persistent selling and liquidation, the spot quotation in that grain ran 11c to $1.38½. Good reports regarding the crop outlook over the West and disinclination on the part of operators to increase their commitments at the former price levels, were bearish factors.

Stocks of wheat in the elevators at the Head of the Lakes have been cut down to approximately 250,000 bushels, of which a large proportion is durum. In view of the light supplies of wheat operators of mills at this point are being held down to a minimum. Were it not that more wheat has been coming in from the country of late the plants would have been compelled to close up shop, failing their ability to obtain some bonded grain through the grain corporation. Last Saturday millers here paid $2.57 for some cars of No. 1 northern.

Members of Duluth's market delegation in the recent conference with Julius H. Barnes at New York to take up the marketing of the 1919 wheat crop, H. F. Salyards, H. S. Starky and A. Laird Goodman, have returned home. They put up a hard fight to have the Duluth market placed on a parity with Chicago at $2.26 for No. 1 Northern wheat. Their contention was that it is unfair that the three leading Northwest states should be penalized to the extent of 3½c a bushel in the marketing of their high grade spring wheat. They found themselves confronted with strong opposition, and intimation came from Julius H. Barnes, wheat director, a few days later to the effect that a general revision of basic prices is not contemplated this season. The change upward in the Gulf Ports basis was made to induce larger export shipments through that outlet. The Duluth delegation were informed that the Grain corporation is making arrangements to handle the expected bumper crops over the Northwest expeditiously this fall. It is hoped to improve handling and shipping conditions at the seaboard to an extent that will admit of an uninterrupted flow of grain to the seaboard right up to the close of the lake navigation season. Better results are hoped for through the issuing of blanket permits to the railroads covering shipments from the country, than was attained in the individual permits system last season.

UNION TRUST COMPANY CHICAGO

A BANK OF STRENGTH AND CHARACTER

The B L Bank of Chicago

With the prospect of bumper grain crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding special facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

C. A. Addington has resigned as manager of the Keystone Elevator & Grain Co., effective July 1.

Miss Violet Richardson, of the Missouri State Inspection Department, returned from her vacation with a sparkler on her left hand.

H. L. Dannen, president of the St. Joseph Hay & Grain Co., spent last week visiting his parents and grain dealer friends in Iowa.

J. F. Herries, of Pawnee, Nebr., was in the city today and arranged to open his office at 1017 Corby Forsee building, by July 10. The style of the firm will be Herries Brothers Grain Co., and they will conduct a wholesale grain and seed business.

Fred. R. Windle, president of the Great Western Grain Co., slipped away during the quiet hot days of last week and entered into a contract with Miss Nelle Acton, of Liberty, Neb., which contract will not be subject to review by either the arbitration or appeals committee of the St. Joseph Grain Exchange.

About 250 grain dealers of eastern Kansas, southern Nebraska and western Missouri met in their annual convention at St. Joseph on the 25th. The meeting was held at the Lotus Club, Lake Contrary, where the visitors were entertained by the St. Joseph Grain Exchange. The afternoon session was devoted to general discussions with reference to the handling of the 1919 wheat crop. After the banquet in the evening, Mr. D. F. Piazzek, of Kansas City, Mo., delivered a bullish speech on the world's wheat condition and discussed the prospective methods to be used by the Food Administration this season.

Cash Markets.

Corn—There has been an excellent demand for all grades of corn during the past week, yellow and mixed corn selling slightly lower; white corn strong and higher. Receipts continue reasonably light. No material decline is anticipated. Nominal quotations: No. 2 yellow, $1.81@1.82; No. 3 yellow, $1.79@1.80; No. 4 yellow, $1.77@1.78; No. 5 yellow, $1.75@1.77; No. 2 white, $1.86@1.87; No. 3 white, $1.83@1.85; No. 4 white, $1.81@1.82; No. 5 white, $1.78@1.80; No. 2 mixed, $1.80@1.81; No. 3 mixed, $1.78@1.79; No. 4 mixed, $1.76@1.77; No. 5 mixed, $1.73@1.75.

Wheat—There was a strong and active demand for new wheat to arrive at 5c to 10c under spot prices. Soft and mixed wheat was not in such urgent request and

many dealers expect the Government price to be reached within a few weeks when the movement becomes general. The prospects are that railroad facilities will be inadequate for the movement of all the wheat offered them during July. Nominal quotations: No. 1 dark hard, $2.52@2.55; No. 2 dark hard, $2.50@2.52; No. 3 dark hard, $2.45@2.48; No. 4 dark hard, $2.34@2.42; No. 5 dark hard, $2.26@2.30; No. 1 hard, $2.51@2.54; No. 2 hard, $2.49@2.51; No. 3 hard, $2.42@2.44; No. 4 hard, $2.32@2.40; No. 5 hard, $2.25@2.31; No. 1 red, $2.32@2.33; No. 2 red, $2.30@2.32; No. 3 red, $2.27@2.30; No. 4 red, $2.25@2.26; No. 5 red, $2.22@2.25.

Oats—Receipts for the past week have been reasonably heavy; demand good at the decline. Bids for new oats to arrive are very near spot prices. Nominal quotations: No. 2 white, 69½@70c; No. 3 white, 68½@69½c; No. 2 mixed, 68½@69c; No. 3 mixed, 68@68½c; No. 2 red, 69½69¾c; No. 3 red, 69@69½c.

KANSAS CITY.

T. J. Tanner, Correspondent.

James N. Russell, of the Russell Grain Co., is a director in the newly organized Continental National Bank, which has a capital of $1,000,000.

W. W. Fuller, of the Fuller Grain Co., spent the week in Oklahoma and reported that, owing to the effect of rains before and during harvest, the state would have a lot of damaged wheat.

W. R. Houston, of Houston, Fible & Co., Kansas City, stock and grain brokers, has been elected a member of the New York Cotton Exchange. Mr. Houston bought his certificate for $19,750. The price of cotton exchange memberships has since advanced to $25,000.

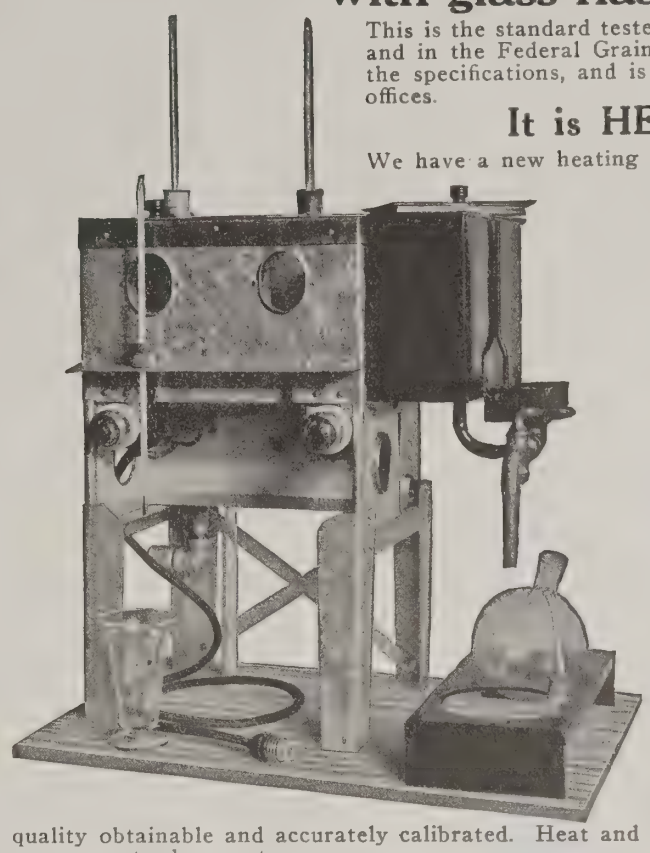
Frank G. Crowell, of Kansas City, first vice-president of the old Food Administration Grain Corporation, arrived in New York from a European trip a few days ago. He is expected home soon, and probably will re-enter the grain business here with the Hall-Baker Grain Co.

"One of the most hopeful signs of the future greatness of the Kansas City Board of Trade," said Secretary E. D. Bigelow, of the exchange Saturday, "is the high class of young men who are aspiring to membership. As a whole, I believe the personnel of the Board of Trade is superior today to that of any stage in the history of the exchange."

Alleging failure to render accountings of their operations to the Food Administration Grain Corporation, the Federated Mills and the Silver Grain Co., of Morganville, Kans., were deprived of their federal licenses this week. According to D. F. Piazzek, Kansas City zone agent, the concerns are under a single ownership. They have been defiant ever since Government control was established.

The Kansas City branch of the Norris Grain Co. has renewed its state license and filed a bond of $100,000 to guarantee operation of its 1,900,000 bushel elevator as a public warehouse. In its application the company recited that it had a capital of $500,000. The officers are: James Norris, Chicago, president; Fred. C. House, Kansas City, vice-president and treasurer; Robert Crombie, Chicago, secretary.

Harvest in Full Blast.



With little rain to hamper the work, wheat harvesting in Kansas advanced this week to the central part of the state, including the main producing region. The weather was very hot and the grain ripened rapidly, bringing wheat in western Kansas to maturity a little earlier than had been expected. There was a great outcry for harvest hands and thousands went from Kansas City and Kansas towns to the fields. Negroes were accepted by farmers as gladly as whites. There were reports of the imminent danger of losing millions of bushels of grain, but the latest advices indicate that this fear is limited to the far western counties, which have an immense crop and are at a disadvantage in securing help.

The report of the Kansas State Board of Agriculture, estimating the Kansas crop at 229,665,000 bushels, was a surprise to most Kansas City grain dealers, who had thought, in view of damage claims resulting from recent rain and storm losses, that the Government estimate of 192,000,000 bushels was about right. Secretary Mohler justifies his high figure on the discovery of 700,000 acres more of winter wheat than were reported previously, making a total of 11,564,693 acres. Winter wheat is expected to thresh 19.8 bushels an acre and spring 15.6, the latter total being 448,000 bushels. The biggest previous crop of Kansas was 181,000 bushels. in 1914.

New wheat samples began to arrive in Kansas City this week from Oklahoma, and several care were scheduled to reach the market during the coming week. The samples thus far received indicated a heavy moisture content, but were otherwise of good quality. They were of the red and hard varieties and were offered at 10c over the Government minimum basis, without takers. There was a rumor that Northwestern mills had bought some new wheat, first half of July delivery, at 11c over, but Kansas City millers refused to buy on such a level and said they expected to see new wheat sell at the minimum basis very soon after the real beginning of the new crop movement. Very little flour is being sold ahead. Millers prefer to wait and see the wheat and to witness the action of prices. If no more heavy rains fall in the meantime, there should be liberal receipts of new wheat here by July 10 or 15.

TheOfficial BROWN-DUVEL Moisture Tester

with glass flasks or copper

This is the standard tester prescribed in Bulletin 72, Department of Agriculture, and in the Federal Grain Rules of Inspection. In every detail it conforms to the specifications, and is of the type used in all Government grain inspection offices.

It is HEATED ELECTRICALLY

We have a new heating element, our own design, which is so simple and convenient, so free from fire hazard that it will supersede all other heaters, with liquid fuel, for testing purposes.

Its points of merit are

1. SIMPLICITY. When a coil burns out, as all coils will, pull off the connector body; lift out the heating plate, which is then free. Turn two screws and the burnt coil will drop out. A new one is inserted, the screws turned up, and the job is done. The element is not even taken apart for the purpose, and the expense involved is just **TEN CENTS.** No delay, no inconvenience.
2. EASY REGULATION. The heat is regulated just like a lamp; the turning of a thumb-nut raises or lowers the temperature just as you want it.
3. LOW COST. A new heater costs $1.00; a new coil 10 cents.
4. ADAPTED TO ANY VOLTAGE and quickly changed from one voltage to another, such as lighting (110V) or power (220V) current, by the change of a screw.
5. SAFER AND MORE CONVENIENT than alcohol or gasoline, and cheaper.
6. SANITARY. No carbon monoxide nor other products of combustion to exhaust oxygen and poison the atmosphere of the testing room.

The tester is made throughout of smooth steel, galvanized to prevent rust. The glassware is of the best quality obtainable and accurately calibrated. Heat and oil resisting stoppers are supplied. The thermometers are guaranteed correct.

Each tester is equipped with a strainer oil-tank, with SELF-MEASURING FAUCET, delivering 150 CC of oil at each discharge, which has no valves nor adjustments to get out of order and leak.

No electric tester was ever so good nor sold so low. Our prices, which include all accessories and one gallon of testing oil, are as follows, f. o. b. Chicago:

One flask	$25.00
Two flasks	40.00
Four flasks	65.00
Six flasks	90.00

A liberal discount for quantity orders or for resale.

We supply gas or alcohol burners if electric current is not available.

We will equip your old tester with these new electric heaters for $3.00 per burner, including wiring, you to pay transportation charges both ways. In sending testers to be changed over, do not send any glassware, accessories, nor water tank; just the heater body.

We carry a COMPLETE LINE OF ACCESSORIES for testers at lowest possible prices.

We still supply the Hess Improved tester, with copper flasks, for gasoline, gas, alcohol or electricity.

Ask for full information.

Hess Warming & Ventilating Co., 1258 Tacoma Bldg., Chicago, Ill.

HESS DRIERS

More are in use, and more are sold yearly, than all other makes combined. There's a reason—a GOOD ONE

It has been announced that the business heretofore conducted under the name of Aylsworth Grain Company will hereafter be conducted under the name Federal Grain Company, which will continue to transact a general grain business, domestic and export, in charge of the following personnel: Mr. Harry J. Smith, president, recently assistant to D. F. Piazzek, second vice-president, Food Administration Grain Corporation at Kansas City, and formerly with Lonsdale Grain Company at Kansas City. Mr. Smith will exercise general supervision over the company's activities. Mr. A. R. Aylsworth, secretary, has been actively connected with the Aylsworth Grain Company for some time past and will continue with the Federal Grain Company in charge of the wheat sales department. Mr. Kenneth G. Irons, manager of the consignement department, recently of the United States Army and formerly with Vanderslice-Lynds Company, Kansas City.

Cash Grain Markets.

Wheat—Receipts for the week, 84 cars, against 72 a week previous and 60 a year ago. Urgent demand from one or two local and a few outside mills for choice samples forced hard wheat prices up sharply early in the week. The feeling became much easier later, owing to good weather for harvesting and the arrival of a few samples of new hard and red wheat from Oklahoma. Low grades were dull at all times and hardly saleable. All grades receded late in the week. No. 1 hard closed 7@8c lower than a week ago, at $2.49@2.52. No. 2 ended 7@11c off, at $2.45@2.51. Red wheat was in very light supply. Milling inquiry for a few cars put prices up 5c, to $2.33@2.35 for No. 1 and $2.31@2.33 for No. 2. Samples of new crop red from Oklahoma were exhibited. As in the case of new hard, the wheat showed a heavy degree of moisture, though the quality was good. Several cars of new wheat are en route from Oklahoma to Kansas City. Stocks of old grain here decreased 58,000 bushels for the week, to 294,000, against 42,000 a year ago.

Corn—Receipts, 230 cars, against 301 a week ago and 257 a year ago. The market had narrow and irregular price changes from one day to another, ending generally unchanged to 1½c lower, with No. 2 mixed at $1.80½, No. 3 at $1.78½@1.79½, No. 2 white at $1.87, No. 3 at $1.85, No. 2 yellow at $1.82 and No. 3 at $1.79½@1.80½. The best demand was for the better grades of white and yellow, which were wanted, respectively, by millers and feeders. Mixed corn and low grades of all kinds were often left to be taken by elevator men on the basis of the July contract. Shippers complained of extreme dullness in the outside demand. Sentiment with regard to the new crop improved, as the week was very hot, with occasional showers, promoting growth and permitting cultivation. Owing to short acreage, the southwest has no hope of a bumper yield this year, though more corn may be raised than last year unless drouth ensues, as it did in 1918. On an area of 4,358,000 acres, the condition of the Kansas crop on June 21 was officially estimated at 75.4 per cent, about 10 per cent lower than a month ago, suggesting a yield of 85,000,000 bus. The crop of 1918, as finally reported, was 44,500,000 bus. Stocks of corn in the Kansas City elevators this week increased 6,000 bus., to 288,000, against 1,312,000 last year.

Oats—Receipts, 103 cars, against 103 a week ago and 74 a year ago. Though local stocks were reduced 46,000 bus., the fresh offerings met a very slow demand and were bought mainly by elevator men on the July delivery basis. Shippers said the Texas inquiry was shut off by the new crop in that state and the same condition developed as to Oklahoma. Central Kansas bought more from Omaha than from Kansas City. Local feed dealers were good buyers on declines. In anticipation of the offering of new oats here in the near future, prices were forced down 2½@4c. At the close No. 2 white was quoted at 70c; No. 3, 69@69¼c; No. 2 mixed, 69½@70c; No. 3, 69@69½c; No. 2 red, 70@70½c; No. 3, 69½@70c. Crop reports were generally good, except from northern Kansas, where the growth was said to be light. A yield of 52,416,000 bus. was officially estimated in Kansas, or 33.5 bus. an acre. This is about 2,000,000 bus. more than in 1918.

Kafir and Milo—Receipts, 18 cars, against 16 a week previous and 29 a year ago. The market was weakened slightly by the action of corn and oats, but there was a good demand. Stocks decreased 42,000 bus., to 57,000, against 365,000 held in 1918. Kafir closed 5@10c per cwt. lower, at $3.40@3.50 for No. 2 white and $3.25@3.30 for No. 3. Prices of milo were unchanged, with No. 2 $3.35@3.45 and No. 3 at $3.23@3.25. Firms here did a liberal business in milo from the Imperial Valley, southern California, putting the product through on a transcontinental rate to New York at a considerable discount under prices at which the southwestern product could be sold. Handlers here believe the new acreage in Kansas and Oklahoma is about the same as last year and that the prospect is good. Texas shippers have asked for bids on their new crop,

KAFFIR CORN
MILO MAIZE **GRAIN**
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

which will be ready to move in July or August.

MEMPHIS.

George Williamson, Correspondent.

John B. Edgar is home after a several weeks' trip to eastern points. He thinks there will be a large and sustained demand for sweet feeds of all kinds.

The largest car of oats ever received in this market came in during the past week, having been consigned from Illinois to E. E. Buxton. It contained 3,205 bus. and weighed 102,560 lbs. Big car loads have been a feature here for some time, but this one topped them all so far.

The first car of new wheat came the latter part of the week from near Greenville, Miss., nearly 200 miles south of here, to John Wade & Sons. It was good quality, but later than expected because of so much rain. Reports from the territory indicate that the rains have done considerable damage to wheat and oats, but if they do not come again harvesting will now be pushed to completion.

The weather in this territory has turned off some better after continued rains and now the task of cleaning the crops is being faced with a limited labor supply. Cotton is in the worst shape ever known and already considerable acreage has been abandoned. Lots of corn in the lowland sections is in bad shape, but as a whole this section has promise of a good crop. Some late planting is still to be done, but the big job of cleaning and saving crops already planted may restrict efforts to put in more corn. One thing now feared is that after the prolonged wet spell, which has lasted through the months of May and June, may be followed by a dry summer and thus make ineffective efforts to grow a late corn crop.

Activity in grain has been moderate all the week and a general tone of firmness has prevailed. Receipts have been light, but enough to fill requirements. Corn has advanced some and on call Saturday cash 2 white was offered at $1.95, without any bidders. July shipment of 3 white was offered at $1.97, while same for 3 yellow was offered at $1.92. Cash 2 yellow was offered at $1.91 and 3 yellow at $1.90. Feed manufacturers have been doing most of the buying, although millers have taken some for making corn meal, for which there is a fairly good demand. Interest in Texas red oats has been limited, due to lack of offerings, but July shipments are expected to be larger and bids and offers are getting closer together. For July shipment 3 red 69½c was asked and 68¼c bid, which about represents current ideas of value. Some June shipment sales were bought in by the shippers and resold in the Southwest.

CHICAGO.

July 1 brokers' license tax of $50 are due.

The Chicago Board of Trade will be closed July 4 and Saturday, July 5, thus making a three-day holiday possible.

Effective Jan. 1, 1920, grain storage rates at Chicago will be 1¼c for the first 10 days and 1/20c for each succeeding day.

Demurrage charges will be $2 per car for each of the first four days and $5 per car for each day thereafter, effective July 20.

Chicago banks have been advised that the Grain Corporation expects to borrow $30,000,000 in this territory during the crop moving season.

James A. Patten and family are motoring through New York and New England states and are making a pilgrimage to the homes of all the family relatives.

A recent charter was made at Chicago for 80,000 bus. corn at Kingston, and a load of 25,000 bus. corn and 25,000 bus. oats has been taken for Georgian Bay.

"Herb" Mayer of Mayer-Holbrook Co. and Harry Watson of Ichtertz & Watson, St. Louis, are out on a combined crop reporting and business getting trip in Missouri.

The surplus property division of the Army at Chicago has invited bids on 6,276 lbs. of rice flour held at Rantoul and Chicago as well as a stock at Selfridge Field, Mich.

July 12th a special meeting of the stockholders of the Quaker Oats Co. will be held in Jersey City for the purpose of increasing the authorized capital stock from $30,000,000 to $50,000,000.

Howard B. Jackson will remain as vice-president of the Grain Corporation at Chicago for the coming season and Victor Peterson, the flour specialist, will continue his association with Mr. Jackson. W. R. Linn and John H. Jones have resigned.

The average price of memberships in the Board of Trade during the period to figure the Government tax was $6,717, making the tax $150 for the year. Memberships at this time are down to $8,300 net to the buyer.

Applications for memberships in the Chicago Board of Trade have been filed by C. A. Fleetwood, H. H. Gingham and F. A. Fisher. F. W. Swift, J. Park Dean and the estate of John W. Murphy have filed memberships for transfer.

Capt. J. M. Phillips, although 91 years of age and having had a serious automobile accident last year, made his friends on the floor a visit last week. Capt. Phillips is recognized as one of the large traders in grains and stocks of earlier days.

Due to the uncertainties of the keeping qualities of July corn and the difficulties of watching it after it should be delivered, one of the leading commission houses has given notice that margins of 25c per bu. must be kept good on July corn carried into that month.

The industries are taking over large amounts of "posted" corn. Reports from elevators in central Illinois are to the effect that much corn is in a heating condition. Holders of the July delivery are selling freely, thereby weakening it more than the others.

The National Elevator, operated by Bartlett-Frazier Co. and having a capacity of 1,000,000 bus., is now a part of the regular public elevator of the city which has a total capacity of 12,730,000 bus. The agreement between the Board of Trade and elevator owners now absolves the owners from any responsibility should there be a discrepancy between the Illinois state grain inspection and the U. S. Government inspection on grain shipped from the regular houses.

Parker M. Paine of Duluth has been taken into partnership with Logan & Bryan and his thirty years of active service in the grain trade has won him many friends who extend their congratulations on his new connection.

GEO. A. WEGENER,
Chicago.

Wegner Bros. is the name of a new Chicago grain firm which started in business on July 1 with offices in the Traders' building, for the conduct of a general grain commission business at Chicago. Mr. Geo. A. Wegner was formerly a member of the firm of Logan & Bryan, retiring from such firm June 30, 1919. Both Geo. A. Wegner and his brother, Arnold G. Wegner, comprising the firm, started with the old firm of W. F. Johnson & Co. many years ago and have been members of the Board of Trade for twenty-five years. Their long experience and close personal attention to the interests of their clients will surely merit the continuation of their patronage.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

President Roy V. Harper of the local exchange presented L. G. Miller of Cincinnati, O., on the floor last week.

Receipts of straw are still in excess of the light demand and good grades are selling as low as $11.50@12 a ton, or a reduction of about 50c a ton on all grades.

Among visitors to the Pittsburgh exchange during the week were: Lew Hill of Indianapolis, Ind., a guest of W. J. Mehan, and E. A. Kerwin of Coraopolis, Pa., introduced by the Ohio Valley Grain & Feed Co.

The bottom has practically dropped out of the oats market. The demand is very light, while receipts have been large enough to put a plentiful supply on the tracks and in storage. Sales are being made with difficulty around 76@76½c a bushel.

Keen interest is being shown among members of the exchange in the probable makeup of the new committees, soon to be announced by President Roy V. Harper. It is expected that the list will be presented for approval of the board of directors at the regular meeting on next Thursday evening.

Conditions are anything but satisfactory in the local market for grain, especially with regard to corn. The receipts, while very light, have been more than sufficient to meet the demand and prices are barely steady. Only 27,300 bushels of shelled corn arrived during the last week. The best grades are holding around $1.92@1.95.

Considerable more progress is being made in the matter of inspection since the regular force was increased last week. This was one of the first official acts of the new executive head, President Harper, following his recent election. Two new inspectors have been appointed and results already have brought forth expressions of satisfaction from local dealers.

The annual outing of the local grain exchange on last Wednesday was rained upon, but even an unsympathetic weather man was unable to put a damper on the enthusiasm of the members. Some of the sports planned had to be abandoned, but others were provided and one of the most enjoyable events in the history of the exchange went on record. About 100 members, their wives and friends were present at "The Pines," a beautiful spot within easy motoring distance of the city. President Roy V. Harper and his corps of assistants were on the job from shortly after noon until late in the evening and nothing was left undone to make the affair a huge success. Dancing was the principal amusement of the day and evening. An outstanding feature, of course, was the dinner. Owing to wet grounds and a soggy ball the baseball game was hardly what might be termed championship form, but it furnished gobs of genuine fun for those who took part as well as those who merely look on. Needless to say, considerable "soreness" developed, this being especially noticeable on the following day.

BUFFALO.

E. Bangasser, Correspondent.

Some rain has fallen here the past few days and will do considerable good, as pastures were drying up.

A round lot of Argentine corn sold some time ago arrived this week. It was well dri led and alive for further action as far as the weevil was concerned.

Fred J. Collins, who has been with the Urmstrom Grain Co. for five years and well known throughout the East, has been appointed manager of the Buffalo office. Mr. Collins is well fitted for this position because of his wide knowledge of the outlet east of Buffalo and his many years' connection with the grain trade generally.

Oats had quite a few fluctuations following the option more closely than usual. The demand was mostly for No. 2 white and buyers seem to have a place for them. The oatmeal mills took considerable. Receivers as a rule were inclined to keep the tables cleaned of samples. Closing: No. 1 white, 75c; No. 2 white, 74½c; No. 3 white, 73½c on track, through billed.

The corn trade was confined to just what the mills would take, and owing to light receipts they had to pay the prices asked. There was a decline of about 2c from the close of last week on Monday, but a steady market since then on any corn not likely to get out of condition and there were quite a few cars which needed quick attention. Closing: No. 1 yellow, $1.89; No. 2 yellow, $1.88½; No. 3 yellow, $1.87½; No. 2 mixed, $1.87@1.87½ on track, through billed.

Inspection track receipts for the week were: Wheat—No. 1 Northern, 7 cars; No. 1 red, 4 cars; No. 2 soft white, 1 car; Corn—No. 1 yellow, 5 cars; No. 2 yellow, 34 cars; No. 3 yellow, 7 cars; No. 4 yellow, 1 car; No. 6 yellow, 6 cars; sample yellow, 29 cars; No. 2 mixed, 3 cars; No. 6 mixed, 1 car; No. 2 white, 1 car; sample white, 1 car; No. 2 milo, 1 car. Oats—No. 1 white, 12 cars; No. 2 white, 42 cars; No. 3 white, 68 cars; No. 4 white, 6 cars. Barley, 65 cars.

INDIANAPOLIS.

Myron R. Green, Correspondent.

The Farmers' Elevator Co. of Otterbein increased its capital stock from $30,000 to $100,000.

Twenty per cent of the wheat crop of Madison County has been affected by wheat scab, according to estimates of County Agent Agster. The loss is placed at $300,000.

The Bippus Co-operative Elevator at Bippus, Ind., incorporated with a capital stock of $10,000. Directors are Edward Wetters, Clarence D. Eberhart and W. Albert Bickel.

The Monroe County Farmers' Grain Co. of Bloomington, Ind., incorporated with a capital stock of $15,000. Directors are Benjamin F. Elrod, John Marlin and Harvey Stephenson.

A public hearing will be held at the Chamber of Commerce July 3, at 10 A. M., to discuss the proposed regulations for grain warehouses provided under the United States Warehouse act.

The Montmorencie Elevator Co. of Montmorencie, Ind., incorporated with a capital stock of $25,000. Directors in the new company are William Burkle, John Martin, Jr., and J. E. Marshall.

The Rochester Co-operative Elevator Co. of Rochester, Ind., incorporated with a capital stock of $40,000. Directors in the new company are James M. Downs, Norman R. Stoner and Milton Smiley.

Among the out of town millers and grain dealers in the city during the last week were: Elmer Hutchison, Arlington; O. J. Thomson, Kokomo; T. B. Wilkinson, Knightstown; H. W. Reiman, Shelbyville, and Charles Stafford Thorntown.

The Farmers' Co-operative Co. of Treaty, Ind., purchased the Martin Grain Elevator owned by J. C. Martin & Sons of LaFontaine, Ind., and after making some repairs the new company will begin immediate operations. It is understood that the consideration was $27,500

Fire of undetermined origin destroyed the Little Crow mill, owned by W. F. Maish, with a loss estimated at from $8,000 to $10,000. The flames started in the upper part of the mill around the wheat elevator and before the alarm could be sounded the entire structure, which was of frame, was ablaze. About 800 bushels of wheat, 500 bushels of oats and considerable flour and other feeds were burned. The mill and contents were fully insured.

County grain elevator operators were advised to provide themselves with standard Federal equipment for grading wheat and determining dockage, by Charles B. Riley, secretary of the Indiana Grain Dealers' Association at a meeting of operators, farmers, county agents and others, under the auspices of Purdue University and the federal bureau in markets of the Board of Trade building last week. Following the talk by Mr. Riley, H. A. Rhodes, federal grain supervisor of the Indianapolis district, demonstrated the equipment and methods of grading wheat, especially in reference to the application of docking and determining grade.

Members of the Indianapolis Grain and Hay club went to Mooresville, Ind., for their annual outing. A fake prize fight between two of the members of the club was staged. The gore (sack-of-blood trick used by fake fighters) was spilled profusely, much to the consternation of those members who were not "wise" to the dodge, and not until the vanquished member got up smiling did they realize how well the entertainment committee put it over on them. Another diversion of the hay and grain merchants was a ball game between the "fats" and the "leans." The game was won hands down, 19 to 6, by the "fats." A horseshoe pitching contest preceded an unusually good chicken dinner. The club elected the following members: O. D. Kendrick, president; Carl D. Menzie, vice president; Frank Tompkins, secretary, and E. D. Anderson, treasurer.

BALTIMORE.

Robert C. Neu, Correspondent.

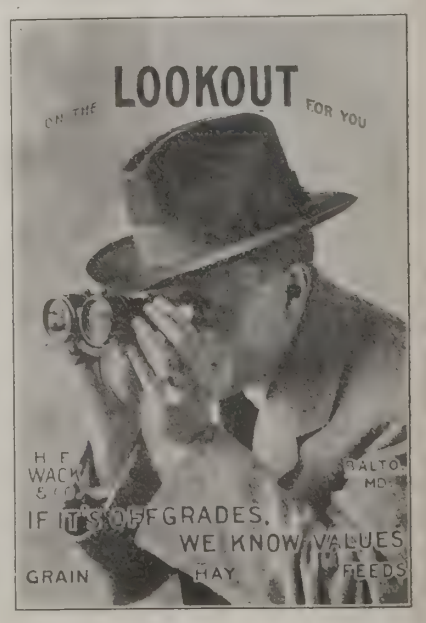
B. Gerlach, president of the La Grange Mills of Red Wing, Minn., was a visitor on the floor of the Baltimore Chamber of Commerce last week.

H. A. Stotler, of Wenona, Ill., and Lew. Hill, of Indianapolis, Ind., were visitors on the floor of the Baltimore Chamber of Commerce last week.

The names of Edgar Holbein and Christopher S. Thomas are posted on the official bulletin of the Baltimore Chamber of Commerce as applicants for membership in this organization.

Hay prices here continue "on the toboggan," and with some new hay already coming in from nearby points by farmers' wagons the end of the decline appears to be not yet in sight.

The returning delegates from Baltimore to the recent annual meeting of the Ohio Grain Dealers' Assn. were loud in their praise of the all 'round excellence of the program and business-like proceedings.



In common with similar action on the part of the leading boards of trade and chambers of commerce of the country, the rooms of the Baltimore Chamber of Commerce will be closed on July 4th and July 5th.

The Food Administration Grain Corporation advises that application for permits to ship wheat must be accompanied by the written request of the shipper (either letter or telegram) and state when the wheat will be shipped.

The name of Jas. W. Lyon, Jr., who will engage in the grain business from July 1st under the style of Huyett & Lyon, is posted on the official bulletin board as an applicant for membership in the Baltimore Chamber of Commerce.

Geo. C. Smith, director, Industrial Bureau of the Baltimore Board of Trade, addressed the members of the Baltimore Chamber of Commerce in the directors' room of this organization on June 26 on the subject of "Baltimore's Opportunities."

Col. H. C. Jones, of this city, who was one of the first officers to see active duty after the United States entered the war, and one of the last to embark for home, is

now on the steamship "Infanta Isabella" homeward bound and due to arrive at Hoboken on July 1st. Col. Jones is head of the grain and hay commission house of H. C. Jones & Co., Inc., of Baltimore.

Col. M. A. Reckord, a member of the grain and milling firm of M. L. Reckord & Sons, Belair, Md., and who just returned about the middle of June from "over there," was a caller on 'Change here last week and was warmly welcomed by his friends in the trade. Col. Reckord commanded the 115th Infantry, 29th Division, which broke the "invincible" Verdun line.

The Judson Freight Forwarding Co., which maintains branches in all the large cities of the country, has opened offices at 412 Garrett Building, this city, for the purpose of conducting a general forwarding business through the port of Baltimore. The local manager of the company, Mr. John Corbett, who, as foreign freight agent of the Canadian Pacific Railroad Company at Montreal, has had a long and varied experience in shipping, declares that Baltimore has greater opportunities for development and growth than any other eastern port. Its shortest rail haul from Pittsburgh, Cleveland, Detroit, Milwaukee, and even St. Louis is a paramount consideration, he says.

A new grain commission firm, under the style of Huyett & Lyon, will make its bow in the Baltimore market on July 1st, to engage in the cash grain business, covering not only the nearby territory, but reaching out extensively into the Central West. The offices of the new concern will be in the Chamber of Commerce building, immediately in touch therefore with "the pulse" of all outside grain markets. The principals of the new house scarcely need a formal introduction to the grain trade at large, since D. Yulee Huyett, senior partner, "knows the game" from all angles, and has had many years' practical experience in marketing grain, being as well known, perhaps, in the Middle West as he is at home. Mr. Huyett's attendance at the various state conventions from time to time has given him an intimate acquaintance with the leaders in the grain business and his genial personality has won for him many friends. Jas. W. Lyon, Jr., the other member of the firm, emerges from an environment of twenty years with "big business," having been in the office, for this length of time, of Messrs. Gill & Fisher, one of the largest and internationally best known firms in the grain exporting trade of Baltimore. The house of Huyett & Lyon will be equipped therefore by both experience and ample capital to well take care of all business entrusted to its care, and it starts off with the best wishes of a host of friends in the trade.

BOSTON.

R. S. Wallace, Correspondent.

Stocks of grain in regular elevators June 23rd were: Wheat, 147,825 bus.; corn, 2,516 bus.; oats, 182,221 bus.; rye, 970 bus.; barley, 106,686 bus.

Exports of grain and flour for the week ending June 28th were as follows: Wheat, 122,231 bus.; rye, 23,837 bus.; oatmeal, 1,500 sacks; barley, 24,500 bus.; flour, 74,065 bus.

The following were visitors on 'Change during the past week: W. S. Miles, Peoria, Ill.; C. C. Ladd, Osceola, Minn.; W. Vervliet, Antwerp, Belgium; C. W. Hall, Ottawa, Canada.

The demand for corn continues extremely light with prices somewhat easier than last week and ranging as follows. No. 2 yellow corn, $1.98 to $2 per bushel; No. 3 yellow corn, $1.96 to $1.98 per bushel. Receipts for the week ending June 28th were 2,300 bushels.

Very little inquiry for oats during the past week, with prices lower, being quoted as follows: Fancy 40/42 lbs. clipped white oats, 80½c to 81c per bushel; fancy 38/40 lbs. clipped white oats, 80c to 80½c per bushel; regular 38/40 lbs. clipped white oats, 79c to 79½c per bushel; regular 36/38 lbs. clipped white oats, 78½c to 79c per bushel. Receipts for the week ending June 28th were 29,960 bushels.

NEW YORK.

J. M. Nugent, Correspondent.

The following gentlemen visited the floor of the Produce Exchange this week: Lew Hill of Indianapolis, J. B. Rosenbaum of Cleveland, B. Smith of Chicago, L. F. Gates, president of the Chicago Board of Trade, and J. W. Snyder of Baltimore.

Oats remain quiet with only a very small trade passing. Exporters apparently have withdrawn for the present owing to the scarcity of tonnage for the carrying of this kind of grain. Prices as follows: No. 1 white, 80c; No. 2 white, 79½c; No. 3 white, 79c; No. 4 white, 78½c, all elevator; other grades are not quoted.

There has been a steady inquiry in the market for barley during the week and most of the quantities worked were for the United Kingdom. It is difficult to estimate the amounts purchased, but figures vary between one-half and a million bushels at least. Bids were in the market at the close of the week but were slightly out of line.

Sentiment here among local traders appears to be decidedly mixed regarding the effect the signing of Peace will have on grain ultimately. Many are of the opinion that this has been discounted, and that liquidation from now on will be in evidence. On the other hand, there are many of the opinion, now that the treaty has been signed, the blockade removed, that the demand for grain of all kinds will be enormous.

In connection with the work of American relief of Europe, it is noted that during the month of May 168 shiploads of food were delivered to the seventeen countries covered by the relief program. These cargoes amounted to 738,000 metric tons. Since December 1st to May 30th distribution has been 2,486,000 tons, comprising 512 shiploads, worth $636,175,000. Port stocks on May 31st were 166,777 tons. Mr. Hoover states that he is confident that if there are no interruptions through delays in peace, of reaching the completion of the task of relief without preventable loss of life.

Trade in cash corn continues dull but prices maintain a firm undertone. Transactions are of a limited nature. No. 2 yellow is quoted at $1.94½; No. 3 yellow at $1.93½; No. 2 white, $1.96½; No. 3 white, $1.95½; No. 2 mixed, $1.94, and No. 3 mixed, $1.93, all cost and freight New York, domestic, ten days' shipment. Argentine corn offerings to the seaboard continue light, owing mainly to the small supply of tonnage at present. Rates for steamers to New York are now figured to be about $32 to $33 per ton as compared with $30 a short time ago. Sailers are also very firm with $25 to $26 being bid as against $22 during the early part of the week. There appears to be a good, active demand on spot for Argentine corn, one local handler having sold eighteen cars over night. Due to the brisk inquiry prices, it is claimed, have advanced 5c a bushel within the past few days.

WESTERN CANADA.

A. Caldwell, Correspondent.

Winnipeg.—Heavy rains over large areas in central Soskatchewan have greatly improved crop prospects in that province, but conditions in Alberta leave much to be desired. There have been some local rains that have benefited districts but the province as a whole cannot expect to have anything but a light crop.

In Alberta conditions seem to be very similar to those prevailing in Western Saskatchewan. The only districts reporting sufficiency of rain being from the Edmonton country. Carmangay, usually the center of a magnificent wheat producing area, reports "wheat ruined." The irrigated lands at Lethbridge, Brooks and Bassano report excellent crops and a first crop of alfalfa has been gathered in the pink of condition.

As regards the market, there is little doing and what trade is being done reflects the fluctuations at Chicago. The board of grain supervisors has assumed control of the milling wheat in the eastern storage elevators except that held for the account of the Wheat Export Company, and will apportion the supply to the various mills. The Lake Head terminals are now almost bare of wheat and there is practically nothing in the interior in the way of carry over from last year's crop.

Reviewing the situation by provinces, Manitoba is in excellent condition. There is abundance of moisture, practically no damage from hot, arid winds and the damage from hoppers and other insect pests of no great moment. The probabilities point to Manitoba having a very fine crop of all grains and an excellent crop of both wild and domestic hay and potatoes. Fodder corn, which is growing in importance year by year, never looked as well. The oat crop in Manitoba is the least promising of any, but it can be described as generally good.

In Eastern Saskatchewan conditions are quite on a par with Manitoba, but central and western Saskatchewan have had a bad time of it with extreme heat, hot winds and dry weather. It is pleasing to note that the drouth has been broken, but wheat will be very short in the straw and has matured too rapidly. Many districts report wheat heading out while only 6 to 8 inches high. Oats are generally poor, but in the great oat country centered around Yorkton and Canara they are excellent. Flax is in poor condition, barley fair and with a sufficiency of moisture may recover.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Harriss, Magill & Co., Inc., steamship agents, have been proposed for membership in the Commercial Exchange.

William Behrens, bag manufacturer and member of the Commercial Exchange, is back again from a successful trip in Virginia.

Exports for the week ending June 27 were 293,271 bus. wheat, 107,775 bus. corn, 215,280 bus. oats, 65,000 bus. rye and 40,000 bus. barley.

Lieutenant Joseph A. Klump of the General Headquarters, A. E. F., has returned from over the seas and appeared on 'Change again.

Receipts of grain for the week ending June 28 were: 15,850,035 lbs. of flour in sacks; 78,218 bus. of wheat; 35,996 bus. corn; 655,371 bus. oats; 299,764 bus. rye; 319,305 bus. barley; 60,000 bus. malt and 340 tons of feed.

A. Judson Stiles, the well known and very popular grain broker, has been recuperating at Montclaire, N. J., for a couple of weeks and will now go with his family to Beechhaven, N. J., where they will spend the summer.

Sergeant Charles A. Wenz, formerly a well known grain broker and member of the Commercial Exchange, who enlisted in the Canadian Army Service Corps, has just arrived from over the seas and been mustered out of the service. He will now return to his old business on 'Change, where he is very popular among the members.

J. F. Armstrong, sales manager of the Eagle Roller Mills Co., New Ulm, Minn.; Louis Hill, grain shipper, Indianapolis; F. F. Hasbrouck, grain dealer, Peoria, Ill.; F. G. Atkinson, of Washburn, Crosby & Co., Minneapolis; H. S. Heffner, grain dealer, Circleville, Ohio; W. D. Saunders, Richmond, Va.; W. F. Heck, Pittsburgh; H. W. Hilyard, Kenton, Del.; G. B. Thorn, Crosswicks, N. J.; R. E. Lewis, Dover, Del.; and M. D. Fennell, Lynch, Md., were registered on 'Change.

A testimonial dinner was tendered on Tuesday evening, June 24, at the White Marsh Valley Country Club to C. Robert Bean, Marshall M. Ford, Cecil Wilson and S. Gartland Horan, four young members of the Commercial Exchange who have recently arrived from France and mustered out of the service. The dinner was presided over by James L. King, a former president of the Commercial Exchange. Addresses were made by H. De Witt Irwin, second vice-president of the Food Administration Grain Corporation; C. Herbert Bell, president of the Exchange; Hubert Horan, president of the Flour Club; H. N. Dean, Harry M. Edenborn, whose son is still over in France, and others of the honored guests. About seventy-five guests were present and the occasion was one of the most enjoyable events in the history of the Country Club.

CINCINNATI.

George Mosbacker, Correspondent.

John Kelly, associated with the feed and hay business of the W. H. Kramer estate is traveling through the South in the interests of the firm.

"Jack" Gartner, secretary of the D. O. Cross Co. and manager of the hay department of the firm, left Saturday for a month's business trip to Eastern cities.

The Mutual Commission Co. had the proud distinction of receiving the first car of new clover hay of the season, which they disposed of on the plugging tracks at $28.75 per ton.

According to estimates furnished by W. Stone, County Agricultural Agent, the total yield of wheat for Hamilton county (Cincinnati) will exceed 300,000 bushels this year.

Charles S. Custer, manager of the local branch of the Cleveland Grain Co., who has been visiting the Cleveland, Ohio, offices of the firm for several days, has returned to his home.

The Cincinnati Grain and Hay Exchange has issued a booklet of the "Rules and Regulations Governing the Grain and Hay Trade of Cincinnati," which can be secured by shippers and others interested upon application to D. J. Schuh, executive secretary.

R. H. Dyer, Federal Inspector of Equipment, United States Railroad Administration, met with the representatives of the mechanical departments of the several railroads entering the Cincinnati terminal with an object of directing particular attention to the condition and equipment of grain cars before the big movement begins.

W. H. McMurtrey, one of the most popular and efficient members of the local Federal Grain Standards offices, has resigned as a grain supervisor to accept a position as traveling representative for the Early & Daniel Co. Mr. McMurtrey's thorough knowledge of grain testing and grading, together with his extensive acquaintance among traders and producers, will make him a valuable acquisition to the Early & Daniel force.

E. B. Terrill, president of the Cincinnati Grain and Hay Exchange, will forward letters this week to the officials of the National Hay Association and to the delegates of the convention to be held in Detroit in July in an effort to hold the 1920 convention of the association in Cincinnati. His Honor, the mayor, the Cincinnati Chamber of Commerce and the Cincinnati Hotel Men's Association, have joined the Grain and Hay Exchange in extending a cordial invitation to the members to meet here. Cincinnati offers every facility as a convention city, with convenient, comfortable and ample hotel accommodations, splendid convention auditoriums and meeting places for handling the largest of sessions. The committee in charge will give as widespread prominence as possible to the city's favored location as an ideal convention city, and also plan to include publicity advertising of a sort which will be most effective. More detailed information will be supplied in the next issue of the Price Current-Grain Reporter.

Cash Markets.

Wheat—The relatively higher prices prevailing in other markets caused a steadier tone to the local wheat situation the past week, but the demand was unimproved, and buyers apparently awaited more the new crop movement. Prices were nominally irregular, and fluctuated according to the number of inquiries received from nearby mills for necessary operative supplies. The best price secured during the week was $2.37 for a car of No. 2 red sold after 'Change hours. Split cars, smutty and sample wheat comprised the bulk of the receipts. No. 1 red winter, track, $2.36@2.37; No. 2 red winter, track, $2.34@2.36; No. 3 red winter, track, $2.32@2.34; low grades, as to quality, $1.85@2.32.

Corn—Corn prices reached the top of the season when a sale of a car of No. 3 white at $1.89 was recorded. White grades, however, were at a premium all the week, owing to the eagerness of demand by grinders, who expect a considerably smaller movement of corn when wheat harvesting and hay baling becomes more general throughout this territory. Yellow grades also sold better and at firmer prices both for local and shipping account, but mixed especially grading below No. 3 was dull with the moderate offerings neglected. No. 2 white $1.89@1.91; No. 3 white, $1.87@1.89; No. 4 white, $1.83@1.85; No. 5 white, $1.81@1.83; No. 6 white, $1.78@1.80. No. 2 yellow, $1.87@1.89; No. 3 yellow, $1.85@1.87; No. 4 yellow, $1.82@1.84; No. 5 yellow, $1.80@1.82; No. 6 yellow, $1.78@1.80. No. 2 mixed, $1.84@1.85; No. 3 mixed, $1.83@1.84; No. 4 mixed, $1.81@1.83; No. 5 mixed $1.79@1.81; No. 6 mixed, $1.77@1.79.

Oats—The oats market was dull and easy throughout the week, and prices 3c to 4c lower. Receipts were comparatively liberal, but consisted largely of country purchases for elevator interests. No. 2 white, 72½@73c; No. 3 white, 71½@72c; No. 4 white, 70@71c; No. 2 mixed, 70½@71½c; No. 3 mixed, 70@70½c; No. 4 mixed, 69@70c.

MILWAUKEE.

Erich E. Meyer, Correspondent.

The directors of the Milwaukee Chamber of Commerce voted to adjourn on July 5, which with July 4 and Sunday, July 6, will give three consecutive holidays.

Wheat flour production at Milwaukee mills for the past week reached 10,500 barrels, or 59 per cent capacity. Two thousand five hundred barrels of rye flour were produced.

NEW WHEAT

We are prepared to handle heavy consignments of the new crop to the complete satisfaction of shippers, and in conformity with the desires of the United States Wheat Director.

We are in the market for good HAY, OATS and BARLEY at all times.

MAX BLUMENTHAL
CINCINNATI, OHIO
Edward A. Smith, Mgr. Hay Dept.

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

The Milwaukee Grain & Feed Co. was fined $100 in District Court after pleading guilty to selling feed without proper labeling. A charge of selling without proper license was dismissed

Shipments of grain from Milwaukee for the past week were 830,290 bus. oats, 125,040 bus. corn, 685,842 bus. barley, 29,066 bus. wheat, 16,200 bus. rye; total, 1,686,138 bus., against 859,797 bus. the preceding week and 524,415 bus. a year ago

Grain receipts at Milwaukee for the week ending June 28 were 336 cars barley, 16 cars corn, 345 cars oats, 27 cars wheat, 39 cars rye, 2 cars flax; total, 795 cars, against 1,143 cars the week before, 415 cars a year ago and 653 cars in 1917.

On returning to Milwaukee after an auto tour, Harry A. Plumb, secretary of the Chamber of Commerce, declared crops in the surrounding territory were never better. Corn looks especially good, he said, and farmers are well satisfied with weather conditions so far.

In the local cash grain market, under more favorable crop news during the past week values showed moderate losses, barley being 2c lower for the period, corn 2@3c cats 2½c, rye 7@8c, while wheat ruled unchanged. The movement is moderate and the demand good, both domestic and export

The Canada Atlantic Transit Co. has resumed lake service with two vessels from Milwaukee to Depot Harbor, Canada, and connecting with points beyond in New York and New England. Until the company's own wharf at 272 South Water street is ready, the Ruthland wharf at 16 West Water Street is being used

W. M. Bell and W. A. Hottensen, well known Milwaukee grain men and officials of the W. M. Bell Co., Milwaukee, are members of a new grain firm organized as the Bell, Huntting & Co., Inc., at Sioux City, Ia. Associated with them is F. H. Huntting, for several years manager of the Atlas Elevator Co. at Sioux City, who will manage the affairs of the new concern in the capacity of vice-president and general manager.

The Boosters' Club of the Milwaukee Chamber of Commerce attended the annual convention of the Tri-State Grain Dealers' Association at Minneapolis June 25 to 28. Many unique methods were used to advertise the Milwaukee grain marts at the conference. The trip was made in a special car, more than thirty members composing the party. Hugo Stolley was chairman of the committee in charge of the arrangements.

Visitors registering at the Milwaukee Chamber of Commerce during the past week included the following: G. Flipse, Sheboygan, Wis.; H. Flow, Minneapolis, Minn.; C. E. McDonald, Burt, Ia.; F. H. Hunting, Sioux City, Ia.; C. H. Howard, Omaha, Neb.; G. C. Larson, Chicago, Ill.; Chas. B. Helmuth, Chicago, Ill.; W. E. Weeks, Davenport, Ia.; E. Klatscher, New York, N. Y.; W. H. Barrett, Salt Lake City, Utah; J. E. Heaney, Buffalo, N. Y.; J. E. Carter, Menominee, H. A. Draers, Horicon, D. R. Mehills, Fond du Lac, Wis.; Wm. M. Hirsch, Aberdeen, S. D.; E. A. Knight, E. O. Moffatt, Kansas City, Mo.; H. Kirth, Mozamanie, F. A. Miller, Manitowoc, F. De Brown, Green Bay, A. J. Pick, West Bend, A. E. Mory, Appleton, C. Coldman, Elkhart Lake, Wis.; F. S. Radway, New York, N. Y.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

Amended articles have been filed by the Crescent Milling Co., Cynthiana, Ky., increasing its capital from $21,000 to $42,000

The Glendale Mill & Elevator Co., Glendale, Ky., capital $15,000, has been incorporated by Al Cox, D. B. Lewis and others.

A. C. Schuff & Co. and the Louisville Board of Trade will shortly have a case heard before the Louisville District Freight Traffic Committee involving the milling in transit privilege at Lexington grain through Louisville, milled product to New Orleans and Mobile for export

The corn and oats markets have been stronger, while there has been a good demand and fair movements. No. 3 white corn was quoted today at $1.91 in cash car lots. No. 4 white, $1.89; No. 3 yellow, $1.86½; No. 4 yellow, $1.85½; No. 3 mixed, $1.86. Oats—No. 2 white, 74c; No. 3 white, 73½c; No. 2 mixed, 72½c.

Today marked the completion of the long reign of John Barleycorn in Kentucky, a state which has been a leader in the manufacture of bourbon whisky as well as a large brewing center. The loss is a severe one to the cooperage, grain and a few other interests. However, there is still a chance for the brewers, and hope springs eternal

Rains during the past ten days have held back wheat cutting, while hot weather is reported to have caused much wheat to become overripe. Fair weather has existed during the past two days, with reports of a fair outlook. Unless wheat is harvested this week there is a strong chance of severe losses of fine quality, good yield wheat.

S. T. Ballard, head of the Ballard & Ballard Co., Louisville, has purchased the interest of the C. T. Ballard estate in the business, valued at $1,500,000,though incorporated at only $30,000. G. Breau Ballard resigned. Mr. Ballard has announced that employes would be given the privilege of holding stock up to about one-third of the total issue, this being the first time that anyone outside of the Ballard family has had an opportunity to hold stock.

FT. WILLIAM, ONT.

The Hon. A. K. McLean, Acting Minister of Trade and Commerce, Ottawa, called a conference of grain dealers, transportation men and producers in Ottawa on Wednesday, June 18, to discuss the best method of marketing and handling the Canadian 1919 wheat crop.

Representatives were present from the Winnipeg, Fort William, Toronto and Montreal grain exchanges, from the railway companies, lake carriers, millers, Board of Railway Commissioners, Board of Grain Commissioners, Board of Grain Supervisors, Wheat Export Company and farmers. The Canadian Trade Commission was represented by Mr. Lloyd Harris and Sir Charles Gordon.

A round table discussion took place as to the best method to be adopted for moving the new crop, and it was soon evident that there were two distinct opinions. The millers were very anxious for a further government guarantee, giving as their reasons that transportation and finance were barriers that could only be overcome with the help of the Dominion Government. The farmers' representatives also considered that the government should give some form of guarantee on account of the present world conditions. The Winnipeg, Fort William and Toronto grain exchange representatives considered that the government should, immediately after the signing of peace, allow the law of supply and demand to rule. The grain dealers felt that the time had come for the government to leave the grain business alone and felt that the grain exchanges were quite capable of moving the new crop.

It was evident from the speeches of the minister, and also from a speech of the Rt. Hon. Sir Robert L. Borden, Prime Minister, that the government was not anxious to maintain any measure of control in respect to the new crop. The government has the matter under advisement and announcement may be expected any day as to the method that will be adopted in the handling of the 1919 wheat crop.

The following delegates were present: Winnipeg Grain Exchange—President F. J. Anderson, Vice-president J. E. Botterill, C. Tilt. Fort William and Port Arthur Grain Exchange—Vice-president N. M. Paterson, Secretary C. Birkett. Toronto Board of Trade, Grain Section—A. O. Hogg, J. T. Melady. Montreal Corn Exchange—A. P. Stuart, J. Burton. Board of Railway Commissioners—Sir Henry L. Drayton. Board of Grain Commissioners—Chief Commissioner Leslie H. Boyd, Commissioner J. P. Jones. Board of Grain Supervisors—Acting Chairman J. C. Gage, Secretary H. Tooley.

TOLEDO.

Carl Bryant, Correspondent.

John Wickenhiser and his son Fred of the grain firm of John Wickenhiser & Co., returned Friday from a three weeks' motor tour through the East.

F. W. Applegate, of the Mennel Milling Co., and G. A. Kreagloh, of the Toledo Field Seed Co., have been elected to membership in the Toledo Produce Exchange.

A. M. Donovan, of the Toledo Elevator Co., operating the old steel elevator on the east bank of the Maumee River, has made application for membership in the Toledo Produce Exchange.

Farmers and business men at Genoa, O., have formed an elevator company and will erect several large concrete grain bins on the site formerly occupied by the Powers elevator, recently destroyed by fire.

Inspection charges were revised by the board of directors of the Toledo Produce Exchange Monday to be effective starting July 1. The new rates are: Wheat and rye, $1.75; all other grains, such as corn, barley and oats, $1.50. Bulkhead cars are $3.

The following members of 'Change will attend the convention of the Indiana Grain Dealers' Assn. at Indianapolis, June 2: John Luscombe and Joe Doering, of Southworth & Co.; Bill Cummings, of J. F. Zahm & Co.; C. C. Schaaf, of H. W. De Vore & Co., and W. A. Boardman, manager of the East Side Iron Elevator Co.

Harry R. De Vore of H. W. De Vore & Co. is back on the job after motoring through the New England states. He brought back many fine snapshots of mountain scenery and views throughout New York state. He was accompanied by Lou Burlingame of the S. W. Flower Co., Charles Mollett of The Lake Erie Milling Co. and Frank Wilson.

Kent. Keilholtz, of Southworth & Co., graciously submitted to a good, old-fashioned spanking Tuesday. The occasion was his thirty-fourth birthday. When he made his appearance on the floor he was promptly taken in charge by "Big Ed" Churchill, the Jess Willard of 'Change, who did his best to keep Kent, quiet while the members lined up to wield the paddle.

L. J. Schuster, secretary of The Raymond P. Lipe Co., spent four days of last week with the trade in western and southern Ohio. He says storms have done considerable damage in that section and wheat suffers from disease. Wheat in Henry county, he reports, is afflicted with joint worms and rust; Mercer County, army worm; while in Allen and Hancock counties top of heads are dry and empty and show smut.

Claude Whitney, local manager for E. W. Wagner & Co., returned this week from a tour through Ohio, Indiana, Illinois and Iowa. He says he has never seen a more beautiful crop of growing grains. "Everything from Toledo to Davenport, Ia., was in fine shape, especially the late corn through Illinois. Indiana and Illinois had just enough rain to help corn and with these fine hot nights you can almost see it grow."

There is a good cash demand here right now and bidding on spot corn and oats is particularly active. Receipts the past week were very liberal. Prices declined a few cents toward the close of the week along with the decline in the futures market. No. 1 white oats brought 70c Saturday; No. 2 white, 69⅞c; No. 3 white, 69½c. A car of No. 2 yellow corn sold for $1.82. Receipts this week were: Wheat, 8 cars; corn, 16; oats, 77; rye, 13; barley, 3.

Reports on the growing wheat crop are conflicting. While some reports show considerable damage from recent storms in this section others declare the soaking showers were just enough to provide the moisture needed. Lima, O., reports no damage. They expect the largest acreage and finest quality in years. Harvesting is under way in that section. Van Wert County has experienced near drought and rains there were beneficial to oats and corn as well as wheat.

The Toledo seed trade was well represented at the convention at Chicago last week. The following members attended the sessions: Fred. Mayer and Joe Streicher, of J. F. Zahm & Co.; John Luscombe, of Southworth & Co.; J. A. Smith and R. S. Sheldon, of the S. W. Flower Co.; W. H. Annin, of W. H. Morehouse & Co., and Walton Stone, of the Churchill Grain & Seed Co. The Toledo dealers were unanimous in their statements that it was the largest and best convention ever held.

John Luscombe, of Southworth & Co., has developed quite a fondness for water lately. He practiced the Annette Kellerman every day during his vacation at Clear Lake, Ind. Knowing about John's aquatic abilities, we thought he might bring home Walton Stone's expensive reel which Bill Annin lost at the lake last year. Bill prolonged his stay at the lake last summer and tried every method known to the piscatorial experts on 'Change in an effort to reclaim the reel.

Toledo grain dealers were greatly disappointed by the action of the Grain Corporation in eliminating this city as a buying station for wheat. Seaboard terminals will be taxed beyond their limits, dealers declare, and the country will be up against it for empty cars if wheat is going to be forced to the far eastern points. Country shippers of grain naturally prefer the interior terminal market and the shortest possible haul where grain may receive official inspection and weights and with the present depleted condition of car equipment they believe a big mistake is being made by discontinuing buying stations such as Toledo, Cleveland, Buffalo and Mansfield.

When he was a boy, Lou Ulrich, local manager of Lamson Bros. & Co., aspired to be President or a policeman. This week he became a policeman, or, to be specific, a member of the citizen's police detailed to night duty resulting from labor troubles in the city. Lou is patriotic and is a highly respected citizen of "Little Brooklyn," which is across the river, but when a crowd of "wild women," enraged because of an increase in street car fares, tried to "Vamp." him with the common paving brick, one of which found its mark on his back, Lou declared the party off and went home. He is back on the floor now and will continue to give speedy and efficient service in the execution of Chicago orders.

ST. LOUIS.

E. E. Reeves, Correspondent.

The Merchants Exchange will join in the movement to make a three days' holiday on July 4, 5 and 6, by closing July 5, as well as on July 4th.

The election of directors of the Farmers Elevator Co., of Laddonia, Mo., recently, resulted in the selection of the following directors: J. F. Parker, F. A. Lewton, George Williams, W. H. Bailey and E. J. Shobe.

Members of the St. Louis Grain Club will hold a meeting in the directors' room of the Merchants' Exchange, Monday, to discuss the grain to arrive rule.

Harry Watson, of Ichtertz & Watson, and "Herb" Mayer, of Mayer-Holbrook Co., Chicago, are out on a combined crop reporting and business getting trip in Missouri.

Philip Rothrock and Charles Barron, Federal Grain Supervisors at St. Louis, returned Thursday from Chicago, where they went to attend a conference of supervisors from the leading markets of the country.

George J. Schulte & Co. on Saturday received advices of the arrival at St. Louis of a car of Arkansas wheat, the first car of the season, but it arrived too late to be sold on Saturday. It was shipped from Reyno, Ark.

A telegram to local dealers from Odin, Ill., says that the outlook is for a small acreage of corn there, on account of the excessive rains. The yield of hay will be about 80 per cent, with a smaller acreage than usual. There is a large acreage in oats, which appears to be in fine condition.

Charles Wilson, official sampler for the Merchants Exchange, and Mrs. Wilson, have returned from a fishing trip to Campsville and they have given such glowing accounts of their catch, and of the splendid fishing at that point, that Roger P. Annan and Charles Barron will spend the Fourth at that point.

Cort Addison, of the Addison Grain Co., of Kansas City, has purchased the membership certificate in the Merchants Exchange which was formerly held by E. A. Lemp, and is now an applicant for membership. Applications also have been filed by Robert T. Morrison, of the Morrison Grain Co., of Kansas City, and by Milton E. Veninga, of G. A. Veninga & Co.

George P. Gaennie, formerly of St. Louis, but who for a number of years has had charge of the New Orleans house of the Langenberg Bros. Grain Co., was a visitor on the floor of the Merchants Exchange Thursday, but departed that night for Kansas City, Omaha and Dallas. He is a son of Capt. Frank Gaiennie, a former president of the Merchants Exchange.

Ferdinand P. Meyer, president of the Camp Spring Milling Co., has made a satisfactory adjustment with the Government authorities and the mill at Nashville, Ill., which was closed a few weeks ago by the enforcement division of the Food Administration, will resume operations. After a few repairs are completed, the mill will run day and night, to make up for lost time.

Advices from Nashville, Ill., say that last Wednesday night's rain and electrical storm did much damage in the oat fields, making it difficult to cut the grain. Cutting oats will begin as soon as the weather permits. In some sections all the wheat has not been cut and the fields are too muddy for the harvesters. Corn was also badly blown down. Thus far 13 inches of rain have fallen this month, breaking all records.

A. T. Johnson, terminal manager for the U. S. Railroad Administration, has confirmed the order for "designated tracks" on which all cars of grains are to be placed, on their arrival at St. Louis, or East St. Louis, according to a letter from Mr. Johnson, which was received by Charles Wilson, official sampler for the Merchants Exchange. This was requested by the survey committee at its recent meeting here.

On Thursday, July 3, the members of the Merchants Exchange will vote upon a proposition to "amend paragraph 7, of Section 2 of Rule VIII," so that when amended the paragraph shall read as follows: "On and after July 5th, 1919, regular contracts for oats for future delivery shall be for 'Contract' oats, and on such contracts, a tender of any or all of the following grades shall be sufficient: No. 1 white oats, No. 2 white oats, No. 3 white oats, provided, however, that on all No. 3 white oats so tendered three cents per bushel shall be deducted from the contract price."

After a very brief, but promising existence, the Vincent M. Jones Commission Co., which was incorporated last week, with a capital of $25,000, has been absorbed by the Producers Grain Commission Co., which has been organized by the incorporators of the former company, with a paid up capital of $100,000. The new company will occupy the office of the former company at No. 201 Merchants Exchange building. The election of officers of the new company will be held as soon as the details of the new organization can be arranged. They will handle, hay, grain and seeds.

Chief of Police Sullivan and the Justices of the Peace in East St. Louis have solved the problem of contributing their quota of farm labor, and at the same time ridding the town of hobos. An order has been issued to arrest all nonresident unemployed, and all vagrants arrested in the next few weeks will be sentenced to serve terms in the harvest fields. All vagrants run in will be given the choice of accepting work in the harvest fields or serving jail sentences. Arrangements have been made with various county agents to receive the men as fast as they are sentenced. The wages paid for this work run from 45c to 60c an hour, with board and lodging.

Dr. A. G. Johnson, Agronomist for the U. S. Department of Agriculture, acting under Government authority, has taken measures to prevent the spread of the Australian "take all" in this section. Several thousand acres of the finest wheat land between Granite City and Edwardsville, Ill., which were found to be infected, will be marked off, and the crop taken by the Government. The grain on this land will be threshed by an outfit which will not be allowed to touch any other grain until it has been thoroughly disinfected. All of the grain from this infected area will be withheld from the market, and the Government will require the farmers to put in other crops on the infected land until all trace of the disease has been stamped out.

The first of the new steel barges which are being constructed for service between St. Louis and New Orleans, of the Federal Barge Line was launched by the American Bridge Co., at Pittsburgh, Thursday afternoon. It is stated that one barge will be launched every two weeks at Pittsburgh, and the barges will be rushed to completion as soon as possible. According to the contractors, the barges can be made ready

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

J. N. Hynes has purchased the Julius Sundet elevator at Volga, S. D.

A new elevator is planned for Forestburg, S. D., by the Farmers' Union. Work will start shortly.

George Gackle of the Gackle Grain Commission Co. was married last week to Mrs. Martha Hiller of Minneapolis.

J. S. Eales and E. C. Prescott have applied for traveling representatives' licenses to represent the Godfrey-Blanchard Co.

The New Munich (Minn.) Farmers' Elevator Co. has decided to purchase the Belgrade Milling Co. elevator at Melrose, Minn.

Thomas Hanlon, formerly with Bartlett-Frazier Co., and recently returned from France, is now a pit trader for the Brown Grain Co.

A building permit has been issued for a $100,000 addition to the Morrel Packing Co. plant at Sioux Falls, S. D. Excavation work has started.

There will be no session of the Minneapolis Chamber of Commerce on July 4-5-6. Members decided to close from Thursday at 1:15 p. m. to Monday morning at 9:30.

E. A. Cawcutt, formerly a partner in the Northern Grain Commission Co., is now vice-president of C. C. Wyman & Co. He made the change shortly after returning from the army.

Inheritance taxes of $11,951 were paid to the state of Minnesota last week on the $553,347 estate left by George C. Bagley. Mr. Bagley left an automobile and an annuity to his widow and the balance of the estate to his son, Ralph Bagley.

The following requests for transfer of membership in the Minneapolis Chamber of Commerce Association have been posted: From A. E. Patton to H. F. Shepherdson, A. O. Cornwell to R. B. McLean, A. C. Gary to Jesse L. Smith, W. G. Ainsworth to R. E. Tearse.

Cash Wheat—The demand for good milling wheat is excellent and prices are advancing steadily. Offerings have been fair recently, more than sufficient to take care of current requirements of mills, but owing to the reports of wet wheat in the southwest the millers are anxious to accumulate some good dry old crop wheat. Local mill-

ers take the bulk of the daily offerings, but there is a fair demand from interior mills. No particular demand from eastern mills lately. The quality of the wheat arriving here averages rather low, but no good milling wheat is neglected by the buyers. Durum wheat is still very slow in tone and little of it sells better than the government price.

Crop news is very mixed. Too much rain is reported in southern Minnesota and parts of South Dakota. The Montana crop is pretty well gone, but fair rains were received in dry sections of North Dakota. Black rust has been reported by a number of Minnesota and North Dakota points. A few reports came from the Red River Valley district of North Dakota. Scattering reports came from South Dakota, too. The weather turned cool and favorable just as these reports began to come in rather freely.

Corn—The demand for good dry corn of the sort that will keep in hot weather was rather sharp, but the medium and low grade offerings were in dull demand and weak in tone. Only a small proportion of the offerings were of good quality. Farmers have not been shelling very freely of late on account of the hot weather and danger of the corn heating in transit. The new crop is doing much better than it was a short time ago, as there has been more opportunity to cultivate the fields. In parts of southern Minnesota damage has resulted from too much water in the fields.

Oats—Elevator companies were the principal buyers of oats and the demand was not very snappy most of the week. There was a good feeding demand for choice oats and only a moderate proportion of the arrivals graded choice. Prices steady compared with the futures. No. 2 white selling at July price to ½c over, No. 3 white at ½@1½c under and No. 4 white at 2@5c under.

Rye—The demand for rye is steady and prices are firmer compared with the futures. Elevator companies still buying and hedging in the futures. Most of the local supply has been re-hedged in the September futures. Receipts are holding up well. Millers have been better buyers of choice rye of late and they raised the premiums on that kind. Crop news mixed. Some blighted rye fields have been found right around Minneapolis and unfavorable reports of the rye situation have been coming from all over the Northwest. However, a big crop is promised for harvest. No. 2 sells at 1@2c over July, No. 3 at 1@2c less.

Canadian Wheat to Greece.

From Toronto comes the report that wheat in all Canadian elevators has been commandeered by the Board of Grain Supervisors in order to provide Greece with 15,000,000 bushels within the next 12 months. No shipments can be made at present without permits from the Board.

Have Moved Offices.

The offices of L. F. Brown, secretary of the American Feed Manufacturers' Ass'n, were moved July 1 to Room 601, 53 Jackson Blvd., Monadnock Block, Chicago from the Montgomery Bldg., Milwaukee. The growth of the association has made this change necessary.

Cincinnati Wants It.

The Cincinnati Grain & Hay Exchange have sent an invitation to the National Hay Association through its secretary, J. Vining Taylor, to hold its 1920 convention at Cincinnati. The Cincinnati Chamber of Commerce, his honor the Mayor and the Cincinnati Hotel Men's Association have joined with the Exchange in extending a cordial invitation to the National Hay Association. The hotel men have guaranteed the National Hay Association against any increase in hotel rates and the Cincinnati Chamber of Commerce will lend its ready aid in making the convention a most pleasant one. We predict a large crowd of Cincinnati hay and grain men at the Detroit meeting with a live booster committee, and as the boys generally get what they go after, it looks as though Cincinnati will welcome the National Hay Association in 1920.

TRADE MENTION.

The Walter A. Zelnicker Supply Co. of St. Louis has added 2,000 square feet to its present office space at 325 Locust St., St. Louis, Mo., an increase of 33⅓%. This improvement will enable this organization to continue to efficiently render Zelnicker service.

C. U. Snyder of C. U. Snyder & Co., Chicago, well known to the feed trade and a large handler of blackstrap molasses, while going from his office to the Union League Club on Tuesday, June 30, was hit by a motorcycle and suffered a dislocated ankle and compound fracture of the bones of the leg. He was taken to the Mercy Hospital where he is getting along very nicely. However, Mr. Snyder will be laid up for some time. He was all ready to start on his vacation July 1 for Lake Champlain to be gone for the month of July, and had his tickets, etc., in his pocket ready to go.

The Ellis Drier Co., Chicago, in its Catalogue No. 26 makes one acquainted with the Ellis Portable Drier for drying wheat, corn, oats, beans, peas, soya beans, etc., through a series of very fine half tones which graphically illustrate various details entering into the manufacture of the drier, manner of assembly after shipment is made, and the patented feature as regards heating the drying air. To those contemplating the installation of drying machinery we recommend a perusal of this catalogue which may be secured by addressing the Company.

Edw. A. Pratt of Chicago and Peoria, the specialist in tax accounting, auditing and grain trade problems generally, has just returned from an extended Eastern trip. Those who have received his advice and learned of its value in making income returns and on the ordinary garden variety of accounting problems will be further interested in his statement that the capital stock tax report is the most important thing on the docket. Your case may be simple. On the other hand, it might be intricate; and the expert advice of the Edw. A. Pratt Audit Co. may save you money. Address them at City Hall Square Bldg., Chicago, or at their other offices in Peoria, Moline or Quincy, Ill.

To those country elevator operators who have not yet provided themselves with the necessary facilities for taking care of auto trucks, which will in large measure transport the grain crops this fall, the last call is sounded for taking care of the 1919 crop at least by the Automatic Combination Dump Co., who urge promptness in placing orders for their product which accommodates the auto truck as readily as the box wagons which have been in use for so many years. The Combination Dump unloads a motor truck filled with grain as quickly and with as little effort as a wagon is dumped, and it is said that any ordinary mechanic can install it and start it working. Adddess the Automatic Combination Dump Co., 502 Grain Exchange, Omaha, Neb., for bulletin which sets forth in a most lucid manner the advantages of such an installation and depicts the dump in various stages of operation.

BAG SITUATION.

The past week has witnessed a very excited burlap market. Spot goods advanced to even higher levels and large bag consumers are buying burlap as far ahead as next spring. The general impression is that we will not see any lower figures before that time, and that high spot values will continue to move forward. We consider a nominal value for 8 oz. today, June 24, as 11½c per yard, and 10½ oz., 13c per yard. From these figures it will be noted that light weight burlap has doubled in value from the low point while heavy weights have only moved forward about 5c or 6c per yard.

May shipments from Calcutta are reported as 51,000,000 yards, or 14,000,000 short of the United States monthly requirements.

The high prices are apparently caused by the pronounced shortage in supplies, the imports to the United States for the past six months being only 60 per cent of the normal consumption.—*Bosworth Bag Company, Memphis, Tenn.*

SHAFFER & STREAM PRIVATE WIRES.

In view of the prominence earned by John J. Stream as Coarse Grain Administrator, from which position he only recently resigned, there is peculiar interest in the announcement of the new private wire system to be inaugurated by Shaffer & Stream and J. C. Shaffer & Co. Much has appeared in this paper and elsewhere regarding the long service of these old houses as grain merchants, with elevators in Chicago and broad connections everywhere. In their present announcement therefore that a line of private wires at Rochelle, Bloomington, Hoopeston, Springfield, Ill., is arranged and others are contemplated, the country trade may be assured if they do not already realize it of the excellent character of all that goes with the cash and future grain business of these associated firms. The Chicago market with its unquestioned advantages as a receiving, storing and processing location, ideally situated to accept the country shipments of Central northern and Western states for distribution and export as may be desired has in its growth been assisted by men of these firms who have been very long identified with Chicago's grain trade. In addition to Mr. Stream those best known because of their outside contact with the trade are Earle Martin Combs and Wm. Hirschy. Competent wire managers have been appointed to conduct the company's business at various points where offices will be maintained, who will of course be glad to hear from old and new friends.

HANDLING WHEAT.

All dealers under contract with the Grain Corporation must follow Federal wheat grades as closely as possible. Those who have the proper equipment can determine the moisture and dockage, while those who have not will have to just use their best and honest judgment in determining these items. Buyers will not be entitled to dockage unless it is 1 per cent or more, and dockage is deducted from the gross weight just as is the weight of the wagon, and only the net weight is paid for. Record must be kept of every lot of wheat bought and scale tickets given the farmer should show the grade and dockage. Dealers must establish No. 1 as their buying basis, deducting 3c for No. 2, 7c for No. 3, and the grades below No. 3 must be bought on their merits at prices that reflect their commercial values as compared to No. 1.

Too great stress cannot be placed upon the proper grading of the wheat. The farmer is entitled to the grade that he delivers, but is not entitled to a higher grade.

The margin of handling must necessarily be small and no dealer can afford to permit any farmer to deliver wheat in such condition that it will be in worse state when it reaches the terminal.

We have no intent to advise you not to handle poor wheat. It has a value and the farmer is entitled to receive this value, but you are not required to pay him for the privilege of handling it, and under the present rules and regulations you are very likely to do that unless you exercise due caution.—*See'y Culbertson, Illinois.*

Cotton in New York on June 26 was advanced to the highest levels known, the high for July being $33.98; for October, $33.78; January, $33.50; March, $33.55.

News of the Country Grain Trade

ARKANSAS.

Shirley, Ark.—F. M. Eubanks and G. C. Jennings of Shirley have erected a flour mill at this place.

Fort Smith, Ark.—The Western Grain Co. is building a new office building which will cost approximately $3,000.

Hoxie, Ark.—The Hoxie Milling Co. is laying the foundation for its roller mill and corn elevator. Contractors are rushing these buildings to completion.

CALIFORNIA.

Woodland, Cal.—Following the destruction of the Meier Grain Warehouse, the Union Warehouse was destroyed later in the day. Fires were of incendiary origin. Loss on two of the warehouses $25,000.

IDAHO.

Nampa, Idaho.—Plans to build a 400 bbl. flouring mill and another grain elevator with a capacity of 185,000 bushels were formulated at a meeting of J. K. Mullins and other leading officials of the Colorado Milling & Elev. Co. with their local manager Otto Knoche.

ILLINOIS.

Fairfield, Ill.—H. G. Ferguson took an interest in the Gaddis Flour Mills here.

Ludlow, Ill.—Work is progressing on the remodeling of the Ludlow Grain Co. elevator.

McLean, Ill.—The Funk Grove Grain Co. has increased its capital stock from $25,000 to $75,000.

Plymouth, Ill.—Mr. Turner of Avon has been engaged as manager of the Plymouth Farmers' Elevator Co.

Dubois, Ill.—The Dale Malting & Milling Co. has been incorporated with a capital of $24,000 by John Dale, John C. Dale and Wm. Garrison.

Gibson City, Ill.—Geo. W. Walker has sold his grain business and elevator at Gibson City and Derby to Everett E. Hamman of Decatur, who has taken possession.

Decatur, Ill.—The new branch office of Harris, Winthrop & Co., in charge of Finley Baker, is going fine. In fact, another man is to start traveling from the Decatur office, which is located in the Citizens Bank building, to round up the full share of business that the long standing reputation of the company merits.

Chatham, Ill.—T. H. Maddox, 60 years old, one of the best known grain dealers in Central Illinois, who was struck by a C. & A. train while riding in an automobile at Chatham, died at a Springfield hospital. Mr. Maddox operated a grain elevator at Chatham for a number of years and was secretary of the Illinois Grain Dealers' Association at one time.

INDIANA.

Otterbein, Ind.—The Farmers' Elevator Co. of Otterbein has increased its capital stock from $30,000 to $100,000.

Jonesboro, Ind.—The Jonesboro Elevator and C. & O. Coal Yards were sold by W. R. Brock to R. J. Morgan of Mexico, Ind.

McGrawsville, Ind.—A Farmers' Co-operative Co. has been organized with a capital of $50,000. D. T. Kesseler is president.

Logansport, Ind.—The Logansport Elevator Co., recently organized, has purchased the C. C. Bishop elevator at this place.

Kennard, Ind.—A. D. Shirley has purchased an elevator at this place, consideration being $14,000. He took possession July 1.

Osgood, Ind.—The Farmers' Mill & Elevator Co. has purchased the Geo. D. Ruoff flour mill and elevator. Possession has been given.

Royal Center, Ind.—The Farmers' Co-operative Grain Co. has been incorporated with a capital of $50,000 by Bert Williams, J. A. Kistler, Albert O. Brandt.

Montmorenci, Ind.—The Montmorenci Elevator Co. has been incorporated with a capital of $25,000. Directors: Wm. Burkle, John Martin, Jr., J. E. Marshall.

Swayzee, Ind.—The United Grain & Supply Co. has been incorporated with a capital of $25,000. Directors: Robt. McGobbon, James A. Curless and John A. Peterson.

Bippus, Ind.—The Bippus Co-operative Association has been incorporated to deal in grain, etc., with a capital of $10,000. Incorporators: Edw. Wetters, Clarence D. Eberhart and W. Albert Bickel.

South Milford, Ind.—Work has commenced on the new grain elevator at South Milford to be erected by the Home Grain Co., with headquarters at Lagrange. The building and equipment is to cost approximately $14,000 and will be completed within 60 days.

IOWA.

Clinton, Ia.—Contractors have begun the excavation for the Macx Milling Co. buildings.

Mondamin, Ia.—The Farmers' Elevator Co. is making extensive improvements in the office building.

Red Oak, Ia.—The elevator of Turner Bros. at this place was destroyed by fire on June 23. Loss about $30,000.

Herndon, Ia.—The Farmers' Grain & Lumber Co. has been incorporated with a capital of $25,000. Ed Rothfold is president.

New Sharon, Ia.—H. McVeigh of New Sharon has purchased the elevator at Taintor from Paul and J. E. Johnson of Oskaloosa.

Hancock, Ia.—The Farmers' Co-operative Elevator Co. has been incorporated with a capital of $50,000. Incorporators: J. W. King, Guy Coe and L. Brandis.

Lytton, Ia.—The Lytton Farmers' Elevator Co. held its annual election recently. Henry Kruskop was elected president; H. Rix, vice-president; Carl Cooper, secretary.

Sioux City, Ia.—A new drier will be installed at the plant of the Terminal Grain Elevator Co., which will have a capacity of 750 bushels of grain an hour and cost $25,000.

Ladora, Ia.—Contract has been let for the new elevator of the Ladora Lumber & Grain Co. The building which is to be built of concrete is to be 40,000 bushels capacity.

Vail, Ia.—North Bros. & Co. and the Vail Mill & Elevator Co. have been consolidated. F. L. North has acquired a third interest in the business, together with A. J. and Wm. Adams.

Davenport, Ia.—The Community Milling Co. has filed articles of incorporation; capital, $25,000. H. H. Meyer is president and treasurer, Walter M. Balluff, vice-president, and C. R. Marks secretary.

Oyens, Ia.—Fire recently destroyed the elevator at this place, causing a loss of about $8,000. The building was owned by the Plymouth Milling Co. of LeMars and contained about 400 bushels of grain.

Atlantic, Ia.—Farmers will attempt to float a $25,000 farmers' co-operative elevator company. A temporary organization has been formed with Chas. Malone, head of the Malone Seed Co., as president and A. S. Ballentice secretary.

Davenport, Ia.—An amendment to the articles of incorporation for the Farmers' Mutual Elevator Co. has been recorded, providing for the issuing of capital stock in the amount of $50,000. Henry Stoltenberg is president and Chas. Paustian secretary.

Hanlontown, Ia.—The Farmers' Elevator Co. of Hanlontown held its annual meeting recently, electing the following offi-

KANSAS.

Douglass, Kans.—W. N. Harris is rebuilding and enlarging his elevator.

Keats, Kans.—Roy Hulse of the Hulse Lumber Co. is erecting a new elevator.

Linwood, Kans.—The Linwood Elevator Co. has been incorporated with a capital of $6,000.

Olathe, Kans.—The Hadley Milling Co. has completed the erection of a new office building.

Luray, Kans.—The Farmers' Elevator Co. has been incorporated with a capital of $10,000.

Lyons, Kans.—The Farmers' Elevator on the Frisco will be managed this year by Clarence Phillips of Aldeh.

Claflin, Kans.—E. P. Owens of Claflin has taken a position as head miller in the Monarch Mill in Hutchinson.

Yates Center, Kans.—The Farmers' Co-operative Elevator Co. has been incorporated with a capital of $25,000.

Fontana, Kans.—The Farmers' Co-operative Grain & Coal Association has been incorporated with a capital of $5,000.

Whitman (R. D. to Belle Plain), Kans.—Whitman Grain & Elevator Co. has been incorporated with a capital of $25,000.

Corning, Kans.—The Farmers' Elevator Co., E. A. Miller, manager, has purchased the elevator of the Corning Elevator Co.

Emporia, Kans.—A new elevator with a capacity of 15,000 bushels was completed recently for C. W. Hoyt & Son, wholesale grain dealers.

Turon, Kans.—Tom Caruthers has taken charge of the Pacific Elevator. Mr. Caruthers was formerly with a grain elevator at Lyons.

Minneapolis, Kans.—The new elevator being erected by John Wolfersperger is nearing completion. It has a storage capacity of 12,000 bushels.

Navarre, Kans.—A farmers' co-operative elevator of 22,000 bushels capacity will be built by the farmers in the community. Excavation has been started.

Hutchinson, Kans.—A. G. Evans, who has been connected with the Federal Grain Corporation at Kansas City, has taken a position with the Hugoton Elevator & Warehouse Co. in Hutchinson.

Lyons, Kans.—The Farmers' Union is building a new flour and feed warehouse which will be completed within a week. Floor space is 60 x 16 feet and the building will be fireproof, ironclad.

Manhattan, Kans.—The Farmers' Union is building a fireproof, concrete elevator which will have a capacity of 20,000 bushels of grain. The total cost of elevator, warehouses, etc., will be nearly $50,000.

Parsons, Kans.—Manager Aldo Funston of the Rea Patterson Milling Co. announces that the firm has moved from 2015 Gabriel street to new offices and warehouses at Twentieth and Stevens streets.

Coldwater, Kans.—The Diamond Star Milling Co. has been incorporated with a capital of $10,000. Walter L. Coko, president; B. F. Arnold, treasurer; J. H. Hoberecht, vice-president; and Crail M. Pennington, secretary.

Salina, Kans.—The H. D. Lee Mill has been shut down to install a wheat conveyor and make arrangements for the extension of its loading and unloading trackage at its plant which will triple its facilities for handling this season's wheat crop.

Westmoreland, Kans.—Westmoreland is to have a short process flour mill. Chas. Bairrow of Union recently bought the Commercial Hotel building in Westmoreland and will install a Midget Marvel Mill, manufactured by the Anglo American Milling Co.

Wamego, Kans.—The Farmers' Co-operative Mill & Elevator Co. has taken possession of the mill and elevator of the Lord Milling Co. H. L. Graham is manager; Henry Breymeyer, president; A. F. Floersch, secretary; and L. J. Brock, treasurer.

Iola, Kans.—The Iola Mill & Elevator Co. has been chartered with $20,000 capital by Glenn D. Finney, L. E. Harville and Paul Klein, all of Iola. A new elevator is being built by the company across the tracks from the Santa Fe station. A 10-ton Fairbanks wagon scale has been ordered.

Clay Center, Kans.—The power plant of the Snell Mill is being rebuilt this summer and the plant will be ready to operate again by July 10. Two new boilers of much larger capacity than the old are being installed, with arrangements made for the installation of another boiler at a future date. New condensing apparatus is also to be installed.

Larned, Kans.—The Larned Mill & Elevator Co. and the Sylvia Milling Co. have applied for a state charter for incorporation which has been granted for a new corporation to include both companies and to be known as the Sylvia and Larned Milling Co. Capital stock is $200,000. The main offices will be at Sylvia. John Stevens of Hutchinson, president; R. Romer, secretary-treasurer.

MICHIGAN.

Manistique, Mich.—A flour mill will be constructed here by W. S. Bryers of McMillan, Mich.

Jackson, Mich.—The Wagner-White Co., grain and feed dealers, are erecting a three-story building which will be used as a warehouse and office building.

Homer, Mich.—The Homer Farmers' Elevator Co. has been incorporated with a capital of $40,000. Incorporators: P. W. Schaberg, C. D. Sabin and Wm. McKennan.

Lansing, Mich.—Hobart Crouch, who was formerly employed in the grain department of E. L. Weliman Co., Grand Rapids, Mich., but lately returned from France, has gone with the Wickens Grain Co., Inc., of Lansing in the capacity of office manager.—J. Wickens.

MINNESOTA.

Austin, Minn.—The Farmers' Elevator at this place is nearly completed.

Jordan, Minn.—Construction work on the Farmers' Elevator at the M. & St. L. Station is under way.

Madison, Minn.—The Security Elevator of this place was sold to Math Heinzen and Leonard Jacobson, both of this city.

Ghent, Minn.—The Farmers' Elevator Co. has been incorporated with a capital of $10,000 by John A. Brewers and Leo Hennen and others.

Holloway, Minn.—J. S. Murphy has resigned his position as manager of the elevator at this place and has purchased an elevator at Danvers.

Red Lake Falls, Minn.—Albert Cairne reports his company will soon commence work on an elevator of 30,000 bushels capacity to replace the old one.

MISSOURI.

Forest City, Mo.—H. E. Combs has resigned as manager of the Farmers' Elevator Co.

Kansas City, Mo.—A new mill will be erected by the Kaull Milling Co. at Southwest boulevard and State line to cost $250,000.

Braymer, Mo.—The Farmers' Union has let the contract for a new grain elevator to be located on the south side of the Milwaukee tracks. It will have a capacity of 10,000 bushels.

Boonville, Mo.—The Pilot Grove Farm Club has been organized and will either build or purchase an elevator at this place. C. B. Sly, president; A. C. Harriman, vice-president; J. J. Maddox, secretary; E. B. McCutchen, treasurer.

Gilliam, Mo.—The Gilliam Farmers' Elevator Co. has completed its organization and incorporated under the name of the Farmers & Merchants Co-operative Elevator Co., with a capital of $15,000. R. L. Cannon is manager, with G. C. Mayfield as assistant.

Charleston, Mo.—The Charleston Milling Co. is making extensive improvements, repairs and alterations to its plant in South Charleston. The plant office has been moved across the street and one or two additional buildings erected in the mill yard and a third spur put in, affording better loading facilities.

MONTANA.

Froid, Mont.—Work has started on the remodeling of the Farmers' Elevator.

Ingomar, Mont.—The Ingomar Milling Co. has been incorporated with a capital of $50,000.

Lanark, Mont.—The stockholders of the Farmers' Elevator Co. plan to rebuild the elevator.

Ronan, Mont.—A flour mill will be built here. Frank Huot of Plains will have charge of it.

Choteau, Mont.—J. M. Baker Co. announce that they have purchased the elevator and interests of the Farmers' Elevator Co. of this town.

Nashua, Mont.—The Farmers' Produce Co. held its annual meeting recently and the following officers were elected: J. W. Haydon, president; A. E. Carlson, vice-president; J. M. Sholtus, secretary-treasurer.

NEBRASKA.

Strausville, Nebr.—The Farmers' Elevator Co. has been dissolved.

Osceola, Nebr.—A new set of platform scales are being installed at the Farmers' Grain Elevator at this place.

Gibbon, Nebr.—A contract has been let for a complete outfit of new machinery for the Gibbon Roller Mills which is to be installed in the new building to be erected.

NORTH DAKOTA.

Crete, N. D.—The Cargill elevator at this place was struck by lightning recently and burned to the ground.

Grace City, N. D.—H. H. Francisco has taken the management of the Co-operative Elevator, the position he held before going into the army.

Selfridge, N. D.—C. C. Wiemels of New Rockford, N. D., has been selected as manager of the Winter-Truesdell-Ames Co. elevator at this place, succeeding W. D. Idler.

Fargo, N. D.—The erection of a $40,000 grain elevator adjoining the tracks of the Northern Pacific Railway Co. is contemplated by the Interstate Grain Co. The Interstate Grain Co. has an elevator at Grandin. R. F. Gunkelman of Fargo is interested in the company.

OHIO.

Dayton, O.—J. F. Stewart of Piqua will go to Dayton as manager of the Piqua Milling Co. there.

Rogers, O.—Moff Brothers have purchased the elevator of J. C. Rinsley & Co. at Rogers. Some substantial improvements will be made.

Troy, O.—The recently incorporated Troy Grain & Supply Co. has purchased

Field Seeds

The Iowa Seed Co. has purchased a tract of land of 17 acres in a Des Moines suburb on which greenhouses will be erected.

In parts of Missouri it is reported that clover and timothy have made an exceptionally fine growth this year. A large acreage of new meadows seeded last fall and this spring have all done well.

A Holland seed dealer writes C. A. King & Co. that clover prices were very high last season but are now lower. However there are no stocks and no one seems to want to buy clover or timothy. Some trade is expected after the Peace Treaty is signed.

Chile, S. A., is usually an exporter of clover seed. Most of it however goes to Liverpool with an occasional lot to New York, Valparaiso being the chief shipper. A seed firm there writes C. A. King & Co. that estimates on the volume of the crop are difficult in the absence of official figures. The crop however was small and was somewhat damaged by rains.

Detroit Seed Prices.

Closing prices for grass seeds at Detroit June 27 were as follows:

Clover seed—		
Cash	$27.00	$27.00
October	24.00	23.50
Timothy seed	5.60	5.60

Canadian Seed Prices.

Farm seeds remain steady with fair demand for the season. Prices in Toronto are quoted by the Montreal *Trade Bulletin* as follows, per bushel: Alsike—No. 1 fancy $17@17.50, No. 1 ordinary $15.75@16.25, No. 2 ordinary $14.50@15.50; red clover, $18@24; timothy, $4@6; sweet clover, $8@9.50.

St. Louis Seed Market.

ST. LOUIS, Mo., June 28.—The seed market continues to be in a state of coma, as there is no seed offered from first hands, and there is practically no demand. Prices are nominally unchanged, as follows: Stock peas, whippoorwills or new era, per 100 lbs., $8.95@9; sorghum cane seed, black amber, $2.25@2.35 per 100 lbs.; millet, golden, $4.75@5.25; Siberian, $3.50; common, $3.25@3.50; hog millet, $3.10@3.15; clover, $25@30 per 100 lbs; timothy, $11@11.50 for good seed per 100 lbs.; choice recleaned worth more; inferior, less; sunflower seed, $15 per 100 lbs.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending June 28, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs.	.....	30,000	440	80,300
Clover, lbs.	150	.....	110	.....

Chicago Seed Prices.

The timothy market opened the week steady in tone, but a somewhat easier feeling developed the day following. Sales of the cash article ranged from $10.50@11.25 during the week and country lots were quotable at $9@12, according to quality. The clover market is quiet and featureless except that on Friday a stronger undertone developed and contract prime which had been nominally quoted at $45 for some time past made a gain of 80c. Country lots were quotable $25@40, according to quality. Daily range of prices for the week ending June 28 follow:

Timothy—	June.	September.	October.	
June				
23	$12.75A	$13.40B	$13.75A	$12.50B $13.00A
24	12.75A	13.40B	13.90A	12.45 .....
25	12.75A	13.50B	13.75A	....
26	12.75A	13.40B	.....	..... 12.75A
27	12.75A	.....	13.90A	..... 12.75A
28				

Clover, contract prime—			
June 23	$45.00	June 26	$45.00
June 24	45.00	June 27	45.80
June 25	45.00	June 28	45.80

Kansas City Seed Market.

KANSAS CITY, JUNE 18.—Recent uneasiness felt concerning the ravages of the army worm in alfalfa of the second growth has partly subsided, and there is comfort, also, in more settled weather conditions for the hay harvest. Lower prices for hay are a factor in favor of leaving a larger acreage for seed. Prices of old seed here continue to be quoted nominally on a range of $11 to $18 per cwt. The Kansas crop report for June says the first cutting of hay made 1.32 tons per acre, but that 50 per cent was damaged by rains at harvest. Both cutworms and grasshoppers have been a serious menace to the second cutting, especially in the western part of the state. The loss is estimated as high as 40 per cent.

Stripping of blue grass seed is going on in Missouri and Eastern Kansas, with prospects for a big yield. A report from Doniphan county, extreme Northeastern Kansas, says professional pullers from Missouri are operating there. While Kansas City seed houses are showing acute interest, they still withhold public quotation of prices for seed in the rough. Dealers say they are awaiting the curing of seed and the size of the harvest and also the course of the Kentucky seed market. It is promised that within another week or 10 days the market in Kansas City will be established.

With the arrival of a few cars of new timothy hay the interest in timothy seed has increased, but there are no definite indications as to the amount of seed to be saved. Central Missouri has made numerous complaints as to crop damage from army worms and grasshoppers. In the timothy regions of Kansas little complaint has been heard. Prices of old seed here were marked up 50c this week, to $9@11.50 per cwt.

Clover seed possibilities are still obscured by the hay situation. Harvest-

Chicago Seeds Movement.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 19 19 and 1918, in pounds (000 omitted):

438-40 Whitesboro Street, Utica, N. Y.

ing of hay in Missouri and Kansas is progressing under difficulties imposed by the lateness and heaviness of the wheat crop. No new clover hay has appeared in the market. Acreage is not supposed to be up to the pre-war normal, but the crop has shown a good promise except where damaged by cutworms or other insects.

Belated demand from scattered localities for cane seed is keeping the market firm. The seed is wanted for forage production. Trade in millet seed is over for the season. The Kansas crop report says the acreage devoted to sorghums in that state is less than last year.

Seeds are quoted in Kansas City as follows:

Alfalfa—Per cwt, $11@18.

Timothy—Per cwt, $9@11.50.

Cane seed—Per cwt, red top, $4@4.50; orange, $3.50@4; amber, $2.25@2.50.

Millet seed—Per cwt, golden, $4@4.50; Siberian, $3.25@3.75; common, $2.50@2.75.

Toledo Seed Market.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending June 28:

	Range for week, High.	Low.	Close, June 28.	Close, June 21.
Clover—				
Cash	$27.50	$27.00	$27.50	$27.00
October	25.00	24.30	24.75B	24.55
December	24.65	24.00	24.30	24.25
Alsike—				
October	22.25B	21.15	21.35B	22.00
December	22.25B	20.65	21.00	22.00
Timothy—				
Cash, old	5.55	5.50	5.50	5.55
Cash, new	5.55	5.50	5.50	5.55
September	6.12½	6.10	6.10	6.12
October	5.90A	5.75	5.75	5.90
December	5.90	5.80	5.80	5.90
March	6.05	6.00	6.00	6.05

Duluth Flaxseed Market.

DULUTH, June 28.—The past was an eventful week in the flaxseed market in a trading way. Under the influence of urgent bidding, both on the part of crushers and on speculative account, the highest prices in the history of the trade were established. Spot and July seed hit the $5 mark on Wednesday, and on Thursday the figure was boosted to $5.10. From that figure, however, the market receded 9c before the session was over, on a rush of realizing. Crushers refused to follow up the advance, and support came in only after substantial recessions had been made. On the net result for the week, gains up to 23½c in October were set during the week.

From a statistical standpoint, operators on the long side are considered to have all the best of the argument, but whether the setting of abnormally high prices in the product is wise is thought to be a horse of another color. It is claimed in some quarters that a good proportion of the outstanding contracts in the July future are of country origin and that deliveries of seed will be made upon them in due course.

While some operators have grown more bullish as prices have been advanced during the last few weeks, claiming that quotations might easily be put up several notches further in view of the supplies of flax in hand and receipts from the prospective new crop being inadequate to take care of the heavy linseed oil demand from Europe, and for domestic consumption, others point to the disastrous experiences of numerous "wise ones" in the past who have been caught holding the bag in contracts entered into at high prices, and they advise caution. Some of the experts agree that the outlook for the present season's crop in this country is against its exceeding last fall's tally in view of the drought in Montana and the unfavorable outlook in parts of western North Dakota, but as the market stands now they contend that Argentine flax can be laid down at the Atlantic Seaboard at $1 a bushel below the present price basis on this market.

Receipts of flaxseed on this market during the last week aggregated 41,019 bushels, against 8,344 bushels last year, and shipments were reported at 73,442 bushels, leaving 99,000 bushels supplies in the elevators.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous week and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$5.05-7	$4.88½	$3.91¼
To arrive	5.05	4.88½	3.91¼
July	5.05	4.88½	3.91¼
September	4.91	4.71	3.93
October	4.70	4.46½	3.81½

Louisville Seed Market.

LOUISVILLE, KY., June 30.—Bluegrass seed is well stripped, and is promising to cure nicely. Prospects are for a crop of 600,000 bushels or more. Prices promise to be strong. A pool has been formed at Winchester, Ky., of growers from various counties, who pooled 100,000 bushels at the meeting, and have since secured a large amount of poolings. Reports are to the effect that some small lots of seed have changed hands at $1.75 a bushel, which would figure about $2.75 for 21 lb. seed after cleaning.

Orchard grass is cut and in the shock in many instances, and is a promising crop. Good weather from now until threshing should guarantee a good crop of fine weight and color seed.

Minneapolis Flaxseed Market.

MINNEAPOLIS, June 30—The July future at Duluth finally reached the $5 level. Around that figure there was some profit taking and hesitancy, but today there was a wild upturn on reports that Argentine markets were up 20c a bushel. There is a keen demand for choice seed as the crushers are doing the biggest linseed oil business on record. A round lot of it was sold for export for the first time in years. Country offerings are running heavier than the trade expected, but none of the seed of desirable quality is neglected. The new crop will not be as large as expected at the outset of the season owing to the damage in Montana, where

THE FARMERS PLATTE VALLEY MILLING & ELEVATOR CO.
Buyers and Sellers of all kinds of Grain and Seeds. Colorado Hard Wheat Flour.
FORT MORGAN, COLORADO

the weather was dry and a lot of the fields failed to germinate. The situation in North Dakota is favorable on the whole and the crop in Minnesota and South Dakota is doing well. No. 1 seed on spot sells at Duluth July price to 2c over, to arrive at 2c under to 2c over.

Rudy-Patrick Seed Co.

A local paper at Ft. Madison, Iowa, of recent date says: It has been announced by the members of the industrial committee of the Fort Madison Chamber of Commerce that the Rudy-Patrick Seed Co. of Kansas City, had secured the old packing plant, Wissmath, and will immediately begin extensive improvements and alterations on the buildings preparatory to locating their plant here.

Flaxseed Condition.

The Van Dusen Harrington Co. crop report for the week ending June 24 says that the general flax condition in Minnesota, South Dakota and eastern North Dakota was very satisfactory. There was plenty of moisture and with warm weather the plant has come along in wonderful shape. Some advices say that the crop never looked better than in those districts. In western North Dakota however the crop is very spotty and in Montana except in a few restricted districts the crop will be light.

Iowa Seed Poor.

At the recent session of the Iowa convention of seed dealers, at Des Moines, Prof. H. D. Hughes, of Iowa State College, told the seed men that the average quality of seed sold to Iowa farmers this year was poorer than ever before. He declared that other states were discriminating against seeds originating in Iowa. He suggested that county agricultural agents be encouraged to obtain samples of seeds sold in their counties and send them to the state agricultural experiment station, at Ames, to be tested for germinating power and purity, and that the results of the tests be published.—*Wallaces' Farmer.*

Seed at Toledo.

Clover seed touched the high water mark again last week at Toledo and $25 clover seed at this time of year really looks high in the opinion of many big dealers. They realize, however, the danger of bucking a buying wave like the present one, and know it must spend itself sooner or later. Present buyers may be right even at the high point, but the growing conditions all over seem to indicate an average crop, barring sections here and there that say no seed at all; say grasshoppers have destroyed the crop, etc.

Alsike did a little more last Saturday. Crop reports rather favorable, on a fair acreage.

Timothy took a vacation and prices were practically the same as week ago, except October which lost a few points. Lightest trade in a long time and may be duplicated for another month when much should be learned as to what the Central Powers will do, and whether their wants will be larger or smaller than figured on.

New crop is still a puzzle.—*J. F. Zahm & Co.*

Clover and Timothy.

Bears are going slow even at the record prices of clover account the absence of stocks. Crop reports are good, but acreage is short. We suggest taking profits on long seed, although prices could easily go much higher in event of damage.

Despite good crop conditions, the outturn cannot be very large, and domestic demand is expected to keep prices high. This in spite of considerable exports of fair grade of seed by Italy caused by their lack of funds over there and desire to cash in on our high prices.

Timothy stocks very large. Everybody seems to have some. Even if Europe develops a big demand, it appears as though some of this is discounted by present high prices. Market will need fresh support to absorb the new crop offerings in addition to the liberal carry-over.—*Southworth & Co., Toledo.*

NEW AND OLD OATS GRADINGS COMPARED.

On June 16 the new Federal standards oats grades became effective. We have said nothing so far, preferring to await developments in the actual application and operation of the new grades. In this connection figures speak best, and the statement following gives a comparison of the old and new grading:

OLD INSPECTION.

Week ending June 14th—

2 white oats	52 cars	11%
Standard oats	417 cars	89%
Total	469 cars	
3 white oats	504 cars	92%
4 white oats	46 cars	8%
Total	550 cars	

NEW INSPECTION.

Week ending June 21st—

1 white oats	32 cars	10%
2 white oats	298 cars	90%
Total	330 cars	
3 white oats	466 cars	75%
4 white oats	149 cars	25%
Total	615 cars	

Oats formerly grading 2 white and standard are now grading proportionately the same as 1 white and 2 white. There is no change to be noted here. As to oats which graded 3 and 4 white there is a decided difference, with a big increase in the percentage which now grade No. 4.

If the present interpretation and application of the new Federal inspection prevails the natural conclusion must be that the new grading is more severe and disadvantageous as relates to the producer and country shipper. Generally speaking, the standard has been raised as to quality, test weight, heat damage and wild oats and lowered only as to admixtures of sound other grains.

The moisture content is a new feature which will be a contending factor in the grading of new crops for a brief period after harvest. The new rules state that "white oats include yellow oats," but it remains to be seen whether inspectors can accurately differentiate between natural and stained oats.

Shippers need to exercise caution in buying oats, for if light in weight, badly stained, weathered or ground-damaged the grade will be No. 4, and if heat damaged it will sample grade.

CANADIAN WHEAT ACREAGE.

Frank O. Fowler, sec'y The Northwest Grain Dealers' Association, Winnipeg, under date of June 23, makes the following estimate of the acreage under crop in Manitoba, Saskatchewan and Alberta, for season of 1919, compared with 1918:

	Acres. 1918.	Acres. 1919.	% inc. 1919.
Wheat	15,526,000	16,085,000	3.6
Oats	9,133,000	9,626,000	5.4
Barley	1,955,500	1,955,500	...
Flax	1,000,000	1,000,000	...
Rye	200,000	216,000	8

"Owing to the strike," says Mr. Fowler, "we have had great difficulty in getting reports from our correspondents and a great number have not been received at all; but, judging from what we have received, considerable areas in Saskatchewan and Alberta are needing rain badly, while other districts, especially Manitoba, have had plenty of rain and crop prospects are splendid."

The grain situation as compiled by Mr. Fowler is as follows (000 omitted):

Date, June 21.	Wheat.	Oats.	Barley.	Flax.
Inspected to date	124,922	28,457	10,799	2,375
In transit[1]	500	3,000	500	175
In store[2]	4,000	300	100	25
Seed[3]	36,000	.....	.....	.....
In farmers' hands	750	1,500	.....	.....
Total	166,172	33,257	11,399	2,575
Dual inspection	1,500	.....	.....	.....
Net wheat	164,672	.....	.....	.....

Rye inspected to date, 1,179,000 bus.
[1]Not inspected. [2]At country points. [3]Also in feed and country mills.

VAN DUSEN HARRINGTON REPORT.

The Van Dusen Harrington crop report, June 25, says that during the week heavy rains fell in southern Minnesota and eastern South Dakota, where the crops in the lowlands have suffered considerably. In western Minnesota the bad wind storm covering several counties did considerable damage to the crops. The balance of Minnesota and South Dakota is in excellent condition, the only complaint being that warm, drying weather is necessary, as the growth of the grain is too rank. This condition is favorable for the development of rust. In the eastern half of North Dakota conditions remain excellent, but the western half, while greatly benefited by recent rains, is spotted and more moisture is needed. Except in limited areas, Montana conditions are very poor. Lack of moisture and the extremely high temperatures have hurt the prospects. In Minnesota, North and South Dakota the hot weather has forced the wheat until it is almost as early as last season. In many places, it has started to head, and in some of the dry districts of North Dakota it is heading at from six to eight inches high.

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons as compiled by the secretary of the Chicago Board of Trade for the week ending June 28, 1919. (000 omitted).

CLIMAX SUPERFINE BRAND.

This is a one act play with just one scene. It does not ordinarily require more to prove up with **SMALL'S FIELD SEEDS.**

The two fields above show on one side the prosperous looking natural results obtained by the successful farmer.

The other field is weedy and badly run down, and as it is only across the road, we can hardly blame the soil, or difference in rainfall or sunlight. It must be something else.

The farmer and his son are talking things over and the latter has just returned from the poor field and in speaking to his father says: "Dad! Let us buy Small's seeds again. Look at the difference between our fields and John Smith's." Father knew all about this difference before it was called to his attention, but is frank enough in getting down to brass tacks to admit in replying to his son, "There is a **DIFFERENCE IN SEEDS,** and we'll quit monkeying around with any old seed and **BUY** all of ours from **SMALL'S.** Their quality and service can't be beat."

CLIMAX SUPERFINE BRAND.

BROOM CORN.

Field reports to the *Broom Corn Review* indicate that considerable replanting has been done in portions of the broom corn area. Considerable apprehension is felt in western districts on account of grasshoppers, and should the damage prove to be serious it may result in cutting the stand of the sorghums, in which case there may be some increase in the acreage to broom corn which is a shorter maturing crop. The acreage this season so far planted shows a decrease as compared with a year ago, the greatest shortage being in the northwestern districts of the area. The market has been slow; buyers are not as numerous as they have been, but prices offered for corn show no material change, running from $65@100 with some special qualities held by farmers at $150 or even $200. In Central Illinois the growing condition is very good. Dealers there report business fair with considerable corn moved during the past week at $180 to as high as $230. The highest prices quoted have been for several cars of Lindsay corn which brought $250@260.

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago decreased 26,000 bu. last week, and corn 153,000 bu. while oats increased 1 429,000 bu., rye 21,000 bu. and barle 161,000 bu. Detailed stocks follow, th last three ciphers omitted except in th totals.

	Public.	Private.	Total.	Last yr
Wheat	.....	199,000	199,000	21,00
Corn	484,000	1,070,000	1,554,000	4,341,00
Oats	902,000	3,642,000	*4,597,000	2,423,00
Rye	1,127,000	559,000	1,686,000	393,00
Barley	689,000	694,000	1,383,000	271,00

*Includes 53,000 bu. afloat.

Beans and Potatoes

The feed demand is generally poor in the Pacific Northwest, some oats and barley moving locally but the market is anything but active.

The potato acreage is reported increased in North Dakota and about normal in Michigan. The balance of the early potato crop of Virginia is expected to run 60 per cent only and early estimates of shipments from Norfolk are not expected to reach 500,000 bbls.

There seems to be a growing demand in the Eastern states along the Seaboard for Argentine corn and inquiries from country points are said to be growing quite numerous. Owing to the high price of Western and the difficulty of moving it eastward, considerable business in the Argentine article is not unlikely between now and September 1 when new corn should move.

Colorado Potato Shippers.

The Colorado Potato Shippers' Ass'n at a special meeting at Denver a few days ago adopted resolutions endorsing the work of the Bureau of Markets, including the inspection and market news service of Colorado.

Officers of the association are as follows: Z. J. Fort, president, Denver; Grant Wilson, first vice president, Greeley; E. J. McNamara, second vice-president, Kansas City; W. E. Anderson, third vice-president, Greeley; I. E. Ingle, treasurer, Greeley; W. T. Richards, secretary, Denver. Directors—W. H. Ross, Eaton; H. B. Crandall, Denver; Ben Gibson, Monte Vista; J. E. White, Carbondale; P. E. Boyle, Greeley; W. H. Garvin, Delta; Z. J. Fort, chairman, Denver.

BEAN SITUATION.

DEMAND FOR BEANS IMPROVING.

MICHIGAN (8).—The demand for beans seems to be improving the last few days. The stocks in this territory are very low; do not think you could scare up five cars of beans in this county. Acreage planted is probably 25% less than last year.—*The Huron Milling Company, R. M. Jenks, Secretary, Harbor Beach, Mich.*

MICHIGAN BEAN CROP.

MICHIGAN (9)—Acreage to beans this year is about 50 per cent of last year. We find about 20 per cent of last season's crop still in first hands but farmers are generally holding for a higher price. The new crop is looking fine. There are some real early patches but mostly the crop will be from late plantings.—*Holly Grain & Produce Co., Holly, Mich.*

BEANS LOOKING FINE.

MICHIGAN (9)—We have about 60 per cent acreage of beans growing, crop looking fine, nice stand and good, healthy plants. The old crop beans are pretty well cleaned up, probably a car or so in this neighborhood in dealers' hands, probably a couple of cars still in farmers' possession.—*F. M. Houghton, Clios, Mich.*

BEAN AND POTATO PRICES.

Beans ruled slightly weaker last week. Potatoes, both new and old stock were somewhat lower in value. Quotations follow for lots of good quality and condition, sacked per cwt. unless otherwise stated as of July 28:

Beans—

Buffalo—Marrows, $10@10 50; mediums, $7@7.50; pea beans, $7@7.50; wh. kidney, $11@11 50; red kidney, $11@11.50.

Chicago—Trade slow, prices steady. Pea beans, hand-picked, ch. to fancy, $7.75@8; fair to good, $6.75@7.25; brown Swedish, $5@6; red kidneys, $11@11.50.

Cincinnati—Navies, $8.50; marrowfats, $12@12.25; red kidneys, $12.75; limas, $10; pintos, $7.50.

Denver—Pintos, paid to jobbers, $4.25@4.50; navies, $6.50@8.50; limas, $9@10.

Minneapolis—Navys, $8; brown, fcy., $6; Calif. limas, $11; soy beans, $5.

Montreal—The market continues steady for hand-picked beans. Business reported in jobbing lots of Ontario hand-picked beans at $4.25 to $4 50, and in car lots at $4. Quebec beans have sold in small lots at $3 50 to $3.75, as to quality.—Trade Bulletin.

New York—Calif. limas, $9 25@9.50; pinks, $7.50; red kidneys, ch., $12.75@13; ordinary, $11.25@12.50; pea beans, ch., $7.50@8; ordinary, $6.75@7.25.

St. Louis—Quote white beans in c. lots—ch. h.-p. Mich., $8.50; prime m.-p., $8; orders and small lots higher; pintos, $6. From store—Scotch peas, 7½c per lb., split peas green at 17c and yellow 7½c per lb. Per cwt., Calif. black eye, $5.50; ch. limas, $9.50; Calif. pinks, $7.50; wh., $8.—Market Reporter.

San Francisco—Limas, $9.50; lge. wh., $5.75; sma. wh., $6.50; black eyes, $3.75; pinks, $5.80; red Mexican, $4.25; cranberries, $5.75; red kidneys, $11.50; teparies, $2.50.

Potatoes—

Boston—Maine, 50c@$1 for old stock. New—East'n Shore, $6; Norfolk, $2@5.

Buffalo—Mich. rnd. wh., 10 pk. sk., $1@1.10; Va., bbl., $6.25@6.50.

Chicago—Old—Prices slightly higher, $1.50 for fancy blk. stk. New—Prices firmer. Ark.-Okla., $3.15@3.40; Va. cobbler, bbl., $6 75@7, jobbing price; N. Car. cobb., $5@5.75; tr Tex., gd., $2.25@2.50; Ark. tri., $2.50@2.75; La. tri., $1.50@2.50; Okla., $2@2.75; Miss., $2@2.75.

Cincinnati—Mich., Wis., rnd., wh., $1.65@1.75; La tri., $3.25; Miss. tri., $3.50@3.75; Ckla. tri., $3.50.

Denver—Wholesale prices to jobbers—Colo. wh., $1.75@1.80; red McClures, $1.85@2.10; burbanks, $1.75@2.15. New—Calif., $4@5.

Indianapolis—New—$4 per cwt.

Kansas City—New—Tex. tri., $2. Old—West'n wh. $1.60; russets, $1.75.

Minneapolis—New—Ebl., $11.

New York—New—Tri., $3.

Montreal—Receipts last week were 8,362 sacks, against 2,978 sacks the week previous, and 2,447 sacks for the same week last year. The market is weak under increased offerings of Green Mountains, Quebecs and Manitobas. Car lots of Green Mountains are quoted $1.40 to $1.50, and Quebecs at $1.25 to $1.30. Manitobas have arrived in very poor condition, partly rotten. One car sold as low as $1.15, the quality being poor.—Trade Bulletin.

Pittsburgh—Tex. red, $3.50@3.75; East'n Shore, $6@6.25 bbl.

Philadelphia—S. C., $2.50@4.25 bbl.; East Shore, bbl., $4.25@5.25 bbl.; N. J., ⅝ bsk., 85c@$1.

St. Louis—Old—North'n, 75c@$1; Colo. russet burbank from cooler, $2.25. Dmd. nil and season about over for old stock. New—Skd. tri., $2.50@2 85 f. o. b.; Ark.-Okla., h.-g., early Ohios, $1.15@1.25 per box.—Market Reporter.

San Francisco—Ore. burbank, $2@2.25; gems, fcy., $2.10@2.30. New—Garnets, $2.25@3; whites, $2.50@3; Deltas, $3.50. New—Early rose, $3.50@3.75; garnets, $3.25@3.50.

The Food Administration has given notice that the business of importing, manufacturing and storing of rice and rice flour has been decontrolled.

Peace at Hand.

The world is at peace once more. The significance of these words is far reaching. They bring joy and blessing to all humanity. Undoubtedly commercial relations with Germany will be resumed. A great demand for food and raw material, particularly, is expected from there. However, not only Germany is in need of the necessities of life and material to rebuild her shattered industries, but other nations as well have sadly depleted stocks. The war has been one of unprecedented destruction; it has entailed a notable diversion from productive to unproductive fields. The result has been underproduction, while consumption has increased. Hence Europe, as a whole, has a distressing and, in many places, alarming scarcity of raw material, machinery, food, fodder, fats, fertilizer, etc., which can and must be supplied by America. Thus America may view the future with equanimity. Economically it leads the world.—*Simons, Day & Co., Chicago.*

Feedstuffs

Tyrrell Feed Co. has been organized at Nichols, Tioga County, N. Y., with a capital stock of $75,000.

The Globe Milling Co. expects to begin the erection of a feed mill and two large warehouses at Stockton, Cal.

The Department of Agriculture has started upon a campaign to drive the rat out of agricultural districts. Some job!

The Martin Calf Feed Co., which has been operated by the John C. Martin Co. of Mineral Point, Wis., for a number of years, has incorporated its business with a capital stock of $75,000.

Stocker and Feeder Pigs at Ft. Worth.

The prospect of good feed crops in Texas is given as a reason for an increased demand at Ft. Worth for stocker and feeder pigs. A record price for this class of stock was reached on June 17, when a small lot was sold at $18.10 per cwt. Up to June 1, 1919, there were 51,871 stocker pigs sent to pasture and feed pens from this market. This number represents 12.8 per cent of the total hog receipts, and shows 38,622 or 9.58 per cent shipped interstate and 13,249, or 3.23 per cent shipped intrastate.

Cottonseed Feed Trade Dull.

KANSAS CITY, June 28.—Quiet continued in the market for cottonseed cake and meal in Kansas City this week. Practically no feed is being offered, nor is any important buying noticeable. Southern feed interests are offering 43 per cent protein cottonseed cake for September, October and November delivery at $65 a ton, basis Texas points, but dealers in Kansas City are not taking this price seriously. No trade, so far as can be learned, has been done on this basis with local dealers.

Cottonseed Meal Versus Oil Meal for Fattening Steers.

One of the common questions asked by cattle feeders is, "which is more valuable, cottonseed meal or oil meal?" During the past fifteen years there have been a number of experiments comparing the two feeds, most of them being slightly in favor of oil meal. One of the most recent experiments, and one which is most applicable to feeding conditions as they exist today, was conducted at the Pennsylvania experiment station last winter.

One lot of 800-pound steers was fed an average daily of 41 pounds of corn silage, 2 pounds of shredded corn stover, and 3 pounds of oil meal. The other lot was fed practically the same ration, except that cottonseed meal was fed in place of oil meal. After 140 days the oil meal steers had gained an average of 2.22 pounds daily, whereas the cottonseed meal steers had gained an average of 2.12 pounds daily. For 100 pounds of gain the oil meal steers required 1.850 pounds of corn silage, 95 pounds of shredded corn stover, and 136 pounds of oil meal, whereas the cottonseed meal steers required 1,940 pounds of corn silage, 85 pounds of shredded corn stover and 135 pounds of cottonseed meal.

The oil meal seemed to save enough silage to make it worth about $5 a ton more than the cottonseed meal. But this saving of silage was not the only advantage of the oil meal. The oil meal steers seemed to have a little better finish, and at the close of the experiment were valued 15 cents per cwt. higher than the cottonseed meal steers. On the basis of this experiment, oil meal would seem to have a value of at least $10 a ton more than cottonseed meal.—*Wallaces' Farmer.*

FERTILIZER MEN MEET.

The National Fertilizer Association held its annual convention at the Hotel Griswold, New London, Ct. last week. The morning of each day was given over to business sessions, dealing with problems of manufactured fertilizer, and the proper uses of fertilizer in its relation to soil improvement.

The Soil Improvement Committee of the National Fertilizer Association, whose headquarters are in Baltimore, also held its annual meeting at the Hotel Griswold the same time. W. D. Huntington, of the Davisson Chemical Co., is chairman of this organization, and Spencer L. Carter, president of the Rasin-Monumental Co., treasurer. The Soil Improvement Committee is the educational bureau of the National Fertilizer Association and as such, is responsible in a large part for the recent effort on the part of the fertilizer manufacturers to standardize fertilizer analyses, and is active in educational work along other lines, both inside the fertilizer industry and outside of it.

FEED MARKETS.

Montreal.

Montreal, June 27.—There is a fair demand for bran this week, sales being reported at $40 in carlots, and shorts have sold at $44.

CHICAGO.

Chicago, June 28.—Due to a very brisk demand mill feeds advanced sharply during the past week being $2 higher. A slight shortage in the supply was evident. Quote bran $36.50 and middlings $46.50, sacked.

TAMPA.

Tampa, Fla., June 27.—Shorts are offered at from $52 to $54, according to quality. The demand has been good during the past week from country buyers and some buying has been done for shipment to dealers. Receipts during the past week have been principally from Eastern mills, totaling about 6,000 bags. There has been a little demand for bran at $42@43.50 per ton, delivered. Hominy feeds have practically disappeared from dealers' stocks on account of the extreme high price of corn products.

DULUTH.

Duluth, June 28.—Specialists in the feed market here have had a slow time of it of late. Inquiry from the district was reported to be at a minimum in view of good pasturages being available. Outputs of millfeeds are small on account of the reduced operations of the mills with the scarcity of wheat supplies. Some millfeeds are being shipped east. With the exception of a jump in red dog to $58, prices are unchanged from a week ago as follows: Bran, per ton, $38; ground oats, per ton, $46.25; No. 1 ground feed, per ton, $58.50; No. 2 ground feed, per ton, $55.50; No. 3 ground feed, per ton, $52.50; shorts, per ton, $44; red dog, per ton, $52; Boston mixed, per ton, $44; cracked corn, per ton, $64.50; rye feed, bu., $35.

PHILADELPHIA.

Philadelphia, June 28.—The market for Feedstuffs is quiet but offerings are light and prices well supported.

Winter Bran in 100-lb. sacks, spot, $42 @43 per ton, and $41@42 per do to arrive.

Spring Bran in 100-lb. sacks, $41.50@ 42.50, spot, and $41@42 per ton to arrive.

Quotations for Feedstuffs in 100-lb. sacks to arrive are as follows:

Standard Wheat Middlings, $49@50 per ton.
Flour Middlings, $56@57 per ton.
Red Dog, $62.50@63.50 per ton.
Low-grade Flour, $62.50@63.50 per ton.
Rye Middlings, $43@44 per ton.
Fine Yellow Hominy, $70@71 per ton.
Fine White Hominy, $71@72 per ton.
Reground Oats Feed, $32.50@33.50 per ton.
Cotton Seed Meal, 36% protein, $69@70 per ton.
Cotton Seed Feed, 20% protein, $54@55.50 per ton.

MEMPHIS.

Memphis, June 28.—Activity in feed continues limited and prices remain about as they have been. Cotton seed meal has advanced to $62 and $63 a ton for 7 per cent in car lots, but there is not much for sale and buyers are taking it slowly, although showing more interest. Hulls are going very slowly and are quotable at $7.50 a ton loose in car lots. Wheat bran is very scarce, but demand is limited. Wheat shorts have been firm and scarce and on call today $54 was asked. Demand has come chiefly from manufacturers of the balanced hog and dairy feeds.

MILWAUKEE.

Milwaukee, June 28.—The mill feed market this week is firmer under a fair demand with limited offerings. The production is low, milling operations being limited. Bran is up $1.50, with standard middlings improving 50c, red dog $3, hominy and rye feeds 50c. Outdoor feeding limits the demand for mill feeds. Current quotations are: Bran, per ton, $36@36.50; standard middlings, $45@45.50; flour middlings, $50@51; red dog, $59; hominy feed, $65; rye feed, $37.50; old process oil meal, $68; cottonseed meal, $62.50@67.50; brewers' dried grains, $46; gluten feed, August shipment, $58.80, all in 100-lb. sacks.

BOSTON.

Boston, June 28.—Most wheat feeds lower than last week with moderate demand. Gluten, stock feed and cottonseed meal higher with light offerings. Oat hulls lower. Prices quoted as follows: Bran, spring, sacked, $41.50 per ton; bran, winter, sacked, $41.50; middlings, sacked, $48.00@ 51.00; mixed feed, sacked, $48.50 to $53; gluten feed, sacked, $64.92; red dog, sacked, $62.50; stock feed, sacked, $65.00; oats hulls reground, sacked, $31.00; hominy feed, sacked, $71.40; cottonseed meal, sacked, $73 to $77. Receipts for the week ending June 28th were 130 tons.

NASHVILLE.

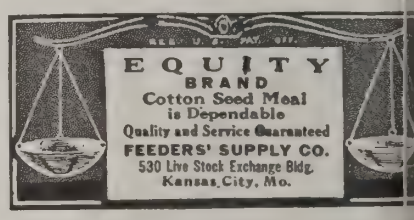
Nashville, Tenn., June 30.—There is scarcity of offerings of wheat bran and middlings, as mills are closed down waiting for new wheat. Other ground feeds are in good demand, and $1@2 higher because of high prices of grain. Quotations: Wheat bran, 100-lb. bags, per ton, $42@44; middlings or shorts, $52@54; horse and mule feed, $50@62; poultry feed, $72@78; dairy feed, $49@61; hog feed, $59.

ST. LOUIS.

St. Louis, Mo., June 28.—Offerings of feed stuffs are light, and wheat feeds particularly scarce, but the demand only fair, and the market steady, with quotations as follows: Bran, $37 to $38, spot in good demand at the latter price and futures offered at as low as $36 per ton, in 100 lb. sacks; middlings, gray, $52 to $53; brown, $49 to $50; futures counted up to as much as $2 per ton, according to the time of shipment; mixed feed, spot, $43.50; futures as much as $1 per ton less. White hominy feed, $65; feed offered at $26 to $26.50 per ton; whole ground barley feed, $52 per ton.

TOLEDO, O.

Toledo, June 28.—Millers report the local demand is taking all the feed they are able to produce and the outside inquiry very heavy. Mills here produced 19,000 brls. of flour this week. Bran is quoted at $42 and middlings $52 per ton in sacks, f. o. b. Toledo.



NEW ORLEANS.

New Orleans, June 28.—Dealers here are bidding about $1.80 per hundred for bran delivered New Orleans. Western mills are offering at about $1.92 for new and as low as $2.05 for old crop bran. Sales of a few cars of new crop bran have been made at about $1.80 delivered New Orleans, and no doubt, considerable business could

worked at this figure if mills were inclined to take this price.

NEW YORK.

New York, June 28.—During the early part of the week the demand for millfeed was fairly active, but toward the close of the period the inquiry showed a noticeable falling off and the market as a result closed a shade easier. Local distributors were rather anxious to make sales, some at slight concessions, but trade was limited to small amounts. City feed bran is quoted $40; Middlings, $48 in 100-lb. sacks; Red Dog, $62 in 100-lb. sacks. Western Standard Middlings are quoted $49 to $49.50 and Spring Bran at $41 to $41.50.

BALTIMORE.

Baltimore, June 28.—The fact that Western bran and middlings for July shipment are offered at considerably under spot prices, is causing the trade to take hold of wheat feeds only to the extent of their actual or near wants, in consequence of which there is no volume to trading and the market generally lacks support. Quotations follow: Spring bran, per ton, 100-lb. sacks, $40@41; Western middlings, per ton, 100-lb. sacks, $48@49; City Mills' winter bran, per ton, 100-lb. sacks, $47; brown middlings, per ton, 100-lb. sacks, $47; white middlings, per ton, 80-lb. sacks, $57.

PITTSBURGH.

Pittsburgh, June 28.—In some respects there is a decided improvement in the local market for feed and arrivals are keeping pace with the demand. More feed came into the market last week than for many months and the work of grading has not been entirely up to the requirements. No. 1 and 2 middlings are in plentiful supply, but there is very little bran to be had. Prices on middlings range from $40 to $50, while good grades of bran are bringing as high as $55 and $60 a ton. There is no regular quotations here.

MINNEAPOLIS.

Minneapolis, June 30.—There is a good demand for millfeed and prices are gaining ground quite rapidly. The delay in the movement of new winter wheat owing to rains at harvest time revived eastern and central states buying of local offerings and the drouthy weather in North Dakota and Montana resulted in a good demand from that territory. Large quantities of bran have been bought for poisoning grasshoppers by North Dakota counties. Offerings of feed are light, as the mills are not operating much of their capacity. Brokers own considerable feed and find a ready demand for what they have to offer. Heavy feeds are in steady demand and strong in tone. Shipping directions are prompt. Quotations in car lots, f.o. b. Minneapolis: Bran, $35.50@36; standard middlings, $45@46; flour middlings, $51@52; red dog, $57@58; rye middlings, $38@39.

LOUISVILLE, KY.

Louisville, Ky., June 30.—The demand for feed is rather light at this time, with mills offering very small supplies, and many not quoting. Mills are almost all down waiting for new wheat. Quotations are: Bran, $40; mixed feed, $47; gray middlings, $55; brown, $52; hominy feed meal, $70.

Alfalfa Products Co.

The Alfalfa Products Co., of Sioux City, Ia., recently announced their purchase of the controlling interest in the property which they are now operating. Alex Larson is president; R. C. Merrill, vice-president; St. Elmo Bateman, second vice-president; W. M. Mize, auditor and sales manager and J. M. Chicoine, secretary-treasurer.

The Sioux City market has had frequent extended mention in THE PRICE CURRENT-GRAIN REPORTER in connection with the Grain Exchange activities and the organization of a Hay Exchange. We have referred to the advantages of location, freight rates and manufacturing facilities for alfalfa meal and stock feed. The plant of the Alfalfa Products Co., although not a recent institution, has taken on new life under the above management, who advise that the former complete equipment is being further increased through the addition of a 15-ton track scale, a Richardson Automatic Six-bushel Scale, a battery of six Draver Automatic Feeders and a six-roll feed grinder, as well as other improvements. The company is now grinding new crop alfalfa and anticipates capacity operation throughout the entire year. They report an excellent demand for the millfeeds, which is only natural when we consider the company's growing popularity for the entire country and abroad and product that is so widely known, due favorable publicity and its merits in ding and mixing operations.

Stock feeders from Ogallala in the tral Nebraska wheat belt say there still some corn fed cattle in that reon with about the average number on ss. Pastures were never better.

Alfalfa Department

Dullness in Alfalfa Meal Market.

KANSAS CITY, June 28.—Extreme dullness characterized the trade in alfalfa meal in Kansas City this week. Buyers apparently have assumed a "watchful waiting" policy, and while stocks in the consumers' hands are reported as light generally, little interest is manifest in the current market. Mills offered only small quantities of meal, with grinding in Kansas and Oklahoma restricted because of condition of the hay.

Choice alfalfa meal was quoted at a range of $37@38 per ton, in sacks, carlots, basis Kansas City, about $2 lower than a week ago. No. 1 held around $34@35; No. 2, $30@31, and for No. 3, $28@29. The market for the poorer grades was extremely weak, owing to a predominance of offerings. Better quality meal displayed a firm tone.

Light buying was reported by manufacturers of alfalfa molasses and alfalfa grain molasses feeds. Excellent pasture conditions and comparatively low prices for oats were restricting influences. Mixers here are not attempting to do business with territory east of the Mississippi, confining their efforts to the West, Middle West and Southwest. Prices were unchanged, as follows: No. 1 molasses alfalfa feed at $38.50@39.50; No. 2, $37@38; brown, $35@36; alfalfa grain molasses feed, $45@54.

St. Louis Alfalfa Market.

ST. LOUIS, Mo., June 28.—The alfalfa feed market is very quiet, as there is the usual between-seasons lack of business, but meal is weak and lower, particularly the lower grades. Prices on mixed feeds are steady and unchanged. Offerings are sufficient to enable sellers to make prompt deliveries on all orders. Quotations are as follows: Molasses grain mixed horse feed, No. 1, $60@61; No. 2, $55; No. 3, $50; straight molasses alfalfa feed, No. 1, $45; No. 2, $42; No. 3, $39; alfalfa meal, No. 1, $37@38 for prompt; deferred shipments from $1 to $2 less; No. 2, $31 for new.

Alfalfa hay is quiet and easier, as most of the receipts are of poor quality, and the demand is confined mostly to high-grade hay. Hay for prompt shipment is filmly held, but deferred shipments are offered at a discount. Prices are as follows: Choice, $35@36; No. 1, $33@34; standard, $32@33; No. 2, $25@27.

Alfalfa Outlook.

"While the heavy damage to the first and second cuttings of alfalfa in Kansas and Oklahoma accounts for the strength in the market for this variety of hay in Kansas City, there is yet another important influence, serious drouth conditions in the Northwest," emphasized W. B. Poindexter, of North Bros., Kansas City. "Pastures of Wyoming, Montana and other of the Northwestern states are in poor condition, owing to the lack of moisture. This, of course, will divert Idaho alfalfa hay from Kansas City to that territory. Already, Idaho is moving some of its irrigated alfalfa into Wyoming and northern Colorado, an unusual situation. Unless the weather becomes more favorable in the Northern grazing districts, it is probable that Nebraska hay also will find its way into that section, while there is a probability, too, that Kansas City may be forced later in the season to supply a portion of the requirements of the Northwestern grazers. No large movement of alfalfa hay to market from Kansas and other Southwestern states is anticipated within the next few weeks, as farmers will be busy gathering their wheat. A scarcity of cars may later delay the movement."

Kansas Alfalfa.

Comments of Secretary Mohler of the Kansas state board of agriculture on the condition of alfalfa in the Sunflower State, made in his monthly crop report, were not a surprise to members of the Kansas City hay trade. Secretary Mohler's statements as to the heavy damage from excessive rains and as to the losses inflicted by cut worms were considered by hay dealers of the Kansas City market as conservative. The members of the trade who have been in instances made even higher estimates as close touch with the situation have in to the damage than noted by Secretary Mohler, and these calculations were employed in considering market developments. Mr. Mohler estimates that 50 per cent of the first cutting of alfalfa in Kansas was damaged by rain and that 40 per cent damage has been inflicted on the second crop by cut worms. Dealers here had estimated as high as 80 per cent, but the trade is inclined to accept Secretary Mohler's figures as accurate. Since the publication of the Mohler report, weather conditions for alfalfa in Kansas have improved. It is hoped the crop will be favored with ideal weather the remainder of the growing season. If not, this will be a very disappointing alfalfa year in the Southwest.

Small sales of second cutting alfalfa are reported from Oklahoma. The movement, however, is rather light.

The second cutting of alfalfa in eastern Nebraska was about ready to cut last week. A stockman from North Bend reported that he expected to get four cuttings this year, having done so every year except last, when the weather was unusually dry. The first cutting this year was a week earlier than usual.

A stock feeder from Silver Creek, Neb., reports that the army worm has done some damage to the second crop of alfalfa. Wild hay, however, was never better than now.

The first crop of alfalfa in the neighborhood of Wiesner, Neb., was in cutting last week. A good deal of it had been spoiled by the wet weather and the harvest delayed from the same cause.

Work has begun on an alfalfa meal mill at Lexington, Neb., which it is expected will be completed by Sept. 1.

It is reported from Red Oak, Ia., that the first crop of alfalfa in that section was good but that the worms are getting the second growth from which no hay at all is expected.

Generous rains over a widespread area is reported from the Canadian provinces on Friday last.

SEED TRADE CONVENTION

Sessions in Chicago of the 37th Annual Meeting—President's Annual Address—E. C. Dungan Elected President—Other Officers

When the seed trade gathers for their annual convention with representations from the entire country and from Canada, we find a gathering of men representing not only important financial and trade interests, but peculiarly allied with farming interests. This thought was frequently brought out during the convention proceedings, showing that although farmers were dependent in their efforts to a very large degree on securing and planting seed of proper germination, the seed fraternity as a whole were even more dependent on their farm friends in securing ample and satisfactory supplies of seeds. It is quite true that such products of the farmer's industry must be carefully cleaned, graded, bagged and stored for shipment as desired and this great function of seedsmen cannot be over-emphasized. Government officials on the program of the 37th annual convention of the American Seed Trade Association at the Hotel Sherman, Chicago, dwelt on this point at length. They urged closer co-operation of its members, with the government offering free technical service during a two months' period at Washington in the inspection work of the seed bureau.

Pres. Frank W. Bolgiano of Washington, D. C., as chairman of the convention, in his annual address said in part:

"The labor situation today is almost if not quite as dangerous as it was during the war times; vast numbers of Greeks, Italians, Spaniards and other laborers are going back to their home land. Our laboring men seem to be so short-sighted as to be willing to place the cost of production so high in this country that we fear that as soon as the abnormal wants of the world are supplied we shall see the trade needed so much for the prosperity of our country go to more conservative lands, and we shall again be put into the borrowing nation class.

"In October your president was asked to attend a hearing of the cotton seedsmen at the War Trade Board. It was surprising to find that because of the interference of some seedsman the cotton seedsmen were very likely to be placed in the same class as the elevator men who handled grain, their profits being reduced below the cost of handling. The matter was thrashed out and cottonseed was again placed in the same position as seed wheat.

"The prosperity of the trade, I believe, has been general, abundant crops have again filled our storehouses with merchandise to a greater extent than we have had in years, but a bare market and a hungry world have taken largely of what we might have feared at the early season, as being unprofitable surplus.

"At a meeting of the National Seed Analysts there was proposed and carried a motion appointing a committee to go further into the seed law and asking that a similar committee be appointed by the American Seed Trade Association to co-operate with the Seed Analysts in this work which is of vital importance to the seed trade; we therefore recommend that such a committee be appointed at the very earliest moment, and that this action be conveyed to Mr. G. T. French at the earliest possible time. This committee should have power to act for this association.

"The last of May we received from the Southern Seedsmen's Association an invitation to attend their convention at Montgomery, Alabama. We thought it both wise and profitable to accept this invitation. At the same time we were informed that our counsel, Mr. Curtis Nye Smith, was asked to make an address at the same convention. There can hardly be any doubt that our association must in some way form a connection with the bodies that are springing up all over the country."

Lester S. Ivans, Regional Director for the Central States read a paper on the United States School Garden Army.

The Secretary's report showed 231 active members and a cash balance on hand of $1,196.83.

A paper was read by Edgar Brown of the U. S. Dept. of Agriculture, which is withheld until released by the Department. Mr. Brown, among other things complained that only a few seedsmen co-operated with the seed survey of the Department and a committee was appointed to consider the subject.

Most of the open session was devoted to the consideration of fiscal affairs of the association.

Officers elected for the ensuing year were E. C. Dungan of Wm. Henry Maul, Inc., Philadelphia, president; W. G. Scarlett, Baltimore, first vice-president; David Burpee, Philadelphia, 2nd vice-president; E. E. Kendall, Cleveland, secretary-treasurer.

The final day's session closed with an interesting trip to Peacock's Trial Farm. He has one of the show places of suburban Chicago, and it made a fine outing for the members.

C. A. Neal of the Philadelphia Seed Co. believes that although the past year's trade has been good an even better outlook is before Philadelphia and Eastern markets. He suggests that import and export business, stimulated for some time, will show even greater strides in the near future and open up in nice volume.

Sutton, Steele & Steele, Dallas, Texas, exhibited their gravity seed cleaner during the Chicago seed dealers' convention, displayed by C. F. Wood, their sales agent. This machine has been satisfactorily tried out for the past several years and is meeting deserved demand among discriminating buyers who naturally want their money's worth.

Rosenbaum Brothers and the American Mutual Seed Co., jointly entertained about 65 guests at a dinner in the Grey Room of the Hotel Sherman on Tuesday evening last, which will be remembered for the hilarity which reigned supreme as well as a dinner far different from those prevailing during the Hoover regime. Those of the trade who were not planning to even sit in $10 bleacher seats at the great Willard-Dempsey fight to be staged at Toledo to say nothing of handing over $60 for a slip of pasteboard, saw a pretty good round of boxing bouts which were staged for the amusement of the guests and "Kid" W. H. Crossland of the Courteen Seed Co., Milwaukee, and "Knockout" J. H. Warren of the W. H. Small & Co., Evansville, Ind., made things interesting for all when they put on the gloves. Later there was a cabaret entertainment, the feminine members of which proved especially attractive to the seed men.

H. J. Rankin is a recently appointed Southern salesman for W. H. Small & Co. of Evansville, Ind. He has been identified with the Nashville trade for many years and with a broad list of friends in Southern markets has a nice start in selling the following brands of his Company: "Interstate," "Eclipse," "Woodpecker," "Old Style," "Climax" and "Early Days."

The Illinois Seed Co. displayed in their room at the Sherman Hotel at the Seed Dealers' Convention interesting pictures prepared by Andrew Fogellberg of their company. One of them portrayed in weed seeds a pastoral scene. Another illustrated in good seeds, from which the above mentioned weed seeds had been taken, how nicely the colors blend and create an artistic piece of work, equaling similar efforts in oil.

The Brown Portable Conveying Machinery Co., 842 Otis Bldg., at 10 S. La Salle St., Chicago, Ill., during the Seed Dealers' Convention showed motion pictures of their equipment for the quick and low cost handling of bagged, baled and packaged goods. Much has appeared in these columns relative to their equipment so widely used in the elevators, mills and warehouses of our trade in elevating, conveying, loading and unloading work and this practical showing was much appreciated.

Woodpeckers were much in evidence during the seed convention at the Sherman Hotel, Chicago, and if you "ask our friends" about these birds who use their heads, you will have the ready explanation that the W. H. Small Co. of Evansville, Ind., is back of this new lodge intended through more head work all 'round to make better seedsmen and to distribute and plant better seeds.

WHOLESALE GRASS SEED DEALERS MEET.

The first day of the seed dealers' convention, really held the day before the stated annual meeting, is always devoted to the special interests and semi-annual convention of the Wholesale Grass Seed Dealers' Ass'n. Their meeting on Monday, June 23, at the Hotel Sherman, Chicago, mainly concerned a discussion of trade rules, new

JOHN A. SMITH,
Toledo, Pres. Wholesale Seed Dealers' Ass'n.

forms for which were offered, with their several advantages, to be taken under consideration during the next six months for settlement at the mid-winter meeting. Any changes desired will mainly influence the betterment of trading conditions. Reports on legislation during the past year with other pertinent details to the continued successful conduct of the grass seed business were taken up.

John A. Smith of S. W. Flower & Co., Toledo, was elected president; Wm. G. Scarlett of Baltimore, vice-president; and C. K. Jones of W. A. Simpson Co., Baltimore, secretary for the ensuing year.

WHEAT LICENSES.

The formal proclamation of the President giving authority to Julius Barnes, Wheat Director, to execute the guaranties made to wheat growers, to license dealers in wheat and wheat products, etc., was issued on June 25. The proclamation says that it is essential in carrying out the guarantees aforesaid to protect the United States against undue enhancement of its liabilities thereunder, that wheat and wheat flour, on and after July 1, 1919, shall not be imported into the United States from, and shall not be exported from or shipped from or taken out of the United States to Abyssinia . . . or any other foreign country, except at such time or times and under such regulations or orders, and subject to such limitations and exceptions as shall be prescribed, until otherwise ordered by the President or by Congress.

"The regulations, orders, limitations and exceptions will be prescribed and administered by and under the authority of Julius Barnes, United Stat Wheat Director, from whom such censes in conformity with said regul tions, orders, limitations and exceptio will issue.

"The powers and authority herete fore vested in the War Trade Board any proclamation or executive ord heretofore issued by men in respect the prohibition of regulation or impo or exports of wheat or wheat flour, hereby transferred to and vested in t United States Wheat Director as July 1, 1919."

Announcement was made yesterd at the offices of the United Stat Wheat Director, 42 Broadway, that M. Barnes will establish regulations unde this proclamation from time to tim Mr. Barnes announced the present r ulations covering the exportation wheat and wheat flour as follows:

(1) Wheat: Lisenses for the expo of wheat will be issued only to t United States Grain Corporation or nominees.

(2) Wheat Flour: Licenses will issued for the export of wheat flour all destinations in the western hem phere; the east coast of Asia; Briti French and Portuguese West Afri Liberia and the Belgian Congo. For exportation of wheat flour to other d tinations licenses will be issued only the United States Grain Corporation its nominees.

The United States Wheat Direc announced the regulations covering importation of wheat and wheat flo to be:

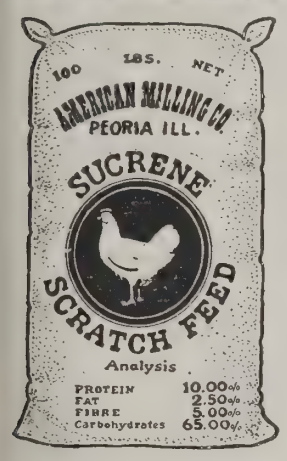
(1) Wheat: Licenses for the impo tation of wheat will be issued only the United States Grain Corporation its nominees.

(2) Wheat Flour: Licenses for importation of wheat flour will be sued only to the United States Gr Corporation or its nominees.

Applications for licenses to exp wheat flour to the western hemisph the east coast of Asia, and the we coast of Africa and applications for censes to import wheat or wheat fl should be filed with the United St Wheat Director, 42 Broadway, N York.

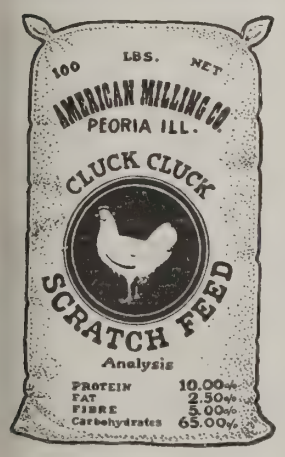
Exporters and importers are advi that the foregoing rules do not con tute any material modification of regulations heretofore existing as tablished by the War Trade Board.

GRAIN SHIPPING CONTRO



The Director-General of Railroads announced the following plans for trolling grain shipments:

Grain control committees will be pointed in Duluth, Minneapolis, St Louis, and Omaha to administer trol of grain movements to the princ primary markets in their respective ritories. The market jurisdiction the Minneapolis committee will inc St. Paul, Milwaukee, Chicago Peoria; of the Omaha committee, C cil Bluffs, Detroit, Toledo, Clevel Cincinnati, Indianapolis, Wichita, Fort Worth; of the St. Louis commi East St. Louis, Kansas City, and Joseph, and the territory of the Du committee will include Superior. committee will consist of three m bers, two representing the Railroad ministration and one the United St Grain Corporation's transportation vision.



The movement of grain from r points to primary markets will be trolled by the issuance of blanket mits to the individual railroads e ing those markets, while control of movement between the foregoing mary markets, as well as from all p to Atlantic or gulf ports, will be ised through the issuance of indivi permits to the shipper.

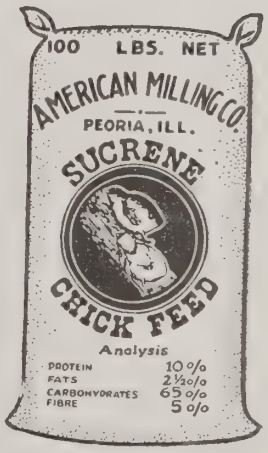
Canadian crop reports say that c tions over the territory served by National Railways between Port thur and the Rockies are gene favorable. This is true and also eral of the prairie districts althoug some sections of the latter rains w be welcome.

SUCRENE Poultry Feeds

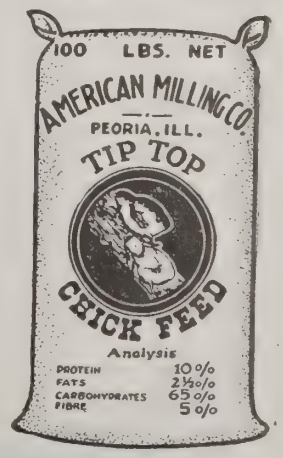
There's profit in pushing Sucrene Poultry Feeds. Poultry raisers know them and believe in them. More of the big poultry raisers are now buying Sucrene Feeds in large quantities than ever before, because they find these feeds dependable for quality, economy and profitable results

A Line of "Repeaters" With a Steady "Pull"

The popularity and always-satisfying superior quality of Sucrene Poultry Feeds gives you a clear field for big sales which competitors can not touch.



There's a Sucrene Poultry Feed for every stage of poultry life—in quality and price to suit every class of trade—which means an all year round business:



Sucrene Scratch Feed — **Sucrene Chick Feed**
Cluck Cluck Scratch Feed — **Tip Top Chick Feed**
Tip Top Scratch Feed

We Fill All Orders Promptly

Our 10-cars-per-day capacity for manufacturing poultry feeds, and our big fire proof elevator, were unimpaired by the recent fire and are operating to full capacity.

BARLEY MARKETS.

MILWAUKEE.—Moderate receipts and a good demand from shippers and industries maintained a good barley market during the past week. Favorable crop reports resulted in a moderate net loss for the week of 2c. Export buyers and elevators have been taking both feed and malting qualities and are keeping the market closely cleaned up. Local maltsters are not active. At the week-end session the close was steady and unchanged with prices firm. Receipts for the week were 336 cars, against 473 cars a week ago and 29 cars in 1918. Current quotations are: Good to choice, 48 to 50-lb. test, is quotable at $1.19@1.21; bright, $1.21@1.23; fair to good, 45 to 47-lb. test, $1.15@1.19; low, 41 to 44-lb. test, $1.13@1.15; feed, $1.10 @1.15. Iowa quoted $1.13@1.21 for light to fancy; Wisconsin, $1.14@1.23; Minnesota, $1.11@1.21; Dakota, $1.11@ 1.21; feed and rejected, $1.10@1.16.

CHICAGO, ILL. MILWAUKEE, WIS.

DULUTH.—Receipts of barley continued in heavy volume on this market during the last week, with inspections reported at 251 cars against only 17 last year. In spite of the liberal offerings, the market held steady with final figures 1c off to 1c up at from $1.04 to $1.13 for spot. Specialists in the barley market here reported improved interest on the part of Eastern maltsters as a sesult of the near-beer decision by the Supreme Court. From reports being received, it is thought that considerable barley remains to be marketed by farmers over the Northwest.

BUFFALO.—Barley dealers here had a few small lots to sell, but maltsters were not interested and feed men took only a few cars. The market hinged on the signing of the treaty. In the opinion of those best posted, this country cuts little figure, as the remaining barley will go across the water with a settlement of the war. The few lots held here were quoted at $1.23@1.31.

KANSAS CITY.—An increase in the week's receipts of barley to 18 cars, nearly three times as much as for the preceding week, overloaded the market. The result was a decline of 10@12c a bushel. No. 3 closed nominally at $1.13 @1.14 and No. 4 at $1.12. Offerings were mostly low grade and brokers expressed disappointment over the slow demand, which was a reflection of dullness in the feed trade. Some cars came from Western Kansas and Colorado, where new crop prospects prompted shipments of grain that had been held back. The Iowa offerings also suggested a good crop outlook in that state. An official report makes the barley acreage in Kansas 513,000 acres, with a yield of forecast of 16,666,000 bus., against 5,737,000 in 1918. Barley feed was quoted about 15c lower per cwt, at $2.70. Stocks of barley were unchanged, at 2,000 bus., whereas a year ago the holdings were 101,000 bus.

CHICAGO.—The market during the week was not particularly interesting at any time. The earlier part of the week prices were distinctly weak, Tuesday's market showing a decline of 2c. Indeed until after the turn of the week the shippers and exporters were about the sole support of the market. The receipts were largely delivered on "to arrive" contracts and few of the buyers in the market were disposed to raise their bids. Friday, however, there was a little more competition for the better grades and these advanced about 1c. Shippers however were out of the market and only the local demand was a little better. The week closed with decidedly limited offers and a stronger tone to the market with prices 1@2c higher. This advance however was lost on Monday, particularly on the choice barley, the demand for which was indifferent, and in spite of the limited offerings a clean up was a matter of some difficulty. Maltsters took a few cars and shippers a few more but the only demand that was really good was for the feeding qualities. The exporters were in the market but were unwilling to pay the prices asked. Eighteen cars of malting varieties were sold at a range of $1.16@1.21, while 11 cars reported sold at $1.14@1.17. Futures were lower. July which opened at $1.10½ closed at $1.10 and September at 1.14½ which was the opening price. Exports from Atlantic ports last week were 1,983,000 bus. against 1,600,000 bus. same week a year ago. The visible supply is shown in the regular table.

PACIFIC GRAIN CO.
Grain Dealers
PORTLAND - - OREGON
Milling Wheat and Brewing Barley a Specialty
Shipment from Principal Grain Points in Washington, Oregon and Idaho

PORTLAND.—The barley market is in a waiting mood and few sales were made, the chief interest being now centered on the new crop and weather conditions. Rain is badly needed and the total acreage is said to be slightly better than a year ago with the indications for the three northwestern states at 15,000,000 bus., according to the *Commercial Review* estimate, against 11,750,000 bus. a year ago. Receipts were small and entirely from California and prices were strong to advancing, the *Review* quoting Standard A at $54 and feed at $53 per ton.

SAN FRANCISCO.—Prices on the spot market for barley have been steady to firm. In some sections of the interior asking prices were practically as much as could be obtained at the terminals. Shipping grades were quotable $2.70 and feed at $2.60 for the 1918 crop. The new crop shipping was quotable to $2.60 with feed at $2.50.

OMAHA.—Barley was a slow market product all week, with declining price tendency. On Saturday the quotation was $1.13. This is a cent lower than the last previous sales, say the Geo. A. Roberts Grain Co., and the demand is just about equal to the receipts of two or three cars a day which are coming. There does not seem to be anything in the situation to encourage holders as the new crop will be on us in a few weeks, and unless they are allowed to continue making beer, it will all probably have to be used for feed.

MINNEAPOLIS—Although barley receipts have been heavy right along, the demand for offerings was sufficient to clean up the daily arrivals promptly and keep the market fairly firm i tone. There has been a steady shi ping demand from eastern maltster who have sold large quantities of ma for export. Some bad crop news h been received, but on the whole the si uation is favorable. Prices range fro $1.02@1.12.

BARLEY
The cheapest feed: saves corn and wheat.
It requires less barley than shelled corn to produce hogs and the cost is lower.

Milling and Feed Barley.
ROSENBAUM BROTHERS, Inc.
77 Board of Trade. CHICAGO, ILL.

The Van Dusen Harrington Co., Mi neapolis, in their crop report of la week said there is very little change barley from the previous week. Thes crops are in good condition althoug the plant is of rank growth. In som places barley was then heading.

Rye Harvest Early.

Exceptional in both quality and yiel will be the rye crop this year, due weather conditions unusually favorabl throughout the entire season. Here the Rock River Valley of Wisconsin cu ting began on July 1, so that it is po sible that new rye may be in grindin condition by July 29th, depending e tirely upon the weather following ha vest.

With restrictions still limiting free e port trading, rye prices last week d clined still further, widening the cu rent spread between the best millin grades of wheat and rye to over 90c p bushel. Whether wheat is far too hig or rye much too cheap at present figure we venture the opinion that foreign bu ing, when given a free rein, will quic ly indicate the answer. — *Blodget Holmes Co., Janesville.*

First Car of Wheat.

Kansas City, Mo., July 1, 1919.-[Special Telegram]—Fort Gibson, Okl has the honor of marketing the fir car of 1919 wheat in Kansas City, whic arrived June 30, three days later tha the first car last year. The whe graded No. 2 red but showed 4% doc age on account of oats contents, a tested 58½ lbs. It contained 12½% moisture. At auction the grain sold f $2.21 a bushel.—*T. J. Tanner.*

Molasses a Splendid Conditioner

For finishing off stock and as a general conditioner cane molasses is an excellent and economical carbonaceous supplement to feeds high in protein.

Whatever the method of feeding, the glossy coats and generally thrifty appearance of stock whose rations include several pounds of cane molasses daily, bear out the testimony of experienced feeders to its splendid tonic value.

Grades from Blackstrap, up, are always available from great reserves, for present or future delivery, by tank carload or trainload shipments. Consult us about your requirements.

American Sugar Refining Company

Molasses Department

Chicago New Orleans

Hay Department

Timothy seed at Seattle showed a slight advance during the past two weeks.

Haying had quite generally begun in all sections of Michigan about the 25th of June.

No. 1 timothy is quoted at $34 Spokane, $31 at Seattle, $28 at Bozeman, $40 at Great Falls.

The hay crop in the Midway district of Minnesota, it is reported, will be the heaviest this summer in a number of years.

Reports to the American Steel & Wire Co. from New England states indicate a very good crop of hay throughout that section.

It is reported that the Mobile Chamber of commerce will appoint hay inspectors that are members of the National Hay Ass'n effective July 1.

Klamath Falls, Wash., reports that grain hay from California is being received and present prospects for grain and hay thereabouts are not particularly good on account of dry, cold weather.

It is reported from Harlan, Ia., that hay is very good; clover is ready to cut and timothy will be so in a few days. Farmers, however, are bending every energy to cultivate corn, letting the hay go as long as possible.

The Bureau of Crop Estimates states that the old mowings of hay in New England are poor as usual—rather weedy, more clover than usual. The acreage of new hay will be much larger in 1920. There is more oat hay than usual. The clover and hay crops in Delaware and Maryland are excellent.

Our San Francisco correspondent reports increased receipts of alfalfa in that market made up mainly of first cutting and the earlier cuttings of volunteer oat hay. Better grades of hay, however, are expected in the near future and heavier quantities during the next two weeks. The market is somewhat weak in tone in consequence.

The demand for hay is reported light throughout the Middle Atlantic and New England States with a decline in price of about $1.00 per ton. The good weather prevailing has increased the cutting of new hay. Boston and Pittsburgh report some accumulation, especially the lower grades. Other markets report receipts adequate to care for the demand which is light.

A farmer from Payette, Idaho, says that although they have not had rain in that locality since March, the grass is not yet killed as it seems to be in Wyoming and that rains would soon revive it. Dry farms are pretty badly burned out, however, but the irrigated crops are looking well, particularly the alfalfa, which was being cut 10 days ago. Help, however, is very scarce, hay makers being paid $4 a day with board.

Montana and Wyoming are badly hit as to hay this year. Conditions, as reported by a stock shipper from Sheridan recently, "are absolutely the worst in my recollection for this time of the year. All records for heat were broken for May with 101 degrees in the shade. The usual winter snows and spring rains did not make their appearance this year and bluestem grass, which is usually the stock feeder's standby and selling for double what alfalfa is worth, is this year practically a complete failure. Even in the best localities there will not be over half a crop."

HAY SITUATION.

HAY BELOW AVERAGE.

INDIANA (8)—The hay crop is very much below the average in acreage; prospects are good for quality of timotry and light mixed hay; clover fields show quite a few weeds.—*Jas. J. Adams Co., Bryant, Ind.*

HAY SITUATION NOT ENCOURAGING.

ILLINOIS (6).—The hay situation here so far as new crop is concerned is far from encouraging. The crop looks well enough but the weather is awful. Rain follows rain and hay is down, lodged, tangled and flooded on the low lands. While the harvest will not commence for some two weeks unless it stops raining soon, hay in low lands will be ruined before that time. There is no old hay in farmers' hands here, and with the 1919 crop 50 per cent ruined by floods it will take remainder to supply home demands.—*James R. Allen Hay Company, Mt. Vernon, Ill.*

BIG CROP.

WISCONSIN (2).—We have the best prospects for hay ever had if the weather will settle so it can be properly cured. It has been raining nearly every day the last three weeks.—*A. J. Amundsen, New Auburn, Wis.*

HAY IN CAYUGA COUNTY.

NEW YORK (5).—In our opinion there is very little old hay in northern Cayuga County, either in growers' or shippers' hands. On account of the extreme high prices in April and May, hay was moved very freely.

We find the demand is decreasing for first cutting alfalfa and heavy clover mixed hay, as is usual at this season of the year. Our farmers are now securing the first crop of alfalfa and clover mixed and timothy grades will be harvested the very last of June and first of July. We expect a good yield of both grades. The weather during harvesting will determine to some extent the quality of the crop.—*Adams & Blumer, Westport, N. Y.*

WISCONSIN HAY CARRYOVER SMALL.

WISCONSIN (7).—The old hay crop is just about gone. There is less than 5 per cent of last year's crop still in the mows, which is considerably less than was carried over last year. Most of this is in point of being shipped out now. Eastern Wisconsin is nearly devoid of old hay.

The new crop looks very promising; farmers have begun to cut hay and if the weather during harvest time is good we shall expect to have not only an abundant crop but one of very fine quality as well. The clover yield this year will be considerably greater than last year, as it wintered through splendidly, and prospects are that Wisconsin will be able to furnish its usual quota of good quality hay.—*Knauf & Tesch Co., Chilton, Wis.*

KANSAS CITY HAY NOTES.

SANDERS SOSLAND, CORRESPONDENT.

Wilbur Warren, one of the pioneer members of the Kansas City hay trade, who some months ago retired from the National Hay Co., was a visitor on the market the past week. Mr. Warren is engaged in farming and fruit raising in Florida. "The only hay I now handle," declared Mr. Warren, "is that which I produce to feed my stock."

Charges for plugging hay cars have been advanced from 50 cents to 75 cents per car by directors of the Kansas City Hay Dealers' Ass'n. In plugging hay, 45 to 60 bales are extracted from each car, which allows a complete inspection of the contents. During the busy period in the hay trade more than 30 "pluggers" are maintained by the association to carry on this work.

F. J. Butler, of the forage branch of the United States Army Quartermaster Department in Chicago, was a visitor on the Kansas City hay market last week.

"The day of $40 prairie hay has disappeared, temporarily at least," said Dan Tilson, of Dyer & Co. "And, instead of the two cents a pound level of prices, it is not improbable that the market will recede to a top of $20 to $25, more nearly to the one cent a pound level, within the next two to three weeks. New prairie is moving to market in more liberal volume, and while shipments from the country still are below normal for this period of the year, sufficient is being received to relieve the acute shortage witnessed here for some months. Kansas farmers are eager to move their prairie in order to take advantage of the present temporary high levels and offerings may increase moderately within the immediate future despite the pressing wheat harvesting work, which has become general over the state."

"Pile hay on edge," urges Ganthus Peters, of the Peters-Elliott Commission Co., whose length of service as former hay inspector for the Kansas City Hay Dealers' Ass'n excellently qualifies him to make the suggestion to shippers. "There is a tendency among shippers of hay to load hay on its side in order to reach the minimum weight, but the loss resulting from the damage caused by this method of loading is far greater than the extra freight which would be

MIXED CARS A SPECIALTY

required from loading the hay on edge. At the present time, particularly, is it important that the hay should be loaded on edge. Such a method allows air to circulate through the entire contents of the car and thus prevent heating. Much of the new crop hay that is now moving to market would sell at a far greater price should the shippers have followed this plan. It is necessary that more care be exercised in the handling of hay for shipment to market, and, while the producers are making progress in this direction, there is yet much to learn."

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

E. P. Palmer, of Dyer & Co., has arrived home from his trip out West and says that he had a fine time.

Frank P. Bross, of the Knapp Hay Co., has left for Minnesota for his vacation and expects to land some of the big ones.

C. M. Rice, of the Nebraska Hay Co., has been home ill for the past few days, but is now able to be around again.

L. G. Frohardt, of the Gate City Hay Co., left with his family for a trip by auto to go to Colorado Springs and will be gone for some time.

Alvin Anderson of Denver, Colo., was a visitor on the hay market this week. He is connected with the Anderson Hay Co. of that town.

Receipts of prairie and alfalfa hay on this market this week have been confined almost entirely to the arrival of the new crop. It is surprising how nicely the new crop has been cared for under the extreme adverse circumstances, especially those cars that have arrived here. The prairie hay and alfalfa that have arrived at the market was in a cool and merchantable condition. Heavier receipts are expected within the next week or ten days, as many parties having surplus forage for shipment desire to place it on the market before the anticipated shortage of cars reaches us.

More detailed reports are coming from the alfalfa growing sections of western Iowa and parts of Nebraska regarding the damage being done to the crops by the pest that is called in some localities the "army worm," and in other vicinities it is better termed the "cut worm." Reports from sections of Iowa indicate that after the severe damage to the first crop of alfalfa by the extensive rains this pest came along and entirely destroyed the second crop and as much of the third crop as has been developed, the damage being most general in the western part of Iowa and the eastern part of Nebraska. In making allowances for their fall and winter feeds, parties should take into consideration the severe damage to the first crop by extensive rains, and the damage that will develop by the pest that is now infesting the second and third cutting, leaving practically no surplus in any community that expected to have considerable alfalfa to place on the market.

Hay Markets

BUFFALO.

June 28.—Farmers are bringing in quite a liberal amount of loose, fair quality hay and selling it at $28 to $33 per ton. With the dealers here fairly well supplied from Canada and other points the market is breaking as it usually does at this season. Baled is quoted from $38 to $40 per ton, on track.

OMAHA.

June 28.—Receipts light on both prairie hay and alfalfa, and the demand continues quiet and market dull.

No. 1 Upland Prairie Hay, $30 to $35; No. 2 Upland Prairie Hay, $20 to $24; No. 3 Upland Prairie Hay, $10 to $14; No. 1 Midland Prairie Hay, $30 to $35; No. 2 Midland Prairie Hay, $20 to $24; No. 1 Lowland Prairie Hay, $20 to $24; No. 2 Lowland Prairie Hay, $10 to $14; No. 3 Lowland Prairie Hay, $8 to $10; No. 1 Alfalfa, $22 to $25; Standard Alfalfa, $20 to $22; No. 2 Alfalfa, $15 to $18; No. 3 Alfalfa, $10 to $14; Oat Straw, $10 to $12; Wheat Straw, $9 to $10.

DETROIT.

June 28.—Receipts have increased and lower prices are quoted. The movement is believed to represent the cleaning up of old supplies by farmers who are getting ready for the new crop. Demand has been fair and at the close the market was steady to firm. Some new hay is coming to market loose in farmers' wagons and is of good quality. Quote: No. 1 timothy, $36.50@37; Standard timothy, $35.50@36; light mixed, $35.50@36; No. 2 timothy, $34.50@35; No. 3 timothy, $30@32; No. 1 mixed, $33@34; No. 1 clover, $30@31 per ton, car lots.

NEW ORLEANS, LA.

June 28.—New hay should commence to move around July 15th, but whether shippers will decide to take the chance and ship hay to this market remains to be seen. Hay will have to go through the sweat to make it safe, and few shippers do take the chance of shipping before this period has passed. Old crop hay offered from $43.00 to $44.00, delivered, for No. 1, $40.00 for No. 2 and $41.00 for No. 3. Alfalfa hay offered around $31.00, delivered.

TOLEDO.

June 28.—Receipts of hay are much lighter and dealers declare the heavy movement of the old crop is now over. High prices are anticipated from now on until receipt of the new hay. Prices are: No. 1 timothy, $37; No. 2 timothy, $35; No. 1 light mixed, $36; No. 1 clover, $34 per ton, f. o. b. Toledo rate point.

ST. LOUIS.

June 28.—Receipts of hay during the past week have been moderate in amount, consisting principally of common grades of timothy and clover mixed.

Timothy hay market strong and higher on the better grades of timothy which are in scant offering and excellent local demand. Standard or No. 1 timothy is a good seller, but the medium and lower grades are dull, slow and irregular in price. Light clover mixed hay continues to rule firm, with an excellent local demand for good No. 1 light mixed hay, but the lower grades are dull and slow.

Heavy clover mixed hay quiet but steady. Offerings liberal and demand only fair.

Pure clover hay continues to rule steady. Receipts are not heavy but demand is rather limited. Some new clover hay is offered, but is selling slowly as it is mainly warm and inclined to heat and damage.

Alfalfa hay market steady, offerings exceedingly light and there is an excellent unsupplied demand for good alfalfa hay, but on the contrary the medium and lower grades of which the receipts consist principally, are dull, slow and neglected. The trade does not advise shipment of any alfalfa hay unless it is thoroughly well cured and the quality at least is standard.

Prairie hay market nominal. None offered. A liberal amount would sell well if here.

Straw—Scarce.

Track Sales—Timothy—No. 1, $39@40; Standard, $37@38; No. 2 $30@32; No. 3, $25@27; Threshed, $15@18. Light Clover Mixed—No. 1, $37@38; No. 2, $32@34. Heavy Clover Mixed—No. 1, $30@31; No. 2, $27@29; New, $27@28. Clover Hay—New, No. 1, $25@26; No. 2, $20@21; Heated, $10@15. Alfalfa Hay—Choice, $35@36; No. 1, $33@34; Standard, $32@33; No. 2, $25@27; low grades, $10@12. Prairie Hay—Choice, $35@36; No. 1, $33@34; Standard, $32@33; No. 2, $25@27; low grades, $10@12. Straw—$9.50.

NASHVILLE.

June 30.—Stocks of hay are light, with seasonable demand. Quotations: No. 2 timothy, $41; No. 2 clover, $40. Not enough alfalfa being handled to establish market. Receipts of hay at Nashville last week, 14 cars.

BOSTON.

June 28.—Heavier receipts of hay the past week with no trading of any consequence reported has caused the market to rule easier and $1.00 or more per ton lower. The good weather prevailing has caused an increase in the cutting of new hay, being especially active in the southern part of this section. Pasturage conditions are also excellent and there is not much barn feeding of hay. Buyers are holding off and only meeting most pressing needs in anticipation of lower prices. The result is that there is a considerable accumulation of No. 3 hay and poor finish hay at the various terminals, especially at the Boston & Maine, for which there is hardly any demand. In order to save storage charges some concessions in prices are being made by receivers, but even this does not improve the demand. For the small amount of No. 1 Timothy hay offering on the market a range of $43 to $45 per ton is obtainable but there is very little of this grade offered. No. 2 Timothy ranges at $37 to $40 per ton and No. 2 Eastern is quoted at $33 to $35. No. 3 hay is in excess supply and lower at $30 to $32. Clover mixed ranges at $33 to $36 for all grades with fine hay at $31 to $33 for poor to choice. Receipts for the week ending June 28 were: Local, 173 cars.

A lower market on straw with quiet trade and offerings in excess of the demand. Choice rye straw is quoted at $15 to $17 per ton and oat straw at $13 to $14. Receipts for the week ending June 28 were: Local, 6 cars.

MILWAUKEE.

June 28.—Another decrease in hay prices is noted this week, the market being from 50c to $1 lower. Buying is limited to immediate requirements while offerings

are scant. The old crop is about exhausted. The outdoor feeding season is in full swing and the new hay crop is especially promising. Current quotations are: Choice timothy hay, $30.50@31; No. 1, $30@30.50; No. 2, $28@29.50; No. 1 clover, $20@21; light clover mixed, $27@28; red top and timothy mixed, $27@28; stained timothy, $12@15; marsh feeding, $16@17; packing, $10.50@11.50; rye straw, $9.50@10; oat straw, $9@9.50.

CINCINNATI.

July 1.—The heavy movement, largely of terminal market hay was unabated the past week, and again had the effect of depressing the market with further declines for all medium and common quality. Timothy of the top grades alone held a fairly steady tone, but light mixed was weak and lower, with heavy mixtures and clover almost unsalable unless heavily discounted. Losses of $4 to $5 per ton were recorded for clover of good quality, and the same for low grades of mixed and split cars. Trading was slow and a liberal percentage of the offerings remained unsold from day to day. Interference to plugging by rains, and holiday conditions also added to the accumulation and weakened the market.

No. 1 timothy strictly, $38@39; standard timothy, $37@38; No. 2 timothy, $36@37; No. 3 timothy, $29@31; threshed timothy, $21@26; light clover mixed, $34.50@35.50; No. 1 clover mixed, $33.50@34.50; No. 1 clover mixed, $31@33; No. 1 clover, $27.50@28.50; No. 2 clover, $23@26; sample, grassy, $23@28; No. 1 local alfalfa, $28@29.

MEMPHIS.

June 28.—The hay situation here continues pretty much the same as it has been for several weeks. Old hay is very scarce and prices are more or less nominal, with buyers taking only what they cannot do without. Offerings of new are limited, as quality of what has been received continues poor and sales have been at prices ranging from around $20 a ton upward. A few small lots of good new alfalfa have come in and sold at $30 a ton and better. Brokers expect more offerings since weather has turned better, but are still somewhat at sea as to prices. On call today cash standard alfalfa was offered at $30, with $28 bid. For 3 cash $25 was asked, while July delivery No. 2 was offered at $27. Rains have been so frequent in this territory that practically no hay has been cut.

PHILADELPHIA.

June 28.—Baled Hay and Straw.—The market for hay is very unsettled and irregular. Exceptional lots have sold both above and below quotations which, however, are a fair basis for wholesale transactions on spot goods. The market closed quiet.

Straw is in small supply and dull, the market ruling weak.

Timothy Hay (according to location).—No. 1, $40@41; No. 2, $38@39; No. 3, $35@36. Clover Mixed Hay—Light mixed, $38@39; No. 1 do, $35.50@36.; No. 2 do, $33@35. Straw—No. 1 straight rye, $13@13.50; No. 2 do, $12@12.50; No. 1 tangled rye, $12.50@13; No. 2 do, $11.50@12; No. 1 wheat straw, $12@12.50; No. 2 do, $11@11.50; No. 1 oat straw, $12@12.50; No. 2 do, $11@11.50.

DULUTH.

June 28.—Stagnation prevailed in the hay market here during the last week. Receipts only averaged a car a day, and buyers did not appear to be interested. The main reason was that abundant grass feeds were available. Quotations broke from $2 to $4 and the tone of the market was easy even at the lower basis. Quotations follow: Per ton—No. 1 timothy, $28@30; No. 2 timothy, $24@28; No. 1 mixed timothy, $24@28; No. 2 mixed timothy, $20@23; No. 1 prairie, $26@28; No. 2 prairie, $23@26; No. 3 prairie, $18@20; No. 1 midland, $18@22; No. 2 midland, $10@12; rye straw, $9@10; oat straw, $9@10.

BALTIMORE.

June 28, 1919.—The general list of hay prices in Baltimore is again lower under an indifferent demand, resulting in gradually increasing supplies, since the outlet is so light. The nearness of the movement of new crop is also a factor tending to cause buyers to restrict their purchases to actual needs.

Straw—There is an over-supply of straw, especially of wheat blocks, on which the market has declined sharply. Trading in straw is principally of a jobbing character. Quotations follow: Per ton—No. 1 timothy, $40; standard timothy, $39@39.50; No. 2 timothy, $38; No. 3 timothy, $35@37; No. 1 light clover mixed, $38; No. 2 light clover mixed, $35@37; No. 1 clover mixed, $35.50@36.50; No. 2 clover mixed, $33@35; No. 1 clover, nominal, $33; No. 2 clover, nominal, $30; No. 3 clover, nominal, $28; No. 1 straight rye, $16@16.50; No. 1 tangled rye, $12.50@13.50; No. 1 wheat, $8@8.50; No. 1 oat, $11.50@12.

ST. JOSEPH.

June 30.—Receipts of hay were more liberal in the past week, which had a tendency to lower the prices, especially on the new prairie. There has been an exceptionally good demand for top stuff, however, poor quality hay moved slowly at lower prices. Nominal quotations are as follows:

Prairie, choice, $33@34; Prairie, No. 1, $30@32.50; Prairie, No. 2, $25@30; Prairie, No. 3, $10@20; Midland, No. 1, $16@20; Midland, No. 2, $12@17; Alfalfa, choice, $30@31; Alfalfa, No. 1, $27.50@29.00; Alfalfa, standard, $20@26.50; Alfalfa, No. 2, $15@20; Alfalfa, No. 3, $12@14; Timothy, No. 1, $37@38; Timothy, standard, $35@36; Timothy, No. 2, $30@32; Clover, light mxd., No. 1, $37@38; Clover light mxd., No. 2, $30@31; Clover, No. 1, $26@28; Clover, No. 2, $20@25; Straw, $9@9.50.

TAMPA, FLA.

June 27.—No. 1 timothy is quoted at $48.50@50. Receipts have been fair in quality but very light in quantity, amounting to not more than 10 cars during the past week. Dealers' hay stocks are ample for their immediate needs only, they preferring to purchase lightly and frequently.

KANSAS CITY.

June 28.—Sharp declines in prices for prairie were the outstanding development in the Kansas City hay trade this week. While choice new prairie sold at a top of $40.50 late last week, $33 was the high mark of sales at the close this week. Some grades show a sharper decline. A further slump in prices for the wild hay is predicted by market interests here. The movement of hay to market increased slightly, due to warmer weather, the total offerings aggregating 368 cars, compared with 236 cars last week and 382 a year ago. Choice, No. 1 and better standard alfalfa were strong, while the poorer grades declined $1 to $2.50 a ton. New timothy sold at a top of $32 a ton, compared with $38 for the old hay. A light demand prevailed for straw, but none of the product is moving to market.

New prairie—Choice, $32@33; No. 1, $29.50@31.50; No. 2, $23.50@29; No. 3, $18; packing hay, $5.50@7.50.

New midland prairie—No. 1, $18@20; No. 2, $10@17.50.

Alfalfa—Choice, $29@31; No. 1, $27@28.50; standard, $21.50@26.50; No. 2, $14.50@21; No. 3, $11@14.

New timothy—No. 1, $30@32; standard, $27@29.50; No. 2, $23@26.50; No. 3, $15.50@22.50.

New clover mixed—Light, $28@30; No. 1, $25@27; No. 2, $18@24.50.

Clover—No. 1, $23@25; No. 2, $15@22.50.

Straw, $8.50@9.

INDIANAPOLIS.

June 28.—Steady. No. 1 timothy, $35.50@36; No. 2 timothy, $35@35.50; No. 1 loose mixed, $34@35; No. 1 mixed, $33@33.50; No. 1 clover, $27.50@28.

SPOKANE.

June 21.—Timothy, $38 per ton delivered; $36 by carload; alfalfa, $32 per ton delivered; $30 by carload.

MONTREAL.

June 27.—Everything, up to the present, favors a good crop of both timothy and clover hay in this province and eastern Ontario. Prices are also lower in Canada, the demand for hay having decreased through grazing becoming more general, and also owing to the excellent prospects of the new crop.

The receipts of hay during the last week at Montreal were 8,508 bales, against 20,162 bales for the same week last year. Sales have been made of good to choice hay at $35@40. Most of the offerings are of inferior quality and have sold at $30@34. One car of mixed clover was offered at $28.—Trade Bulletin.

NEW YORK.

June 27.—The New York Hay Exchange reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week.....	4,271	340
Receipts last week.....	4,639	302
Receipts Sept. 1 to date....188,249		11,758

The easier tendency noted in our last report soon developed into marked weakness and prices have suffered a very sharp decline, market closing dull, weak, and with values not at all well defined. Offerings have been heavier at all harbor points and buyers were quick to make the most of their opportunity, pursuing a holding-off policy throughout; and with no support to the market prices sagged from day to day, prices at the close averaging from $2@5 a ton under last week and, apparently, "the end is not yet," though the embargoes now in effect may later have a stabilizing effect. New invoices have continued to run heavy though just at the close some receivers report a smaller number coming to hand. Rail receipts have been augmented this week by some 15 carloads of hay on a river barge which are by no means sold out at this writing. There has been very little high grade hay available and this has held fairly steady, though values have naturally sagged somewhat in sympathy with the lower grades which have been very plentiful and begging for sale. A great deal of decidedly inferior hay is now arriving, much of it of scarcely any feeding value.

We can make very little comment on values other than as stated in the foregoing paragraph because of the few sales reported and the wide variety of prices accepted, quotations as given below being more or less nominal at the moment. Strictly No. 1 hay if here might sell at $45 and that figure could possibly be exceeded in Brooklyn, and $44 is generally regarded as extreme on No. 2. Lower grades, especially in small bales, are all largely nominal.

Rye straw has had sale from boat at $14 and that price has been reached in Brooklyn, but we hear of cars offering in the Penna. R. R. yard at 13. Oat straw offering at $12 and is slow sale. Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$44.00@45.00	$44.00
No. 2 hay.....	43.00@44.00	41.00@43.00
No. 3 hay.....	38.00@41.00	37.00@39.00
Shipping hay.....	33.00@35.00	32.00@33.00
No grade	26.00@31.00	25.00@29.00
Fancy light clover mixed hay	42.00@43.00	41.00@42.00
No. 1 clover mixed	38.00@41.00	37.00@40.00
No. 2 clover mixed	33.00@36.00	31.00@33.00
No. 1 rye straw...	13.00@14.00	
No. 1 oat straw...	12.00	

On account of accumulation, all railroads have placed an embargo on hay and straw for delivery at Brooklyn Eastern District Terminal, effective June 25th.

Effective June 25th, the N. Y. C., account of accumulation, placed an embargo on hay and straw for delivery at their 33rd St., 36th St. and 60th St. stations.

MINNEAPOLIS-ST. PAUL.

June 28.—Quote hay prices for the Twin Cities as follows:

	Minneapolis.	St. Paul.
No. 1 timothy....	$29.50@30.50	$26.00
No. 2 timothy....	28.00@29.50	24.00

CHICAGO.

July 1.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending June 28, also the total receipts and shipments of hay from Jan. 1, 1919:

	June 28, 1919.	June 21, 1919.	June29, 1918.
Total receipts	7,513	7,829	7,611
Total shipments....	1,205	1,505	1,702
Recpts. since Jan. 1.	128,634	121,121	180,113
Shpts. since Jan. 1.	30,482	29,277	46,717

There has been a good demand for all grades of timothy and it is still strong, both for local use and to meet shipping demand. With old timothy so well cleaned up as reported, there is some curiosity to know where the supply for this month is to come from. Prairie hay is not so satisfactory; the demand is quite as light as the supply. Straw is dull, demand nil. Quote June 30 market as follows:

Timothy—No. 1, $34@35; standard, $31@33; No. 2, $28@30; No. 3, $23@25; sample, $20@23; threshed, $15@20.

Clover—No. 1 light clover, $31@32; No. 1 clover mixed, $26@28; clover, $15@22.

Prairie—Iowa, Minnesota and Dakota, $20@24.

Marsh hay—Feeding, $15@18; packing, $12@13.

Straw—Rye and oat, $9@10; wheat, $6@7.

LOUISVILLE, KY.

June 30.—Shipments of hay are slightly better, while the demand continues good. Prices are weaker, with prospects for a slow and steady decline.

Quotations, baled, car lots: No. 1 timothy, $39; No. 2, $37.50; No. 1 clover mixed, $36.50; No. 2, $35; clover, No. 1, $28; No. 2, $25; wheat and oat straw, $8; rye, $10.

PITTSBURGH.

June 28.—There is a very light demand for hay, and even the best grades are still in excess of buyers' requirements. No. 1 timothy is plentiful here and prices continue to fall, the best bringing around $39.50@40 a ton. The lesser grades of hay are now practically unsalable. Quotations follow: No. 1 timothy, $39.50@40; No. 2 timothy, $36.50@38; No. 3 timothy, $31@32; No. 1 light mixed, $36@37.50; No. 1 clover mixed, $31@32; No. 2 clover mixed, $26@28.

CONDITION OF HAY TRADE.

Receipts at the regular terminals and outside points during the past ten days have increased to a very considerable extent. All markets have a liberal supply of medium, common, poor and trash hay and only a moderate supply of good. Prices on everything but the top grades are considerably lower than they were a week ago. Invoices from New York, Pennsylvania and Canada during the two weeks ending June 28 have been liberal.

The demand during the past week has not been anywhere near as active as it was formerly. The outlook for an improvement until after the Fourth of July is not promising as conditions in former years, ten days or two weeks before the Fourth have been dull and can see no reason why they will be any different this year with a fair supply of hay in sight to take care of the trade requirements.

The bulk of the arrivals the past month have been a mixture of practically everything in the hay line. A large per cent of which has been medium, common, poor, damaged, unsound trash hay. Some of it is so poor that it would have been a very difficult matter to have disposed of it on an ordinary market at any price. The demand for extremely poor hay is light and it is not an easy matter to find an outlet for it even when hay is scarce.

Therefore, we advise against forwarding to this market anything but sound, merchantable hay that an animal can eat.

Regarding future prices, it seems to be the prevailing opinion among receivers and jobbers that prices during the next two months will rule somewhat lower than prices during the past two months. The decline is very apt to be very much more pronounced on the common and poor grades than it will be on the best grades, owing to the scarcity of good hay throughout the country.

Owing to the lack of knowledge as to the amount of old hay in this and adjoining states, also Canada, available for market purposes, between now and the beginning of the new crop movement, we will not attempt to make any predictions what market conditions will be between July 1 and Sept. 1. We are, however, of the opinion that there is enough hay still in the hands of shippers and farmers to supply all needs until the new crop is in a condition to come forward. Fairly liberal shipments from Ontario and Quebec the past ten days is proof that Canada still has considerable hay that will come to this and other Eastern markets during the next two months.

Reports from Canada the early part of May were to the effect that the Canadian crop was practically all shipped out. This is a mighty resourceful country, and in periods of extreme shortages, such as we have experienced during the past two months, the unexpected most always happens. When prices of a product reach an abnormal figure supplies generally come unexpectedly from somewhere to an extent that will materially change the situation.—*W. D. Power & Co., per F. M. Williams, New York.*

STATE NEWS.

[Concluded from page 43.]

the elevator of the Allen & Wheeler Co.; consideration, $25,000.

Lodi, O.—The Lodi Mill & Elevator Co. of Lodi has been incorporated with a capital of $125,000 by Clarence M. Crum, E. H. Plank, Herbert A. Falconer, Frank C. Crum and others.

Brighton, O.—At a meeting of the Brighton Farmers' Elevator Co. it was voted to increase the capital stock from $15,000 to $20,000. Workmen are busy remodeling the elevator.

Harrod, O.—Fire totally destroyed the flour mill at Harrod, ten miles east of Lima. Loss is estimated at $3,500. Flames started from spontaneous combustion. The flour mill was purchased recently by Metz Brothers of LaRue and was being remodeled into a grain elevator.

OKLAHOMA.

Wetumka, Okla.—H. M. Brazil has leased his mill and elevator to Sheppard Bros.

Walters, Okla.—John J. McAnaw has bought the Walters Mill and is putting it in first class shape.

Guthrie, Okla.—Plans have been completed for remodeling the plant of the Guthrie Mill & Elevator Co. New power plant and more elevators will be put in.

Muskogee, Okla.—The Oklahoma Grain Co., a new business enterprise, has opened for business at 104 McKibban building. The company is composed of R. L. Yandell, A. Johnson and Geo. W. Johns, all of Ft. Smith, who have been operating as the Fort Smith Grain Co. for the past four years. The Muskogee concern will handle eastern Oklahoma and parts of Arkansas.

SOUTH DAKOTA.

Volga, S. D.—Julius Sundet has sold the elevator he purchased a year or two ago to J. N. Hymes.

Selby, S. D.—The Selby Equity Union Exchange has purchased the Bagley elevator in Selby.

Chelsea, S. D.—The Chelsea Farmers' Elevator Co. has installed a Richardson automatic scale at their plant.

Warner, S. D.—The Farmers' Elevator Co. has been incorporated with a capital stock of $10,000 by P. J. Gunderson and others.

Appleby (Mail to Castlewood), S. Dak.—The Davis Grain Co. has been incorporated with a capital stock of $25,000 by F. P. Creaser and others.

Forestburg, S. D.—The Farmers' Elevator Co. is erecting a 26,000 bushel elevator at this place. It will be electrically driven and S. A. Gere will be the manager.

Sioux Falls, S. D.—Announcement of the erection of a five-story oatmeal plant to cost $125,000 has just been made by C. W. Jackson, manager of the Whole Cereal Co. of Sioux Falls. The new structure will be erected on the site adjoining the firm's present plant.

WISCONSIN.

Waterloo, Wis.—Albert Skalitsky has purchased the warehouse of Matt Voelker on Monroe street and will conduct a feed and commission business in that location.

Embarrass, Wis.—The Farmers' Milling Co. has been organized with a capital of $15,000. It is the intention to purchase the Buntrock & Kronitz Mill at this place. Aug. Beversdorf is president.

De Pere, Wis.—The A. G. Wells Co. has plans for the construction of a warehouse and elevator to cost $15,000. General contract has been awarded for a reinforced concrete structure, 50 x 75 feet, and two stories.

Amery, Wis.—The Northern Supply Co. will erect a new elevator here with a capacity of 40,000 bushels. It will be of concrete construction. Hickok Construction Co., Minneapolis, Minn., has the general contract.

Waukesha, Wis.—William Barrows has been made manager of the plant of the Armour Grain Co. in the town of Merton. He has been stationed at Woodland for two years, previous to which time he was at Merton. Mr. Moses, whom he succeeds, goes to Minneapolis.

UTAH.

Tremonton, Utah.—The Holley Milling Co. has let the contract for the erection of a bi- grain elevator at Tremonton. It will be completed in time for handling the grain crop this season.

TEXAS.

White Deer, Tex.—Material is being placed on the ground for the construction of the Farmers' Elevator.

Crowell, Tex.—Material is being placed on the ground for the erection of an elevator by Messrs. J. W. Allison and B. W. Self. The building will cost approximately $6,000 and will have a capacity of about 16,000 bushels.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, June 30. — The provision trade has reached the stage where careful speculators are afraid to sell short or to buy to any extent. Those who are bearish can see too much of a possibility of higher prices, while traders who are bullish are afraid that the foreign demand might not continue up to expectations and prices recede. A lower range was made last week and closing trades were at a loss of $1.17½ on July and 97½ on September lard, with the bulk of the trading in that article. Short ribs lost 32½ to 42½c, with July in the lead, and pork closed 25c lower for the week.

Lard was the most actively traded in with an unsettled feeling. Prices advanced early, but declined $1.45 for July and $1.25 for September from the close of the previous week. A feature was the narrowing of the spread between July and September, which was 17½c a week ago, while at the close Saturday prices for both months were the same. A falling off in the export demand was noticeable, owing to high prices and the belief that the foreign consumers have secured liberal stocks.

The signing of the peace treaty on Saturday failed to stimulate trading as expectations of peace have been one of the most important market factors of late and apparently the effect has been discounted. Most operators took this view of the situation and said they saw nothing in the situation on which to base new speculative commitments. A feature that probably has as much to do with selling by several of the leading packers, particularly the Armour interest, was the calling for a statement of open trades on June 26. Packers brokers were liberal sellers early in the week and on the decline supporting orders appeared, creating a good rally. There is a great deal of gossip about the increased use of lard substiuttes and their effect on the lard trade which creates a bearish feeling and was in a measure responsible for the big break in July of nearly 1½c a pound. Country packers are sending in lard freely with the expectation of delivering it on July trades, receipts last week being 6,115,000 lbs., or almost double last year's. Shipments continue heavy, 11,334,000 lbs., compared with 1,740,000 lbs. last year. Cash lard was July price to 10c under and loose lard sold at 90c to $1 under July. Neutrals were easy.

Considerable trading was on toward the last in buying July and selling September lard and ribs. One of the large commission houses bought lard freely for three consecutive days, while packers brokers were liberal sellers.

Short ribs came in for more attention toward the last, although being neglected early in the week. There was no particular pressure of offerings, but prices receded 82½c from the close of the previous week with a good rally at the last. Expectations are that stocks will show a small increase for the month. The meat trade in general was of moderate proportions, particularly on domestic account. The foreign situation is less inviting to the buyers. Consignments that recently arrived in England have not found buyers and had to be taken into store.

A Liverpool provision man who was here last week said stocks in England are not more than a few weeks consumption and the trade is affected by selling of product that was bought at much lower prices some time ago and until it is cleaned out, higher priced product is not expected to move fast. Shipments of all meats continue large and of cured product were 28,046,000 lbs. last week, compared with 21,761,000 lbs. last year.

Pork was without particular feature as a trading proposition. There is a big profit in cutting hogs and supplies are liberal.

Kansas City Provision Review.

KANSAS CITY, June 28.—With official announcement of the signing of the peace treaties by Germany, a further increase from the present enormous volume is anticipated in the export movement of pork products from the United States by provision interests here. The market displayed a strong tone this week, in sympathy with the rebound in live hog prices. Fresh pork met with a fair demand, with loins closing with a gain of as much as 1c for the week. Poorer grades of fresh pork were unchanged and even lower in instances. The East was a light buyer of fresh pork. Requirements of wheat harvesters continue an important item in the trade in the better grades of smoked provisions. A large movement is reported from Kansas City to the wheat-producing districts, where harvest is in full swing. Dry salt and heavy smoked meats were up ½c, sharing a fair demand from the South and locally. Lard was up slightly. Fancy hams and bacons were in improved demand during the week, due to higher temperatures. Prices were up ¾c.

Cash Meats.

There was an easier tone to the hog products market on Monday. Shipping demand for mess pork, lard and ribs is said to be moderate with offerings fair. Quotations follow as of Monday, June 30:

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, June 30.—Hogs sold at $21.60 at the opening and again at the close of last week the highest price on record. The average price on Saturday was $21.13, against $20.70 a week ago and $16.85 last year. Average for the week was $20.80, against $20.40 the previous week, and $16.55 last year. Prices were 40 to 50c higher than a week ago. Pig prices were little changed, compared with the previous week's close, with supplies light. The impression prevails that the big part of the summer run of hogs is over and that supplies will be much lighter and the quality poorer. A good percentage of the run at the close of the week was common mixed and grassy hogs are offered more freely, the latter selling $1 under matured corn fed stock.

Packers were good buyers throughout the week and took 149,900, compared with 160,300 and 113,100 last year. Average weight was 233 lbs., compared with 232 lbs. the previous week and 237 lbs. last year. Receipts were 160,159, or 29,000 less than the previous week, compared with 119,719 last year. The eleven markets had 596,000 for the week, against 667,000 the previous week and 534,000 last year. At the twenty-one markets there were 675,200, a decrease of 70,500 for the week.

Top prices on heavy cattle at Chicago last week were $15.80, or 55c lower than the previous week and $2.20 under those of the same week last year and $1.90 higher than in 1917. Trading was largely at a drop of 50c for the week, while light cattle showing good form were called 25c higher. A better quality was on the market, taking it on the whole. Average price was $13.65, or 15c higher than the previous week, compared with $16 last year.

Cows and heifers closed 25 to 50c lower, while good yearlings and choice heifers were practically unchanged and canners and cutters finished at about the same prices as a week ago. Prime heifers sold up to $14 with comparatively few good enough to bring that price, but there was more trading at $13 and under than over that figure. The bulk of sales was around $9.15 to $11.30, with the average of fat cows and heifers $10.20, a loss of 5c for the week.

It was a poor week for bulls, which were off $1 to $1.25 with the bulk of sales at $8.50 to $10 and the average $9.25, or 60c off for the week. Bolognas averaged $8.40, a loss of 90c. Canners and cutters sold largely at $6.55 to $7.80, with an average of $7.15, or the same as the previous week. Calves advanced 50c to $1 and sold up to $18.25 and $18.50 for choice, with a few fancy at $18.75. Fair to good calves sold around $17.50 to $18, with the bulk of sales at those figures and the average $17.75, a gain of 50c.

A few choice feeders sold at $12.50, but the bulk of sales were at $10.35 to $11.45, an average of $10.90, a gain of 15c for the week. The seven markets had 170,000 for the week, or 8,000 more than the previous week and 11,000 in excess of last year. Chicago had 65,000 against 44,300 last year.

Native spring lambs were $16.75 to $17.50. First crop of new Oregons brought $17. Feeder lambs sold at $13.50 to $14 for breeding ewes. Average of lambs were $12.25, against $14.30 the previous week and $16.25 last year. Aged ewes closed 50c higher for the week and the bulk of sales of sheep were at $7 to $9 with the top $9.50 made at the opening, and the average $8.75, against $9.30 the previous week and $12 last year. Receipts here were 77,500, or nearly 3,000 less than last year. The twenty markets had 287,600 for the week, an increase of 27,500.

The Chicago live stock markets will be closed July 4 and 5. Live stock will be received and cared for on those days, but there will be no trading.

Estimated receipts this week are, cattle 53,000, hogs 140,000, sheep 62,000. Last year receipts were, cattle 53,762, hogs 136,002, sheep 64,623.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, June 28.—Hogs continued this week to lead the live stock market in bullishness, closing with gains of about 75c per hundredweight. Another slump was witnessed in cattle. Sheep closed 50c to $1.50 lower. There was a general decrease in the receipts, with hogs showing the sharpest reduction. Rush of harvest work in wheat fields undoubtedly checked the movement of hogs and cattle, particularly the former.

Among the unusual features of the hog market was the fact that sales were made frequently at prices averaging higher than the quotations at Chicago. At times the average cost here was as much as 20c over Chicago. A new record top, $20.35, was paid on Monday, and the average price on Friday was up to $20.82. Pigs were in light supply and in strong demand, selling as high as $20.25 per hundredweight. Producers are displaying confidence in the market by the manner in which they are holding their stock hogs.

All classes of cattle shared in the extreme weakness which developed in this branch of the market. The top sale was at $14.50, and the fed steers which sold at $13 or more were very few in number. Steers receded 25 to 50c, and butcher cattle lost 25 to 75c. The best cows closed around $10. Veal calves sold up to $15.50, but closed 25c lower, with tops at $15.25. In the stocker and feeder market, extreme dullness was the rule. First, there was an unwillingness on the part of feeders to pay current prices for stock or feeding cattle in view of the fact that the margin is not wide enough as compared with fed offerings. Another adverse influence was the demands of the wheat harvest upon producers. Stocker and feeder steers are quoted up to $12.50, but these prices are not expected to be maintained in view of the weakness in fed cattle. Indicative of the tendency of the market is the fact that stockers and feeders receded $1 per hundredweight this week.

Sheep lost $1 to $1.50 and lambs receded about 50c this week, the market feeling the weight of bearishness on the part of packers said to have been induced by large lamb sales by Tennessee and Kentucky. Lambs sold up to $17.10, and few ewes up to $8. Stockers were in poor demand and there was a glut of old ewes from native territory. Breeding ewes were quoted up to $16.

Omaha Live Stock Market.

Bruce McCullough, Correspondent.

Omaha, June 28.—Conditions surrounding the cattle market were generally bearish this week and closing prices for both beef steers and butcher stock around 50@75c lower. Heavy local receipts, unseasonably hot weather and unfavorable advices from Eastern beef and cattle markets all combined to depress trade and values on Wednesday were the lowest so far this year. There was a moderate reaction the latter part of the week but the extent of this reaction next week will depend largely on the size of the receipts.

Heavy cattle and yearlings are now selling in pretty much the same notches, choice to prime grades at $13.50@14.25, fair to good kinds largely around $12@13, and common to fair stuff at $10@12 and on down. Cows and heifers have followed the same course as the fat cattle and on the finish choice heifer stock was selling at $10@12, fair to good butcher grades at $8.50@10, and canners and cutters at $5.50@7.50. Bulls, stags, etc., have shown fully as much decline as the cows, selling now around $7@11. Veal calves, however, have advanced fully half dollar and best vealers now bring $14.50@15.

Business in stockers and feeders has been seasonably light and while fleshy steers of good quality have held about steady at $10.50@12.25 the general run of stock cattle has sold half dollar lower at 8.50@9.50.

Hogs have sold very unevenly all week but the average was higher than the week previous and closing quotations in pretty much the same notches as a week ago. There have been generaus offerings and quality has been good while there appears to be no limit to the demand both from local packers and Eastern buyers. All classes of buyers now favor the light weight hogs and they command a considerable premium, while discrimination against heavy and rough packing loads has been more marked than at any previous time this year. Saturday's receipts were 12,000 head and the market 15@35c higher. Tops brought $20.90 and the bulk of the trading was at $20.25@20.75.

Receipts of sheep and lambs have been very heavy this week largely owing to the slouthy conditions in the Northwest and the market broke sharply early and recovered very little later. For the week quotations on both lambs and aged stock show a decline of $1@1.50 and undertone to the market is rather weak than otherwise. Spring lambs are quoted at $15@16.75, shorn yearlings $9@10, wethers $8@9, and ewes at $6@7.

St. Louis National Stock Yards.

H. L. Wyatt, Correspondent.

National Stock Yards, Ill., June 28.—Although there were comparatively large runs of cattle reported at the other Central markets this week, our run shows a very moderate total. During the early part of the week prices showed a steady decline but about the middle of the week conditions changed and while trading was slow, prices struck a much steadier basis. We go out of the week 25@40c lower on all classes than the close of last week. Good butcher stock and medium steers show less decline perhaps than the other grades.

The hog market was very irregular but the trend is to higher prices and at this writing the top, which was made on good heavy hogs today, is the highest figure ever paid upon this market. The advance for the week is right at $1.35 over the close of last week. The quality of the offerings is fair. The week's closing quotations are: Mixed and butchers, $21.20@21.85; good heavies, $21.75@21.95; roughs, $17@20; lights, $21.30@21.70; pigs, $16@20.50; bulk, $21.35@21.85.

The sheep and lamb market under rather generous receipts as compared with what we have been having has shown a steady and consistent decline. The best Kentucky lambs which, by the way, are about as good as anything we receive here, topped the market for the week at $16.75 and they had to be strictly good to bring that figure. We anticipate an increasing volume in receipts for the next few weeks in this department.

Oklahoma Live Stock Market.

Tusnelda Haehnke, Correspondent.

Oklahoma City, June 28.—The run of cattle has been very light this week but nevertheless prices have been going steady. On Friday the steer market was called 25@35c lower for the week. Packers here are greatly in need of cattle as they are constantly drawing from nearby markets. Quality in cattle has been one of the lacking factors here, consequently holding down the prices. Good Texas cattle have been scarce, 11c being the top this week. Several loads of short-fed caked steers went at from $10.50@11.15, which is an advance over last week. The week ended up with a very draggy market. The steer offering was largely a supply of half fats from Texas with here and there a few loads of Oklahoma grassers, bulk selling at $8.50@9.50. Getting an exact line on the trend of the market was out of the question as bids were very erratic and fills of the best.

Butcher cattle here have been in great demand and consequently buyers are paying good prices for them. The fore part of the week canners and cutters sold active and steady and closed on about the same basis, bulk bringing $5@6.25 with now and then an old shell down to $4.50. About the same thing can be said about vealers, the best kinds going around $13. The calf market is called slower by some compared to the beginning of the week. Also a scarcity of stockers. Prices are ruling steady on this class, some yearlings bringing $8.25 or better and breeding cattle $6@7.25 with $7.50 possible for the best.

The hog top came very near being around the $2 mark, but only reached $20.90 which was just a trifle below Kansas City. Hogs for the week were called 25c higher compared with last Monday. Although receipts were lighter than usual pretty good prices were seen here. Stockers were few and the market was steady, best bringing $17@18. The week's top was $20.20, bulk $19.40@19.70, while a year ago the best brought $16.90.

Fort Worth Live Stock Market.

Roy C. Murphy, Correspondent.

Fort Worth, June 28.—Steers worth $10 upward at last week's close, have suffered a decline of 50 to 75c while 35 to 50c will cover the depreciation on the lower priced cattle. Some cake cattle have ranged as high as $11@11.50, but good South Texas steers seldom reached $10, though a few cars went at $10.25@10.50. Through sympathy with the beef steer market, prices on cows and heifers have suffered a corresponding decline, the loss for the week measuring right around 50@75c.

All classes of stockers have found slow, peddling markets, and prices have worked unevenly lower on steers and cows.

Hogs started on the upward trend Monday, and it was a higher market from there on out. Prices were at their best Friday when one car sold at $20.95, the equal of the previous yard record, but choice hogs were easily worth $21 or more. The advance for the week amounts to at least 50@75c.

It was a bad week for sheep and lambs. On Monday's market clipped wethers brought $9.75, but at the end of the week $9. Best genuine lambs are selling at $15 on Friday's market.

Canadian Live Stock Market.

Winnipeg, June 27.—Arrivals of hogs have been light this past week and what have arrived for the most part went on East, $21.50 being paid for selects. Buyers, it was noted, graded very severely. On Wednesday about 1,400 hogs were on sale. At Toronto the end of the week buyers offered $22.50 for select quality hogs but commission men were holding out for 25c additional with the result that trading was very light. At the Winnipeg yards the cattle market was stagnant. There were practically no arrivals which was a good thing for those from the previous week were still on sale and what sales were made were at lower prices than previously bid, $13 being obtained with difficulty on steers that a couple of weeks ago brought $15. Buyers in fact do not even trouble to come to the yards and it is anticipated that prices will drop still lower so it is advised that intending shippers hold back their cattle.

Movement of Hogs.

Weekly receipts and shipments of hogs at western centers the week of June 28, and totals with comparisons for corresponding time last year compiled by THE PRICE CURRENT-GRAIN REPORTER:

DIRECT HEAT DRIERS

THE STRONG-SCOTT MFG. CO.
MINNEAPOLIS

"THAT PROSPERITY SPECIAL"

was a "BOOSTER" Train composed of EIGHT PULLMAN Cars, TWO DINING CARS and BAGGAGE CAR filled with ONE HUNDRED AND FIFTY Members of the Wichita, Kansas, Board of Commerce. The purpose of the trip was to BOOST WICHITA. The train left Wichita on Monday Morning, May 19th, and returned to Wichita on the following Saturday night, May 24th. The RICHARDSON MAN went along and amused himself by gathering some statistics. Listen! we will give them to you.

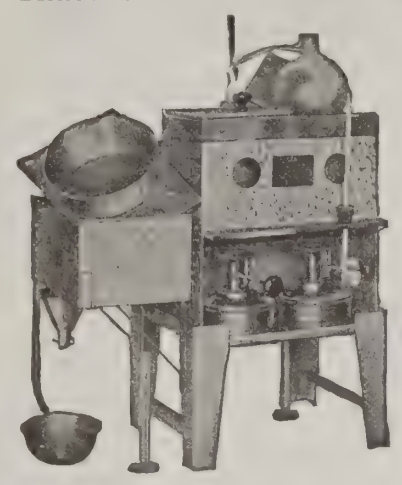
78 Towns were visited.
210 Grain Elevators were visited.
145 Richardson Automatic Scales were found.
12 ———— Automatic Scales were found.
1 ———— Automatic Scale was found.
4 ———— Automatic Scales were found.
36 Hopper Scales were found.
12 Elevators had no scales at all.

The average of Richardson Automatic Scales found on the trip was 1.8% per town visited.

There were only FIVE towns out of the 78 which did not have at least one Richardson Automatic Scale.

198 Scales were found in all, of which 145 were Richardsons. 853% more Richardsons were found than all the other Automatic Scales combined.

And since the return of the PROSPERITY SPECIAL—FOURTEEN NEW RICHARDSONS have been sold on the route.



Richardson Scale Co.

WET WHEAT—Big Dockage

That means—Mr. Grain Dealer—you will ***need*** a moisture tester and other grain grading equipment ***for your protection.***

You will want the ***standard*** equipment—the same identical grain grading devices that the government approves and uses. You can't afford to take chances with any other.

SEEDBURO (Trade Mark) QUALITY

OFFICIAL BROWN-DUVEL MOISTURE TESTER

manufactured by **The Seed Trade Reporting Bureau,** is the standard approved and used by government exclusively in its supervision offices, grain inspection departments and laboratories. Mills and elevators from coast to coast use SEEDBURO (Trade Mark) so their tests will check absolutely with the terminal markets.

The **SEEDBURO** Official Brown-Duvel Moisture Tester (for whole or ground grains) is made in sizes of 1-2-4-6 tests at a time and heated by electricity, alcohol or gas.

When you see the SEEDBURO (Trade Mark) label on grain grading equipment you *know* it's the Standard, you know it's correctly made—you know it's *right.* The old story of "just as good" has been the cause of many enormous losses. There is no "just as good" as SEEDBURO equipment, manufactured by the Seed Trade Reporting Bureau.

Look Sharp!—Be sure it is "SEEDBURO"

MANUFACTURERS OF COMPLETE GRAIN GRADING EQUIPMENT

Send for Catalogue E21—Contains Government Grain Standards

SEED TRADE REPORTING BUREAU

Postal Telegraph Building **CHICAGO, ILL.**

Dockage Sieves for Wheat and Oats
Government Specifications

Made throughout of aluminum, 13 inches in diameter telescoping, only two pieces of metal are used, thereby making the sides seamless. The bottom perforations are of aluminum, which makes the construction strong, light weight, and will not rust. Set consists of

Scalper Sieve, round perforations, 12/64 inch.
Buckwheat Sieve, triangle perforations, 8/64 inch.
Fine Seed Sieve, round perforations, 1/12 inch.
Chess Sieve, slot perforations, 4½/64x½ inch.
Solid Bottom Pan.
Price $8.00 for complete set.

Special "Four-in-One" Scale No. 14

This scale, designed and manufactured by us, is a small, complete office scale for weighing samples for moisture test and for determining test weights per bushel, dockages, weighs for mailing samples, etc.

This "Four-in-One" Agate Bearing Scale is the most complete, compact, accurate and adaptable scale made satisfying these many needs.

Effectively used in connection with grain sieves described herewith.

Quick breaking and guaranteed accurate. Will do the work of four ordinary scales designed especially to satisfy any one of the above needs and at the small price of one. Used by thousands of country shippers, receivers and grain men everywhere.

Price with weight per bu. cup, $23.00.

FOOD CONTROL IN ENGLAND.

Mr. McCurdy, British parliamentary secretary to the Minister of Food, in a recent speech says the possibility of reimposing control of the foodstuffs of the United Kingdom is under consideration, and as thus far it has been the habit of the American Congress on recommendation to "me-too" pretty much everything done by the George ministry in England, Mr. McCurdy's remarks have interest. He said to a conference of Local Food Control Committees of several towns:

"The question of retaining and in some cases of reimposing control upon foodstuffs in view of the possible rise of prices during the coming winter is now receiving the close attention of the Government, and it is not possible for me to make any announcement or to express any personal opinion upon the matter.

"The Ministry of Food was instituted in time of war as a purely temporary ministry for the purpose of protecting the public against the profiteering in food which had arisen out of war conditions and for the purpose of assuring supplies and co-ordinating distribution at a time, when the submarine menace made the food position in this country very precarious.

"The work of the ministry will be performed as soon as the dangers which it was created to guard against have passed away. It is impossible to say that we have yet returned to normal conditions, and I think it certain that some measures of control will be retained during the coming winter, either by the existing ministry or by some other department of state to whom the powers of the present ministry might be transferred.

"In speaking of control I am not thinking so much of rationing, the necessity for which we hope has now disappeared,—although even in that respect there may be surprises in store for us,—but the maintenance of national or possibly inter-allied purchases of some essential foodstuffs with a view to stabilizing prices and cutting out the speculative middleman, who in any period of shortage found his harvest at the expense of the consumer.

"In my opinion the protection of the public against profiteering, not merely in foodstuffs but in all essential commodities of life, is just as desirable a form of control to be permanently retained as the control exercised by the factory acts, by the public health acts, to which industry has long learned to accustom itself.

"The rapid multiplication of trusts and trade combinations having for their object the maintenance or raising of prices to the consumer proceeded at alarming rates during the last few years of war, and we do not yet know what the effect of this transformation of industry which has been silently proceeding will be.

"No one can view without alarm the growing power of the American meat trust to control in their own interest the food prices of the world."

The conference passed a resolution viewing with alarm the high prices of food and calling upon the Government to take drastic measures to protect the consumer against profiteering.

New Oklahoma Members.

The following have been accepted as members of the Oklahoma Grain Dealers' Association since the issuing of our 1919 directory: R. C. Koble Grain and Feed Co., Boynton; Farmers Co-operative Grain and Elv. Co., Sayer; Morrison Grain Co., Morrison; Otis O. Snyder, Prior; Farmers Co-operative Elv. and Exchange, Hinton; Davis Grain Co., Davis; Seminole Hill and Elv. Co., Seminole; Farmers Elv. Co., Minco; Duncan Elevator Co., Duncan; Robinson & Brown, Fargo; the Red Star Milling Co., Wichita; E. L. Juns, Carmen; Priddy Grain Co., Chillicothe; W. E. Britton, Moorewood; Fred Graves, Foss; W. H. Balthrop, Marietta; D. F. Wegner Grain Co., Ketchum; E. F. Young, Oolagah; Quapaw Mill and Elv. Co., Quapaw.

RECONSIGNMENTS.

The Commerce Commission has made a report (by Eastman, Commissioner) on I. & S. Docket No. 1161, entitled "Reconsignment Case No. 3," the syllabus of which report follows (53 I. C. C. 455):

"With few exceptions, the carriers serving grain markets in western classification and central freight association territories and north Atlantic ports make no charge for setting out and holding on tracks, cars of grain, seeds, hay, or straw, for official inspection and disposition orders, provided the disposition orders are furnished within a specified time. If the disposition orders are not so furnished a charge, generally $2 per car, is often made. Upon consideration of fifteenth section applications and certain suspended schedules providing for the application of graduated charges for the setting-out service, ranging from $2 per car to $5 per car, dependent upon the length of time the car is held; Held:

"1. That the service performed by the carriers in setting out and holding cars of grain, seeds, hay, and straw for inspection is clearly distinguishable from that given in the ordinary diversion or reconsignment. In the case of grain shipments the service springs from requirements of law based on business usage, and it is, and for many years has been, so general a custom in the territories in question to perform this service without charge, provided disposition orders are furnished within a specified time, that it falls within the rule laid down in Lighterage and Storage Regulations at New York, 35 I. C. C., 47, as being a service which the carriers have heretofore treated as included in the freight rate and which they may not now segregate for separate charge without taking into consideration, in order to justify such charge, the entire through service of which it forms a part and the compensation heretofore received for such through service.

"2. That the supercharges proposed in the schedules under suspension have not been justified, but that a flat charge of $2 per car, when the disposition order is not furnished within the time specified in the report, would be reasonable and is approved in the case of grain.

"3. That the rules and charges applicable on grain held for inspection should also apply on seeds.

"4. That as neither state nor federal laws require the inspection of hay or straw, the circumstances and conditions differ, and the service, unlike the service accorded grain and seeds, is not one which by long continued usage and custom has been treated as included in the line-haul rate, a flat charge of $2 per car without limitation of time is approved on cars of hay and straw held for inspection.

"5. That in order to eliminate discrimination or prejudice and expedite the service, cars held for inspection should be placed on hold tracks designated for that purpose and notice of the location of such tracks given to the consignees.

"6. That under the proposed rules two charges would be applicable on cars of grain and seeds held for inspection at intermediate points and later held for disposition orders incident thereto at the destination market, but that in practical operation under the rules found reasonable and prescribed this situation can not arise in case of grain and seeds, and will not arise on hay and straw since the record does not indicate that such shipments are inspected, or can be inspected, practicably, at intermediate points.

"7. That no charge may be made when cars are inspected while being held in railroad yards or at outside points for the convenience of the carrier.

"8. That when grain is inspected on the tracks of terminal elevators or public team tracks within the switching limits and delivery is taken therefrom no charge for holding for inspection will be made.

"9. That the disposition order received after the official inspection will be considered as in lieu of the consignment instructions under which the cars arrived at the inspection point.

"10. That the suspended schedules will be canceled but respondents are authorized to file schedules not inconsistent with the conclusions reached and the rules approved in the report."

Little Doing in Burlaps.

There was little business reported in the burlap markets for Friday, many of the large bag manufacturers being busy in closing and examining their inventories, says the *Journal of Commerce.* Prices quoted on 8-ounce goods vary from 11.75c to 11.85c and on 10½-ounce goods from 13.15c to 13¼c.

A farmer from Plainview, Neb., says he got as much hay from the first cutting of alfalfa this year as he did from three cuttings last year, and wild hay on the bottoms is very fine.

WANTED and FOR SALE
GRAIN DEALERS' MARKET PLACE

For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line

ENGINES FOR SALE.

FOR SALE—110 horsepower Bessemer gas engine, good condition.

FARMERS BUSINESS ASSOCIATION, CHANUTE, KANSAS.

SCALES FOR SALE.

ONE RICHARDSON AUTOMATIC SCALE, 1916 type, in first-class condition, selling because we are replacing with a ten-bushel machine of the same make, as we need larger capacity. Address FARMERS ELEVATOR COMPANY, La Crosse, Ind.

ELEVATORS FOR SALE.

25,000-BU. ELEVATOR, electric power, good coal and feed business, located in best farming district in Iowa. Address COAL, Box 2, Price Current-Grain Reporter, Chicago, Ill.

GRAIN ELEVATOR for Sale—Also three fine business lots and 40-acre farm with fine residence. Address E. HAUTERBROOK, Green Bay, Wis.

FOR SALE—8,000-bu. cribbed elevator in good grain territory; feed and hay business in connection. Priced cheap at $3,500. Only elevator in town. H. G. SCOTT, Buck Grove, Iowa.

ELEVATOR FOR SALE—Capacity 25,000 bushels. International farm machinery contract goes with the deal. Price $12,000. Cash $7,000, balance terms. Big grain point and good machine business. Max, N. D. Address E. BALSUKOT, Plaza, N. Dak.

OFFICE SUPPLIES.

FOR SALE—Burroughs, Wales, American, Dalton, Standard, etc., adding machines, half retail prices, fully guaranteed. Typewriter bargains, all makes. Get illustrated catalog and bargain list. MINNESOTA TYPEWRITER EXCHANGE, Dept. P. C. 236, 4th Street South, Minneapolis, Minn.

MACHINES FOR SALE.

ONE NO. 2 SIDNEY Oscillating Corn and Grain Cleaner in good condition and one 6-ton Fairbanks Scale in good condition. RICHARDS & ARMACOST, New Hope Station, Ohio. (P. O. Address Campbellstown, Ohio.)

FOR SALE—One No. 8 Bowsher feed mill in perfect running order. First person sending check for $50 will get this machine. Price F. O. B. cars point shipment. GOODRICH BROS. H. & G. CO., WINCHESTER, IND.

ENGINES WANTED.

WANTED — Second-hand gasoline engines. Fairbanks-Morse and Otto preferred. Describe and state price wanted. Address ENGINE, BOX 1, Price Current-Grain Reporter, Chicago, Ill.

HAY FOR SALE.

FOR SALE—Elkhorn Valley Hay in carload lots. Write for prices. HARRY T. STEIN, Ewing, Nebr.

HELP WANTED.

WANTED — Grain solicitors; one for southeastern South Dakota and southern Minnesota; one for northern Missouri and northern Kansas. Must have experience; someone controlling fair volume of business preferred. Address, giving reference and salary expected, CHILD, Box 2, Price Current-Grain Reporter, Chicago, Ill.

MILL MANAGERS WANTED—I need three live men as managers of Community Flour and Feed Mills by Aug. 1. Good salary and quarter the net profits to those willing to invest $2,500 in working capital. CHAS. T. PEAVEY, Webster Bldg., Chicago.

SALESMAN WANTED—Young man of good education and character to travel Southeastern territory as representative of one of Indiana's leading mills. Splendid opportunity for the right man. Must have experience in the sale or manufacture of corn meal and corn products. Give full particulars in first letter. References required. BOX 468, Lawrenceburg, Ind.

OPPORTUNITY.

WANTED BY a long established conservative grain commission firm, several experienced traveling men of good address and habits. One for Iowa, others for Kansas, Oklahoma and Nebraska. Must have experience and established trade and be able to show results. Address B. C. CHRISTOPHER & CO., P. O. Box 590, Kansas City, Mo.

The Irish Department of Agriculture announces that potato blight has made its appearance in County Cork. The department urges spraying immediately.

The Ogilvie milling plant at Winnipeg has resumed milling on a contract to provide 2,000,000 bbls. of flour for the Wheat Export Co. representing the allied governments of Europe.

Many cars of corn are arriving at St. Louis in a heating condition and the Elmore-Schultz Grain Co. have warned their shippers to use caution about loading corn that feels damp or tough and recommends running it a few times to dry it out.

The I. W. W. has been trying to center its activities in Kansas during the wheat harvest but its movements have been more or less interrupted by agents of the United States Government.

WANTED

For small terminal elevator and corn mill, an experienced elevator man understanding grading, mixing and blending of grain. Business and living conditions exceptionally good. Located in city about 35,000. Permanent position.

Address Corn, Box 2, Price Current-Grain Reporter, Chicago, Ill.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

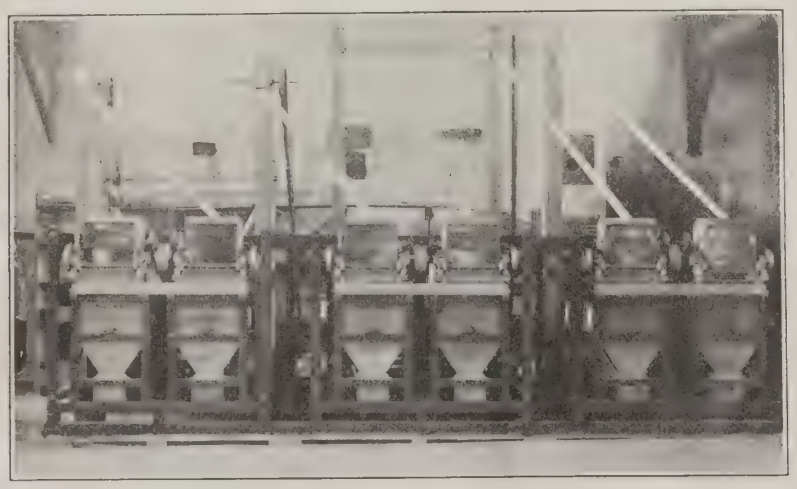
It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

The XX th Century MILL MFG. CO.
DECATUR - ILLINOIS

Dow's "Handy Andy"

The Scotch say that money saved is money earned. "Handy Andy" will therefore earn money for you by *saving* it.

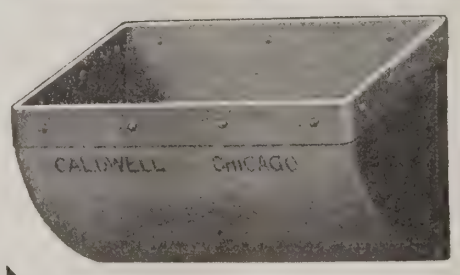


"Handy Andy" is the practical, portable, adjustable elevator that stacks and conveys bags, boxes, bales and other packages. Light in weight, sturdy and strong, simple to operate, easy to adjust, easy to move.

We can also furnish you with "Handy Andy" in another model for handling *material in bulk* such as coal, ashes, rock, brick, etc. Write for further particulars.

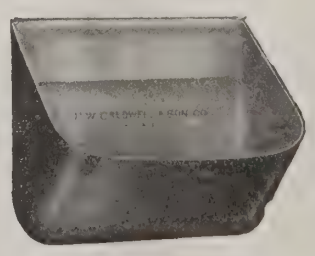
DOW WIRE AND IRON WORKS, INCORPORATED, LOUISVILLE, KY

Elevator Operators are fast realizing that profits are to be made through



MILLING WHEAT AT ITS SOURCE

A strict eye on the tailings and bran is the food program of the Nu-Way Mill. It occupies very small floor space; Uses minimum of power; Inexpensive to buy and to operate.



The Simplest, Most Practical, Most Economical Flour Mill on the Market

Cape Mill Manufacturing Company
10 S. Frederick St. CAPE GIRARDEAU, MO.

Elevator Buckets

WE CARRY IN STOCK at all times a large supply of Elevator Buckets, including Salem, Caldwell Seamless Steel, Regular Riveted, and various styles of Malleable iron. All sizes and gauges for handling different materials. Special buckets made to order. Manufacturers of Helicoid Screw Conveyor, Steel Elevator Casings, Pulleys, Bearings, Rope Sheaves and Gears. Complete Equipments of Elevating, Conveying and Power Transmitting Machinery for Grain Elevators, Flour Mills, etc., etc.

BUSINESS AND TRADE CONDITIONS

THOSE good people who have entertained the notion that the change which in November last was made in the political complexion of the Congress would mean putting a break upon the habit of the Congress to multiply paternalistic laws, are rapidly being disabused. It was the hope, as it was the expectation, of most business men that the ending of the war would also put an end to the control and regulation of business by the Government, both directly by law and indirectly by virtue of executive orders delegating the war powers of the President to meddlesome commissions and obscure departmental clerks alike. But there is no evidence that the present Congress has any intention to discourage or relax the control which has made the Administration in its relation to business so irksome and irritating.

On the contrary, the Kenyon-Anderson and Kendrick bills to regulate and control by law the meat packing industry of the country are as drastic measures as any that have preceded it. Senators Kenyon and Kendrick may even have taken their cues from the Department of Agriculture which has been endeavoring for a long time to fasten itself on this industry. The recent decline in the price of cattle, without any corresponding decline in the price of butcher's meats, has, of course, given the radicals a new opportunity for a hearing, of which they have not failed to avail themselves; and Ass't Sec'y Ousley on July 4 published an "analysis of the situation," which contains some curious phases, to say the least. In explanation, for example, of the excessively high retail prices for beef, he says: "The fact is evident that many persons who desire to eat more meat, especially beef and lamb, are denying themselves"; but he is quite certain of the fact, since it is established by published prices, that "these prices are not justified by the wholesale quotations." Therefore, he proposes that all shall eat more beef and more lamb and get out of the war habit of saving food, because, he says, "an increased consumption of beef would reduce prices to the consumer." There are some unprogressive people who still adhere to the thought that it is demand which makes price and that the greater the demand the greater the price, at least until the supply equals or by a little exceeds the demand. Now, as to cattle, there seems of late to have been distinctly an excess of supply at the yards, with poorness of quality; and the foreign demand for beef having become somewhat less insistent, the hoof price at the yards has naturally declined. But the retail prices have not, although the wholesale price to the butchers, of Chicago at least, has fallen about 28 per cent since March 1, or 3 per cent more than the decline in prime steers and twice the decline in "medium" beef on the hoof. "The facts," therefore, says Mr. Ousley, *lucus a non lucendo*, "demonstrate clearly the commanding need for Governmental supervision over the manufacture, sale and distribution of meat products."

Now, of course, one naturally feels restraint in questioning so distinguished a purveyor of paternalistic clap-trap as the Department of Agriculture, but it may be conceivable that there are other explanations for a situation which Mr. Ousley and his chief fail to explain and which they think can be mitigated only by a resort to a system of bureaucratic control and "Federal supervision," as proposed in the bills named, as shall put us well on the road to nationalization of our industries and the annihilation of that independent personality and individual initiative to which as Americans we owe all our National achievements and which in two great wars has saved the country by creating in advance stores of private wealth for the National use in time of emergency.

"Until another war happens along, the $20.00 steer, in our opinion, is not going to be in evidence," say the Prey Brothers, live stock men at Denver. "Nor will the common and rough weighty cattle, which brought a premium last year on account of being heavy enough to fill a war order, command as much money as they did last year. This does not mean that we are going back to pre-war prices, but it seems that if the public is to consume beef in normal quantities the cost must be reduced. The same will apply to mutton. During the last two years of the war, retail meat establishments multiplied on account of the public paying the prices without complaint. . . and until they have been eliminated relief is improbable. . . . City rentals are enormous. Union labor dominates the retail business as it does the packing industry. Wages in both cases have advanced 50 to 75 per cent as compared with pre-war basis. . . . In delving into this matter we find that the packer is satisfied and continues to handle beef products on the same small margin that Government investigation has demonstrated, and that the discrepancy lies between the selling price of the packer and the cost price to the consumer, showing an enormous profit that should be remedied. We see no other solution but fewer retail butchers, bigger volume of business with the same overhead expense, which would enable them to handle the product, in our opinion, for 10c per pound less than the consumer is compelled to pay at the present time. Decrease in price, increase in consumption; increase in consumption, stimulation to the market for live cattle."

But one might ask, who is to take up the cleaver to cut off the superfluous butchers because they do not imitate the packers by doing a big business on a small profit? And why impound in the Agricultural Department the packers who, on Mr. Ousley's own showing are not guilty and let go the retailers who are guilty, but whom even the Agricultural Department cannot expect to bring under "Federal supervision" to the extent of taking away their licenses on complaint of suffering but irresponsible housewives?

The May exports, $606,379,599, were the greatest on record. For the fiscal year 1918-19, ending June 30, the Department of Commerce estimates a total of $6,806 million dollars, the greatest valuation for a year of foreign trade in American history. The following showing of origin of imports for the eleven months June-May and destination of exports same period (000 omitted) has a peculiar significance:

	Imports from—		Exports to—	
Divisions:	May.	Eleven mos.	May.	Eleven mos.
Europe	$ 47,275	$319,583	$389,519	$3,990,085
N. America	113,113	955,194	101,628	1,172,401
S. America	51,184	516,213	32,441	357,105
Asia	88,839	757,916	52,140	523,561
Oceania	10,724	181,433	19,647	186,771
Africa	17,792	72,513	11,006	76,323
Total	328,927	2,802,853	606,380	6,306,745

In one word, our exports are going to Europe and to Canada and our imports are coming from everywhere except Europe.

Naturally enough American business is good. The demand for products is unlimited, but because, as the Federal Board *Bulletin* has said, demand and supply are automatically equalized by changes in prices, such changes are, under the circumstances, necessarily upwards. The problem ahead is how in trying to satisfy the demands of Europe through this enormous exportation for which nothing is coming back, and maintain the supply of banking credit at home in volume enough to supply domestic demands; it can't all be placed at the disposal of foreign buyers. There is a large demand, for example, for homes, but the National Bank of Commerce in New York says "a difficult financial situation exists as a result of high costs of materials and labor, coupled with the diversion into other channels of capital which would ordinarily go into this class of buildings"; wherefore prospective builders must expect to carry a larger share of the total costs than has been the custom because there is not so much loanable money available. This does not encourage home building and is responsible for the steady advance in rents. On the other hand, short time money has been easy except at intervals when stock speculation reached excessive limits, and there has been a steady buying of industrials showing large earnings and of oils stocks. The latter class of stocks has in fact been very prominent all through the recent movement. While the general outlook seems very promising there is behind it always the "inflation hazard," the danger that prices will reach impossible heights and that with apparently unlimited credit for the asking European buying may reach indiscrete proportions. However, when Germany begins paying indemnities there must be more or less disturbance of the export trade. Germany will, of course, pay only in goods and she will therefore export far more than she will import, whereas before the war the reverse was true. The indemnity situation is not quite understood. To the mass of men paying a national indemnity is like John Smith paying a judgment to Jones on the next street; but it is quite a different affair. The Allies who are so jealous now of Germany's trade, her exports, in fact, and only her exports, are confronted by the fact that if Belgium and France are to receive their allotments of the indemnity the solvent Allies must first help Germany to become a great industrial nation so that she can pay and then accept their pay in goods. Germany must manufacture on a tremendous scale and ship in proportion or no indemnities can be paid. In like manner, if the U. S. Treasury is ever to be paid the advances made to our Allies or even the interest thereon, we must expect to accept pay in goods. Wherefore, in its present temper it is only a question of time before the Home Market Club of Boston, and standpatters generally, in order to prevent this, will take up the proposition already made to cancel the entire debt to prevent an influx of goods. This is bound to come. The notion that a people can become rich only through exportation and poor by importations is an insidious fallacy that time and experience do not seem to dispel.

Another interesting presentation of the foreign trade is the following table showing the nature of our imports and exports for eleven months:

Groups—	Imports.	Exports.
Crude materials for use in manufacturing	$1,115,489,246	$1,065,093,738
Foodstuffs in crude condition and animals	339,078,183	639,025,327
Foodstuffs partly or wholly manufactured	407,673,849	1,509,599,588
Manufactures for further use in manufacturing	567,172,098	854,151,276
Manufactures ready for consumption	360,668,306	2,093,796,169
Miscellaneous	12,771,389	14,913,694
Total imports	$2,802,853,071	$6,176,580,392

From which it appears that only 12.8 per cent of our imports were of manufactures ready for consumption and 87.2 per cent foodstuffs or raw materials, while 33.9 per cent from exports were manufactures ready for consumption. The argument for the protection of infant industries or against pauper labor seems therefore to have lost any significance it may at one time have had.

THE HAY CONVENTION

THE annual hay convention, the yearly meeting in mass of the National Hay Association, will be held at Detroit next week. This is always one of the great trade conventions of the year. The membership of the Association represents perhaps the greater part of the responsible purchasing and forwarding interests in the country, as well as many heavy producers; and the trade generally looks to this body to take up for settlement the peculiar problems which continually arise in the course of business. If these could be settled, once for all, to "stay put," there would be no need for associations and conventions, except to promote good fellowship; but as there is no progress without change, it is the duty of the members of the trade to meet annually to consider the changes that are apparent, study their influence on the business in general and on that of individuals, which is possible only by personal contact and by concerted action to influence the action of Government, the common carriers and other functionaries in ways that will promote and not disarrange the natural course of business. That's the reason why every man who takes every precaution to foster and protect his own business should go this year to Detroit.

HANDLING THE SOUTHWESTERN CROP

KANSAS CITY and Western wheat handling markets have fully arranged the necessary financing to cover the enormous tonnage and high valuation of the present crop movement. There has been some uncertainty regarding available storage for the new wheat; and although terminal markets do not show any particular increase, there is in the states of Kansas and Oklahoma several million bushels more elevator room than on the last crop. Scores of small elevators have been built and hundreds of others have made additions so that one firm, for instance, has in this way, through the erection of 15,000 to 40,000 bushel plants, built in the past few months between 5,000,000 and 6,000,000 bushels in these two states alone. Absolutely accurate figures are impossible to secure, but terminal market operators rather believe that the country trade, if given reasonable car supplies, can satisfactorily handle the rush of wheat from the farmers and the delivery to terminal markets.

THE GOVERNMENT AS A WHEAT BUYER

THE Government as a wheat buyer, in the guise of the Grain Corporation, is not destined to be popular this season, one has reason to suspect. Mr. Barnes is a merchant and has not yet been long enough in the official saddle to have lost his merchandising instincts. His profit of 23 millions handling the crop of 1918 is to his merchandising instinct's credit, even if it does make Senator Gronna's constituents mad because they now think they were deprived of it. That's, of course, a last year's bird's nest; but apparently the Corporation does not intend to sink any money this year if it can avoid it.

This year it will not be hard for the dealer to handle Nos. 1, 2 and 3 wheat—the price is fixed and the terms known, but the crop is large and quality threatens to be poor and very spotty. How about the lower grades? Will the Grain Corporation take them with the better? When the proposition was put up to one Zone Agent, In case of dispute with farmers as to grade and price of lower grades and you fix grade and price as per contract requirement, will the Corporation agree to take the grain at the price put on the sample by you? he replied, "No." In reply to the query, In case an elevator man desires to throw the burden of risk on the farmer to market the lower grades for himself, will the elevator man be allowed to ship on account of the farmer for an agreed compensation? he replied, "That is up to the Wheat Director."

We don't know what the country buyer will do under the circumstances. The Corporation as guarantor of the price made by the President ought to buy everything offered and in particular all grain, the value of which is in dispute between buyer and farmer and upon which the Zone Agent fixes a price, as he must in such instances. It would be highly unfair for the Corporation to take the cream of the crop at stated prices and let the country trade struggle with the farmer over the lower grades and the refuse. Yet apparently that seems to be the program as interpreted by at least some Zone Agents.

THE DEALER'S POSITION

THE position of the elevator operator in the wheat belt is not an enviable one this season. He is morally bound to keep his houses open for the purchase of wheat, but he is under more or less restraint as to his operations. Especially difficult may be his position in handling the grades below No. 3, which must be bought and sold without fixed price guides, as provided for grades 1, 2 and 3. Doubtless as the season develops and the quality of the crop is established, the price difficulties with the lower grades will prove less formidable than they may appear to be at this moment. Borrowed trouble is always the most burdensome.

This much is certain, however; the buyer of wheat must be well prepared for his work of grading the grain. His contract with the Grain Corporation protects him against unfair "come-backs." The farmer who is dissatisfied with the grading and the price offered must voice his complaint before the grain passes from his ownership and control, otherwise he is estopped from any complaint. But he has the right of appeal to the Zone Agent, as has the buyer, and the finding of the Agent as to grade and price must be accepted by both parties.

The position of the buyer, therefore, is exceedingly precarious in case of appeal, unless his office is equipped with the apparatus for grading the wheat by the Government standard method, as provided in the "Rules and Regulations." The outfit is not expensive. It can be purchased for quick delivery now; and a misgrading due to lack of apparatus may be so expensive that a single instance where a lower grading be made at a terminal or on a farmer's appeal might conceivably cost many times the expense of a complete outfit. The dealer who takes such a risk—who fails to study the method so deeply that he can use the system intelligently and literally—will have only himself to thank if he makes no money on his transactions this season.

TOWNLEYISM WINS AND LOSES

TOWNLEYISM in North Dakota has reached its climax and is now in its decline. It won out on the referendum a few days ago; and the socialistic program of state ownership and operation of banks, grain elevators, packing houses, etc., has been approved by the voters; but the majority was so small, a matter of 6,000, or 6 per cent of the total vote, it suggests that the momentum of the Non-partisan League is now a spent force. Whether the gang will have the hardihood to attempt carrying out the program under such circumstances remains to be seen and also whether a state in the hands of such a government can raise the money to carry out such a program. If it does procure the money needed, most of the rules of sound investment will be ignored or set at defiance.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	July 3.	June 28.	July 6, '18.
Wheat—			
Primary receipts	1,022,000	1,419,000	1,743,000
Primary shipments	488,000	1,493,000	244,000
Receipts since July 1.	1,022,000	434,911,000	1,743,000
Visible	6,708,000	8,681,000	551,000
Available, June 28	9,720,000	12,805,000	2,156,000

EDITORIALETTES

RYE-WHEAT mixtures are going to be troublesome this season in Kansas, Oklahoma and Indiana, if not elsewhere in the wheat belt. Wheat buyers are cautioned to study the Rules.

IF YOU have not bought your wheat grading outfit, do so at once. Every bushel of wheat bought this year must be graded by the Standard rules; and you can't do that without standard equipment. Don't try to "beat the game"; it can't be done.

BROOMHALL cabled on Monday that it is reported that France will reimpose the pre-war duty on imported oats, corn and barley, and doubtless when a wheat surplus shall have been accumulated, the wheat duty also be re-established. France has been a protective country for a generation and her peasants, like the German junkers, know too well the financial benefit to them of a good fat duty on imports what the people must have or go hungry for bread. The immediate reason assigned for the renewal of duties now is that the ocean tonnage is needed for the bread grains and other necessaries more important than stock feeds.

VICE-PRESIDENT EARLEY of the North Dakota Bankers' Association told the Wisconsin Bankers' Association that Townley of the Nonpartisan League is "a capable leader, a master of political strategy, and if he should gain a foothold in an agricultural state like Wisconsin or Illinois, and thus succeed in his dream of linking up labor and farmer, all I can say is 'Look out!' This man has made the farmers of North Dakota conscious." Well, probably the fool report of the North Dakota Bankers' Ass'n committee on the Duluth and Superior elevators some years before Townley broke loose did quite as much as Townley to that effect; at any rate, his success is based largely on that egregious blunder.

THREE DOLLARS a year in the United States and Mexico; $4.00 a year for Canada, $5.00 United Kingdom, the Continent of Europe, Australia, and other countries in the Universal Postal Union. Less than a year at the same rate. Single copy 10 cents.

LETTERS on subjects of interest to those engaged in the grain trade, news items, reports on crops, grain movement, new grain firms, new grain elevators, contemplated improvements and cars leaking grain in transit are solicited.

THE ADVERTISING value of The Price Current-Grain Reporter as a medium for reaching the buying power of the grain elevator men is unquestioned. The character and number of advertisements in its columns tell of its worth. If you would be classed with the leading firms catering to the grain trade, place your announcements in the trade's only weekly, which is always first to get the live, up-to-date news to its readers.

ADVERTISEMENTS of meritorious grain elevator machinery and supply houses and of responsible grain firms who seek to serve grain dealers are solicited.

CHICAGO, JULY 9, 1919.

GRAIN TRADE REVIEW

Corn crop reports of late have been generally excellent. There are a few unfavorable spots in the country which is only natural, but the general average has been so favorable that the December has at last broken away from the old crop deliveries and is inclined to drag. The Government Report is expected to show a relatively small acreage with a good condition, but the final returns are likely to indicate a smaller acreage than the first returns, as there has been more or less loss on low lands due to flooding and other factors and in some sections this land cannot be replanted. The bulk of the crop is now laid by, with the greater part of the early tardiness of growth recovered. The abnormally hot weather has brought this about, but there are some sections that will have soft grain unless there are continued high temperatures until late in the season.

The old crop situation is becoming very strong. A short while ago the trade made much of the low prices prevailing in Argentina, yet values there have practically doubled of late and ocean freights have mounted, so that at the moment the Argentine grain delivered at New York *via* steamer would cost nearly as much as the domestic article laid down from the West, and the latter would be of excellent quality and free from weevil. Drought in western Europe has materially cut down the crops of feeding grains, and Argentine corn is about the cheapest of all feeds that can be secured. This has tended to force values upward, and American speculators were not slow to take advantage of it. Export business from the United States of grain seems almost impossible, but there is an excellent call for the finished product in the way of starch, etc., which keeps industries in the market for the grain, and stocks in sight are by no means liberal. Receipts are expected to be very light for some time to come as harvest of winter wheat and oats is now under way, and farmers have little time for hauling.

Hog prices are the highest on record, and corn is about the same, everything considered, the high levels of several years ago being due more to a scarcity of grain of milling quality than to anything else. Yet, corn is still below a parity with hogs, and there is an excellent profit in feeding. Cattle prices are very low, but in some instances feeders have such heavy losses staring them in the face that they are inclined to keep on feeding, hoping that there will be a turn for the better. Europe cannot substitute barley and other grains for corn for feeding purposes, having little to substitute with. Very large sales of barley have been reported on the Pacific Coast to go to the United Kingdom. How much grain will be shipped from North America, and in fact from all countries, depends greatly on the amount of ocean tonnage, which is already commencing to be a little short.

The food situation is about the same as in other lines of business. The war caused reserves of all commodities to be reduced to small proportions. Peace is at hand and with fair confidence in the maintenance of a high level of prices there is a move to restock. This finds supplies rather light, and accounts for some of the advance. Wages have also gone up, and are still trending higher, so that there is more money with which to pay for food. Prohibition may also make a difference in the purchasing power of the poorer classes.

True to form, a black rust scare has developed in the Northwest, and heavy damage has already been done in some sections of South Dakota. The rust has been found in North Dakota and in Minnesota, but so far no estimates of the prospective losses can be made. Much depends on weather conditions. The spring wheat outlook is much less favorable than of late, and the Government report is expected to show a fair loss. Yields of winter wheat are disappointing in many sections of the belt, but the total is so large that even were the entire spring wheat crop wiped out there would still be sufficient for bread and seed requirements as well as a large surplus for export. Washington messages indicate that North Dakota producers are not satisfied with the guaranteed figure, and believe that they could get more were there an open market.

Oat prices have made little or no response to the reports that the crop is heading short in some sections of the belt, and at the present time nearly three bushels of oats can be purchased for the price of one bushel of corn. The visible supply is extremely heavy for this season of the year and the movement of the new crop is impending. Unfavorable weather in Texas has delayed the movement in that section. While the crop does not promise to be a bumper one, it is expected that final returns will show better than an average yield. Foreign news has been very bullish, but the export demand has been slow in developing, and it would take large purchases to cut down stocks materially.

Grain Market Summary.

Primary receipts of wheat, corn and oats for the week follow:

	July 3, 1919.	June 28, 1919.	July 6, 1918.
Wheat	1,022,000	1,419,000	1,743,000
Corn	2,253,000	3,536,000	3,910,000
Oats	3,213,000	3,393,000	4,406,000

Combined primary receipts of wheat, corn and oats for the past week, with comparisons as shown by the PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	6,468,000	10,059,000
Preceding week	10,353,000	12,277,000

Corn futures advanced to new high levels for the season the past week, and closed at the top on the July, and ¼@1c under the outside figure on the distant deliveries. Sentiment was strongly bullish, and with a three day holiday ahead there was general evening up by shorts. Weather conditions were excellent for rapid growth of the crop, but the trade are afraid of a scarcity of old grain before the new crop is harvested. Foreigners bought some futures here. Argentine prices have advanced faster than in this country. Closing trades were at net gains of 8¾ @9⅛c, the latter on the September.

Oats held within a range of 4@4½c, and closed with net gains of 2¼@2½c, December leading. The cash demand was slow with stocks large, which more than offset the effect of the less favorable crop reports. The dominating influence was the action of corn. Outside interest was much larger, but with the movement of the new crop impending there was little desire to take the bull side in volume.

New wheat has commenced to move, but as yet in small volume. Chicago received its first few cars, but next week is expected to see a material increase providing weather conditions are favorable. So far the grain received has sold at better than the guaranteed price, and the cost of flour will remain high for a while at least. The winter and spring wheat crops promise to be smaller than anticipated earlier in the season, blight and rust making its appearance in the Northwest, while yield of winter wheat is disappointing. Foreign demand is expected to be heavy. Range of prices for the week follows:

			Close		
Corn—	High.	Low.	July 3, 1919.	June 28, 1919.	July 6, 1918.
July	$1.87	$1.77½	$1.87	$1.78	$1.53⅜
Sept.	1.85⅛	1.75	1.84⅞	1.75¾	1.55¼
Dec.	1.63½	1.53½	1.62½	1.53¾	.....
Oats—					
July	.71½	.67½	.71	.68¾	.74⅛
Sept.	.71¾	.67⅝	.71	.68⅝	.69½
Dec.	.73⅛	.68⅝	.72⅜	.69⅞	.....

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	4,048,000	539,000	4,992,000
P. receipts to July 5	280,486,000	318,868,000	290,870,000
P. shipments to July 5	219,328,000	238,143,000	252,642,000
P. stocks on July 5	11,279,000	5,013,000	2,525,000
P. consumpt'n to July 5.	53,927,000	76,251,000	40,695,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to July 3	1,022,000	1,743,000	1,922,000
P. shipments to July 3	488,000	244,000	1,529,000
P. stocks on July 3	2,574,000	298,000	3,283,000
P. consumpt'n to July 3	902,000	1,427,000	1,399,000

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to July 5, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	46,758,000	65,399,000
Milwaukee	3,911,000	9,762,000
Minneapolis	5,543,000	13,646,000
Duluth	25,000	163,000
St. Louis	16,299,000	19,999,000
Toledo	975,000	1,860,000
Detroit	1,338,000	3,074,000
Kansas City	14,651,000	26,330,000
Peoria	15,912,000	26,005,000
Omaha	17,976,000	36,121,000
Indianapolis	13,083,000	14,221,000
Total	136,471,000	216,580,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	July 5, 1919.	June 28, 1919.	July 6, 1918.
Chicago	883,000	1,275,000	1,575,000
Milwaukee	43,000	77,000	187,000
Minneapolis	64,000	77,000	186,000
Duluth	.....	.....	.....
St. Louis	353,000	581,000	333,000
Toledo	17,000	16,000	18,000
Detroit	8,000	24,000	31,000
Kansas City	176,000	330,000	206,000
Peoria	222,000	472,000	666,000
Omaha	335,000	409,000	406,000
Indianapolis	152,000	275,000	302,000
Total	2,253,000	3,536,000	3,910,000
Shipments	1,555,000	2,069,000	2,176,000

for $2. The test weight is only 58 lbs.

Exports of grain from New Orleans is reported by Chief Inspector Colby for June at 2,612,563 bus. of wheat; 51,132 of corn; 85,270 of oats; 647,195 of barley. For the season since July 1, 1918, the record shows 15,711,878 bus. of wheat; 922,000 of corn; 11,186,000 of oats; 1,087,000 of barley and 1,100 of rye.

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1918, to July 5, 1919, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	54,000	8,000
Milwaukee	32,000	2,000
Minneapolis	650,000	834,000
Duluth	69,000	3,000
St. Louis	47,000	102,000
Toledo	7,000	15,000
Detroit	10,000	3,000
Kansas City	109,000	684,000
Peoria	1,000	.....
Omaha	30,000	75,000
Indianapolis	13,000	17,000
Total	1,022,000	1,743,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	July 5, 1919.	June 28, 1919.	July 6, 1918.
St. Louis	47,000	87,000	102,000
Kansas City	109,000	101,000	684,000
Omaha	30,000	72,000	75,000
Toledo	7,000	6,000	15,000

Indianapolis	13,000	9,000	17,000
Peoria	1,000	12,000	.....
Chicago	54,000	75,000	8,000
Milwaukee	32,000	37,000	2,000
Minneapolis	650,000	870,000	834,000
Duluth	69,000	130,000	3,000
Total	1,022,000	1,419,000	1,743,000
Shipments	488,000	1,493,000	244,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	July 5, 1919.	June 28, 1919.	July 6, 1918.
American	4,376,000	11,883,000	1,719,000
Indian	.....	.....	240,000
Argentine	3,594,000	3,493,000	4,423,000
Australian	1,448,000	2,720,000	720,000
Others	112,000	69,000	38,000
Total	9,530,000	18,165,000	7,140,000

Exports of wheat since Aug. 1, commencement of European crop year, compared for three seasons:

	1918-19.	1917-18.	1916-17.
American	343,694,000	226,494,000	324,294,000
Indian	5,099,000	13,140,000	32,538,000
Argentine	72,473,000	68,221,000	58,156,000

INDIANA DEALERS MID-SUMMER MEETING

Very Large and Successful Meeting at Indianapolis Last Week—The Wheat Campaign the Chief Cause of Enquiry and Discussion—Cost of Handling

Reported by EATON G. OSMAN, Editor

The midsummer meeting of the Indiana Grain Dealers' Ass'n was held at Indianapolis on July 2 in the library room of the Board of Trade building and was one of the largest summer meetings ever held by the Association. The hall, which was filled with seats to its utmost capacity, proved to be too small for the audience gathered, who with commendable fidelity to the interests of the Association and the subject matter under discussion remained in the room practically throughout the entire meeting, which began at 10 o'clock in the morning with a short interval for luncheon and lasted until nearly 5 o'clock in the afternoon.

The welcome was extended by the Rev. Jas. M. Eakins of the Memorial Presbyterian Church of Indianapolis and was a very felicitous effort. At the conclusion of the welcome the invocation was made, all standing.

General Accident Prevention.

K. M. Bickel, manager of the publicity department of the Integrity Mutual Casualty Co. of Chicago, who had the day previous addressed the Indiana Millers' Ass'n, gave an address on general accident prevention, which was to have been illustrated with motion pictures. The intense heat of the day, however, which would have necessitated closing out all the ventitlation of the room, suggested to Mr. Bickel that it would be more comfortable to omit the motion pictures, which he did.

The talk was of course very interesting and had this virtue, that it all pointed towards ways and means for the prevention of industrial accidents which the speaker said carried off more men per year than were carried off by war from the ranks of the American Expeditionary Force in France. As the premiums paid for insurance in this company depend upon the amount of losses and the continuance of payments as compensation to sufferers in the industrial accidents hinges also upon the reduction of those losses by the prevention and the reconstruction, or rehabilitation, of the sufferers from accidents, the remarks of Mr. Bickel had a direct bearing upon the financial aspect of the industrial accident problem.

Accidents are caused by the physical hazard; that is to say, from machinery and carelessness in its protection and also from the natural hazard; in other words, carelessness. The latter is far more serious than the former and represents the greater portion of the losses.

As far as elevator men are concerned. who are interested, of course, as employers, and every employer should carry insurance to cover his liability, it may be said that policing is really not necessary, but there should be a continuous cautioning on the men to protect themselves against dangerous contacts with the machinery in the building and from general movements about the building that are likely to result in accidents. The fact that no accidents may have occurred in a partitcular elevator for a great many years is no criterion of what may or may not happen in the future. The descriptions of reconstruction work were most interesting. Some of the cases reported seemed to be almost incredible.

Prevention of Smut.

Russel East, county agricultural agent for Shelby County, Ind., gave a very interesting talk upon wheat culture and methods of prevention of smut and other diseases. Mr. East opened his remarks by expressing his appreciation of the value of coöperation in his work by the grain dealers of Shelby County, who, he said, made it possible to have a county agent in that county, by contributions of their means and their influence after others, and particularly the farmers, interested in the same work had failed in their efforts. He further struck a responsive chord by saying that he did not like the word "agent." His first thought of an agent is that of a salesman. "Now, I am not a salesman," he said. "I am not in the buying or selling game; I am simply an agricultural adviser. Just bear that in mind that I am an adviser and not an agent and we will all get along a good deal better, and I find it is not desirable to give too much advice." He spoke of a case where on one occasion he had given a man advice to hold some wheat, and the result was he lost about 20c a bu. on it; and the farmer of course was sore and he has not gotten over it. He spoke of the place the grain dealers have in helping to develop agriculture in the counties by using the standard grain grades in their buying from farmers as the best means to develop better quality of grains. It is not fair to buy on an average or upon a single flat grade, but the buying should be strictly on the merits of the particular lot of grain offered.

Some time was given to the "smuts," the stinking smut and the loose smut. The former is quite familiar to everybody. The loose smut, however, is different. It results in black heads; appears when the wheat is in bloom and does its damage by the spores entering into the kernel of the grain. Farmers generally are quite ignorant of the influence of the loose smut upon their crop. Some farmers even refer to it rather in a welcoming way as an indication of a good wheat crop. This is of course a mistake, because the damage is done in any event whether the farmer can see it or not. The loss this year by loose smut in Shelby County is about 11 per cent of all the crop of that county and is equivalent to a total loss on 5,000 acres, the cost representing the value of at least 100,000 bus.

The method of control for loose smut is more complicated than for stinking smut. The hot water treatment was recommended; it is slow but sure, but in Shelby County he has built a machine that will treat about 50 bus. every 15 minutes. The process is for the farmer to wet his grain, which is very loosely sacked, before hauling it to the machine, then turn it over to the agent who puts it in his drum for one minute in water heated to 120 degrees. It is then put into a bath heated to 129 degrees, where it is held for 10 minutes and is then taken out and dried. Now, it is very necessary that the process should be exact, because it has been found that if the temperature of the water is under 129 degrees the smut spores will not be killed and if it is in excess of 129 degrees then the influence upon the germinating quality is bad.

He has found by using this method that practically all of the wheat the seed of which has been treated is now disease-free; and it is his purpose to go through the county and pick out the best heads as a beginning for a stock of disease-free wheat which will be planted next season and a stock of seed accumulated from such planting. Some discussion followed on the varieties of wheat grain in Shelby County; the most prolific and satisfactory of which is a hybrid, the origin of which is not known, but locally it is called "Hall's," presumably introduced by a man of the name of Hall. It is proposed, however, to change the name of this particular strain of wheat, particularly after a supply of disease-free wheat is accumulated. Tentatively it may perhaps be denominated as "Shelby's Favorite" or something of that sort.

What Is the Matter with Business?

By special request of the officers of the Association, E. G. Osman, editor of THE PRICE CURRENT-GRAIN REPORTER, made an address which was entitled on the program "What Is the Matter with Business?" The main topic of the address was not exactly of that nature, but more properly might be entitled "What May Happen to Business." The chief subject under discussion was the material condition of Europe at this time and its probable influence upon prices of commodities of all sorts in this country. The theory of the speaker was that the prevailing high prices the world over are not due as the politicians and sensationalists in the newspapers and even some of the officers of the Government have maintained, to profiteering, but to an all-prevailing scarcity of commodities of all sorts and descriptions, which is one of the first and most natural conditions brought about by the war. During the war all production was diverted from its usual objects to the purpose of making war materials to be destroyed. General commodities, therefore, in consumption in a time of peace were neglected; surplus stocks existing before August, 1914, have been consumed, while the working people, misunderstanding the nature of wages and where wages come from, have been insisting that the better life, to which all people are looking, means as to them at least less work and higher wages; in other words, diminished production and greater consumption, at least by themselves. This being the universal tendency of the labor program, coupled with the fact that surplus stocks in the old world have been practically consumed, and the further fact that Americans are the only people able to proceed immediately with the production of these necessary articles, we are called upon to supply not only our own wants, but also those of the old world, including Great Britain. For which reason the high cost of living, entirely naturally the result of economic laws, can be relieved only by abandoning the labor union's and the sentimentalist's doctrine of reduced production and turning to what is absolutely necessary—the immediate resumption of production in every direction.

This problem, the speaker said, at this moment more intimately concerns Europe than it does ourselves, but Americans must not take it for granted that it does not concern them. This country is and for some time to come must continue to be a reservoir from which the world is supplied with raw materials and consumable goods, and as Europe has little to give in return in kind, the satisfaction of wants of the entire Western world depends in large part upon American workers. If the latter shall insist upon the almost universal policy of labor, of less work but greater consumption, we shall, like Europe, come face to face with the fact that the less there is produced the less we shall have to consume and the more serious will be the scramble for what there is, because men cannot live on gold or evidences of European indebtedness.

The situation in its most aggravated form is therefore what now exists in Russia. When the Russians were still fighting but tired of fighting, German propagandists sent Lenine and Trotzky to tell the Russians they would have the better life by abandoning the war and distributing among themselves the wealth monopolized by capitalists and land owners. And the Russians did it. The creation of new wealth stopped and the paupers and aristocrats fared alike, because all production has practically ceased in Russia; and that great state seems to be perishing under our eyes because the people have ceased to work and to save. The trade unions throughout the world are strong enough to throw society into confusion and stop all production by their lightning strokes, but that is all. Strikes add nothing to production; they reduce it; and labor by such policy is simply forcing the whole world to squander its capital, and governments are contributing to the disorder by masking extravagance and waste and non-production by the inflation of credit and the encouragement of high and exorbitant prices. The Federal Reserve Board has referred to the growing scarcity of capital and to the necessity of using caution about exporting to it wholesale from this country; so that on the whole the problem of universal scarcity has already begun to throw out its warnings to the Continent as well as to ourselves, that unless there be an immediate resumption of work and strenuous saving the exhaustion of capital may come, as well as the exhaustion of the supplies of commodities and the day of the general scramble be brought nearer, with the further warning that should the capital of the world be exhausted the latter would face a repetition of the submergence of civilization as it was when the barbarians overran the Empire. The speaker continued:

There is, however, one class of producers against whom the indictment of slacker will not lie, the farmers. The farmers have been well paid in these later days, but they have not cut their production in order to gain by creating scarcity, although there is a class of self-appointed mentors who have advised that very thing; particularly is this true of certain cotton factors who have advised cutting the next acreage when the current price for cotton was about 25c a pound and the world bare of cotton. The weather this season has cut the acreage, but the slacker's plea for artitficial scarcity did not get very far. The American farmer has not over-produced as it happens, but in this country he has produced far beyond the capacity of the country to consume, and in the years to come as in the past he must depend upon foreign markets to take up his surpluses at prices profitable to him. The one great danger in all this reconstruction hysteria of the politician is that Congress, which has already taken it up for discussion, may adopt Sec'y Lane's specious scheme to drain swamps and irrigate deserts to make farms to give to soldiers. I do not object to compensating soldiers and I am of course not suggesting improper motives to the Interior Department, but I do agree with a member of Congress who the other day referred to this project as pure speculation in land, of the same character as 90 per cent of all the land legislation since the Civil War, which has been more for the benefit of land speculators large and small than it has for land seekers. The production records show that there are farms enough in this country now to feed our people and have a large surplus for export. Wherefore until the making of more farms comes in response to a permanent demand for more foodstuffs for home consumption than our existing farms can produce, to make more would be a menace to the prosperity and the solvency of existing farms. One thing men forget speaking of the H. C. L. and the farm's responsibility therefor is the inelastitc demand for farm products. These are different from all other commodities in general use. The changing succession of wants promotes progress. Every time one human want is gratified, by some mysterious process of nature a new one immediately makes its appearance, so that the inventive and productive activity of man can never cause surfeit; wants merely

change character and human activity its direction. But when a man has had enough to eat to satisfy nature he stops eating to go to golf, his motor or any one of a thousand other competitive wants that men must work to gratify. Therefore the demand for farm products, while it is persistent, is limited and the surplus of the farms that cannot be marketed goes to waste. It is therefore a distinct drive at the prosperity of American farms to try now to step backward to the days when they burned corn for fuel in Kansas as they are doing at this very moment in Argentina, to ask Congress to appropriate money to make more farms for which there will be no immediate demand.

As to the grain trade, I think the reconstruction needed there is a return to the *status quo ante bellum*—to be let alone to have state and National governments take their hands off and suppress all unnecessary bureaucratic meddling and unnecessary interference with the trade and its lawfully recognized customs. No trade is better self-policed than the grain trade. Nearly every abuse of which the public had reason to complain when I first began to take notice of the grain trade, in the spring of 1898, I find is now gone and has been abolished by the trade itself. With a single exception of the standard grain grades, now made universal by law, to which the markets would not agree, the abuses existing in 1898 which affected farmers have all been done away with by the trade itself acting through its trade organizations; yet it is a fact that as the trade has cleaned house and given the benefits most largely to the farmer or to the ultimate consumer in a ridiculously low cost in handling, cleaning and milling grain, the more vicious have been the attacks upon its individual and combined trade integrity and fairness. Yet as we now know, the experience of the grain trade with wheat during the reign of the Grain Corporation has demonstrated beyond question that the farmer, until the price of wheat was fixed and the grain marketed through the Government, the farmer had never paid to exceed 50 per cent of the actual cost of handling his grain through the elevators.

Now, there are more important reasons than this one why the grain trade should be allowed at the earliest possible moment to return to its old ways and methods; by which I mean that all interference of the price-making process through the operation of free speculation on the grain exchanges should cease.

First, I should say, is the fact that the exchanges make the price not by caprice, but by actual bargain and sale. A grain exchange true to name is a market where buyers and sellers get together and on the basis of their knowledge of supply and demand fix a price. On the grain exchanges the price varies somewhat from day to day and from hour to hour and from delivery month to delivery month, but the price itself, whatever it is, is always the result of the competition of the grain buyers and sellers of the world. It is their opinion at a given moment as to what the value of the specific grain is. Some farmers are forever complaining that the farmer is the only producer who does not have the power to fix the price of his own products. Now the farmer ought to count himself as particularly fortunate that he is not compelled to fix the price of his own product himself. He is in the fortunate position of having the price fixed for him by the best informed men in the world, devoting themselves to that very task and doing it in the open, without cost to him and at no risk to him. Speculators relieve him of all anxiety as to values which he could not know without the speculators. Furthermore, the study of quotations on contracts for the distant future deliveries are some indications to the farmer what crops would likely be most profitable to plant for the next growing season.

Then there is the facility for selling grain for future delivery. I am not asking this privilege on behalf of the grain dealer only, however valuable to him may be the privilege of forward selling and of hedging his transactions, with its backward reflection of benefit to the farmer. What I am contending for is that this speculation is in itself of so great an advantage to the farmer that as a disinterested observer of this game of handling grain I insist that free speculation is indispensable to the farmer's welfare as a producer; and I can scarcely retain my impatience with official ignorance when I hear it iterated and reiterated from the peanut stand to the capitol at Washington that speculation is a part of the illegitimate methods of the grain trade or stock exchange and ought to be suppressed.

It is the grain buyer's business to take a farmer's grain, grade, clean and condition it and to move it by the most expeditious and cheapest route to the mill or the industries which prepare it for human consumption; but most of all it is his duty to keep an open market every business day in order to relieve the farmer at the earliest possible moment he desires that relief of the burden and risk of carrying his grain and to pay him the price, when the farmer sells, which in normal times and under ordinary market conditions of peace is substantially the same at all times and seasons of the year. There is a very widespread belief that farmers suffer serious loss from having to throw their crops on the market immediately after harvest. This is a very common misconception which even friends of the trade cannot get away from. They think that because as a rule between July 1 and March 1 following about 87 per cent of the wheat is marketed and only 13 per cent during the remaining four months, therefore the early marketing of wheat has a tendency to bear the price between June and March. Mr. Butler told the Ohio dealers only the other day that if the producer would be content to market his crops more moderately the prices of his products would become more stable relatively to other commodities and many of his problems would be solved. This by many people is taken as axiomatic—something beyond dispute because it seems that it ought to be true, but as to grain it is not true. When the world is at peace, and that is the normal condition of the world, thank God, and our Governments have the common sense to let the grain exchanges function according to their natures and do not try to force them to function as bureaucrats and some Congressmen think they ought to function, the fact is developed that no matter when during the season the farmer sells his grain the perfection of the mechanism of the grain exchanges has been such that the price has been practically the same at all seasons. The rule is that the farmer can sell his products cheapest as soon as they are ready to market. He saves handling cost, shrinkage, cost of carrying. But the further reason is that trained speculators through their knowledge of the relations of supply and demand can be relied upon to adjust prices at the beginning of the crop season to the expectancy throughout the whole season and this adjustment, however early it is made, more often than otherwise maintains itself substantially throughout the crop year, as the records of the grain exchanges will prove beyond question.

This is the value of speculation. It is the one thing that stabilizes prices, and the broader the market, the greater the number of speculators, the greater the volume of their business, the more certain it is that price fluctuations will be the least. It is only when the speculators are few and the volume of their transactions small that the fluctuations are great.

Now, what I am getting at is simply this, that when people talk to you grain dealers about reconstructing the grain trade it is your duty as grain dealers, I take it, to make no apologies. You have made too many apologies already. It does not follow because men complain, that there is weakness in the system of grain marketing which arouses the passions of men. The passions of men are far more easily and far more often aroused by lies and innuendoes and by misconception than by truth. Men complain more about those things that do not exist or of things that once existed and are past and gone. This is peculiarly true of the grain trade, which has been the target of complaint and legislation in all ages and the desire to control it now is no less keen on the part of department clerks and those who know nothing about it than ever before, at a time when such control would be most unfortunate and dangerous to all concerned. It is your duty to the trade, I make bold to say, to defend trade practices when they are attacked, by explaining what they mean, not to yourselves, but to the producer and to the consuming public. Do that, and do your business with your farmer friends frankly and on the square, and the grain trade will need no reconstruction, only restitution of its rights and privileges. But it is also to be remembered that men and politicians are all alike. Whether the Administration be Democratic or Republican, the grain dealer and food purveyor are alike always fair game; and the present session thus far has shown that the Republicans have the same disposition to take and retain and make more control of business in the same ways that distinguished the Democrats.

At the conclusion of this address adjournment was taken for luncheon.

AFTERNOON SESSION.

The afternoon session was opened by an interesting report by Elmer Hutchinson, member of the Market Survey Committee, which recently made an investigation of a large number of primary inspection points to check up the quality of supervision service and the equipment provided by the state and exchange and other local inspection departments for the practical inspection of grain under the standard grain grade rules. Reviewing briefly the movement which led up to the adoption of the standard grades and the inauguration of the Bureau of Markets and inspection supervision system, Mr. Hutchinson confining his talk chiefly to wheat as the one cereal of greater immediate interest, said that to be absolutely frank the system of inspection is not as yet working to perfection. The machinery of the supervision is itself not entirely organized as it will sooner or later be organized and there is also a deficiency of apparatus in a great many of the markets as well as some local antagonism towards the supervision system. In answer to the question, therefore, why the existing system has not yet resulted in the uniformity of inspection so much desired and which was expected to be the immediate result of the inauguration of the system, Mr. Hutchinson said there are several reasons. In the first place, there is in many markets a lack of equipment such as is required if the inspection under the rules is to be carried out literally as it must be. There is also the lack of desire on the part of a good many inspectors to use the equipment even where it is provided. There is also some improper use of the equipment due to carelessness or ignorance. The fee system of payment for inspections where the fees constitute the entire compensation of the inspector and where the inspector receives the entire amount of fees paid, one immediate result of which is that fewer samplers are employed than are really necessary and poor sampling results, and of course it is well understood that poor sampling means poor subsequent inspection. In some markets it is found also that the rooms used by the inspectors to work in are not what they should be, particularly are they dark.

Generally speaking, fees for inspection are high and have a tendency to advance like everything else. Now the dealer does not object to paying a good round fee providing he gets the service and they do not always get the service, and inspectors admit that they do not always give the service, for the reason that the volume of work crowding upon the inspectors being very heavy, there is somewhat of a disposition to slackness. There seems also to be a disproportion between the fees paid for in-inspection and those paid for out-in-spection. This is perhaps natural, as there should be a differential in favor of the out-inspection, but in some places the latter is found to be disproportionately large.

Variations in intermarket inspections were thought to be perhaps not unexpected in view of the difficulties encountered during the war in the shortage of men, but hereafter this should be considerably improved. There is a distinct improvement in the tendency to uniformity, but it has not come absolutely as yet. The complaint, of course, that is always in evidence as the result of grain inspecting very close to the line, cannot be avoided. Complaints of this character are lodged very naturally against the rules themselves; but dealers should bear in mind that the same thing happened in the old days when the test weight was taken of a kettle and the moisture was guessed at and dealers should not find fault now that the system is much more intricate, if they will only bear in mind that the miller must also be so much more exact in his operations as to require a chemist practically all of the time in his plant. Dealers must bear in mind constantly that the zone agents will insist that the country elevators shall buy wheat from now on through the rest of this crop strictly upon Government grades. Now the country elevator man in doing so may not always be absolutely correct in his establishment of the grade before it reaches destination, but he will be required to take the grades as his basis and will be expected to use all the appliances for testing the grain in order to establish the weight that the Federal grades contemplate shall be used and which supply men are now in a positoin to supply to all dealers.

Mr. Hutchinson said that all markets visited by the committee where inspection for any reason was deemed inadequate or unsatisfactory by the committee the authorities in charge had been duly notified not by a circular letter but by a letter of information based upon the specific deficiencies found in that market so that every market now has had called to its attention the defects of the system which the committee deemed it necessary to correct in order to bring the service up to the proper level of efficiency and he had no doubt that the result of the survey would be very beneficial.

Attitude of the Farmers.

Mr. McCollum, secretary of the Indiana Farmers' Grain Dealers' Ass'n being among the audience, was called upon and made a short address. He said in view of the fact that the farmers' movement is growing quite rapidly in Indiana, regular dealers would perhaps like to know where farmers' companies stand. He assured them in the first place that the farmers' managers will do all of their buying of grain strictly upon the basis of the Federal standard grades. They support the grades heartily and the by-laws of the companies in that state distinctly provide that all grain shall be bought upon its merits as determined by the testing of the grain and on the basis of the Federal Standard Rules. Any farmers' manager who does not do this will certainly lose his job when the fact is disclosed.

Another thing Mr. McCollum was interested in was the question of an 8c margin. An advertisement of a grain paper saying that 8c was not enough called his attention to this matter and he was a little curious to know just what it meant. The farmers' companies in their by-laws provide that man-

agers shall handle grain on a fair margin and that is what they propose to do; and if it turns out that in handling this 8c is a fair margin, 8c will be taken. If 8c is not enough, managers will take 9 or 10c or whatever sum is necessary to handle the wheat at a profit to the company; and he said that the companies and the managers are determined to work along with the regular dealers; and if you regular dealers will give me information concerning any manager who is not playing the game on the square he will be taken care of.

Handling the Wheat Crop.

President Goodrich of the National Ass'n was called upon to tell how to handle the wheat crop. He explained, however, that he was not in position to tell anything new. The ground had been pretty well gone over heretofore, particularly in the matter of ascertaining costs of handling, and as this had a rather wide variance, it is practically impossible of course that any fixed margin will be made. However, he thought that a great deal of the apprehension of difficulty of the farmers as to the amount of the margin was largely imaginary. He found in consultation with the farmers in New York in connection with the conference with Mr. Barnes that the farmers are quite as willing to make a fair margin themselves as buyers and to permit the regular grain dealers to make such margin as any one could reasonably expect. Only the demagogues floating about the country are they who are making trouble. However, the trade must decide immediately as to what they will pay. When representatives of the trade started out to settle this difficulty it was thought that a margin could be arranged with Mr. Barnes, but that was found to be impossible. Farmers as well as the regular dealers were interested in this matter and at first thought that they could arrange a solution with the zone agents and not submit the matter to Mr. Barnes, but as far as the zone agents are concerned they will act chiefly as arbitrators in the matter of settling complaints. He found also that the farmers as well as dealers had not quite agreed on the form of the contract with the Grain Corporation. They as well as ourselves objected to the holding of samples 60 days so that the contact has cut that out. If there is any controversy with the farmer as to your grading complaint must be made immediately. You will then take the sample of the grain in controversy which is sent immediately in a proper container to the zone agent and he will fix the grade and discount, but the farmer must make complaint when the grain is delivered or he is estopped from making it at any subsequent time. The Grain Corporation through the zone agents has provided a poster which shall be posted in every grain elevator.

[This poster, a copy of which has just arrived in this office, is 15 inches wide and 30 inches long. It is headed "Notice to Producers of Wheat." It then goes on to state that the Grain Corporation has entered into a contract with the buyer in whose house the poster is fixed and calls attention to the clause of the contract which is designed to furnish a method by which the producer may satisfy himself that he is receiving fair treatment in grade, dockage and price and that clause in the contract is reproduced upon the poster. The poster then further states how subsequently the differences between buyer and seller shall be harmonized by mutual agreement if possible, or by reference to the Grain Corporation or the Zone Agent of the Grain Corporation acting in the district where the transaction takes place. Further down the poster for ready references gives a schedule of the standards for wheat and at the bottom is a schedule of prices to be paid in the zone in which the elevator is located. The varieties are Northern spring with prices and discounts for No. 1, 2 and 3; the Hard spring and Durum No. 1, 2 and 3; the yellow and soft winters, No. 1, 2 and 3; White Club No. 1, 2 and 3; red spring No. 1, 2 and 3; Red Durum and Red Walla No. 1, 2 and 3. These posters must be attached to the property of the elevator in such position that it is so conspicuous the producer cannot well avoid seeing it. The zone agent accompanies this poster with a number of slips to be used for making complaints. This slip contains the name and address of buyer; name and address of seller, number of bushels in dispute; grade and dockage fixed by buyer; grade and dockage claimed by seller and space for the Grain Corporation's findings. Zone Agent Jackson in the forwarding of these documents to elevators in his zone says, "We enclose half a dozen slips to be used in forwarding samples. Please see that they are properly filled out and placed in the container that will carry the grain. More slips will be furnished upon application, but we hope that even the use of this half dozen will not be necessary."]

The keeping of the record of transactions of course is a heavy task, but it must be kept as specified in the contract or the dealer will certainly lose his license, and licenses of course it must be understood now refer only to wheat. There is no longer any control over any but wheat and wheat products. Representatives of the trade endeavored to get other markets than those of the primary ones named by the Corporation, but this was found to be impossible. These markets such as Toledo, Cleveland, Mansfield and Buffalo can buy and resell and the storage allowance given them will enable them to make a profit, but the objection to opening up Toledo, Cleveland, etc., was that in doing so it would be necessary to open up a purchase and sale to the Corporation of about 25 other markets whose storage capacity equals or exceeds 1,000,000 bus., and this was found to be impracticable.

There is another thing that is not so pleasing, and that is that the exporters' bids this year are 2½c under the Government prices instead of 1½c as heretofore. It will be remembered, however, that the Grain Corporation will not advance money on drafts. It will pay for the grain in one lump and only when the grain is tendered to them in the form of elevator or warehouse certificates of deposits, whereas the exporters will have of course to honor drafts and make advances upon them.

One problem is of course the question of buying the off-grade wheat in case of inability of agreeing with the producer as to its value. The general trend of opinion among those present was that in such a case the elevator man would refuse to handle the grain at any price because once in the house that is practically an end of it, the identity of the grain is lost and there is no way of settling the controversy. Mr. Hutchinson said the elevator men are recognized as public servants and will have to depend upon the men higher up for fair treatment. Both farmers and elevator men will have a right to appeal personally, but he believed that the trade could rely confidently upon both the zone agents and Mr. Barnes himself to do the square thing.

Secretary Riley said of course Mr. Barnes and Mr. Irwin, zone agent for Indiana dealers, know what is the right thing, but as far as he was concerned he would rather close up his house than undertake to handle off-grade wheat for which the price or grade was in dispute. He would put it up to the farmer to hold the grain on his own property while the sample was in progress of investigation and the value in the process of determination. Then the Corporation or the zone agent having passed upon the value of the grain, they would no doubt be willing to take the off grades at the price or at the value they had themselves put upon it.

Mr. Riley then took up the contract with the Corporation, which all have by this time been provided with copies, and explained to us several feaures one by one, the sum total of which may be expressed in a few words. The dealer must be absolutely familiar with his contract and his duties under the contract both to the Corporation and to the producer, and particularly to the producer. He will not be permitted to take an excessive margin but he will undoubtedly be permitted to take a reasonable margin and there will be no interference with him on that score, and there will be no interference with him at any time except by the producer, who must make his complaint at the time of delivery and not at any time thereafter, and as stated above, the contract provides for the settlement of all such disputes. The elevator must be equipped for scientific determination of the grade and the dockage. There can be no guesswork on that score, because in case of a controversy the elevator which is not equipped to make a scientific inspection of the grain when it is offered has no possible defense to make against a complaint. The records called for in the contract must be kept exactly as therein stated and suitable record books must be provided for the bookkeeper of the elevator to keep such records. License numbers will be changed unless by some accident the holder getting a new license should obtain one of the same number as he has been holding up to the first of July. These license numbers should be printed plainly on all the stationery of the elevator. Receivers must know that the men from whom they buy wheat are licensed to purchase from the producer and to ship. Farmers alone may sell grain without a license and they may sell only their own grain. If a farmer should go into the neighborhood and purchase a neighbor's grain, then he becomes a dealer and must take out a license. Mr. Riley called attention to the poster described above which he said would no doubt be in the hands of all very soon, and these should be posted up very conspicuously, and he also added in the same connection that the prices paid at the local elevator should be prominently displayed.

Bureau of Markets Inspector.

H. A. Rhodes Federal Grain Inspector for Indiana, talked upon the wheat grades and answered a great many questions. He called attention subsequently to the difficulty that will be encountered in grading wheat with rye content. Also to the fact that Turkey Red wheat grown in Indiana mixed with soft red wheat will become the mixed wheat and will take grades of mixed wheat. A great many questions were asked and answered, the purport of which tends to this as recommended by Mr. Rhodes, that every elevator should be supplied with a complete set of equipment for the examination and testing of wheat according to the standard grades. The wheat will be bought upon these grades and the contract with the Government provides that everything must be tested by those grades, the dockage and price fixed by that at the time the grain is delivered and this can only be done where the elevators have the facilities for making the inspection. He advises that the elevator man should grade every car before it leaves his house and report the grading expected to the receiver. If it then misses grade, the terminal market or receiver will know what to do about it and will do so at once. He also urged particular care in the coopering of cars. The cooperage material as furnished by the railroads is poor enough, in fact, is generally so very poor that the shipper can under no circumstances trust its use to poor or cheap men. The cars are loaded so heavily that the material at best is hardly proper under the circumstances and must be used with great skill and extreme carefulness in order to make it stand. He also called attention to the peculiar necessity of proper inspection of bulkheads. He cited one instance of where a bulkhead car containing yellow corn and a peculiarly fine quality of pure white corn was irretrievably ruined as to the latter as peculiarly high bulkheads were permitted and the quality of the white corn was destroyed.

Resolutions.

H. H. Dean reported the following results which after some discussion were unanimously adopted:

GRAIN CORPORATION BUYING POINTS.

Resolved, That the grain dealers of Indiana here assembled, object most strenuously to the act of the Food Administration Grain Corporation in eliminating the following interior buying points as announced by Zone Agent, H. D. Irwin, Buffalo, Cleveland, Toledo and Mansfield, which have been during the past year used as official buying points; that the act will have a tendency to forward all wheat to seaboard points, where, through lack of terminal facilities, a congestion of cars will follow; that the shippers here represented object to their grain being forced to these far eastern points and favor the shortest possible haul to a terminal market where grain may receive official inspection and weights and where deliveries can be made either to commission dealers or to buying agents of the Government; that in so doing the grain car equipment, which this year is far below normal, can receive immediate handling and the empty equipment can then be returned to interior points for reloading, relieving the country shippers and accomplishing quick returns; that the wheat in our opinion will not be safe to remain out for any excessive length of time, but should be unloaded promptly where handling, smutting or drying can be given should it be found necessary.

Resolved, That this resolution be spread upon the minutes of this meeting, and that a copy of same be forwarded to Julius H. Barnes, Wheat Director Food Administration Grain Corporation.

COST OF HANDLING GRAIN.

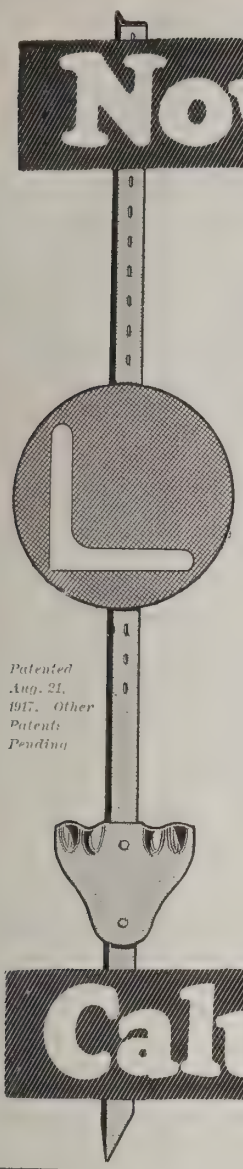
Whereas, The regulations of the Grain Corporation (Bulletin No. 2, July 1, 1919, Page 2) require grain dealers in purchasing wheat from producers to establish No. 1 wheat as the buying basis, deducting therefrom 3c per bu. for No. 2 and 7c per bu. for No. 3, with all grades below No. 3 to be bought wholly on their merits with reference to the grade of No. 1, be it

Resolved, That it is the sense of this convention that each and every grain dealer and miller in buying wheat from the producer should adhere strictly to the rules and buy strictly on the Federal grades, and that they should post up a price or bulletin board in a conspicuous place at or near their offices on which the schedule of grades and prices be recorded, from day to day, and that the producers be **thoroughly informed** as to the cost of **handling** wheat, including the terminal charge for weighing, inspecting and elevating, which amounts to over 1c per bu. plus the commission of 1 per cent or 2.39c per bu. for the Grain Corporation, making a total of 3¼ to 3½ per bu. at such terminals, to which should be added 1.21c per bu. for and on account of shrinkage in passing the grain through the house and in transit. The above items plus freight will determine the value of the wheat f.o.b. shipper's station, to which should be added interest on wheat in transit, averaging ½c, then add a "reasonable handling margin" as contemplated by the Grain Corporation, the contract and the law.

To illustrate the above, based on New York price and export freight rate of 2.5½ per cwt., the following schedule approximates the items of cost in marketing wheat:

	Per Bu.
Freight at 25.5c Indianapolis export per cwt.	15.3c
Shrinkage in passing through house and transit	1.21c
Weighing, inspection, war tax and elevating	1.25c
Commission to Grain Corporation..	2.39c
Interest while in transit, average 20 days	75c
Making total cost of delivering wheat to market	20.9c
Selling price at New York	239.5c
Leaving f.o.b. value for No. 1 wheat in car lots	218.6c
Using the domestic freight rate would add to cost	9c
Leaving the f.o.b. value	217.7c

The experience table prepared by the secretary during the past season shows that the actual cost of handling grain, as compiled by 73 elevators, to be 7.12c. thereby netting the dealer actually 2.1146c.



TO TRUCK BUILDERS.

Whereas, Numerous manufacturers are building trucks for farmers, used for the transportation of grain, we respectfully recommend that they hinge the truck bodies so that the front end of the truck may be lifted so as to dump the grain without molesting the truck in any other way.

IN MEMORIAM.

Whereas, Divine Providence has removed from our midst and our membership, Mr. James M. Brafford, who for many years was identified with the grain trade

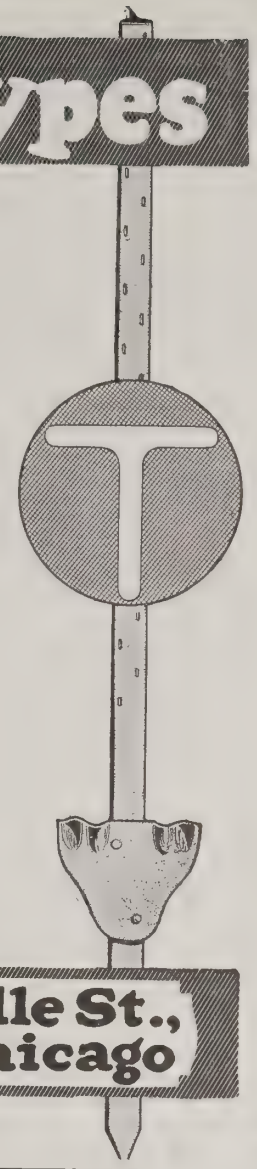
Now 2 Sturdy Ankorite Types

Patented Aug. 21, 1917. Other Patents Pending

TO the popular angle steel post, which has proved to be a wonderful money-maker for Ankorite dealers, we've now added another type that gives them one more tremendous advantage in shutting out competition—the Ankorite "T" post.

It is of the same sturdy construction as the angle post; flexible under strain, but always springs back into place. It has the famous Patented Crimped Anchor that makes the Ankorite the choice of every fence post buyer who has an opportunity to compare it with other steel posts.

No special fasteners to bother with—Ankorite Posts are provided with slots for fastening the wire with ORDINARY STAPLES.



Show your prospects these springy, rail steel Ankorite Posts and let them take their choice. Get in your order now for a shipment of each—THIS IS THE TIME TO HAVE THEM WORKING FOR YOU.

Get The Facts About This Hard-Hitting Sales Plan

It's a plan by which we'll go after your prospects from every conceivable angle with a series of straight-from-the-shoulder order-clinching letters, folders, farm paper and local newspaper ads. We'll guarantee to get customers into your store if you'll sell them the posts!

The plan is costing us thousands of dollars—it's free to you if you'll use it.

Want the new price list? A postcard or letter will bring it by return mail.

Calumet Steel Co. 208 So. La Salle St., Dept.-7 -Chicago

in the city of Indianapolis and for a term of years secretary of this association, we deeply deplore his demise and desire to extend to his beloved family our sympathy in their great loss; and

Whereas, John G. Donovan, member of the firm of John G. Donovan & Son of Yorktown, Ind., for many years identified with the association, has passed away since our last meeting,

Resolved, That we desire to express to his family our deepest sympathy in this, their bereavement.

More Farmer Views.

After some further discussion on the cost of handling grain as expressed in the second resolution Mr. Lewis Taylor, secretary of the Indiana State Federation of Farmers, who was in the audience, was called upon. Mr. Taylor referring to the cost of handling wheat as outlined in the resolution said that his organization had been trying to get this information, but had not been able to do so heretofore and would be very glad to have it. He felt that he could safely say that the farmers and the grain dealers are going to get along amicably. The farmers are going to pay you dealers a fair compensation for your services. Furthermore, farmers are really taking a very serious interest in this whole matter of handling grain. We have an organization for that purpose. "We are going into this business of marketing farm products as a business proposition, but if we build farmers' elevators it will be because we think the regular dealer is not treating us fairly. I think the time has come when the farmer is going to be more of a business man than he has been."

Mr. Taylor said also that the farmers generally approve the present system of grading grain and of buying grain upon its merits. They thought it was the only square way of doing business and they have thought that where the grain dealers are square with the farmers the farmers would be willing to be friendly and willing to coöperate with them in all things.

Thereupon the meeting was adjourned.

ENTERTAINMENT.

At 6:30 p. m. a dinner was served at the Severin Hotel provided by the Indianapolis Board of Trade and the Indiana Grain Dealers' Ass'n jointly. A very comfortable and attractive meal was served, during the course of which there was ample vocal and instrumental music, and after the cloth was removed and the cigars had been provided there was a good deal of story telling by various gentlemen belonging to the association and among their invited guests, making all told a very satisfactory evening. About 9:30 or 10 o'clock the dinner came to an end and everybody went home voting this midsummer meeting one of the most successful in the history of the Indiana Association.

PERMIT SYSTEM.

In addition to the preliminary notice of the permit system printed herein a week ago, the following has been published by Director-General Hines:

"Blanket permits will be issued to all railroads for loading at country stations to primary markets. In other words, each railroad reaching a specific market with its own rails will be permitted to load a certain number of cars daily. Railroads which do not reach primary markets with their own rails will make application directly to the Grain Control Committee for permits showing the number of cars to be loaded per day and routing desired, the road delivering the grain at primary markets to have its allotment of cars adjusted accordingly.

DETAILS OF THE PLAN.

"Copies of permits issued to lines not serving directly the market involved will be transmitted to the line *via* which grain is to arrive at market, which will serve as that line's authority for accepting the grain from the connecting lines specified.

"Individual permits will be issued for all shipments betwen primary markets or from primary markets to ports and for all grain shipments from country stations to port cities, whether domestic or export.

"It was also agreed that Buffalo would be designated in this plan as a port city; in other words, individual permits would be required on all grain regardless of origin when consigned to Buffalo.

"Loading records will be maintained by each road and reports made daily by it to the Regional Directors and Grain Control Committee involved, showing cars of different kinds of grain loaded for each market on blanket permits and cars for each kind of grain on individual permit.

"Roads serving primary markets will report daily to Grain Control Committee number of cars received from connections, separated by roads for such markets.

WILL REPORT DAILY.

"The Grain Control Committees will report daily to Regional Directors the permits authorized and each road is to carefully supervise its daily loading in order that cars in excess of permits may not be loaded.

"It was agreed that the above plan would be established simultaneously at all markets. While, as stated, it is the intention to establish the plan simultaneously to all primary markets cited, it is, of course, appreciated that the southern markets, like Kansas City and St. Louis, will require some control earlier than the northern markets, like Minneapolis and Duluth.

"At the same time, the establishment of the proposed plan at all markets on the same date will in no way affect the actual movement of the northern markets, in view of the fact that the Grain Control Committees at these markets will, of course, permit the railroads serving such market to load accordingly to the capacity of the market to absorb and which, at the outset would mean that the railroads could load all the grain that might offer."

ATTACKING THE NEW B/L.

Decision was reserved on Thursday last by the United States District Court in New York on the application of the Alaska Steamship Co. *et al. vs.* U. S. A. for a preliminary injunction to have the order of the Commerce Commission set aside whereby a new bill of lading is to go into force in September next.

The proceedings are brought under the Federal Court Jurisdiction Act, and an appeal from the decision of the District Court may be taken direct to the Supreme Court of the United States.

In their petition to set aside the order prescribing bills of lading and for preliminary injunction, the petitioners contend that by existing tariffs the carriers offer to perform carriage under common law liability, unmodified except by applicable statutes or, in the alternative, under liability measured and defined by the bill of lading adopted and issued in 1912 at the recommendation of the Commerce Commission. Shippers are free to choose either liability. If the shipper chooses the liability measured by the bill of lading the tariff charge for the transportation is approximately 10 per cent less. The form of domestic bill of lading ordered by the Commission would eliminate the provision of the existing bill which exempts the carriers from liability on account of loss or damage due to riots or strikes and would limit that provision to delay as distinguished from loss through those causes.

The Ministry of Food of Great Britain have given the assurance that there will be sufficient tonnage forthcoming to insure adequate supplies of seeds, oils and fats to Great Britain, control over these products being revoked as from May 31. Restrictions on exports will be maintained until there is a clear margin of surplus to cover home demand. It is said, however, that if prices continue to rise unduly the situation will then be again "reviewed."

THE GRAIN CORPORATION

Changes In the Identity of the Corporation on July 1—Some Resignations Announced—What the Corporation Has Done—Its Profits.

America's most gigantic war undertaking on July 1 changed its identity as the Food Administration Grain Corporation and undertook the task of handling the 1919 wheat crop for the coming year and under the new corporate title of the United States Grain Coporation with a capital of $500,000,000.

At the annual meeting of stockholders with the President, Julius Barnes, United States Wheat Director, held in the Corporation's offices, 42 Broadway, New York City, reports of work accomplished revealed the Grain Corporation not only as a war body which had paid all of its own expenses and operated at a small profit rather than a loss, but also as perhaps the greatest commercial undertaking in the world in regard to the volume of business handled.

Upon the suggestion of the Executive Committee of the Grain Corporation, the stockholders adopted the recommendation that the organization was justified in carrying forward as earned surplus the equivalent of 6 per cent on capital supplied by the United States, of $10,191,666.64 and earnings of one-half of 1 per cent net on $1,800,000,000 worth of commodities handled, amounting to $9,000,000. This recommendation was made after setting aside a reserve for contingent liabilities, such as fire insurance, which the Grain Corporation carries on its own stocks and the necessary adjustment of outstanding obligations in European relief.

A total of funds returned by mills as refund of excess profits over the regulated amounts of the 1917-1918 crop year, amounting to $4,571,654.29, was also carried into earned surplus, making a total carried forward to net surplus earned amounting to $23,763,320.93.

Herbert Hoover, who has been chairman of the Board of Directors of the Grain Corporation for nearly two years, cabled from Paris to the meeting of stockholders his resignation from that position which will be filled by Mr. Barnes as Wheat Director. Mr. Hoover, who continues as director in the Corporation, cabled to Mr. Barnes as follows:

"Will you kindly request the Directors of the Corporation to accept my resignation as chairman and at the same time record my sense of loss at this termination of two years' personal coöperation with them in national service? I should not resign did I not feel certain that the Corporation is in hands which will assure the same public interest as hitherto."

This resignation of the Director-General of Relief in Europe is one of the first steps in his intended withdrawal from public service as rapidly as the war service of the various departments of the Food Administration is finished, or they are absorbed by other agencies. It is expected that Mr. Hoover will return to America in about two months upon the completion of European relief and the arrival of the European harvest.

During the existence of the Grain Corporation the purpose of Mr. Barnes and the executive officers has been that the United States funds employed to conduct its affairs should at least earn the customary interest charge and that, beyond this, the turnover of its large business should be with as small an operating profit as could be properly calculated considering the complexity of its operations. During the twenty-two months of its existence the Grain Corporation has been fortunate in not losing a single dollar through fire loss. Calculation of its margin of profit at one-half of 1 per cent on commodities handled is in part due to the fact that its earnings were not drawn upon to absorb fire losses, which might easily have been expected under war hazards.

Since its incorporation twenty-two months ago, the Grain Corporation has disbursed $3,500,000,000 and collected $3,500,000,000. It has brought from first hands and sold for overseas shipments commodities to a value of about $1,800,000,000, at an operating expense of about $3,250,000. This means that its operating expense ration has been about one-sixth of 1 per cent.

Throughout the month of last November the Grain Corporation was using in the handling of commodities, principally wheat, its own capital of $150,000,000, its own surplus of about $20,000,000, besides $360,000,000 borrowed from banks and others, or a total employed of $530,000,000.

The Grain Corporation has been, for the past two years, a vast collection and distribution agency. Its function has been to assist in supplying to the Allies and the American army and navy large quantities of wheat, wheat flour, and other foods, with very little disturbance of American prices, and with such an even control of American distribution that reserves from one crop to another have been brought down to the lowest possible compass and without the development of actual scarcity anywhere in the United States. In the year just past it carried on all the buying and shipping for the Belgian Relief Commission, until the Commission retired on May first and the Belgian Government itself undertook its own overseas supplies.

The business of the Grain Corporation has been carried on since the begining of its active duties under Mr. Hoover two years ago without a single change in personnel. Although other war agencies have demobilized, the Grain Corporation will continue in service for another year

At the meeting of stockholders the first changes in the executive body became effective with the withdrawal of Frank G. Crowell of Kansas City as First Vice-President and Gates W. McGarrah as Treasurer, both of whom have held offiee in active service since the incorporation of the organization. Both Mr. Crowell and Mr. McGarrah have been mentioned in a special cable of thanks from the President for their war services in these offices. They retire under pressure of private duties.

Edwin P. Shattuck of New York, who has acted as general Counsel of the Grain Corporation since its inception, has been elected as the new first Vice-President. Mr. Shattuck will also continue as general Counsel of the Grain Corporation.

The new Treasurer-elect is Edward M. Flesh of St. Louis, who has been in London for the past six months handling the widespread European activities of the Grain Corporation in Food Relief as the active buying and distributing agency of the American Relief Administration. It is expected that Mr. Flesh will be able to close up the European work within the next few months and subsequently become actively identified with the Grain Corporation work in New York.

Watson S. Moore of Duluth, was elected Second Vice-President of the Grain Corporation and will continue in New York as a director. A. W. Frick of Duluth, formerly Assistant Secretary was elected Secretary of the Grain Corporation. H. M. Smith was made Secretary to the United States Wheat Director.

The new Board of Directors of the Corporation includes Julius H. Barnes, Herbert Hoover, Edwin P. Shattuck, Watson S. Moore, Edward M. Flesh, Darwin P. Kingsley of New York and J. W. Shorthill of Omaha. Mr. Kingsley and Mr. Shorthill have been directors in the Corporation for the past two years.

Second Vice-President in charge of the thirteen outside offices of the Grain Corporation and supervising each zone of operation will remain the same as for the past two years with the single exception of San Francisco where R. A. Lewin has withdrawn under pressure of private affairs, and has been succeeded by W. A. Starr, his assistant for the past two years.

The Second Vice-Presidents are George S. Jackson, Baltimore; Howard B. Jackson, Chicago; E. F. Newing, Galveston; F. L. Carey, Minneapolis; D. F. Piazzek, Kansas City; C. B. Fox, New Orleans; Charles T. Neal, Omaha; H. D. Irwin, Philadelphia; M. H. Houser, Portland; B. H. Lang, St. Louis; W. A. Starr, San Francisco; Charles Kennedy, Buffalo, N. Y. and P. H. Ginder, Duluth.

HANDLING WHEAT AT NEW YORK.

At a conference of the New York Produce Exchange special wheat committee with Wheat Director Julius H. Barnes, Mr. Spens and Mr. Stevenson, Traffic Control Manager at New York, held July 1, 1919, the following rules governing the handling of wheat at New York were agreed upon:

1. Permits against all applications properly made and lodged with the Secretary of the New York Produce Exchange before 1 p. m., on any full business day, will be ready for delivery and wired to agents before 5 p. m. of same day. On Saturday, if lodged before 10 a. m., delivery as above by 1 p. m.

2. Applications will be accepted and permits issued for the shipment of wheat only when same is about ready to be loaded out. Evidence to this effect must be given to Assistant Manager Inland Traffic through applicant, by submitting telegram or letter from shipper.

3. The number of permits issued, and other particulars, will be wired by issuing office immediately and directly to agent at shipping point with instructions to similarly advise shipper in whose name it has been issued. Confirmation also will be sent to agent by mail. Copy of permit delivered to applicant will be stamped with notation that authority has been wired to agent at shipping point. The same procedure follows when extensions are granted.

4. Permits will be good ten (10) days after receipt at shipping point.

5. If cars are not supplied within life of permit, or if, for other good and sufficient reasons wheat cannot be loaded within the 10-day period, then the issuing office will, by wire to agent at point of shipment, extend time of such permit under its original number for additional ten days. This extension may be similarly repeated under like circumstances.

6. Any deliberate irregularity in connection with the application or issue of permits, or failure to use permits when issued without good and sufficient reason, shall subject the one knowingly causing such irregularity or non-use of permits to drastic action by the authorities, as may be determined later. It was made distinctly plain that no abuses would be tolerated.

7. The Wheat Director expects to be able to take care of all wheat moving to the seaboard during July and August. Should, however, the movement become so heavy as to exceed terminal handling facilities and require some restriction in the issuing of permits, he has expressed his willingness to permit the allotment of permits to this port during such restricted period to be apportioned among the grain receivers in some manner that may hereafter be agreed upon.

HARVESTS IN SOUTHWEST.

W. P. Anderson, who recently returned from a trip into the Southwest under date July 2, says:

"I have just returned from a trip into north and central Missouri, Monday, June 30, and Kansas City, July 1. I find oats were heading out short and beginning to ripen and large quantity being cut around Kansas City. Corn is backward in Missouri but the subsoil moisture is ample, and the weather could not be more ideal for corn which is making wonderful progress and catching up.

"Wheat was being cut everywhere on July 1 for 125 miles north of Kansa City, and the size and number of shock indicate that the yield must be heav in both wheat and oats. I saw san ples of a number of cars of new whea from Oklahoma which show that th wheat in quality is not up to last year's being lighter in weight and consider ably shrunken, owing to hot weathe at filling time. In northern Illinoi the stand of corn, oats and wheat, coul not be improved upon; the acreag everywhere is very large, while ther is some apprehension of hot weathe in the next few days, which may dam age oats in the milk stage. So fa there has been a very good breeze blow ing daily and the damage in territory covered very slight."

MONTANA DEALERS' MEETINC

The Northwestern Grain Dealers Ass'n's annual meeting will be held a Lewistown, Mont., on July 18 and 19 The people of Lewistown are preparin to give the visiting grain dealers royal welcome. In order to do this ef fectively they desire to know about hov many will be in attendance and thos intending to be present are asked t advise Sec'y H. N. Stockell, at Grea Falls, so that those having the enter tainment in charge at Lewistown ma not be in doubt as to how many t provide for. The program is as fo lows:

PROGRAM.

July 18.—Morning: Opening formalities annual reports. Afternoon: Crop report followed by general discussion on handlin the 1919 grain crop; Federal grading dem onstrations by Federal representatives with Federal equipment, and paper o "Collecting Railroad Claims," by R. C Stuart. Evening: At 8:00 p. m., Roun table talks and music and social feature

Saturday, July 19.

Morning.—Addresses by the Secretary o the Grain Dealers National Associatio and Vice-President W. T. Greely; repor of Auditing Committee, and addres "What Montana Wheat Means to th West and the Rest of the World," by T E. Fowler.

Afternoon.—Address, "New Wheat Va rieties," by Prof. Alfred Atkinson, agron omist; address, "Work of Bureau o Crop Estimates for Montana," by Gu Fitzgerald; address, "Personal Respons bility for Fire Losses," by C. A. McCotte Election of officers and directors and com mittee reports.

The Secretary advertises an exhib of elevator machinery with demonstra tions.

MEXICAN CORN PRODUCTION

In a translation of an item appea ing in the May 13, 1919, issue of th Excelsior forwarded by Vice-Consu Chas. H. Cunningham from Mexico City it is said that the partial computatio of the corn crop of 1918 has recentl been given out by the Department o Agriculture. Excluding from this est mate the states of Michoacan, Morelo Tabasco and Tlaxcala, wherein com plete reports have not as yet been made it is officially stated that the know production of corn for the rest of Mex ico reaches the amount of about 40,496 000 bus. Owing to the defective syste of collecting statistics it is believed tha 50 per cent of the corn produced i Mexico has not been reported.

Notwithstanding the extensive pro duction of last year, it has not resulte in the lowering of the price of corn owing to the fact that most of th leading exporters and buyers have th greater part of it contracted for ex portation when the opportunity pre sents itself.

Northwestern Flax Crop Outlook.

The condition of flax in Minnesota South Dakota and eastern half o North Dakota is very favorable. I northwestern North Dakota the recen rains should improve the crop an carry it along for at least two weeks unless extremely high temperature should prevail. The flax condition have not changed in Montana since week ago and it looks as though, eve under the most favorable conditions the flax crop of Minnesota will be ver small.—*The Van Dusen Harrington Co*

JULY RAINFALL.

Rainfall during July results largely from thunderstorms and these are often of local character, but when pressure and moisture conditions are favorable for the development of such disturbances, they may visit extensive areas on the same day. Thunderstorms occur more frequently in July than in any other month and the region of their greatest activity is found in the east Gulf coast section, where, on the average, they occur on more than 20 days of the month. As a result, the central and east Gulf states usually receive heavy rainfall during July, especially near the coast, where the average amounts range from 1 to 10 inches or more, and are larger than in any other section of the country. Over the Great Plains region the normal July rainfall is somewhat less than for June, but on the other hand, there is in July a general increase over the June averages to the eastward of the Plains as far as the Appalachian Mountains. In the southwestern districts, including extreme western Texas, New Mexico and Arizona, July is usually the wettest month of the year, but in the Pacific coast districts the dry season is at its height and little or no rain is expected in California during the month.

FREQUENCY OF SUBNORMAL RAINFALL IN JULY.

Based on 560 records covering the 20-year period from 1895 to 1914 inclusive, Weather Bureau finds that the number of years in which less than half the normal rainfall occurred in July during these twenty years varies greatly for different sections of the country; as a rule, the percentages increase from east to west. They vary from 5 per cent of the years in much of the Appalachian Mountain and east Gulf sections to 90 per cent in central California. In most of the principal agricultural sections east of the Rocky Mountains, from one year in three to one year in five receives less than half the normal rainfall in July. It is also found that rain seldom falls during July in California, but there is a progressive increase in the number of days with rain to the eastward, culminating in an average of more than 15 days along the east Gulf Coast. Rain usually occurs in July on from 9 to 12 days or more, in practically all of the eastern half of the country.—*Nat. Weather and Crop Bulletin.*

PROPOSITION TO CANCEL STORAGE PRIVILEGE ON HAY.

The Western Freight Traffic Committee, 608 South Dearborn Street, Chicago, under its Docket No. X-1498, is proposing to cancel the storage privilege on hay in Texas for Government controlled railroads, claiming that no other state has this storage privilege; and A. C. Fonda has filed with the Commerce Commission his application No. 15 (Section 15) for authority to make this change for account of non-controlled lines between Shreveport and Texas; also on interstate traffic in Texas, and if this is granted, no doubt he will attempt to make the same change in Texas intrastate traffic, making use of the alleged principles of the Shreveport rate case. When this question first came up, I led a protest with the Western Traffic Committee and the Commerce Commission, claiming that Texas, being a consuming state, under this storage rule, had built at great expense storage room in which to take care of the hay shipped from producing states, alfa and prairie, thus using the cars the summer when the hay was moving freely, when the cars were not demanded for other traffic, and distributing the hay as the supply was demanded, and that to cancel this rule would practically confiscate considerable property in Texas in the way of store houses for hay, and work a hardship on the hay producers, as this rule sets as a leveling or equalizing proposition between the producer and consumer, and would set aside a long established custom.—*Sec'y Dorsey, Texas.*

U. F. CLEMONS, MARSHALL, OKLA.

One of the staunch association men of the big Southwest, one who has served the grain trade of the state in a National way by being on the Advisory Committee of the Grain Dealers' National Association, is U. F. Clemons of Marshall, Okla. Mr. Clemons is a

U. F. CLEMONS,
Marshall, Okla.

clear thinker, a man of mature judgment, open to conviction and ready at all times to fight for what is right. It gives us pleasure to show Mr. Clemons out in the broad open of Oklahoma, seated on his riding horse. This form of exercise is most conducive to clear thinking and logical reasoning, and Mr. Clemons surely is noted for both of these qualifications. The grain trade of the Southwest owes Mr. Clemons a debt of gratitude for the work he has performed for them on his many trips to Washington and New York. For the past two years he has been president of the Oklahoma Grain Dealers' Association, having been succeeded this year by W. M. Randels of Enid, Okla.

THE KANSAS WHEAT CROP.

Allen Logan of the Kansas City Board of Trade, whose wheat crop reports particularly are anticipated as reliable, was unfortunately prevented this year from submitting his usual report, owing to a period of many weeks of almost continual care and attention for his father who was extremely ill.

Just recently, however, Mr. Logan has gone through a considerable portion of the wheat belt, attending a meeting at Salina, Kans., two week ago, and motoring through the most important wheat producing counties of Oklahoma. He interviewed at the Salina meeting many large operators whose opinions are desirable and fair, controlling broad interests and many grain shipping stations. An analysis of their advice indicates that a crop of 220,000,000 bushels and upwards from 11,500,000 acres of the state is promised. Thousands of fields will make 35 to 40 bushels per acre with ordinary good luck during the harvest which is quite generally finished by the time this issue is off the press.

The trade must expect a rather unever quality for a considerable percentage of this new wheat, which will be low in test and run to ordinary and semi-dark and therefore will not be as strong in gluten as last year, and the milling trade and buyers on whom many mills place dependence as to their ability must be prepared for a wheat of different character than was the 1918 crop. Serious labor shortage on the farms may, in northwestern Kansas particularly, delay the harvest and thus permit wheat fields to become over-ripe and "shattered." The shriveled wheat is not conducive to best milling results or full price for its ordinary value.

Mr. Logan, when in Enid, Okla., on June 27, in securing crop reports and information from trade well posted on local conditions, roughly estimated the yield for that state at 60,000,000. Samples of the new wheat showed a broad range, running from 53 to 60 lbs. and samples of this wheat have, of course, been quite generously received by wheat handlers planning to get their share of the crop movement. They will soon learn that this year's crop has possibly more than the ordinary percentage of rye mixed with the wheat, and inasmuch as such rye is worth approximately $1.00 less per bushel than the wheat, a considerable dockage is to be expected on such grain. A further reduction in full values will be experienced through receipts of tough and low grade wheat as it reaches the various terminal markets.

In summing up Mr. Logan's interview with your correspondent, based on a knowledge of what may be expected from given conditions and facts, it is his impression that all of the really final unfavorable factors on trade reduction will be more than offset by the wonderful crop yield.

The Corn Market.

Were sentiment alone the price making factor, corn values would be materially lower. Sentiment has been bearish; in fact, too bearish; and this is the reason that the market shows such recuperative power, as an oversold condition develops easily with restrictions placed on trading conditions. News in general has favored lower values, but the absence of important hedging pressure makes the market unsettled, narrow and subject to the wide fluctuations of the past. Crop news shows little change of importance. . . Several bills putting a tariff against importations of corn into the United States are pending in Congress. Agricultural interests are said to be working in favor of this. It is aimed at Argentine imports. These have so far failed to make any visible depression on prices. —*Simons, Day & Co., Chicago.*

CHICAGO OATS DELIVERIES.

It may not be inappropriate to repeat here the following notice approved by the Directors of the Board of Trade, referring to oats deliveries on contracts at Chicago:

No. 2 White Oats, inspected on or after June 15, 1919, are deliverable on all contracts for July and subsequent delivery without premium, and when tendered on contracts for delivery during July, 1919, and thereafter, must be accepted in fulfillment of such contracts without premium.

No. 2 White Oats carrying inspection as such into regular warehouses on or before June 14,1919, are deliverable on contracts for July and later deliveries at a premium of one-fourth of one cent per bushel, and when tendered in fulfillment of July and subsequent contracts must be accepted on premium basis.

Standard White Oats, inspected on or before June 14, 1919, are a proper tender on July and subsequent contracts without discount; and when so tendered must be accepted in fulfillment of July and subsequent contracts; provided, however, that in case a buyer whose contract dates subsequent to June 7, 1919, can establish any loss to himself—not to exceed ¼c per bushel —because of any difference in value of Standard Oats as compared with the value of No. 2 White Oats, as inspected on or after June 15, 1919, he shall have the privilege of establishing such loss and bringing action for its recovery in the usual way under the rules of this Association in case such Standard Oats have on being loaded out failed on reinspection to grade No. 2 White Oats of the Illinois grade in force since June 15, 1919.

GRAIN CORPORATION AT SALT LAKE.

Mark H. Greene who has represented the Grain Corporation at Salt Lake City, has been authorized to establish a branch of the Corporation in that city.

The plan for handling the 1919 wheat crop in the Intermountain territory is entirely different to that of last year. The Presidential guarantee specifies Salt Lake and Pocatello as buying points in this section, at which $2 per bushel is guaranteed to the producer, based upon No. 1 hard winter wheat. The plan of last year of paying $2 per bushel, f. o. b. cars, in the Intermountain territory, has been changed to a Salt Lake basis. The price of wheat at points outside of Salt Lake will be governed by the freight deduction from the $2 price, less a grain dealer's and miller's handling charge, in case producers do not ship direct to the Salt Lake market or other market which may prove to be equally advantageous.

The Salt Lake office will be opened just as soon as Mr. Greene has gone over the entire situation, visiting various elevators which may be used for the storage, transfer and shipment of wheat purchased by the Grain Corporation.

A Weed That Is Not a Pest.

Yellow trefoil, or black medick, has been found to be one of the more valuble weeds by the agronomists at the Ohio Experiment Station. The plant is a legume with trailing habits, and flourishes on hilly ground or soil generally too poor to grow ordinary crops. This weed gathers nitrogen from the air and puts it in the soil so that better results are secured when crops are planted. Many samples of the weed are received by the Ohio Experiment Station for identification. Some farmers fear that the plant may be a serious pest.

FROM WASHINGTON

Northwestern Farmers Are Kicking About the Fixed Price of Wheat—Federal Trade Commission and Agricultural Department After the Packer.

By JOHN GLEISSNER.

WASHINGTON, D. C., July 7.—[Special Correspondence.]—Farmers are insistently demanding removal of the Government's guaranty of $2.26 a bushel for wheat, according to Senator Gronna, chairman of the Committee on Agriculture. Gronna says the demand is so widespread that the committee is seriously considering asking Conogress to remove the fixed price. Thousands of letters have been coming into Washington from farmers, asking that they be permitted to sell their wheat for whatever price they can get. They declare the market price would be much higher if it were not for the Government's fixed price.

"The demand from the wheat farmers seems to be so general that we have decided to investigate the situation," said Gronna. "If we find that the growers are discriminated against, we will report a bill."

INVESTIGATING FOODS AGAIN.

Three agencies of the Government—the Federal Trade Commission, Congress and the Department of Agriculture—are concerning themselves with the question whether the packers are exercising an unhealthy influence on the growing and marketing of meat, and with the rapid decline in the prices of live beef. The Federal Trade Commission shortly is to put out another part of its investigation of food, which will deal with the activities of the packers. A report made a year ago charged combination. The Commission plans to present exhaustively facts showing how the packing industries have entered into allied businesses such as canning and the handling of rice and other foodstuffs. It will tell also how marketing is carried on, and to what extent packers participate in branches of the cattle industry other than slaughtering. It will be charged that there is a tendency to monopoly and absorption of competing businesses.

Recommendations are to be made for Federal supervision or control of some sort. It is not known what these recommendations will be, but it is believed they will not differ greatly from provisions of measures which Congress now has under consideration. Several bills are before Congress, notably the Kendrick and Kenyon measures. These provide for divorce of the packing business from other businesses, and for strict Federal supervision or control. Congressional leaders freely predict that this session will witness the enactment of drastic legislation of some sort or another. More radical members charge that the packers are in a conspiracy to obtain control of the nation's food supplies and that they are rapidly getting into a positoin where they are able to dictate prices and distribution.

The Department of Agriculture says the Nation is confronted with a grave problem which requires solution if we are not to suffer a decline of the live stock industry, with meat prices to the consumer so high that he is denying himself, and with prices for live stock, especially beef and lamb, so low to the producer that he is actually losing money.

A statement from Clarence Ousley, acting secretary of the department, says, in part:

"It is an anomalous situation. The Department has endeavored to inform itself on the subject, and after conference with senators and members of the House who represent live-stock producing regions and who also feel deep concern for the welfare of consumers, deems it important to give to the public certain outstanding facts, which may be summarized as follows:

"There is no longer need for meat conservation. The supply is plentiful, and patriotic citizens may freely disregard the meat-saving placards which are still displayed at many eating places.

"Europe needs our surplus pork, but is filling its beef requirements by importations from South America and Australia. Prices of beef cattle have fallen sharply since March 1 on account of the stoppage of exports for army use, and a slack demand for beef at home, due to the continuation of beef conservation under the mistaken idea that such conservation is still necessary to feed the people of Europe. Beef producers and lamb producers who sell their products at this time are confronted with the danger of heavy financial losses which would tend to restrict production and cause a serious shortage in future.

"The United States will never have a satisfactory and permanent solution of the problem until the manufacture, sale and distribution of meat products are officially supervised by authorized agents of the Government, working in coöperation with state and municipal authorities, whose only aim is to serve the public at large and not any particular class. When the Federal Government is enabled by law to maintain a just supervision over the meat-producing industry that will prevent unfair dealings, speculation and profiteering, by furnishing the public from an unimpeachable source all the facts with regard to the industry, and when the states and municipalities are enabled by law to exercise similar supervision over intrastate and local business, then only can we expect to have fair and stable markets in which producer and consumer alike will have a square deal."

COTTONSEED PRODUCTS.

The Bureau of the Census shows that 4,373,294 tons of cotton seed were received at mills in the United States from August 1, 1918, to May 31, 1919, compared with 4,195,044 tons during the corresponding period of the previous year, not including 40,438 tons and 31,828 tons on hand August 1, nor 134,008 tons and 190,520 tons reshipped or burned for 1919 and 1918, respectively. The quantity of seed crushed during the 10 months was 4,322,499 tons for 1919 and 4,134,701 tons for 1918; and the amount on hand at the mills on May 31 was 91,233 tons in 1919 and 92,171 tons in 1918. Cottonseed products manufactured, shipped out, and on hand were, season of 1918-19 (Aug. 1 to May 31):

	Produced.	Shipped.
Crude oil, lbs.	1,272,241,579	1,223,420,138
Refined oil, lbs.	1,043,791,511	.....
Cake and meal, tons	2,101,754	2,040,846
Hulls, tons	1,081,214	968,536

Imports of cottonseed products for the 10 months ending May 31, 1919, consisted of 15,905,266 pounds of oil, compared with 13,433,935 pounds during the corresponding period of the preceding year. Exports were 132,941,252 pounds of oil, compared with 75,685,355 pounds; 140,299 tons of cake and meal, against 19,043 tons; and 65,945 running bales of linters, against 161,801 bales.

MONTANA MILL REGULATIONS.

The Montana Trade Commission, by virtue of laws recently enacted, will make rules and regulations for the governance of mills and elevators. Milling regulations have already been put out. The portion of flour and mill feed returnable to the patron when wheat is ground for the owner has been regulated and prices also made for grinding, chopping or rolling grain for feed. Prices for grinding vary according to the size of the mill and its distance from the railroad. Mills of 100 bbl. capacity or upwards will be allowed 25c per bu.; those between 25 and 100 bbl. will be permitted to charge 30c; mills at 25 bbl. and under a charge of 35c; mills located 20 miles or more from the railroad may charge 40c. If this means what it says, milling certainly will be some snap in Montana. Feed mills will be permitted to charge 10c per cwt. where the amount to be ground is 2,000 lb. or upwards. Lesser quantities will collect 12½c per cwt. The patron will be required to pay for sacks and other containers and the actual cost of sacking. The Commission also decided "that a reasonable profit for the manufacture of flour or its by-products or other grain products of every kind or nature is fair but all unreasonable or unjust profits are prohibited and declared unlawful." Complaints may be made to the Trade Commission.

BEAN GROWERS' PROTEST.

The Colorado State Farm Bureau, Fort Morgan, recently adopted the following resolution protesting against the indiscriminate use of the term "Pinto" in reference to beans and against the policy of the U. S. Government in buying imported beans:

Whereas, Many importers of foreign beans market them as "pintos"; and,

Whereas, There is a tendency on the part of the trade to designate all foreign beans under the term "pintos"; and,

Whereas, The pinto bean is a distinct variety of Colorado beans grown extensively in the states of Colorado and New Mexico; and,

Whereas, The pinto bean is of superior quality food value and edibility to many other varieties of Colorado beans; therefore, be it

Resolved, That the Colorado State Farm Bureau protests against the sale of any foreign bean as "pinto"; and be it further

Resolved, That the Colorado State Farm Bureau protests against the policy of the United States Government in purchasing any foreign beans as long as there is any considerable quantity of home grown beans not marketed.

Potatoes Respond to Fertilization.

Compared with all other field crops potatoes yield more profitably to the application of commercial fertilizers as shown by tests at the Ohio Experiment Station. Experiments covering a 25-year period in potato culture give an average of 170 bushels to the acre as compared with the 82-bushel average yield for Ohio during the past 10 years. This yield was produced when only 8 tons of manure was used as a fertilizer but experiments on other crops have shown that the effect of manure may be greatly increased by the use of acid phosphate in addition to the manure.

Because European potash is not yet available and is high in price, specialists point out that potato growers will be justified in using from 10 to 16 tons of manure and 300 to 500 pounds of acid phosphate to the acre.

Reports to the American Steel & Wire Co. from Alabama say that velvet beans condition ranges from poor to excellent in the southern section. In the western section of the state, however, condition of beans is only about one-third of normal.

It is reported from Indiana that some grain fields have been burned by farmers in an effort to stop the progress of the army worm which has appeared in great numbers in various sections of the state, particularly in the east central portion.

Movement of Oats.

Following is a statement of the receipts and shipments of oats at the primary markets of the West for the weeks named:

	Receipts.		Shipments.

The entire crop of attar of roses of Bulgaria has been taken over by that country to be swapped with the Grain Corporation for bread grains. It is estimated the crop should be sold at about $17.50 per oz.

At a recent conference of farmers at Spokane a protest was made against the alleged "maladministration" of Wheat Director Barnes because of his entering into agreements with mills, grain buyers and bakers to buy wheat only at the Government guaranteed price. The conference also asked for more Government money for roads, a temple of agriculture at Washington, reduced freight rates on seeds, a branch of the Bureau of Animal Industry in the Northwest and a 1920 minimum fixed price for wheat "to prevent loss and possible disaster to the agricultural interests of the country."

PHOTO OF THE MILWAUKEE BOOSTERS WHO WERE AT THE MINNEAPOLIS CONVENTION OF THE TRI-STATE GRAIN DEALERS.

The Letter Box

Out of Business.

Price Current-Grain Reporter: We do not intend to remain in business here in Kansas.—*Dickinson Bros. Grain & Hay Co., Humboldt, Kans.*

Let Supply and Demand Do It.

Price Current-Grain Reporter: We deem it of vital importance to let supply and demand make prices on all products.—*Shellabarger Elevator Co., Decatur, Ill.*

Sold Out.

Price Current-Grain Reporter: Cancel our subscription to the Grain Reporter as we have sold out our stock and will discontinue the business for the present.—*Johnson Bros., Nebraska City, Nebr.*

Traded Elevator.

Price Curren-Grain Reporter: H. H. Wright has traded his elevator with the Oakland Grain and Coal Co. of Oakland, Ill. Wright has been located at Brockton.—*Brockton Elevator Co., Brockton, Ill.*

New Office.

Price Current-Grain Reporter: After Monday, July 7, our main office will be located at 123 W. Washtenaw Ave., Lansing, Mich., where we will be pleased to have all mail, etc., sent to us.—*Chatterton & Son, Lansing, Mich.*

A Real Problem.

Price Current-Grain Reporter: We think one of the most important and vital subjects confronting the grain trade at the present time is that of the Government grading and handling of wheat and the destination, weights and grades and how to avoid controversy.

We expect to soon purchase a feed mill. There is nothing especially new here. Wheat, rye and corn are looking extra good.—*Lewellyn Bean Co., Carson City, Mich.*

Equity Union Building.

Price Current-Grain Reporter: The Farmers' Equity Union Exchange at Crestline are just completing a new 30,000 bushel elevator, modern throughout, which they expect to have in operation for the new wheat crop which is now being harvested. It is the largest for years and promises to be of a very good quality. Other crops, such as corn and oats, are looking well; and considering everything, it looks like a prosperous year in the grain business.—*Farmers' Equity Union Exchange, by W. Shupp, Mgr., Crestline, Ohio.*

Re Texas Oats.

Price Current-Grain Reporter: With reference to the mill product situation will say that few cars of flour and feeds are being shipped in at this time, the season being practically over. There have been a few cars of new wheat moved up to this time; however, rainy weather has delayed the harvest at least 10 days.

We have handled a good amount of the new crop Texas grown RRP oats and expect to do quite a nice business in this commodity during the next 30 days.

We find that Texas dealers have paid more money for June shipment than outside markets would bid. The dealers in outside markets have figured that when the actual movement begins the prices will be cheaper. Most of the best growers and first hand dealers have sold about all June shipments that they care to, unless weather conditions had been different; and for this reason we doubt if they will see any cheaper prices for this month's delivery. In other words, we think that the opportunity for making money out of June shipments of Texas oats has been passed up by the dealers outside the state, and this money will be made by the Texas dealers who have been conversant with conditions and paid the prices.—*E. A. Johnson Co., Dallas, Texas.*

Items from Kendrick, Idaho.

Price Current-Grain Reporter: John F. Waide has resigned his position as manager of the Kendrick Rochdale Co., Ltd., and accepted a like position with the Idaho Bean and Elevator Co. of Spokane. He will have charge of their Peck, Troy and Kendrick warehouses.

The Kendrick Warehouse and Milling Co. has just completed their season run, and will make extensive repairs before the new crop grain is ready for milling.

Fall-sown wheat is good, spring-sown grain needs rain; barley and oats are looking good, but are needing rain to make the grain fill and to lengthen the straw. It will be short unless we have rain soon. The nights are cool and the grain looks well. The bean crop looks well with about 60 per cent of a normal crop planted.

Kendrick will not build any new elevators this year. There are two concrete houses of 120,000 bushels capacity each, and warehouse room for 150,000 bushels of sacked grain or beans. There are two up-to-date bean cleaning plants. Our usual yearly receipts are 350,000 bushels of grain and 150 to 250 cars of beans.—*E. P. Atchison, Kendrick, Idaho.*

More Orders Than Hay.

Price Current-Grain Reporter: We have many orders on hand and in fact more than we can fill or ship. Our high-grade quality alfalfa is in great demand, as it costs less to feed it to live stock. This is the sound commercial answer to the insistent demand for our alfalfa and our patrons gladly pay us a little more money for it than they could buy other hay for elsewhere. We are not particularly advertising at this time because in doing so we would probably be swamped with hay orders, and we don't wish to disappoint the trade by not being able to fill their demands under the circumstances.

We shipped from the first crop alfalfa nearly 100 cars to the Carlisle Commission Co. of Kansas City and we have orders from this firm for 75 cars more which we should ship when the second crop shall be harvested. Besides this particular firm we have other good patrons to whom also we have shipped quite a number of cars and have some further orders from all of these now, so you see that our supply is pretty well spoken for.—*Lang Bros., Carlsbad, N. M.*

The Real Profiteer.

Price Current-Grain Reporter: I noticed in the issue of June 25th of your paper, under the Kansas City correspondence, that the Lynn County, Kansas, Threshermen's Association had adopted a scale for thrashing for the coming season as follows: Wheat, 10c; oats, 6½c; rye, 12c; barley, 8c, etc. Last year some council or commission with authority from the Federal Government sent representatives over the grain producing states with authority to condemn threshing outfits that were not or could not be put into workable condition to do a good job and save the grain. This was very commendable and no doubt resulted in saving a great deal of grain that is otherwise lost each year.

These men, working in many counties with county agents, called the threshermen together and explained the matter to them and made it clear that no wasteful methods would be tolerated, and they were given to understand that they would be allowed to charge a fair price for their services.

In this county the threshermen adopted a scale of prices higher than ever before charged and about the same as that adopted by these Kansas men. This scale was adopted with the knowledge of the county agent and the Federal representative. The U. S. Food Administration, through Messrs. Barnes and Stream, fixed the compensation, or margins, of country grain dealers at not to exceed 3% and dealers taking more than that would be considered as profiteers and would be liable to have their licenses revoked or compelled to make restitution to the farmers. I think I am safe in saying that the average threshing outfit, considering the total number in use, is not worth to exceed $2,500, while the value of a country elevator, valued in like manner, is about $10,000 and in addition money is necessary to conduct the business, either the owner's or borrowed.

If the Food Administration sincerely wished to prevent profiteering, why not start at the source and get the first malefactor, the threshermen, who beat the elevator man to it and at it? They saw Stephen stoned and lifted not their hands. Why should the Administration allow these men to charge more for their services than is allowed the dealer who had six times more money invested who did more actual manual labor and who assumed the risk of market conditions and that of the grain getting out of condition? Threshermen who were not operating their outfits under a Federal License and did not have to secure permits to move to the next job; in short, they were relieved of practically all the red tape to which the shipper was subjected.

The threshermen in our county admit that they never before made as much money as they did last year on the same amount of work, while the country buyer was forced to take his pittance with the sword of Mr. Barnes hanging over him. If it is worth 10c per bushel to thresh Kansas wheat the country buyer should be allowed compensation for his services in proportion. But he will not get it, with or without the sanction of the Food Administration or any other power in heaven above or the earth below nor the waters under the earth.

Mr. Barnes may not know of these things, but I'll wager a dollar against the one he received as salary that if the grain dealers of Lynn Co., Kans., formed an organization and did the same thing these threshermen are doing and what other organizations of threshermen did last year, they would hear something to their interest as well as to their detriment. The Food Administration might profitably meditate on the admonition "to render unto Caesar the things which be Ceasar's and unto God the things which be God's."—*J. K. McGonagle, Washta, Ia.*

Crops in Henderson County, Illinois.

Price Current-Grain Reporter: There is a large acreage of wheat, but quality will be poor on account of scab. The yield will be cut at least one-third, and spring wheat will be cut from one-half to two-thirds. Corn is doing the very best, although the acreage is small. Clover is good and promises a normal hay crop.

Old corn is scarce and although this is a corn section very little has been shipped. There has been double the feeding done the last year.—*E. G. Lewis Seed Co., per E. G. L., Medea, Ill.*

Small Grain in Illinois.

Price Current-Crain Reporter: The wheat crop is now safely in the shock, except a very small percentage lost by high water. It's too early yet to state fully the quality of this crop, there are but few who look for much No. 1 wheat. The dry, hot spell of last year while the grain was ripening was replaced this year by a good deal of wet weather, resulting in softer berries; also many heads are smaller. An average yield of 25 bushels per acre is still as good a guess as any for the winter wheat.

Spring wheat fields were attacked here by blight and scab, as might be expected in this latitude, and the financial results of spring wheat promise to be less per acre than if the same land had been planted with corn.

Not many years past has there been as much corn drowned out as now, both in bottoms and in numerous low spots on the prairie—mostly in one to five acre ponds, few of which will be replanted this year. Considerable corn is now too high to cultivate and farmers working hard on the balance, but more weeds will be left in fields than usual. Otherwise the crop looks fine.

An oat raiser this week guessed the number of bushels raised this year at two-thirds of last year's crop. This is putting it pretty strong, but certain it is that both acreage and yield are less than usual.—*H. I. Baldwin & Co., Decatur, Ill.*

CASH PRICES FOR GRAIN.

Following is a statement of the we ekly range in cash prices for grain as mentioned in the leading markets of t he country for the week ending July 5:

	CHICAGO.	ST. LOUIS.	KAN. CITY.	OMAHA.	MILWAUKEE.	PEORIA.

DETROIT WELCOMES HAY TRADE

National Hay Association—26th Annual Convention
Detroit, Michigan
Hotel Statler July 16-17-18
Important Business—Good Speakers—Big Time

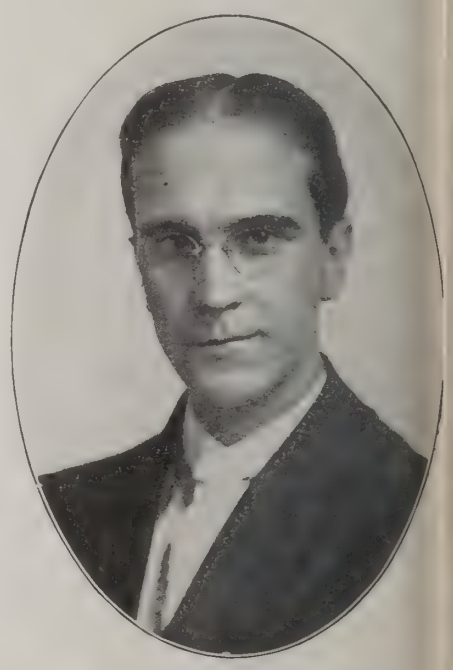
WEDNESDAY, JULY 16—OPENING SESSION, 9:30 O'CLOCK.

Convention called to order by President Samuel Walton.
Invocation—Rev. M. S. Rice, Pastor North Woodward M. E. Church, Detroit, Mich.
Singing of "America" by Delegates.
Address of Welcome on behalf of the city of Detroit, Mayor Jas. Couzens.
Response in behalf of The National Hay Ass'n—J. L. Dexter, ex-President, Detroit, Mich.
Address of Welcome on behalf of the Detroit Board of Trade—Theo. W. Swift, President.
Response in behalf of The National Hay Ass'n—Fred M. Williams, New York City.
Memorial Address—D. W. McMillen, Chairman, Fort Wayne, Ind.
Reading Minutes of 1918 Convention—Sec'y J. Vining Taylor, Winchester, Ind.
Report of Board of Directors—President Samuel Walton, Pittsburgh, Pa.
Address—"Some Stray Bits from Overseas," Col. H. C. Jones, Baltimore, Md.
Report of Legislation Committee—Alfred Gowling, Chairman, Cincinnati, O.
Address—"Several Legume Hays," Dr. H. E. Horton, Agricultural Commissioner, American Steel & Wire Company, Chicago, Illinois.
Appointment of Committees.
Adjournment.

THURSDAY, JULY 17—MORNING SESSION, 9:30 O'CLOCK.

Report of State Vice-Presidents—C. M. Rice, Chairman, Omaha, Nebraska.
Address—"The National Organizations—Essential," Lee G. Metcalf, ex-President, Grain Dealers National Association, Illiopolis, Illinois.
Report of Committee on Transportation—J. H. Devlin, Chairman, Chicago, Ill.
Address—"Is Business Adjusting Itself Properly to Post-War Conditions?" E. C. Eikenberry, ex-President, Grain Dealers National Association, Camden, Ohio.
Report of Committee on Statistics—N. M. McEachern, Chairman, Wilmington, N. C.
Address—Walker D. Hines, Director General of Railroads, Washington, D. C.
Presentation of Prizes in Membership Campaign—D. S. Wright, ex-President, Weedsport, New York.
Adjournment.

Afternoon Session—1:45 O'clock.



Report of Committee on Arbitration—Rudolph Raabe, Chairman, Ft. Jennings, Ohio.
Address—"America in the New Age," Dr. John Acheson, President, Pennsylvania College for Women, Pittsburgh, Pa.
Report of Grades Committee—F. L. Young, Chairman, Lansing, Mich.
Address—Colonel A. D. Kniskern, Q. M. C., Forage Branch, War Department, Chicago, Illinois.
Report of Committee on By-Laws—Chas. England, Chairman, Baltimore, Md.
Report of Secretary-Treasurer—J. Vining Taylor, Winchester, Indiana.
Address—"Agricultural Problems," G. I. Christie, Assistant Secretary of Agriculture, Washington, D. C.
Round Table Talk—One hour discussion devoted to any subject delegates desire to present.
Report of Nominating Committee.
Report of Auditing Committee.
Adjournment.

FRIDAY, JULY 18—MORNING SESSION, 9:30 O'CLOCK.

Report of Committee on Board of Directors' Report.
Report of Committee on Resolutions.
Unfinished Business.
New Business.
Installation of Officers.
Adjournment.
Changes in this program or order of business will be made to suit the convenience of the Association and the accommodation of those appearing on the program.

SAMUEL WALTON
President
National Hay Association

J. VINING TAYLOR
Secretary-Treasurer
National Hay Association

ANNOUNCEMENTS.

Chicago Grain Market Reports will be received during daily sessions from the Secretary's desk.

Thursday evening, 6:30 o'clock promptly, a banquet will be given for delegates, their families and friends, in Convention Hall of Hotel Statler. This is one of the most pleasant features of the Convention. It will be necessary for you to secure tickets from the Secretary by Thursday afternoon at 4:00 o'clock—$1.50 for adults and children. Those attending the last annual banquet know just how much pleasure was derived from it. It is a splendid way of getting acquainted with your fellow member and competitor. Make your reservations early, please. Cabaret feature during the meal. Banquet will be followed by dance.

Any member desiring to speak on any particular subject should notify the Secretary in writing as soon as possible in order that he can arrange for same on the program.

ENTERTAINMENT.

Wednesday, July 16, the Detroit Board of Trade have arranged a lake trip for delegates, their families and friends, from noon until 6 p. m., on the Steamer "Columbia" of 4,000-passenger capacity. Badges will be your ticket of admission on board. Boat leaves dock promptly at 1:00 o'clock, giving you plenty of time to get lunch and get down to the dock. The place of leaving will be announced later.

Thursday, July 17, 6:30 p. m., banquet for members, their families and friends, followed by dancing in ball room. Splendid cabaret has been provided for this banquet and good music for the dancing. Tickets, $1.50 per plate.

Can You Beat It?

We wish that we might truthfully state that we grew and marketed our own alfalfa from fields such as this, but we can say that thousands of such fields furnish us forage of just the quality desired by a long list of feeders and dealers who have learned to depend on

Dyer's Nebraska Prairie Hay and Alfalfa

We hardly like to venture market opinions and prices, but are always glad to give our friends and trade up-to-the-minute advice and reports from which they may draw their own conclusions as to the best time to contract or make round lot purchases. We have discovered that as a general thing farmers, influenced by war prices on grain, sugar beets, etc., are demanding proportionately high prices for alfalfa and high grade hay. The consuming and manufacturing demand among dairymen, feeders and finishers of cattle as well as an increasing list of alfalfa millers should also be recognized in contemplating the prices you will pay this year, suggesting your good judgment in establishing your hay connections now at primary markets.

Omaha has the very best inspecting, weighing, receiving and reconsigning facilities.

Omaha's location is just right to tap the great producing areas of the west and northwest with which supplies we are continually in touch. We are thus able to fill your orders as you would if you were personally in the hay fields.

Tell us how many dairy cows in your herd, and let us quote you on your entire requirements from feeding young pigs to finishing 200-lb. hogs, raising calves to 3 year olds, or advise regarding the demand of your trade if you're a dealer. We will **send you one car or a dozen** (we have on occasion handled a train load per day, one day handling on the Omaha market 65 cars of prairie ourselves) of alfalfa or prairie hay, or we shall be just as glad to answer in detail your inquiries about the probable trend of prices.

Dyer & Co. Omaha, Nebr.

KANSAS CITY IN THE HAY GAME OF 1919-20

The Range of Kansas City Business Covers the Entire Country—What the Market Has to Offer and Its Guaranties of Service

By SANDERS SOSLAND

HAY dealers of Kansas City are today in a position to make the new crop year just begun the greatest in volume and the most valuable in point of service to the country. This is a broad statement, but the accomplishments of the past crop year and the conditions surrounding this market point to the establishment of new records by this, the world's largest hay market.

Dealers on the Kansas City hay market transact business in hay and alfalfa meal in California, in Idaho, in Wisconsin, in New York and Massachusetts, in the Carolinas and Florida, in Texas and Louisiana, and, in fact, with practically every state of the country. The optimism of this market as to the new year just begun is therefore a subject of national interest. Those who look to this market as an outlet for their hay and meal and the distributors who come here with orders to meet the needs of consumers are vitally interested in the factors which have led to the feeling that Kansas City faces a year of business which will mark up a new total in point of volume.

No market can enjoy a large business without large supplies to draw from to fill the orders which it obtains. Kansas City realizes this. It expects generous crops in its immediate territory. It is also counting upon the extension of its sources of supplies to add to its business. No year in the history of the market witnessed buying of hay by local dealers in so many different states as in the past twelve months. Arizona, California, New Mexico, Idaho, Colorado, Utah and Wisconsin and Illinois were among the states, in addition to Kansas, Oklahoma and Nebraska which furnished supplies for this market the past year. The states which are ranked as surplus producers of hay and which did not come to Kansas City previously have learned of the advantages this market offers as a distributing center. They are going to use its facilities in the next year. Not only will this be an advantage to the producers of those surplus states, but it will be helpful to buyers who come to Kansas City, for this market will be in a position to offer alfalfa, prairie or other varieties of hay from the most economical shipping points. The broader territory looking to this market to distribute its surplus hay will also enable Kansas City dealers to make selections of the various grades in a manner which will give greatest satisfaction to buyers.

As for supplies in its immediate territory, prospects are far brighter than a year ago, when drouth prevailed over the Southwest. Kansas, Oklahoma, Nebraska and Missouri have ample moisture. In fact, they have had an excess of moisture in recent months. The first cutting of alfalfa was damaged in a measure by excessive rains. Pests injured a portion of the second cutting, but the later crops may be better. Including New Mexico and other irrigated portions of the Southwest, it may be said that the Southwest will make a favorable showing in alfalfa production this year. There are, however, no indications of a great abundance, but the situation here will be the most favorable, relatively speaking, than any other alfalfa region in the United States can report. In the case of prairie, a large harvest is in prospect. Heavy rains in the spring stimulated weed growth in prairie fields, but there will be considerable good prairie. Tame hay yields, while not heavy, are in excess of last year and of very good quality. Production of straw will be huge.

During the past year thousands of cars of hay handled on the Kansas City market by dealers were taken for the army. Some of this hay was shipped to Europe, but the bulk of the supplies for overseas consumption was obtained in territory east of the Mississippi River. While the army continues to favor the Southern camps for carrying its horses and mules, it has an insignificant number of these animals to feed today as compared with the total a year ago. Compressing plants have suspended operations. Orders for 500 to 5,000 tons of hay at a time are not coming to dealers here from the army as a year ago. It was a patriotic duty to supply the army with hay and straw during the war, and Kansas City dealers did more than their share without denying to their regular trade connections ample attention. This was made possible by enlarging the business facilities of the market. Dealers have not permitted these facilities to disintegrate. Instead, they are maintaining their organizations. What will be the result? This market will give to its patrons more satisfactory and more prompt service than ever before. Also, this market will reach out for larger supplies and larger orders, and its meritorious service will bring it greater growth.

To gain an idea of what this market is capable of attaining in the hay business, it is necessary to review briefly the statistics relating to its past growth. in the crop year ending with June, Kansas City received, despite an enormous diversion of hay direct from points of origin to Texas and other states without passing through this market, a total of 32,205 cars. If the hay handled direct were included with the receipts, probably a new high volume of business would be revealed for the last year among members of the Kansas City market. In the preceding year, Kansas City received 35,725 cars of hay. In 1916-17 Kansas City received 30,790 cars. In 1915-16 the receipts here were 34,144 cars, and in 1914-15 the arrivals aggregated 34,673. In 1909-10 this market received only 19,495 cars.

In the receipts the past year there was a total of 14,639 cars of alfalfa, a new high record for this market. The previous record was 14,325 cars of alfalfa in 1917-18. In 1915-16 Kansas City received 10,222 cars of alfalfa. In 1909-10 the alfalfa arrivals were only 3,407 cars. Of prairie the receipts the past year were 12,861 cars, against 12,938 the preceding year and the record total of 20,626 cars in 1915-16. In 1909-10 the prairie receipts were 12,846 cars. It should be borne in mind in comparing the prairie and the alfalfa receipts that alfalfa is replacing the wild hay in the trade here. Of timothy the receipts were 2,645 cars the past year, against 6,201 in 1917-18, and 1,845 in 1909-10. The 1917-18 total established a record for Kansas City. Clover mixed receipts were 661 cars, against 751 the preceding year and the record of 1,803 in 1916-17. In 1909-10 the clover mixed arrivals were 692 cars. Of clover the receipts were 166 cars the past year, compared with the record of 247 in 1910-11. Straw receipts were the second largest on record, 1,233 cars, against the banner total of 1,369 cars in 1917-18, and 428 cars in 1909-10.

Kansas City has received as much as 4,177 cars of hay in a month, this record standing to the credit of last October. It has received as much as 1,402 cars in a week, this total having been recorded in the first market week last February. It has received as much as 320 cars in a day, this total having arrived on February 3, 1919. Kansas City can handle and expects to handle a larger volume than indicated by these records, which are in excess of the totals received at any other market in the United States.

Only recently the Kansas City Hay Dealers' Association voted against an increase in its commission rates on buying and selling hay, which amount to only 75 cents a ton. On straw the commission is only 50 cents a ton. In recent months the market conducted a successful fight against a political attempt to interfere with its plugging system of inspection, which is now nationally recognized as the only practical means of distributing hay through commercial channels. In seeking railroad improvements for the good of hay buyers and sellers, Kansas City occupies first place as a market. It was officially recognized as a model market during the war, and its facilities for serving the industry today are more complete than during the war, which, as in other business enterprises, was handicapped by the withdrawal of men for the army and the navy.

Possessing all the necessities for a greater hay trade, Kansas City dealers are confident that their efforts to increase their business will meet with successful results for themselves and for the thousands of producers and distributors whom they serve in all parts of the country.

DETROIT: CONVENTION CITY.

The City of Detroit which in 1900 was given 285,704 people by the U. S. Census, is said now to contain 925,000 inside the limits and over 1,000,000 within a 10-mile radius from the city hall building. The phenomenal growth has been due to the automobile industry. Located on the great water way uniting the upper and lower lakes, the site of the city has since soon after the discovery of Joliet been marked for the location of a great city. The city itself was founded by Antoine de la Mothe Cadillac and during the war of the Pontiac conspiracy and after was the scene of many tragic and romantic episodes. Its commerce importance has kept pace with a development of the water way through the Detroit River.

It is one of the most beautiful of the Lake cities and has for many years been the objective point of the tourists, who take advantage of the many delightful trips by water, as well as of the beautiful inland lakes that are adjacent. Climatic conditions are ideal, being in the same latitude as Boston, Mass., while the cool breezes from the Great Lakes give Detroit an average temperature in the summer time that is not surpassed by many points farther north. in fact it possesses that rare combination of a city of beauty and one of i dustry: a class of industry that cal for the world's most skilled workmer a beauty that has caused vistors to e claim "Truly, a city where life worth living."

This famous Belle Island Park, owne by the people, has no superior f beauty and refined, attractive, educ tional features. Its special features i clude an aquarium with all species fresh and salt water fish, a horticu tural building with plant life gathere from the four corners of the world; or of the best zoological gardens of Amer ca; fine bathing beach; public bat house with 900 rooms; yacht and bo clubs; beautiful casinos; miles canal for boating and magnifice boulevards for autoists; a five and on half mile shore drive; band concer and other attractions.

The Detroit River never goes on rampage. It remains throughout th year at just about the same level a is as safe as a mill pond. The fine fleet of passenger steamers on fres water hail from this port and durin the last season they accommodate more than 12,000,000 passengers, thr times as many as sailed from all oth Great Lake ports combined—all th without the loss of a single life. Th river during the season is the gre source of popular pleasure a there are excursion boats of every si and degree of luxuriance of fitting The park system includes that mo superb recreation ground, Belle Isl with its 707 acres of rest, recreatic and unsurpassed beauty. KANSAS CITY HAY TO EAST.

By ROY D. NORTH,
Of Midwest Hay Co., Kansas City, Mo.

Market conditions in the hay trade Kansas City should stimulate the mov ment of hay from here to the East in t new crop year ahead of the industr While production is not without its di appointing features, especially in t case of alfalfa, the market in Kans City should succeed in handling an i creased hay business with the East.

It is our opinion that alfalfa fro Kansas City will offer attractions buyers in the East this year. First, the drouth in the Northwest continue supplies from an important northe territory will be cut off. States nor of Kansas City which now supply va ous consumers with hay will meet unusual demand, and Kansas City w be able to offer favorable prices to t East, other markets considered.

The Southwest is not complaining drouth this season. It complained excessive moisture for weeks, and late has been enjoying favorable weathe This will prove helpful to its supp situation. At the same time the Sout west is well aware of the fact that t states east of the Mississippi have smaller area in corn and will be able

SKY LINE OF DETROIT.

ROY D. NORTH

NEW HAY

HARRY J. NORTH

Unusual developments are ahead in the hay marketing industry of the United States, which has just embarked upon a new crop year.

Readjustment is in process, not alone in the hay trade but in markets for other commodities as well. It will prove profitable for you to keep in close touch with Kansas City, the market which reflects changes more accurately than any other point in the United States.

The Midwest Hay Company is constantly active on the Kansas City market. We are in a position to serve both buyers and sellers to advantage—to insure for you the greatest profit resulting from market changes as they occur on any class of hay in which you are interested.

While our organization is six months old, it is a combination of interests who have devoted practically their entire life to the receiving and shipping of hay on this and other markets of the United States. Our rapid and continuous growth is the result of highly satisfactory service to our connections.

Join our clientele for mutual advantage on the new hay crop.

Midwest Hay Company

KANSAS CITY, MO.

use more alfalfa. There is a possibility that, with the territory east of the Mississippi eager to handle more stock, the herds in the Northwest suffering from douth will be moved to that area, thereby enlarging its needs of alfalfa and other hay.

So far as alfalfa is concerned, price prospects are not such as to warrant any expectation that the cost of moving the hay by freight will add any burden which the trade cannot bear. We do not anticipate a year of cheap alfalfa, but are confident that the prices on the hay will add to its desirability as a feed in the East when compared with quotations on other feedstuffs. After all, this is the only measure which ought to be used by the East and by other sections of the country in determining whether or not to make purchases of alfalfa.

The growth of the dairy industry in the East is enlarging the consumption of alfalfa hay there. Another influence in effecting a larger business in hay between Kansas City and the East is the closer relationship existing between the dealers of the entire country. Friction over grading and grades is not the discouraging influence of a few years ago in the trade between the West and the East and other sections. Grading is more uniform, thanks in part to the plugging inspection system of our market and to the commendable work in this direction which the National Hay Ass'n has been performing. With the better understanding, there is a tendency to do more business. Buyers of the East who send orders to Kansas City were never before so confident as now as to the ability of our market to meet their wants. Similarly, we of Kansas City, despite the distance, are giving the East more attention and are shipping to that section with greater confidence.

MICHIGAN HAY DEALERS.

Following is the program of the Eighteenth Annual Convention of the Michigan Hay & Grain Association to be held at the Hotel Statler, Detroit, on July 15th, 1919:

Forenoon—Assemble in lobby of Hotel.

Afternoon:—

Convention will convene at 2 o'clock in convention room of Hotel, called to order by President Robert Ryon.

Report of Board of Directors by Robert Ryon, President.

Report of Secretary by J. C. Graham, Secretary.

Report of Treasurer by Albert Todd, Treasurer.

Appointment of Committees.

Address—"Our Public Utilities," by U. S. Senator Chas. E. Townsend.

Discussion—Present Grain Marketing and Grading Situation, lead by a Representative of Bureau of Markets, Washington.

8 P. M.—Entertainment at Temple Theatre; Tickets, 75c.

MORE HAY FOR THE TRADE.

By CHAS. D. CARLISLE,
Of Carlisle Commission Co., Kansas City.

Forty thousand cars of hay is the total which now appears in sight for the Kansas City market in the 1919-20 crop year, which opened this month. Such a total will establish new history in volume of business for this market and for the markets of the world, but the character of the harvests realized and still promised should give Kansas City receipts of such volume. And if this market receives that much hay, it will put of silage in the Southwest, which means that the market surplus from the harvests of hay will be increased.

While prairie is reported more or less weedy in Kansas and while some reduction in the area to be cut is claimed, a big crop will be obtained. Very little prairie was plowed up, for the farmers of Kansas appear to have ceased breaking up native sod.

As to the Northwest situation, it is uncertain at this writing. A change in the weather there, which is now too dry, would contribute to the prospective receipts of hay in Kansas City. The quantity of hay to be diverted from this market by continued drouth cannot be determined now. I do not expect the quantity to be taken from Kansas City's receipts—that is, the amount which will go northward or westward instead of coming here will not be heavy, according to present indications.

Kansas City will not be called upon to supply immense quantities of hay and straw to cantonments and remount depots of the army as last year. This demand cut off the receipts here by thousands of cars the past year. Texas promises to prevail as a source of supplies of hay for the camps of the Southwest which are still carrying army horses and mules. We do not expect hay from Texas to reach Kansas City normally, so that demand in the Lone Star State will not affect local receipts.

This market is doing business in hay at pre-war charges to buyers and sellers. We are paying more to do this business, but the market is not charging more to its customers. Surely this should add to the business of Kansas City in hay. I am hopeful that the railroad situation will be handled in a manner which will not keep hay away from Kansas City. The corn crop does not promise to be immense, so with less

HAY CROP CONDITIONS.

BY J. VINING TAYLOR,
Secretary National Hay Association.

We all know that there has been apparently quite a shortage of hay in both the terminal and the shipping markets. Prices have been almost unprecedented, caused by this shortage. I have maintained right along that there was hay in the country, not an abundance, of course, but enough to go around until the new crop was ready for market. My statement and belief in this respect are verified; and I am informed by such markets as Pittsburgh, New York and others that old hay is beginning to arrive in ample quantities for their purposes; in fact, some of the markets are being almost flooded. This is caused by the fact that farmers are now making hay and they are beginning to move the old, rag-tag end of the old crop to make place for this new product.

The new crop bids fair to be a good one in quality but not in quantity. From observation and information received from various sources, we believe that the crop will be at least 25 per cent under normal. This has been caused by the fact that farmers have plowed up their meadows for corn, wheat and oats, and when we stop to

DETROIT'S HUB—THE FINANCIAL AND TRADE CENTER.

In the past year the East suffered frequently from a lack of feed. That was especially the case last winter, when live stock interests made serious complaints. The Southwest itself suffered from lack of feed the past year, and appreciates the difficulties the East reported. Today the Southwest can be counted upon to keep the East amply supplied with alfalfa.

FIRST BID FOR 1920 HAY CONVENTION.

The National Hay Association has already received its first invitation for the 1920 convention, Cincinnati being the first city to offer its hospitality to the hay men through the Cincinnati Grain & Hay Exchange, backed by the invitation of the Mayor of the city, the Cincinnati Chamber of Commerce and the Cincinnati Hotel Men's Ass'n. The latter organization as an inducement states that there will be no increase in hotel rates, and Cincinnati being located centrally and headed by a live bunch of hay men, the city hopes to be chosen as the 1920 convention city. A splendid booster committee will be in attendance at the Detroit convention to talk it up.

St. Louis Wired: "On Monday, June 30, first car new wheat sold at auction at 218; it was heating and low grade. Came from Arkansas."

certainly be in a position to meet the wants of all buyers under peace conditions.

Aside from the hay crop conditions in this territroy, which are favorable on the whole, there are other conditions which prompt the expectation that Kansas City will receive 40,000 cars of hay in the next crop year.

As alfalfa is now the leading hay here, going from Kansas City to practically every state east of the Mississippi River and to other states as well, it will play the biggest part in giving this market a new record. More alfalfa is coming, partly because of the fact that the Southwest, particularly Kansas, Oklahoma and Nebraska, have a wonderful wheat crop this year. The mills of these states will grind more wheat and sell more millfeed at home, thereby permitting larger sales of the hay. While rather unfavorable conditions attended the harvest of the first cutting of alfalfa in Kansas and Oklahoma, weather is now better for the later harvests. The later harvests, incidentally, are usually preferred by the dairy interests, who take so much alfalfa from Kansas City.

Pasture conditions in the Southwest are just the reverse of a year ago. Grass is abundant. There is more pasturage than stock. Texas, a buyer of hay a year ago, is not only selling hay to outside points, but is complaining because it has more grass than cattle. There is also a promise of a great outdemand for cars for moving that grain, the huge wheat crop may not interfere seriously with the shipment of hay to the Kansas City market, and from here to the dozens of states which look to us for supplies of alfalfa, prairie and tame hay.

DETROIT'S CONVENTION COMMITTEE.

The following committees have been appointed to take charge of the local arrangements for the National Hay Association Convention at Detroit on July 16, 17 and 18:

Finance Committee—C. R. Huston, Jno. L. Dexter, Wm. G. Lichtenberg, Wm. Johnson, Harry Botsford, K. P. Kimball, H. B. Simmons, H. J. Mok, G. A. Brown, W. B. Campbell.

Entertainment Committee—J. A. Jossman, Wm. G. Lichtenberg, Richard Pearce, Chester M. Martin, Robert Hughes.

Reception Committee—F. G. Caughey, Chairman; F. W. Blynn, C. M. Carran, H. B. Simmons, R. H. Pearse, Wm. Jossman, A. Dumont, R. Hughes, Chester Martin, Wm. G. Lichtenberg, F. M. Lichtenberg, H. M. Hobart, H. E. Botsford, H. C. Carson, A. E. Lawrence, C. R. Huston, Kenneth Kimball, J. Hewlett, G. A. Brown, Fred Emmons, David E. Stott, Henry Mok, Mr. Scheuren, Ed. Wiggle, Geo. Lange, Chas. Bruce, Wm. Johnson, John L. Dexter, Jas. Gordan, Mr. Lairowe, F. J. Flynn, Gladwin, Mich.; E. W. Aymer, Fairgrove; J. N. McAlister, Cairo; E. H. Recor, St. Clair; James B. Leach, Chesaning; J. Baldwin, New Haven; W. W. Townsend, Brown City; S. O. Downer, Birch Run; Fred Cross, Bad Axe; F. E. McGunegle, Snover; H, D. Jeffords, Marlette; Harry Northway, Owosso; Frank J. Lappin, Saginaw; F. A. Dimond, St. Johns.

think of the price of these commodities we cannot blame the farmer. Hogs have also been extremely high.

The Government has placed its figures for over 100,000,000 tons of hay. We believe that the crop will run between 90 and 100 million tons. It is purely a guess, as there is no way on earth to tell how much hay is in the country, but we have just as much right to our guess as the Government has to its own, both of us being sincere, however.

The approaching Convention is going to be a record-breaker. Our program is interesting, and it will be well worth anybody's time to hear and take part in it. If you do not attend and things do not go as you desire, then you will have nobody to blame but yourself. The purpose of these meetings is to get together, exchange ideas, thresh out our troubles and suggest new plans for the improvement of the business, put it on a higher plane and better basis.

We have had a most wonderful year. Never before in the history of the organization have we been so busy and so successful. The reports to be made at Detroit will verify this statement.

A meeting of the Illinois Grain Dealers Association was held at the Leland Hotel, Springfield, on June 30th, to discuss the handling of the 1919 wheat crop.

Announcement

The growth of our business in the past year, based on the patronage of our customers and friends, made necessary our removal to larger offices, 701-703 Live Stock Exchange Building, Kansas City, Mo. It seems particularly fitting at this time of the year when the new hay crop is moving to thank these customers for their business and to assure them that during the course of another year we hope to show such service that we shall earn your further patronage, results that give just the satisfaction that is mutually desired.

DON'T FORGET that we are well organized and fully equipped to handle either your hay orders for shipments from Kansas City or your consignments to this great market.

DON'T FORGET that we also handle a large tonnage of salvage grain and hold record sales of this commodity.

OUR MOTTO—To extend fair and square treatment to our customers, which practice has caused our business to grow very rapidly; we are glad to say it is still growing.

Your correspondence and orders solicited. Capital and surplus $75,000.

ALFALFA MEAL MAKES GAINS.

By W. B. POINDEXTER.
Of North Bros., Kansas City, Mo.

Alfalfa meal has been the subject of more favorable consideration from feed consumers and feed distributors since the inception of the business of milling alfalfa hay. It is still gaining favor. However, it has not yet approached the volume which its value should create for it so far as production and consumption are concerned. There is room for an increase of thousands of tons in the quantity of alfalfa meal produced and consumed in the United States, and there is no doubt that heavy growth in its consumption will be witnessed in the next few years.

With the upward tendency of freight rates, it is interesting to compare the freight charges which accrue in the shipment of alfalfa hay and alfalfa meal. We handle large quantities of both commodities. Take New York City as an example. The present freight rate on alfalfa hay from Kansas City to New York City is 69.5 cents per 100 pounds, or $13.90 a ton. On alfalfa meal between the same points the freight rate is 41.5 cents per 100 pounds, or $8.30 a ton. This means a difference in favor of alfalfa meal amounting to $5.60 a ton. It is true that the difference is not so great in dollars per ton between points less distant, but a general saving can be effected by transporting meal produced from alfalfa hay to feeding districts instead of moving the unground hay itself.

A comparison of the relative feeding value of alfalfa hay and alfalfa meal reveals points in favor of the latter product. When once ground into meal, alfalfa ceases to lose the leaves of the plant which are so rich in protein. The meal is more digestible.

In the case of dairy herds and other stock fed indoors, it seems desirable to use meal in preference to the hay. A common objection to the feeding of meal itself outdoors is that winds result in blowing and waste of the feed. Probably for this reason the bulk of our sales are now to feed mixers. But, with lower molasses markets, mixing is on the increase, and more alfalfa meal is being sought. It can be handled after being delivered to the feed lot or feeding barns at less expense than alfalfa hay

It is not my desire in pointing out the desirable features of alfalfa meal to prejudice the position of alfalfa hay in commercial channels. We handle great quantities of alfalfa hay and much meal. But it is the duty of the distributor of hay on a market which leads the world in volume of business and in the methods of conducting that trade to point out differences which deserve wider attention.

Kansas City is today the leading hay market of the country, because of alfalfa hay and alfalfa meal. This market sells considerble of that hay for shipment to mills for conversion into meal. This market is growing in the milling of alfalfa into meal, having added thousands of dollars in the amount of the money invested in that industry. A real demand for the meal brought about this enlarged milling capacity. The limit of growth in this field has not, however, been reached. The number of consumers of alfalfa meal is small in comparison with the total of consumers of alfalfa hay. Both hay and meal are gaining and should gain in favor, with meal leading in the forward strides.

Oklahoma Alfalfa.

"Our second crop, which was considerably delayed owing to ravages of army worms, will average about one ton per acre," reported B. M. Huffine of Huffine & Co., of Kansas City, who controls extensive alfalfa land in the vicinity of Frederick, Okla. "The present outlook is bright for an abundance of good quality hay from this cutting. Weather conditions have in the past three weeks been favorable for proper growth and curing of this hay, and unless rains come during the windrow period, much excellent pea-green alfalfa will become available. Oklahoma shippers, who move the bulk of their hay to the South and Southeast, have had more or less complaint over the quality of the hay moving into those sections. The consumers of the Southeast and South, as well as the East, are accustomed to the green hay, while, owing to unfavorable weather, much low grade alfalfa has been shipped."

SOUTHERN ALFALFA AND HOG.

The much discussed advisability of effort to enlarge grain production in the South has often had consideration in these columns; but those disposed to offer advice might just as well make up their minds to gracefully permit the Southern farmer to grow what he pleases. It is well enough and quite proper to intelligently comment on his efforts, but as we have often editorially insisted, the fat or lean character of his pocket book at the end of the year is the best stabilizer of his program the following year.

In considering the hay and alfalfa production of our Southern States, a decidedly different viewpoint is permissible, because hay crops rotate perfectly with other farm products; and in particularly considering alfalfa, we find it runs hand in hand with hogs.

ALFALFA FEED IN SOUTH CAROLINA.

The state of Georgia has come on fast in hog production, having increased the swine population from 1,945,000 on Jan. 1, 1914, to 3,043,000 on Jan. 1, 1919, and is quite credited by the Bureau of Crop Estimates as the seventh state in hog production. And how can a good hog be produced without alfalfa?

The state of Arkansas, considered by many people as way off on the edge of nowhere, can easily disprove this unintentional slight, and we are glad to comment on a recent farming tour, June 5, to June 15, conducted by Prof. P. G. Holden of Chicago, but engineered by H. M. Cottrell, agriculturalist of Little Rock, the Governor of Arkansas and other notables. The members of this tour were looking for information, it being their second annual trip; and they had formerly journeyed through Illinois, Michigan and Indiana, observing everything good in farm and feeding practice, and making suggestions, the good results of which are already apparent. The bankers of Arkansas, like those of other states, overlooking nothing to directly co-operate and assist the farming grain and hay trades. It is not too much to suggest that the Southern states as a whole must be fully recognized in the estimates of those who delight in figuring out to the pound how much pork and grain feed stuffs will be available in the harvest season.

CINCINNATI AS A HAY MARKET.

There is no longer any reason to point out the merits and advantages of Cincinnati as a hay market, or to the expansive progress it has made as a result of the adoption of the hay plugging system, as practically all shippers and buyers in this territory have supported it the past year and are determined, because of the satisfactory results secured, to continue its patrons.

During the crop year now closing more than 15,000 cars were received at the plugging yards, a new high record of receipts. And new high levels reached for timothy and mixed, while shipments to the South and Southeast were the largest ever known to the trade.

Complaint and claims were of less frequency than ever experienced by the members of the trade, to whom it becomes a source of keen gratification to transmit to friends and patrons in attendance at the National Hay Association convention the message of success won, of confidence redeemed, and things accomplished the past year, with appreciation of their business and renewed assurances of the same fairness and integrity which reflects the policies upon which the hay business of Cincinnati is based.

MOST IMPORTANT HAY YEAR.

By DAN TILSON,
With Dyer & Co., Kansas City, Mo.

Our perspective in the center of the hour glass, midway oetwee nthe Great Plains of the West and the densely populated country of the East, sometimes gives us an insight into general hay trade affairs that is at least interesting.

The events of the past year, nationally and locally, with their important bearing on trade generally, carried particular significance for handlers of feedstuffs. It occurs to us that one of the most important angles of the present reconstruction period and the anticipated early return of the railroads to private hands, is the question of transportation. The late J. E. Dyer, as chairman of the transportation committee of the Kansas City Hay Dealers' Association for several terms, was widely credited by his associates and the hay trade generally with a keen perception of the first importance of equitably adjusting transportation problems if hay shippers and hay buyers were to receive their rights.

The proportional rate case, fully written for and published in THE PRICE CURRENT-GRAIN REPORTER last year was one of the notable cases conducted by Mr. Dyer. He was instrumental in saving the hay trade time and money through the successful prosecution of transportation matters.

We have quite naturally continued his work; and all members of the Kansas City trade are continually alert in behalf of their country hay shipping and buying friends who have recently made special pleas for the reduction in demurrage charges, fully co-operating with the Railroad Administration to obtain the maximum service of every car. Hay producers are not usually delayed in loading because baled hay is always waiting for cars that have been ordered, and we believe the new provision will prove quite satisfactory in the changed demurrage tariffs. We want you to know about these things, and Kansas City, with many large hay dealers and transportation specialists invites our friends and customers to submit their problems which we can quite likely help to adjust quicker than otherwise possible.

THE HAY CROP PROMISE.

The June 1 Crop Report puts the condition of all hay at 94.1, compared with 94.3 on May 1 and 89 on June 1, 1918, 85 on June 1, 1917; 90.7 on June 1, 1916, 89.6 on June 1, 1915, and an average for 1910-1914 of 86.1, so that the outlook is for the best crop in a number of years.

Acreage and estimated production of all hay is reported as follows (1919 being forecast on condition of June 1): 1919; 115,907,000; 1918, 90,443,000; 1917, 98,439,000; 1916, 110,992,000; 1915, 107,263,000; average 1910-14, 81,640,000.

Acreage and condition on June 1 of clover and alfalfa estimated as follows (1919 preliminary, others being final estimates):

	Clover.		Alfalfa.	
	Acres.	Cond.	Acres.	Cond.
1919.....	6,659,000	92.8	8,224,000	96.9
1918.....	7,125,000	92.9	7,856,000	89.3
1917.....	7,609,000	82.2	6,362,000	89.5
1916.....	8,617,000	91.1	.....	86.5
1915.....	8,163,000	86.7	.....	95.4
Av.1910-14		82.8	.....	93.2

Following is the forecast by states of tons of all hay on basis of condition on June 1, 1919, and acreage and condition of clover and alfalfa on June 1, 1919, by states:

State.	All Hay Forecast 1919 from condition. Tons.	Clover—Acreage. 1919. Acres.	Clover—Condition June 1, 1919. Pct.	Alfalfa—Acreage. 1919. Acres.	Alfalfa—Condition June 1, 1919. Pct.

A LEAVENWORTH FIRM.

Geo. Legler of the Wilson-Legler Hay & Grain Co., Leavenworth, Kans., on a trip last week to Kansas City was interviewed on the situation in his locality. He is very optimistic of a satisfactory movement, providing suitable car supplies are available, and feels that it should be a very profitable year all around. He is well posted, as the firm operates extensively in grain, hay, feeds and mill products. They are members of the National Hay Association and the Kansas City Hay Dealers' Association, and with increased facilities now being added to the present plant equipment are planning this year an even broader business with outside markets and distant trade.

The inspection charge on wheat and rye has been raised at Toledo, O., to $1.75 per car, the charge on corn and oats will be $1.50.

ANNOUNCEMENT

Continually striving to strengthen our facilities for serving YOU, we announce the completion of a large capacity alfalfa milling plant in Kansas City, and the erection of new warehouses. Our warehouse in Kansas City has been doubled, and similar increases have been made at Cozad, Darr and Willow Island, in Nebraska, at Inola, in Oklahoma, and at Faulkner, in Kansas.

The increases in our hay and alfalfa meal handling facilities are, of course, the result of our broadened trade—proof of the appreciation the entire industry holds of our services. It is trade developed on a basis of "treat your customers as you would like to be treated." We solicit your continued patronage.

BIGGEST AND BEST IN HAY

Kansas City is the world's largest hay market.

Kansas City possesses the best facilities for buying and selling hay.

Kansas City reaches the greatest supply and the greatest consuming areas in the country.

Kansas City received 32,200 to 36,000 cars of hay in the last two crop years. Conditions this season justify the prediction that we will handle 40,000 cars in the new crop year just begun.

The Carlisle Commission Co. has unequaled facilities and organization for buying and selling hay in Kansas City.

OMAHA'S HAY SEASON FOR 1918-19.

BY ED. P. PALMER,
Mngr. Dyer & Co., Omaha, Nebr.

The most successful year of Omaha's hay history has just been concluded. The volume of hay handled by Omaha hay merchants has steadily increased since the advent of the Omaha Hay Exchange, a body which was organized and incorporated in 1916 with the sole purpose in mind of furthering and assisting the hay trade in Omaha's producing and consuming territory. Its purpose, like that of the Kansas City Hay Dealers' Association and the National Hay Association, is to inculcate uniform trading rules and principles.

It has been well demonstrated that this organization, like any other organization with the right ideas, improves and creates better business understandings. Greater confidence in individual members has been instilled, not only among the local dealers themselves but with the buying, selling and shipping element tributary to this market.

So, as it has been said, Omaha has just completed its most successful hay year. Receipts have increased and the business has been handled more expeditiously than ever before.

The features of the hay trade of this section have been numerous. The season opened with a drouth in the immediate vicinity of Omaha which started in April and continued through May and June, so that Omaha's market has been to quite an extent a local proposition. This does not mean, however, that Omaha merchants have not reached out and sought the more distant consuming territory. Nebraska prairie was introduced into Texas, Arkansas, Louisiana and Mississippi and alfalfa originated by Omaha merchants has been shipped to practically every state east of the Missouri River.

Prices started high and remained high, reaching their zenith in April, at which time a large volume of the receipts of the Omaha market were from Wisconsin, Minnesota and from sections normally tributary to Chicago, Minneapolis and Milwaukee. Top notch sales in Omaha were $46 for alfalfa and $43 for prairie and it is to the credit of the Omaha dealers that despite virtual famine conditions throughout the central west, all those feeders and dealers who depended upon Omaha for their hay supply and the Omaha dealers to secure the same for them were rarely disappointed and that they could secure supplies at all times.

The agency which has gone further in helping Omaha as a hay market outside of the live wire merchants is the fact that the plugging system is in vogue on this market and the writer has been informed through inquiry of other local dealers who are shippers of hay that the percentage of rejections under the present system of plugging as compared to the rejections formerly experienced before the plugging system was in vogue has been cut down to an almost negligible quantity. Of course, rejections are still experienced by Omaha shippers but the usual cause of rejection is not the quality of the hay shipped but because of a market change which makes it advantageous for the buyer to reject or the attitude assumed by many purchasers of hay that a rejection will result in a cut in price and therefore a monetary saving.

Omaha enjoys excellent reconsigning privileges and the railroads insofar as it is possible are co-operating with the local merchants in an effort to build up the Omaha market and steps are being taken to further augment the excellent facilities. For instance, one railroad in Omaha now with a capacity of twenty cars of hay per day on its hay track, has applied to the Railway Administration for the privilege of building additional trackage adjacent to accommodate sixty cars additional so that it is well understood and authoritatively prophesied that Omaha as a hay market is just in the beginning and its ultimate will be second to none.

Now, with regard to the territory from which Omaha has drawn its hay supply. Nebraska naturally has furnished the large volume both in prairie and alfalfa, but from Wyoming, South Dakota, Iowa, Minnesota, Wisconsin, Michigan, Illinois, Missouri, Kansas, Oklahoma, Colorado, Idaho, Montana and Utah has come volume of forage. The prospects for the coming year are excellent and it seems to the writer that the Omaha hay merchants should be in better position to take care of customers in Iowa, Missouri, Illinois, Wisconsin, Minnesota, etc., than ever before. Reaching westward for the hay and eastward for the consuming territory, the merchants of Omaha are demonstrating the fact that they have grown beyond a local consideration of the hay business and have put it upon a national basis.

OMAHA HAY MERCHANTS GOING FAR FOR HAY.

Merchants on the Omaha market have without exception enjoyed a prosperous year during the one just ended. Because of the drought which prevailed

J. HYLAND,
President, Omaha Hay Exchange.

in the country south of the Platte River during the growing season last year, Omaha merchants were called upon to meet the demand for hay in that section. In normal years the demand for forage in that section is not great, but Omaha merchants were able to supply the demand. In order to do so however it was necessary for them to go to distant states for the supply. Hundreds of cars of prairie grass were purchased in Wisconsin and Minnesota and shipped into Nebraska. And because of the abnormally high prices for wild grass hay, Omaha merchants were enabled to sell timothy hay in considerable quantities. Ordinarily there is but little demand for Timothy at Omaha proper, although no small amount of it is bought and sold by Omaha dealers and not passed through the market.

In common with other markets, prices during the past year were extremely high, prairie hay selling well above $40.00 per ton for a considerable period. This unprecedented price was merely the result of the law of supply and demand. With a 65 to 75 per cent normal prairie crop to move and an abnormal demand it was quite natural that prices would soar. The Government moved thousands of tons to army camps while the South Platte section took an unusual amount of hay for feed.

Alfalfa too moved in great quantities from Wyoming, Idaho and Utah to this market and was distributed to consuming territory locally and to eastern states. Nebraska ranks near the top in alfalfa production, yet with high prices prevailing it is possible and profitable to move irrigated hay through the market.

Omaha enjoys the plugging system of hay inspection. This department is under the efficient supervision of J. C. Pederson as chief inspector. Mr. Pederson's years of experience, good judgment and honesty of purpose assure patrons of the market a square deal.

GEO. BRIDGE O.K.S NAT'L ASS'N.

No particular commendation from individuals or markets is necessary to commend the National Hay Ass'n for the excellent results secured in its activities. It may not be uninteresting, however, to those in the hay trade who have not personally met Geo. Bridge to quote him in a recent interview in which he stated that the membership of the Nat'l Hay Ass'n in the United States and Canada backed him up in the strenuous activities and enormous hay purchases incident to his use of service during the war as Chief of the Forage Division of the United States army. THE PRICE CURRENT-GRAIN REPORTER during that time commented frequently on various aspects of his work, and as to minor details suggested improvements, but always approving in general the scope of the work undertaken. Mr. Bridge unhesitatingly endorsed the official efforts of the Nat'l Hay Ass'n, encouraging as it did the individual operators, comprising the great hay-handling fraternity of our country, to work closely with the Government. They did so and there was plenty of hay for horses and mules at remount stations here and ample recompressed supplies for shipment to our allies and our remount stations abroad.

CHICAGO HAY MARKET BRISK; THE OUTLOOK.

The new arrivals on the Chicago hay market on July 7 were 134 cars, of which 130 cars were of timothy and 4 of prairie. This of course looks large, but when it is considered that this takes in three days' run it is only an average of about 45 cars per day, which are very light receipts for the Chicago market. Even with the heavy receipts there was quite active buying, not only for local consumption but on shipping orders. All of the better grades sold while there were quite a number of cars held over, mostly of the medium and low grades. It is believed, however, that even the lower grades will show improvement within the next few days.

Chicago's receipts from different sections of the country would indicate that hay cutting is now in full swing and any unbaled hay that still remains in the farmers' hands is being covered up. If the reports the trade are receiving from all over the country are anywhere near reliable, we should see old timothy hay quite a scarce article before this month is over. It is the opinion of well-posted operators that prices on old hay are possibly as low right now as they will be any time again this month. They believe it is a very good time to stock up, for, as all know, old hay will be needed for some time, and it will be six weeks before the new hay will be in condition to ship any distance with safety.

As to the new crop, we have been asked a good many times as to the prices we thought the new hay would start off at. This, of course, is a question that it is impossible to answer intelligently. The opinion of many, however, is that new hay will start off high, for several reasons: Farmers, in the first place, will not sell unless they can get a satisfactory price for labor, and car shortage is quite likely to interfere with the preparation and movement of hay to the markets. This is anticipated by small country hay shippers and bolsters up their idea of values.

As every one knows, the new crop i reported to be very large, and we be lieve in most sections of the countr this is the case. From the informatio we have been able to gather, howeve we find that the bulk of the hay thi season is clover and clover mixed, i dicating that a good deal of this ha will be fed on the farm. This no doul has been brought about by the hig prices being paid for cattle. Th farmer prefers at all times to fatte his stock on clover and clover mixe rather than on timothy.

We also find that there is quite shortage of hay in the West. It a pears that while in this section of th country we have had an abundanc and in some cases an over-abundance, o rain, throughout sections of the Wes they have had practically no rai Crops as a consequence being very ligh No doubt there are other sections of th country that will have to ship in ha With high prices prevailing on prac tically every other commodity raised b the farmer, we are inclined to believ that we will see hay selling conside ably higher than some would now tr to make us believe. Recent issues o THE PRICE CURRENT-GRAIN REPORTER, re ferring to changing market condition of which the above is a resume, hav also referred to the market tendenc among Chicago hay dealers to eve more extensively handle a shippin business. The market, with its heav teaming and other hay-consuming po ulation, not only in the city proper bu within a radius of 100 miles, may no have taken legitimate advantage of th shipping opportunities offered. It i expected in the future to find this si uation vitally changed, because Chi cago hay dealers are on their toes so liciting dealer, feeder and dairy bus ness everywhere, from New England t Tampa and all intermediate points.

WEST CENTRAL KANSAS ALFALFA.

By H. J. WILCOX,
Mgr., Dodge City Alfalfa Mlg., Elvr. & Supply Co.

A bountiful supply of moisture thi spring started the alfalfa off with rush, and the first cutting from thi part of the state made a good yiel all of which, however, was or will b used locally, owing to the unusua shortage of feed, this last winter. N 2 alfalfa hay, bought by the bale, is i some instances bringing as high a $50 per ton.

Directly the first crop was cut th army worms began working on th new crop and completely ruined it. I is extremely doubtful if there be a other crop here this year, surely not second or third. There will not b ten tons of alfalfa hay ground in For Edwards and Hodgeman Counties com bined this year.

There is quite a little prairi hay this year and the pastures ar good so that there will in all probabi ity not be a great deal shipped in; fo with the oats, barley and other feed that have been mowed for hay sinc the alfalfa failed there will be su ficient to carry the farmers thru til next winter, barring a repetition of th calamity we have just had. But it i going to be all that they can do to ge thru with buying outside and there wil be none for shipping.

C. D. WILLIAMS GRAIN CO.

The C. D. Williams Grain Co., 70 703 Live Stock Exchange, Kansas City Mo., is one of the many good concern on the market that has shown particu lar growth in recent months. Mr. Wi liams has been identified with the loca trade for many years and A. C. Boye acquired an interest in the business on year ago; and these men with a wel balanced and efficient office and fiel force are doing things. They are gi ing in addition to the usual service o hay shipments and receipts consider able attention to salvage grain. Th latter business has come into legiti

mate prominence through the natural desire of feeders to secure satisfactory feed for their stock, sheep, horses and mules for less money than the full grain has earned during the present period of high prices. Its use with a proper tonnage of forage for dairymen or feeders is widely recognized among private and agricultural trade and is meeting the approval of grange and university experts throughout the entire country. It is interesting in this connection to consider the advance made by Pacific Coast and Inter-mountain handlers who long ago learned that grinding barley produced better feed than when offered whole to the stock. The ground grain or salvage grain that is high in moisture content is quite naturally assimilated and shows greater meat, sinew, bone or milk producing results than otherwise.

ALFALFA MEAL AS A FEEDING STUFF.[1]

Alfalfa, fresh and cured, has come to be one of the very important feeding stuffs in this country. Like other leguminous crops it has a higher percentage of protein on an average than the grasses and similar fodders. Alfalfa may be cut several times in a season. It is said that late cutting makes the best hay for horses, but that for pigs and cows the plant should be cut early. It has been suggested that grinding the cured alfalfa would prove an advantage in feeding, since the alfalfa meal could be mixed with more concentrated feeds to form a balanced ration which could be very conveniently handled and stored.

The average percentage composition of samples of alfalfa meal designed for poultry feed and analyzed at the California Experiment Station was water 10.9, protein 17.2, fat 1.6, nitrogen-free extract 36.4, crude fiber 26.3, and ash 7.6 per cent. As shown by the average of a number of analyses, the composition of alfalfa hay is water 8.4, protein 14.3, fat 2.2, nitrogen-free extract 42.7, crude fiber 25.0, and ash 7.4 per cent.

It will be seen that the meal and hay have practically the same composition, the differences in the average values quoted being no greater than might be expected in different samples of either material. This uniformity in composition is to be expected, because the grinding process alone would neither add to nor take away from the amount or proportion of nutrients present, though it might increase the digestibility of the material somewhat.

The feeding value of alfalfa meal and cut or chopped alfalfa hay was tested at the Nebraska Experiment Station with eight lots of seven pigs, averaging not far from 85 pounds each. Both the alfalfa meal and the chopped hay were prepared at the station, the meal by running the hay through a grinder and the chopped material by cutting the hay into one-half-inch lengths with a silage cutter. The test was planned so that corn meal with chopped alfalfa and corn meal with ground alfalfa hay were compared with mixtures of corn and bran and corn and shorts and with corn meal alone. Some of the mixed rations were made up of 3 parts of corn to 1 part of the other products, and others half and half. For convenience, ground corn was used with the cut or ground alfalfa hay, and the ration was moistened with water before feeding. "This prevented the feed from being blown by the wind and induced the pigs to eat up the alfalfa better than they would otherwise have done."

In the twelve weeks covered by the test the average daily gain per pig ranged from 0.8 pound with the lot fed corn and bran 3:1 to 1.096 pounds with the lot fed corn and shorts 3:1. Almost as large gains, namely, 1.071 and 1.062 pounds were made, respectively, by the lots fed corn and cut alfalfa hay 3:1 and corn and ground alfalfa hay 3:1. The gains made on corn and cut alfalfa hay and corn and ground alfalfa hay half and half were respectively 0.922 and 0.888 pound per head per day. The smallest amount of feed per pound of gain (4.66 pounds) was noted with the lot fed corn and shorts 3:1, and the largest amount (5.89 pounds) with the lot of fed corn and bran 3:1. With the corn and alfalfa rations 3:1 the average amount was 4.8 pounds, and with the corn and alfalfa rations half and half 5.5 pounds. The cost of a pound of gain ranged from 2.62 cents with the lot fed corn and cut alfalfa hay 3:1 to 3.96 cents with the lot fed corn and ground alfalfa hay half and half. The cut alfalfa hay was rated at $8 per ton and the ground alfalfa at $16 per ton.

According to E. A. Burnett and H. R. Smith, who made the test—

> The price of alfalfa allows liberally for the cost of running the hay through a silage cutter, but may be too low to pay the cost of grinding. * * *
>
> The largest daily gains were made on three-fourths corn and one-fourth shorts, but a gain practically equivalent was made at a lower cost where either cut or ground alfalfa was substituted for shorts in the ration. The cheapest gains were made on corn and cut alfalfa.
>
> Bran did not prove equal to either shorts or alfalfa when fed as one-quarter of the ration to pigs.
>
> A ration three-fourths corn and one-fourth alfalfa produces greater gains than when one-half alfalfa is fed. Where alfalfa is raised on the farm, and when there is no particular need to hasten growth in the pigs, a ration one-half alfalfa hay and one-half corn may give cheaper gains than when a heavier corn ration is fed.
>
> Hogs which have been raised largely on alfalfa pasture will learn to eat the hay in winter without cutting with a machine and to depend largely upon it where only a limited grain ration is fed, but a ration wholly alfalfa does not seem to give economical results.

The value of ground alfalfa hay was further tested with two lots of twenty-two young brood sows averaging not over 150 pounds each in weight. In eight weeks the lot fed ground alfalfa and corn 1:1 made an average daily gain of 0.98 pound per head, and the lot fed ground alfalfa and barley in the same proportion 0.84 pound. "Both these lots made fine gains and at farrowing time produced large, strong litters, showing that the ration had been nearly ideal as a ration for brood sows."

In another test a lot of thirteen mature brood sows averaging 258 pounds each in weight was fed a ration of 2 pounds of corn and 6 pounds of cut alfalfa hay. At the end of five weeks the average weight of the sows was 264 pounds each.

> As their weight one week earlier was a little less than the original weight, it may be assumed that these hogs got an extra good fill before the last weight and that the ration fed was practically a maintenance ration. These sows commenced to drop litters after the fifth week, so that records could not be kept after that time. [They] * * * kept in fine condition, farrowing during February and March and saved large litters in every case. They were fed a ration one-half corn or barley and one-half alfalfa while suckling pigs.

These several tests, which included a total of 113 pigs, Professors Burnett and Smith believe give excellent proof of the high nutritive value of alfalfa hay supplemented by a small corn ration.

I. D. Graham, in a report prepared for the Bureau of Animal Industry of this Department, states that recently a number of factories equipped with more or less expensive machinery have engaged in the manufacture of alfalfa meal on a commercial scale.

> In order to accomplish this, it is necessary that the hay be kiln dried, and even then it is ground at the expense of great power. Hay, as ordinarily made, is not suitable for the manufacture of alfalfa meal, because it contains too much moisture, which renders it exceedingly difficult to grind and more liable to spoil. * * * The commercial article is made from selected alfalfa and mixed with sugar-beet molasses in the proportion of 75 per cent alfalfa and 25 per cent molasses. The product contains from 15 to 17 per cent of protein and about 50 per cent of carbohydrates and fat. It is being used by numerous feeders in the preparation of their show animals of different breeds.

In the report cited no mention is made of alfalfa meal which does not contain molasses, but apparently such a product is marketed since judging by analysis the samples examined at the California Experiment Station consisted of the ground alfalfa alone.

Alfalfa in its green state or when cured as hay or silage is a very satisfactory poultry feed. The poultry journals have recently made frequent mention of the use of alfalfa meal as a part of the ration. Regarding the value of cured and dried alfalfa for poultry, the Bureau of Animal Industry report, cited above, contains the following statements:

> Poultry will feed voraciously on the dry leaves of the alfalfa plant when they have access to it, and much of the fine material shattered off from the hay in the haymow may be used to great advantage in feeding them. As this shattered material is mostly leaves, it is the best part of the plant and can be fed alone or mixed with other feed. The nitrogeneous element of alfalfa is just what is needed for the development of the young fowls, as well as for the production of eggs, and a number of so-called poultry foods are said to be composed in part of ground alfalfa. It is best for poultry to use the last cutting of alfalfa, as it is softer in texture, has a larger proportion of leaves, less woody matter, and is more succulent than any other cutting. While poultry of all classes will eat alfalfa hay, or at least the leaves from it and thrive, it is undoubtedly a better practice to chop it or grind it and mix it with a grain ration. A good practice is to steep the alfalfa hay in hot water and let it stand for several hours before feeding. If this is done and the grain ration mixed with it, the effect is practically the same as though the birds were fed on the green alfalfa. Corn meal and ground alfalfa, steeped in hot water or steamed to soften it, makes an ideal balanced ration for winter poultry feed.

The data summarized furnish additional proof, if such be needed, of the high feeding value of cured alfalfa. Whether or not the advantages which attend the use of the ground material will compensate for the cost of grinding is a question which each feeder must decide for himself.

[1]Compiled from California Sta. Bul. 164; Nebraska Sta. Press Bul. 20; U. S. Dept. Agr., Bureau of Animal Industry Rpt. 1904, p. 242.

NEW YORK HAY MARKET.

The New York Hay Exchange official report of the market last week said:

The very weak situation noted at the time of our last report has developed into utter demoralization and further very sharp break in prices. Offerings of hay at all harbor points are beyond any possible outlet at the moment and amount of hay rolling shows a marked increase. In addition to rail receipts a canal boat arrived last Saturday, and five or six more are now due holding a large quantity of hay. Receipts of Canadian hay have been a particularly disturbing element in the market, a great deal of the boat hay being from Canada besides liberal quantities by rail; and this is the more surprising in that practically all advices received for some time past had indicated a very general clean-up in Canada. This was also true in New York state, and the amount of hay coming from up-state points or offerings for shipment is very surprising. The 33rd street shed of the N. Y. Central R. R., and Brooklyn Eastern District Terminal are still embargoed. The proportion of top qualities continues very light but the low grades are in excessive supply and working out at all sorts of prices, often without any regard for grading.

At 33rd street shed some 61 cars had been unloaded from Saturday to Wednesday noon, there is an accumulation of 70 cars unsold, and with trade very slow market is very weak and irregular and values not at all well defined. In Brooklyn top grade timothy hay holds fairly steady at the decline but there is a large surplus of low grade and trashy hay which is pressed for sale at any reasonable offer.

Scarcity of No. 1 timothy hay arriving and its value is uncertain. It would probably sell in range of $41@42 at 33rd street, possibly a car or two might be worked out even higher, and up to $43 is still realized in Brooklyn. No. 2 hay is selling largely in range of $38 @39 though occasional cars are reported sold up to $40. No. 3 and shipping in big bales have declined to about the ranges given with our outside quotations, generally regarded as extreme. Small baled hay in very heavy supply and, leaving No. 1 and top No. 2, the market is dull, uncertain and very irregular. A considerable quantity of clover mixed hay has arrived and this is not wanted. No grade hay, including practically every kind of poor, trashy, coarse and weedy hay, is begging for sale, some business being reported as low as $15.

Rye straw slow at $12@13, and some recent business in oat straw is reported down to $10.

THE HAY BROKER IN THE SOUTH.

If there is any class on whom more responsibility is placed than is accorded the hay broker in Southern markets we do not know of it. They have entrance into the private offices of enormous concerns, wholesale growers, individual stores, industries exceeding in their local importance any comparative line of business that we know of in the North. It has furthermore been our frequent privilege when in the office of our Southern friends to see the boys take the telephone receiver off the hook and call up three or four brokers to get their market opinions, on which he would determine the place, from which to buy his next "jag" of hay, as they say.

This angle of the hay broker's activities, about which he naturally does not brag, is but little known to many large hay shippers who have never seen their broker in action and simply judge his ability by his account of sales. These brokers are not wide travellers because they must be on the job continuously day and night, and it is a rare exception to find one away on a vacation. His business is his own and he tends to it with rigorous observance of the interests of both parties represented. His business is under his hat and in his roll-top, and a speaking acquaintance with every hay market in the country is his stock in trade.

Editorially speaking, we should like to see a little closer working arrangement between hay shippers and their brokers. They should know each other personally because the hay business is one giving more than ordinary value to its honorable side to the broker, and in the adjustment of claims the brokers' good offices are highly desirable to the hay shipper and these will be better handled if you know your man.

CINCINNATI: CONVENTION CITY

Cincinnati's attractiveness as a convention city perhaps is best evidenced by the fact that from 150 to 200 organizations choose this city every year as a place for holding their annual conventions.

One of the leading elements entering into the popularity of Cincinnati as a convention city is the unbounded hospitality extended by the citizens generally. Every visitor is treated as an individual guest of every citizen with whom he may come in contact, the proverbial kindness to the "stranger within our gates" being exemplified to the fullest extent.

Cincinnati's geographical location is another feature in its favor. The greater portion of the population of the United States is located within a day's journey of Cincinnati, the center of population of the country being less than 100 miles from this city. Unsurpassed hotel facilities add to Cincinnati's prestige as a convention city. Under no circumstances are rates advanced for conventions, the usual commercial tariffs being standard to all delegates attending meetings.

In the way of special attractions Cincinnati offers an unlimited number and variety. The leading theatrical and musical attractions of the world are seen at its theatres and halls. Its recreation resorts include cool amusement parks on the river and among the beautiful hills surrounding the city; silver sand bathing beaches; attractive woodland taverns and inns; thousands of acres of lovely parks, in which band concerts are given during the summer months; the famous Zoological Gardens, as complete as any in the world; professional and amateur baseball; horse races in season and many other outdoor attractions.

ALFALFA hay should be bought on a protein basis, the only true indication of its feeding value, and when properly bought, alfalfa more than compensates its cost through increasing milk, beef and sinew. We are in position to show you a considerable saving in your purchases, not only of alfalfa but of all kinds of hay.

GRAIN SCALE BOOK

Form 223 is an indexed receiving book designed to meet the requirements of the grain dealer who wants something a little better than the ordinary. Separate pages are given to each farmer, and all are indexed so that their accounts may be instantly located. If so desired, it can be used as a grain journal, the two L. F. columns allowing a posting of both debits and credits and entering the numbers of the ledger pages. The book contains 240 numbered pages of high grade heavy linen ledger paper, each page ruled for 41 wagon loads, and a 28 page alphabetical index in front. Size 10¼x15¾. This book is bound in heavy red leather back and corners with black cloth sides and its name, "Grain Scale Book," is stamped in gold leaf on the front cover. Order Form 223. Price $2.75. Book weighs 4½ pounds.

Mr. Hay and Feed Dealer,
Mr. Consumer and Dairyman,
Mr. Broker,
Mr. Wholesale Grocer,

Dear Sir:

We hope in this informal trade letter to indicate something of the enormous hay tonnage and wide varieties of grades available in the Chicago market to buyers throughout the East, South and Southwest. Furthermore, Chicago being the largest railway center in the world, naturally offers hay buyers advantages in favorable rates on incoming hay from Nebraska, Iowa, Minnesota, the Dakotas, Michigan, Indiana, Ohio and Wisconsin, with through rates to all southern points.

Added to these natural advantages the Chicago market offers the intelligent service of hay merchants who have given a lifetime to the business and understand your most exacting requirements and can ship exactly the grade of hay desired on contract specifications.

It occurs to us that the enormous purchases of the tradesmen, to whom this letter is addressed, will be protected through dependable hay shipping connections in Chicago, from whom offers may be regularly received and to whom you may look for advice on the probable trend of prices.

We are here for such service--please command us.

Very truly yours,
ALBERT MILLER & CO.,
John H. Devlin,
Manager Hay Department.

Cincinnati is the home of the internationally recognized Cincinnati Symphony Orchestra, of which Eugene Ysaye, the noted Belgian violinist, is the conductor; possesses one of the finest art museums in America; boasts of the Rookwood Pottery, where the most artistic pottery in America is made; owns its University of Cincinnati and possesses a school system unsurpassed anywhere.

In a word, where hospitality, accommodations, convenience, attractions, and the general accommodations of conventions are concerned, no city in America offers better facilities for visitors, or is more gracious in its welcome and entertainment.

USES OF ALFALFA.

The best crops for the farm are those which have a good market value or a high feeding value and that are not too exhaustive of the soil fertility. Alfalfa fills these qualifications more nearly than any other forage or farm crop. It has a wide adaptation in its use as well as its growth.

Alfalfa Feed—As a a forage crop alfalfa is unexcelled. It is the most productive forage crop, high in protein, palatable, nutritious, and can be fed to all kinds of live stock. The dairyman finds it the best forage on the farm, the hogman the best pasture, while chickens relish it and horses thrive on it.

The table below shows that alfalfa contains almost the same amount of digestible nutrients per 2,000 pounds of dry matter as 2,000 pounds of bran. Of the various legume forage crops it is exceeded only by vetch in digestible nutrients.

COMPARISON OF THE FEEDING VALUE* OF DIFFERENT FORAGE CROPS IN TERMS OF DIGESTIBLE NUTRIENTS AND FERTILIZING CONSTITUENTS** PER 2,000 POUNDS DRY FORAGE.

		Digestible Nutrients —Per 2,000 Pounds.—			Fertilizing Constituents —Per 2,000 Pounds.—		
Crop.	Dry Matter Pounds.	Protein Pounds.	Carbohydrates. Pounds.	Fat Pounds.	Nitrogen Pounds.	Phosphoric acid Pounds.	Potash Pounds.

* From Henry, W. A., 1910, Feeds and Feeding, p. 585-586.
** From Van Slyke, L. L., 1912, Fertilizers and Crops, p. 720.

Alfalfa Hay—Alfalfa hay is becoming widely recognized on the hay market as a very desirable forage crop and is today replacing much timothy and red top. This is particularly true for the dairies located around the cities. Some of the liverymen and others feeding horses are likewise feeding alfalfa as part of their feed instead of timothy or other grass. As its value becomes more definitely known, alfalfa hay is bound to increase in its use by the consumer located in the city. For the farmer it can furnish all his forage if necessary, and he will find it the most economical forage, when he raises it successfully on his farm.

Alfalfa Meal—By grinding the alfalfa hay into meal it can be more easily shipped to the eastern market, and it allows less loss or waste in shipping and feeding. The cost of freight and warehouse charges also are less for the meal. This product is put on the market as ground meal, or sometimes it is mixed with a concentrate such as molasses, or with some ground grain such as corn meal or wheat bran.

Alfalfa contains no more nutrient when ground than before, and grinding should be considered a desirable practice only when it facilitates shipping or when needed in a special form for poultry or other stock. It is valuable to give bulk to a dairy ration. The market price of alfalfa meal is usually one-fifth above that of alfalfa hay.

Alfalfa as a Dairy Feed—Most dairymen find the feed they must purchase, in order to furnish sufficient protein in the ration, one of the heaviest expenses in the feed bill. The protein feeds are the most difficult to raise on the farm and consequently the dairyman more frequently buys a high-protein concentrate to balance the low-protein forage. These high-priced concentrates, to a large extent, may be replaced by alfalfa.

It is evident from experiments of the Station that alfalfa is not only a high-class forage, but can, in a large measure, replace costly concentrates. At the Illinois Station 8 pounds of alfalfa replaced 8 pounds of bran and produced just as much milk as a bran ration. At the New Jersey Station alfalfa replaced bran and dried brewers' grains, while at Ohio it replaced the cottonseed meal and bran.

In 1914 the amount of grain purchased per cow was 1¼ tons, valued at $38.66, for 160 herds in Sussex County, N. J. At the 1917-18 cost of feeds, this would be about $70 per cow. New Jersey has about 155,000 milk cows. If all farmers purchased the same amount of feed under present conditions, the cost would be approximately $10,000,000. Much of the heavy feed bill of the dairymen would be curtailed if good alfalfa were raised. Thus we can readily see that alfalfa makes a much more economical ration since the cost of the protein feed in the form of alfalfa will not be so high as when purchased in the form of the high-priced concentrates. Besires, a farmer is more likely to use an alfalfa ration in such a way that the cattle will receive an ample supply of protein so as to make the ration the most productive.

At the present time on most of the large dairy farms throughout New Jersey a considerable acreage of alfalfa is being raised. On some of these farms the success of the dairy depends to a large extent upon the success of the alfalfa crop in furnishing a cheap forage high in digestible nutrients, and possessing plenty of protein.

Alfalfa for Hogs—While alfalfa is most commonly used for pasturing hogs, the hay can also be cut and used as a maintenance ration for the brood sows throughout the winter. Frequently it is desirable to pasture lightly and mow the crop for hay; this will keep the alfalfa pasture in better condition and also produce a larger amount of roughage. For the man who is raising hogs on a large scale, it is almost essential that he should use pasture and forage in order to bring about an economical production. Consequently, alfalfa and corn are the most profitable crops to raise in combination with hogs.—*Bulletin No.* 15, *N. J. Dept. Agr.*

ON CLOVER HAY.

We are talking now about real clover hay, hay made from clover cut when not more than half of the heads have turned brown. The making of real clover hay is a fine art, for it must be done about the third week in June, and in some seasons even earlier, just at the time of year rain is more likely to fall than at any other season. Moreover, the clover, when in full bloom, is about 75 per cent water, as compared with perhaps 55 per cent in clover which is cut at the same time as timothy, in July, when all the heads have turned brown.

The problem in curing hay is to get rid of surplus water. In the case of clover, for each ton of cured hay we put in the mow or stack, we must first get rid of about two and a half tons of water. If the hay cures slowly this excess of water finds its way thru the pores of the leaves. When hay is cured in this way, the leaves retain their natural color and are not nearly so likely to powder up and shatter. . .

The curing of alfalfa presents almost exactly the same problems as the curing of clover, except that alfalfa is best cut when about one-tenth of the heads are in bloom, or when the new shoots are just starting out from the crown. Alfalfa is just about as easy to cure as clover. In the case of both, the supreme thing to keep in mind is to handle in such a way that the leaves will not become dry and shatter off, and at the same time get rid of enough moisture so that there will not be more than 30 per cent moisture in the cured hay as it is put in the barn. The old-fashioned method of judging this is to twist the hay; as long as juice is squeezed out on the stems, it is too green.—*Wallace's Farmer.*

NORTHWESTERN HAY TRADE.

The great hay markets of the Northwest in the Twin Cities and Duluth have a business, peculiar to themselves, and it is highly interesting. A considerable percentage of their sales are "to the ranges," as they say, the great iron ore producing country, where transportation on rail and in wagon is a first item of expense to the buyer in considering the feeding cost of hay. There are large hay operators in these receiving markets who make a specialty of this range business, and the confidence of the buyer in the judgment of his terminal market house on prices, the best time to buy and to store up for future requirements is pleasing. It has occurred to us that if comparisons be permitted of the morale of this Northwestern hay trade with other markets that the former would not suffer.

When the great prairies of the Northwest produce a large forage crop and a surplus accumulates in Duluth, for instance, it is not uncommon to load up boats and barges and ship by water through Lake Superior and down to distributing points along the Lower Great Lakes. If, on the other hand, crops in the Dakotas, Montana and other sheep feeding country are short, it is necessary for the hay supplies of the Northwest to be built up through Northern shipments of hay from Illinois, Indiana, Ohio or to top ever abundant supplies of Nebraska prairie.

It is by anticipating conditions and through keeping informed on the forage crop growth during the latter summer months that the hay trade of the Northwest has earned the high esteem which they unquestionable enjoy among country hay dealers, feeders and the large mining, smelting and timber companies.

THE PLACE OF HAY IN THE SOUTHEAST.

Corn is given first place as a wealth producing crop in our nation, but grass is the primary crop of all regions of the United States. Its material worth to the farmer is superior to any cultivated crop which he may grow. Professor Ten Eyck, in Kansas Station Bulletin No. 175, has well said: "Few of us have ever begun to appreciate the value of grass to permanent and successful agriculture. Without grass and its allies—clover and alfalfa—profitable agriculture would soon cease."

Probably no greater change has been wrought by grass than in Florida, where ten years ago, E. P. Powell as said some time ago in *The Country Gentlemen*, practically no hay was made and what was used came from the North: Wherever one went in those days. Here said Mr. Powell, in Florida and along the Gulf Coast, there was a scarcity of fences; herds of wild cattle browsed in the wild grass, mostly in the river bottom and round the lakes. This wild fodder was made up chiefly of wire grass and weeds of no special value, and in the water there were water hyacinths and lily pads. During the winter, from November first to March first, when vegetation hesitates if it does not quite stop, this fare was so meager that a cow dying of starvation was not an uncommon sight, while the rest found it difficult to sustain life until new growth came. To hasten the coming of fresh grass the whole state was burned over during January and February simply to get rid of dried vegetation. I do not recall seeing a single field of mowed hay during the first four years of my residence in the South.

I tried to make hay of the wild grasses, especially those that grew round the lake edges. It was nearly as good as that which came to us in bales from the North, but was accepted by cattle only when they were starved to it. A few patches of Bermuda grass could always be found near the towns, but these soon became so matted as to be a yellow nuisance and worthless for feed.

The only really useful and valuable hay grass that we found in Florida was an annual that, coming up rapidly after potatoes or corn, filled the ground with great speed, rooting at every joint. This was called crab grass, which indicated a class of grasses as well as a specific variety. We found it really valuable for pasture and it made good hay. Coming late in the season, there would, of course, be too little of it to supply the needs of a stock-raising state. Yet I cannot conceive how the roving stock could have been kept alive and fatted had it not been for this autumn feed.

Mr. Powell is not an admirer of Lespedeza, which he regards as a kind of clover "which we grow sometimes because we cannot get rid of it." It makes first-rate sheep pasture, but can't be counted on for hay. Other substitute for Northern hay enumerated are Japan cane, a southern; Guinea & Rhodes pass from Africa; biggard weed, whose value as a legume has just been discovered; alfalfa, cowpeas, etc., the introduction of wheat has done much to greatly change the aspect of things agricultural in Florida.

WHEAT AND THE TREATY.

The exportation of wheat and wheat products to Germany is not expected to begin soon, even after the treaty is ratified by Germany and the Senate, the Grain Corporation saying it has no meat or products in its possession for exportation. It is further the belief of the Corporation, says *The Journal of Commerce*, that Germany will not be in very great need of wheat and other grains as soon as she is in a position to renew commercial relations.

Exportation and Importation of Wheat and Wheat Flour.

The War Trade Board announce, effective July 1, 1919, that all control over the exportation and importation of wheat and wheat flour heretofore vested in the War Trade Board will be revoked, effective July 1, 1919. The Board announce further that wheat and wheat flour will be removed, effective July 1, 1919, from the Export Conservation List and from the List of Restricted Imports of the War Trade Board.

[In connecion with the above announcement Wheat Director Barnes has issued the two bulletins announcing, effecting July 1st, 1919, and until further ordered:

"Properly executed licenses issued by the War Trade Board for the importation and exportation of wheat or wheat flour are herewith declared to be in full force and effect, as if issued by the United State Wheat Director.

"All Customs officials will recognize such licenses as if done by United States Wheat Director under the authority of the President's Proclamation, dated June 14, 1919."]

The Marquis variety of wheat was about 59 per cent of the spring wheat crop of Minnesota last year; 47 per cent of that of North Dakota; 58 of South Dakota and 47 of Montana wheat. Velvet Chaff took second place, Bluestem third and Duram is localized.

AGAINST GOVERNMENT OWNERSHIP.

The following resolutions were recently adopted by the Board of Trade of Topeka, Kans., and by the directory of the Kansas Grain Dealers' Ass'n and sent to Kansas' representatives in Congress:

Whereas, The Director-General of Railroads has recommended a five-year experimental period of Government operation, which would merely continue the present intolerable conditions in peace times; and

Whereas, The railroad executives have suggested that a Secretary of Transportation be added to the cabinet, with absolute power over the railroads, thereby subjecting them to political influence continuously; and

Whereas, The operation of the railroads by the Government has proved very unsatisfactory to every one, including the shipping, the traveling and the consuming public, as well as the railroad men and the owners of railroads, and has resulted in ever advancing charges for transportation with little or no opportunity to be heard and the rendition on the part of the Government of a constantly diminishing service and the complete disruption of the great railroad organizations which were created to serve the people primarily, with only a constantly increasing deficit in the national railroad treasury to show for overturning the work of a generation, demonstrating clearly that Government operation is not conducive to economic efficiency; therefore, be it

Resolved, By the Kansas Grain Dealers' Ass'n, that we urge our senators and congressmen to vote for the speedy return of the railroads to their respective owners; and, be it further

Resolved, That we recommend the prompt enactment of a law conferring upon the Interstate Commerce Commission, which is and has already been a nonpartisan tribunal, composed of highly trained men who are thoroughly competent to deal with the multifarious questions arising in the transportation field, the following powers to supplement those now conferred by statute:

(1) Authority to supervise, regulate and control the issuance of all securities by the railroads and other common carriers under its jurisdiction.

(2) The right to determine the propriety of building new lines of railroad and the construction of all extensions. The law should require the railroad company desiring to build such new line or extension to existing lines to secure from the Commission a certificate showing that public convenience and necessity would be subserved thereby. The railroads should be given the right to purchase parallel or competing lines whenever in the judgment of the Commission the public service would be improved thereby.

(3) Power and authority to compel the joint use of all tracks, terminals and equipment whenever public convenience would be promoted thereby, and to fix the compensation to be paid for such joint use. This should include power to compel the unification of terminals and terminal facilities whenever found necessary. The use of railroad property, such as right-of-way, etc., and the rental to be paid therefor by shippers should be controlled by the Commission.

(4) Power to fix minimum as well as maximum rates. Today the Commission can only fix the maximum. Unjust discriminations are created by reductions in rates as well as by advances.

(5) Authority to require the adoption and use of a scientific system of cost analysis.

(6) Jurisdiction to hear and decide all wage controversies between employes and the railroads with full power to compel compliance with its awards.

(7) Provision should be made that all intrastate rate questions should be first submitted to the state commissions with the right of an appeal to the Interstate Commerce Commission where rates fixed by state commissions would unjustly discriminate against interstate commerce, and the Interstate Commerce Commission should have the right to order the removal of any unjust discrimination in rates, rules or regulations in such manner as it might find to be just and proper. Where complaint is made to the Interstate Commerce Commission that existing rates unjustly discriminate against interstate commerce, the law should provide that a representative of the state commissions interested shall sit with the representative of the Interstate Commerce Commission in all hearings relative thereto, and they shall render a joint tentative report of their findings to the Interstate Commerce Commission, copy of which shall be served upon all parties appearing at such hearings, with the right to all parties to be heard on such report. The state commissions should continue to exercise full and complete jurisdiction over all intrastate service matters.

(8) The membership of the Commission should be increased sufficiently to enable it to handle the various phases of the jurisdiction conferred and in such manner as it finds best adapted to the different questions under its control

---

Reports from the Arkansas Valley from Arkansas City westward and northwestward, indicate that the army worm or cut worm is playing havoc with the alfalfa as well as corn. Wichita reports that the worm is taking thousands of acres of second crop alfalfa.

TILE BLOCK ELEVATORS.

Elevator building is going on at a rapid rate, the direct antithesis to building in other lines, which although picking up, finds a general tendency to await lower prices on materials. The urgency of the storage problem for the enormous crops indicated this season has made it imperative that elevators be built in great numbers, for during the war building was practically at a standstill.

Prospective builders are greatly interested in the Preston-Lansing Vitrified Tile Storage Bins made of Superior Blocks which interlock with the shiplap joints, strengthening the construction and lessening the chances of moisture working through the cement. The blocks are so arranged as to allow a band of twisted steel to lay in a grooved channel of the block on which is laid the corresponding groove of the block above. This groove is then flooded with cement which envelopes the steel rod which is therein and forms a complete band of exceeding strength at each lateral joint. This band of steel and cement extends every 15 inches of the structure, thereby eliminating all danger of bulging. The blocks are of a rich, dark mahogany color of vitrified clay, uniform in shade, and when pointed by a good mechanic a building that is an ornament to the country is the result.

These Superior Blocks giving a double wall construction to an elevator result in storing crops in a most satisfactory manner and there is never a comeback in the quality of ensilage so stored, a most perishable crop, for neither heat nor cold can penetrate these solid walls. Vitrified tile bins are used for storing grains of all kinds, lime, sand, soda, chemicals, liquids, etc., and interested parties by addressing J. M. Freston Co., Lansing, Mich., will receive much helpful information relative to elevator building.

WHEAT DISEASES IN ILLINOIS.

Two serious diseases of wheat hitherto unknown in this country recently have been discovered in Madison Co., Ill., according to the Department of Agriculture. The first is a disease apparently identical with the "take-all," or "white-heads," known in many foreign countries. "Take-all" has caused serious losses in the wheat fields of Australia, and has been reported as a pest of wheat, oats, barley, rye, rice, and certain wild grasses in Europe. The second disease is flag smut of wheat (*Urocystis tritici*) which also is a serious disease of wheat in Australia, and is known in India and Japan. Neither pest, however, has ever been reported to cause losses comparable to those resulting from the great epidemics of black stem rust in this country.

Although these diseases may cause heavy losses to individual farmers, the total area likely to be affected, before eradication or control measures are established, probably will not be large, the Department thinks. The losses in the total area affected this year will have no appreciable effect upon the total production of this year's wheat crop, however.

The presence of these diseases was discovered through a report from the county agent, stating that wheat was being seriously injured by some disease. An investigation was made promptly by representatives of the Illinois Agricultural Experiment Station and the Department of Agriculture. The damage in the fields attacked was found to vary from a fraction of one per cent to as much as 90 per cent. In some fields the damage was so great that the farmers were plowing up the wheat and preparing to plant corn.

Specimens of the diseased wheat plants have been examined and found affected with the disease, showing all the symptoms of "Take-all" in its early stages, as described in Australia. On the second visit to Madison County the Department representative found the flag smut of wheat in the same fields injured by "Take-all." Finding these two Australian diseases in the same fields strongly indicates that they have been introduced on wheat shipped into this country from Australia. These diseases are carried on seed grain. A thorough investigation is being made by the Office of Cereal Investigations of the Department to determine the source of all seed wheat used on the infested farms. A nation-wide survey is now in progress to find if either or both of these two diseases have been introduced anywhere else in the United States.

Their serious effects under Australian conditions are now well known. There is every reason to believe that they will find conditions in this country favorable to their spread. All growers of wheat and other small grains should be interested in helping their State experiment stations and the United States Department of Agriculture to find these diseases if they have been introduced, and to keep them from spreading.

There should be little difficulty in recognizing flag smut, as it differs radically from the other grain smuts. Unlike the others, it attacks the upper leaves, particularly the top one, which is commonly called the flag leaf. The name of the disease comes from this characteristic. The flag leaf always shows long, smut spore stripes and frequently is contorted or twisted into a spiral. Occasionally flag smut attacks the stems as well as the upper leaves. In this respect it resembles the stem smut of rye but differs from it in that all of the culms instead of one out of several are attacked. Affected plants do not produce heads.

The layman may have some difficulty in distinguishing the "Take-all" disease from any other condition that causes the plants to turn yellow in patches over the field. "Take-all" appears in round or irregular patches, within which all of the plants are destroyed. That habit gave rise to the name of take-all. In the infected patches the plants are first yellow, later becoming brown and dead. Diseased plants are but weakly rooted to the ground and the roots and foot of the stems become rotten. From this comes another name, foot-rot, by which the disease is sometimes known. Affected plants may survive the early or seedling attack and produce heads, but they never fill out, and are dead white in color. This gives rise to a third name of the disease, white-head.

The Department of Agriculture has been for some time apprehensive that these two diseases would be introduced into the United States. Several weeks ago a hearing was held with a view to prohibiting the importation of seed wheat from Australia, Japan, India, and practically the whole of Europe. Quarantine regulations were being prepared some time before the discovery of the diseases in Illinois.

A rather remarkable drought was broken in London on June 5 after absence of rain since May 10. The British Rainfall Organization points out that "an absolute drought is defined there as a period of 14 days on no one of which has 0.005 inch of rain fallen or an amount sufficient to bring out a single umbrella." This particular drought continued for 24 days and during the seven days immediately preceding only 0.08 inch of rain fell in London making a period of 31 consecutive days with only the last named quantity of rain. This period of 25 days of absolute drought has been surpassed for duration only six times since the Organization records became available in 1858, the most recent drought being 27 days in April-May, 1917.

The Winnipeg *Grain Trade News* says the flour milling capacity of Canada is 120,000 bbls. in 600 mills, the largest having capacity of 12,000 bbls.

CEREAL NEEDS OF FRANCE.

France seems to be in need of meats but the French people as a whole have never been educated to the use of refrigerated meats as have the English people, and outside of the city of Paris the demand for foreign meats is distinctly limited. Since the war began, however, the city of Paris has been compelled to call upon South America and America for refrigerated meats, and at this time the city is negotiating for 15,000 tons of such meat from South America. The balance of the country will probably get its supply for the time being, until herds have been replenished, from Morocco, on the hoof.

France for many years before the war produced practically all its bread wheat at home, the imports being confined for the most part, except those from African possessions, to macaroni wheat, American Durum and the macaroni varieties from Hungary and Russia, the demand for the Durum from Duluth being in proportion to the production of the best qualities of macaroni. During the war the uninvaded sections of France were kept at a high state of cultivation by the women, old men, prisoners and the children, and it is not expected that the calls for foreign wheat will be very much greater than previous to the war. The difficulty of shorthandedness will be in a measure relieved by the seasonable importation of laborers from North Africa, Spain and perhaps some of the hill country of Italy. Even before the war about 50,000 Kabyles were brought in for the harvest from the hill country of Algiers. Morocco under the French protectorate is also becoming an important source of wheat supply to France, as it was in the early part of the Christian era for the city of Rome and other cities of Italy.

Visible Supply of Oats.

Official statement of the visible supply of oats weekly, compared with same weeks of previous three years:

THE WHOLESALE SEEDSMAN.

We believe that the general public have reason at this time to take an increased interest in the seed business of the United States. The industry as a whole is one of which our country can well be proud of; while the methods employed in conducting the business, not only as to recleaning and perfecting the seed,—but also as regards merchandising and handling it,—are far superior to those employed in any other part of the world.

The business as conducted in the United States is a highly specialized one, requiring large well organized mechanically equipped plants, keyed up to a high productive volume. Any country produced seed raised by farmers must expect to find it delivered to dealers exceedingly weedy, trashy, dirty, and much of it of questionable vitality. Much of this seed is, of course, sold from one farmer to another in its original state, thus tending to spread weed pests and causing heavy losses by the extensive planting of seed which will not germinate. Some of the seed thus produced is bought by country merchants and by them recleaned and sold again by them to farmers. This process, to a great extent, eliminates weed danger and crop loss and has been a valuable factor in the improvement of our crops; but it is not as perfect for the latter purpose as one would wish. The rest of the seed produced is likely to be shipped to a general market, where it is bought, thoroughly tested, recleaned many times over special machinery and offered again through the regular channels by the wholesaler. It is this branch of the trade which, we think, through the intensive care exercised by them and on account of the exceedingly small handling charges upon which they operate, does the most useful and valuable work in the improvement of our planting stocks and the elimination of weed pests.

It has been a frequent matter of comment that due credit for this great service has never been popularly given to the wholesale seed trade. Farming communities have in many cases been made to believe just the reverse, and the seedsman has been often characterized as a person who not only did not improve the product he handled, but on the contrary adulterated, misrepresented and generally worked his business to the detriment of the farmer. Times are changing in this respect, happily, and the opinion is gaining ground that a business basing its prosperity upon agriculture, which has succeeded so marvelously as the seed industry has succeeded, must have performed a highly valuable service and could not from the very nature of things be considered as a detrimental influence to the agricultural welfare of the country. Each year the demands upon seedsmen for seeds and service are increasing and they have universally responded with a vigorous efficiency, comparing favorably with that of any well organized branch of our national life.

Kansas City is no exception to this rule. Lying as it does in the very center of the great seed producing area, it has grown as a seeds market to great importance and is regarded now as one of the world's great primary seed markets.

As the great war cereal acreages are turned back again to pasture, not only in the United States but in Europe and other parts of the world as well, the seed business is likely to come into greater prominence and seedsmen will probably be called upon to solve peace problems greater than their war problems have been.

There has been much confusion of opinion as to the extent of the world demand for seeds, the commodities upon which these demands are based and the rapidity with which they may be expected to materialize, if at all. It is upon these points that seedsmen differ in their views and it is to the solution of them that the farmers of the world must ultimately look. It is important therefore that the reader who should be also a seeds distributor should remember that Kansas City is the largest American market for alfalfa, cane seed, millet, kaffir corn, milo maize, feterita, Sudan grass and meadow fescue; that it rivals other markets closely for Kentucky blue grass and sweet clover; and that it is important for clover, timothy and other forage grass seeds.

The J. G. Peppard Seed Co. has been in business 33 years and has always been an energetic and aggressive influence in the development of seed production in Kansas City territory. Their plant is shown herewith as one of the typically equipped establishments of high class in the West.

PLANT OF J. G. PEPPARD SEED CO., KANSAS CITY, MO.

Provisions on the Continent.

Many think Europe is well supplied with hog products, anticipating the signing of peace, when these products will move freely into Germany and Austria. We hesitate to believe that there is any great surplus of hog products hovering around the border. It takes a good organization to handle merchandise in a country the size of Germany, and as the packers have not as yet been able to distribute their solicitors properly throughout the countries who will need our products, we think it is rather premature to anticipate that there are products enough over there now for the immediate demand of the countries which have been in great need of hog products. It is our belief that as soon as the packers' representatives can get an organization formed for the proper distribution of hog products, we will find a trade that will be startling. Our stocks of provisions are not heavy and it will not take any extraordinary amount of orders above what we are now getting to wipe out our entire surpluses.—*W. G. Press & Co., Chicago.*

WHEN SOMEBODY BLUNDERS.

"The hardest thing to get rid of," said John Lind on one occasion, "is well-meaning mediocrity." He might well have had in mind the official—name and place of residence deleted by the editor in order to beat the censor—responsible for the following:

Washington—there it slips out in spite of the deleters—telegraphed to a western state: "Do you want a threshing expert?" Answering telegram: "Yes."

Some days later the "expert" described as "nine fishpoles of a man" came in—a quiet, gentlemanly sort of fellow from a part of the country justly celebrated for peanuts—and reported for work.

"Good! A man in the western part of the state is having trouble with his injector. You can start right out to help him."

The "expert" looked puzzled. "And what is an injectah, sah?"

There is something more to the story—how the "expert," seeing himself a misfit, refused point-blank to tackle a job he knew nothing about, and returned to the land of peanuts and shoulder-high threshing machines. Also something might be said of the favorable impression he created, during his brief stay, as a fine sort of a fellow, and well trained—in the things he knew.

But doesn't it jar you when you stop and think that some official of the Department of Agriculture is taking good money from the taxpayers for shipping peanut-belt experts into wheat-belt sections to fix machines he never saw until he got out of his berth west of Chicago?

First thing you know they will be selecting statisticians to handle your packing business and laboratory experts to arrange the very practical problems of potato and wheat grading.

And, come to think of it, perhaps that is exactly what has been done.—*Farm, Stock and Home.*

WELL, HOW ABOUT THIS?

Delegates representing Hennepin County potato growers will carry a petition to the Minnesota Potato Growers' Ass'n, meeting in Grand Rapids Jan. 15 and 16, asking that the rules for grading early potatoes be suspended because of damage done to the crops in passing them over the grading screens. This was decided at a meeting of 100 potato growers of the county in the town hall at Osseo. Charles Setzler and B. B. Gibb will represent the Hennepin farmers at the state meeting.

Ten per cent of the Hennepin County crop of 1918, amounting to 3,200,000 bushels, was unmarketable because of the strict Government grades fixed for the war-time emergency, and because of grading the early, immature potatoes, F. A. Corniea, county agent, told the growers. The Government war emergency grading rules were suspended Dec. 11, Mr. Corniea announced, but the state association rules, which the growers are not necessarily required to follow, remain in force. More than 6,000,000 bushels of the Minnesota crop of 32,256,000 were ruined because of the now extinct Government grading rules, Mr. Corniea declared.—*Minneapolis Tribune.*

AIDING THE CROP MOVEMENT.

Although the Railroad Administration holds out the promise of a big increase in the car supply available for the 1919 crop movement, nevertheless it is up to each and every elevator manager to unload and load those cars just as quickly as possible. All coöperation to this end should be accorded that there may be no scarcity of cars in any district.

The McKinney-Harrington Car and Truck Loader and Piler is a machine designed for that very purpose. It loads a car quickly and easily and is a practical piece of machinery for handling bags, bales and boxes at a capacity speed of a ton per minute. The products handled are readily piled from the floor of the car to the very roof, easily stacking the top three or four tiers which usually proves to be such a bugbear when done without machine aid.

One of the attractive features of the McKinney-Harrington Co. Loader is the fact that the machine is reversible in its operation and the delivery end by a slight change in the mechanism can be made the receiving end. This makes it possible to load both ends of a car without having to run the machine out and this change is made so easily that not five minutes' time is involved. When the car is filled at both ends the final fill at the center of the car is made through the door. The machine is so designed as to pass readily in and out of any car door and operation of the machine is adapted to electric motor or gasoline engine.

Those of our trade who are interested in further details may make application direct to the McKinney-Harrington Co. at North Chicago, Ill., where such inquiries will be cheerfully answered.

MEAT PRICES TO REMAIN HIGH.

The American Meat Packers' Ass'n ut out recently from Chicago a state- nent, the dependability of which seems o be self-evident, that meat prices will ontinue high for a long time to come. he meat supply is dependent of course pon the supply of live stock and Eu- opean herds have been to some ex- ent reduced by the war. This is par- icularly true of swine, the great source f fat supply of the world and indeed he great source of supply of meat for ne laboring classes. Pork supplies ore meat energy to the world than robably all the other animals put to- ether, beef especially being rather a uxury than a necessity anywhere. Live ock in the United States on the other and have steadily increased during the ar. This fact however does not make all inconsistent the statement above oted, for the reason that the supply beef more particularly in the United ates has per capita been declining for obably 50 years. The brunt of the eat production for export therefore, ys the Packers' Ass'n, will be borne the United States, South America d Australia. Live stock in South erica, particularly in Argentina and uguay, have not increased during the r. Australian herds of beef cattle as ll as of mutton sheep had been de- ning for a number of years, even be- re the war, due largely to drouth and the ill effects of farm labor unions ose demands for wages and whose trictive practices had rendered beef oduction in that country all but un- ofitable. The American live stock uation, the packers conclude, will for ne time be one in which the demand stock and its products will greatly eed the supply. This means higher ces for live stock and continued high ces for bacon and the better cuts of f, because it must always be remem- ed, what most of the gushing senti- ntalists talking about prices do not member, that 99 per cent of the causes rating to make prices high is the distinctive, ever active cause— ld scarcity and increased demand to increased wages abroad and at ne.

Feeding Operations in Lancaster.

The regular arrival of feeder cattle at the Union Stock Yards at Lancaster, Pa., on practically every market day is attracting the attention of commission men. There were 1,604 head of feeder cattle reported in May by railroad agents through the district, and commission men at the local yards as entering the district for feeding purposes. The same month a year ago only 277 head were reported.

It is the opinion of local dealers that the recent breaks in live cattle prices will not materially affect feeding operaquite closely to established practices tions in this district, as feeders adhere and variances therefrom are never very great. The dissatisfaction which many farmers have voiced in regard to prices received for last year's tobacco crop has had a tendency to increase the corn acreage. Corn has proven an influential factor in regard to the number of cattle placed on feed heretofore. The condition of the corn crop at the present time is exceedingly good. With a good supply of feeder cattle available beginning the latter part of July, indications point to normally filled stables.

The Department of Cereals and Pulse of the Colonial Institute at Marseilles, France, has thrown out a warning as to Australian wheat which is said to be infested by insects and particularly by a disease which attacks wheat in the fields and recommends that very serious control will be necessary on imports of this wheat into France to prevent infestation of mills and crops.

It is reported from Missouri that under inspection from the Government the wheat crop from 2,500 acres from Madison County, Mo., will be kept off the market and destroyed or immunized for the purpose of suppressing the Australian "take-all" disease, which has been prevalent in that county.

IMPROVING THE CROP REPORT.

There was before the legislature of Illinois a bill to revive, or at least to create, a crop reporting service for the state of Illinois, to be conducted by the Commissioner of Agriculture in co-operation with the field agent for the state of Illinois of the Bureau of Crop Estimates of the Department of Agriculture. There was on the statute book 40 years ago more or less a law providing that the township assessors should in making their annual spring assessments of lands and personal property make a census in their returns of the acreage to all crops planted for the previous year and also a statement of the total yields for the same year. As, however, no special compensation was made for this return, which in the rural townships put upon the assessors probably more work than the actual assessment of the real and personal property valuations for taxation, after a few years, ending somewhere along in the early 80's, the assessors ceased to make such returns, and we believe the statute was later on stricken from the statute books. Although the State Board of Agriculture through its secretary has for some years made stated publication of general statistics regarding farm crops, acreage, etc., and also during the growing season made estimates as to the condition of crops, there has been as a matter of fact no machinery of adequate nature that would give the so-called condition reports any standing whatever. We say this without prejudice to the secretary of the State Board of Agriculture who like the mining camp pianist did the best he probably could under the circumstances.

It was proposed to revive this forgotten law, or, rather, to make a new law that should not be quite so burdensome upon the assessors or other officers employed in the way of collecting the necessary data, making it somewhat like say the Iowa law, in general intent, perhaps, rather than in form. In Iowa, for example, the assessors are required by law to collect very carefully data on the crops of the preceding year, this information being collected mostly in the following January. These reports being consolidated for the counties by the county auditors are forwarded to the state auditor and by him turned over to the secretary of the State Board of Agriculture, where the county and township reports are scrutinized for inconsistencies and checked for errors. Many are sent back to the assessors for revision. After these officers are satisfied with the figures, they are then forwarded to the Iowa Weather and Crop Service, in whose office they arrive about June 1, and there become the basis for estimating the acreages for the year following the year to which the reports have reference. For the current year, therefore, the percentages of increase or decrease in the acreage are determined (on the basis of reports referred to) from the reports of about 1,400 men, about one for each township of the state, received by the Weather and Crop Service office about June 1. These township reporters are kept carefully recruited so that there are no breaks in the system and unreliable, indifferent men are gradually weeded out from time to time, the best man in the township so far as possible being used for this service. The result has been that the weekly Weather-Crop Bulletin of Iowa which has been published for nearly 30 years, shows a remarkable degree of accuracy both as to acreage and estimated yields.

The proposed Illinois act was drawn by the direction of Commissioner Adkins on the basis of a bill which has appeared in substantially the same form in various other states of the Central West and also in some of the Mountain States and which is largely the result of the experience in Iowa, Kansas, Nebraska, perhaps, and in Wisconsin, where in the last few years a system has been built up which has given the most satisfactory results. The purpose of the bill is to obtain a complete survey from time to time through the assessors of the essential features upon which an accurate crop report can be based. One trouble with the old law, especially in Illinois, was that it put too much work on the assessors with the result that practically nothing was done. The new bill would cut down the labor by eliminating everything that is not absolutely essential; and by having the state authorities act with the field agent of the Bureau of Crop Estimates, the state authorities turning over to the latter the result of all its findings to be collated and compiled and eventually published by the Bureau of Crop Estimates whose own data obtained from the field agent's personal correspondence and also scrutinized, corrected and revised and edited by the field agent on the basis of his own estimates of the growing crops throughout the state, the whole published as one report coming from the Bureau of Crop Estimates, but with supplementary reports for the state showing the

It was believed that such a system of crop reporting extended and systematized would give very much more accurate reports than are now possible even through the excellent system of the Bureau of Crop Estimates. The bill certainly in Illinois should have had heartiest support of all business men as farmers as well as merchants, because it will be understood that the system of crop reporting is one that is devised not simply for the edification or instruction or use of farmers and grain merchants only, but is of extraordinary value to every intelligent merchant, banker and manufacturer throughout the country, as the reports will show the acreage, condition, yield, etc., for every county in the state as well as for the state as a whole, as is now the only

Ann Arbor
"THE BALER FOR BUSINESS"

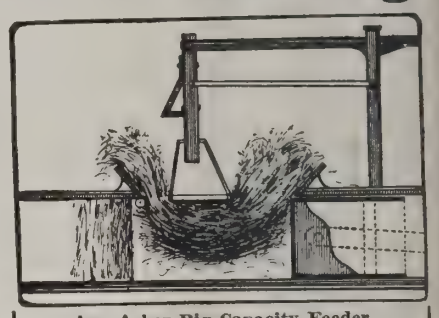
Write For FREE Catalog

BEST! For the business of Baling

"Guaranteed"
"Lowest Cost Per Bale"

The records of years of Ann Arbor Balers in the hands of thousand successful operators have shown us that we could give more than a mere guarantee of material and workmanship. It's all because of the many exclusive, patented features found in these machines—features absolutely necessary for baling speed and hard, smooth, square cornered, even bales. For 33 years Ann Arbor Balers have set the mark of baling perfection—the accepted standard upon which all hay baling machinery is judged.

Longest Life—Lowest Upkeep

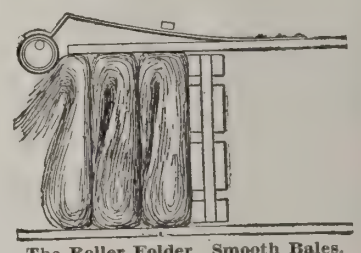


"$3.15 was the average cost of up-keep of all Ann Arbor Balers in service last year." All the more amazing when you think that some of the balers on which this figure is based **have been in steady use more than 27 years.**

This is due to the skill employed in their design and construction and the fact that Ann Arbor Balers are not built to price but to quality.

Balers for Every Purpose

If it's baling hay of any kind in any section of the country for any baling standards there's an Ann Arbor Baler especially designed for your needs. They are furnished to fit any power you may have or you can buy Ann Arbor Balers complete with power installed.



Let us help you to choose the Ann Arbor Baler for your work. Write in! Tell us your needs and we will send you catalog describing complete line besides offering the recommendations of baling experts. Address Department 117.

Ann Arbor Big Capacity Feeder.

Reasons for Big Capacity and Smooth Bales.

Extra size of Feed Opening means bigger charges and larger output. Famous Grasshopper Motion" means quick return and ample time for operator to place full charge in position. Flywheel means uniform power with no loss. Heavy gear means long life. Simple construction. Patent Roller Folder means smooth, even, better bales. More and better bales mean more profits.

The Roller Folder. Smooth Bales.

port. It is hardly necessary to go into particulars and to point out these values because thoughtful business men everywhere recognize the value of that information in the conduct of their business. They are useful to the farmer as a guide to production and as an indication of the fertility of the county where his farm is located in case he should desire to sell. This bill failed; nevertheless, as stated herein a month ago the co-operative report contemplated has been arranged for and will be published monthly hereafter.

Total Grain Stocks Visible.

Armed guards will be employed to patrol the Kansas wheat belt after harvest. This movement was started by the insurance agents.

Heavy floods in the Maple and Little Sioux Valleys of Iowa are said to have caused between $2,000,000 and $3 worth of damage.

Exports of Corn.

The exports of corn from all United States ports, as reported by the Chief of Bureau of Statistics of the Department of Commerce, for each month, for four years:

Mos.	1919.	1918.	1917.	1916.
Jan.	1,177,297	1,952,528	7,253,348	3,498,443

The Weather Bulletin of Iowa reports a tornado in Chickasaw County, Ia., on June 23 which caused $60,000 of damage but fortunately did not seriously injure the crops.

A movement has been started in the Canadian Northwest to reopen the future markets at Winnipeg for wheat. Wheat has been selling there at a discount under the American market.

J. J. O'Donohoe, managing director of the Grain Growers' Export Co. of Canada, announces that effective July 1 the agreement of the company with the Wheat Export Co. will terminate and the Grain Growers Export Co. will resume its old business.

We make more than 275 National Cash Registers every day

The National Cash Register is a modern, labor-saving machine that helps merchants, clerks, and their customers.

It protects profits by stopping leaks and losses, temptation and mistakes.

It adds, records, and classifies many kinds of transactions.

It saves time and money because it does 15 things in 3 seconds.

It enables the merchant to give quick, accurate service.

It more than pays for itself out of what it saves.

It helps merchants make more money, with less expense.

This big plant makes nothing but National Cash Registers

News of the Terminal Markets

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

Oats, like corn, has felt the recent advance in the Chicago market and sales have been made from 77½c to 79c, delivered New Orleans. Sacked oats have been quoted as high as 84½c. Oklahoma is now showing signs of getting into our market. Possibly this state, like Texas, will not be much of a factor.

While the demand for corn has not been very active recently, the late advance in the Chicago market has stimulated buying somewhat, and a number of sales of No. 3 yellow corn have been made during the past week from $1.95 to $1.97 per bushel, delivered New Orleans, quick shipment, New Orleans weights and grades to govern. Our chief outlet at this time, Cuba, has not been buying largely, and their ideas on corn have been considerably under western prices.

MEMPHIS.

George Williamson, Correspondent.

The first wheat marketed at Covington, Tenn., north of here, graded less than No. 2 and was sold at $2.04. It was damaged by unfavorable weather. Weather conditions for the past week or so have been materially better for the crop and harvesting has proceeded more favorably.

The Delta Flour & Feed Co. is the latest addition to the trade here. It has obtained floor space of 10,000 feet on Pennsylvania avenue, but expects later to erect its own warehouse. The concern is to be under the management of M. G. Odeneal, recently of Jackson, Miss., and will have the agency for four large Western milling companies. It is to start in business July 15.

Midsummer dullness has struck most branches of the trade here and there is nothing startling, unless the difficulty in getting corn when wanted may be considered such. Prices of the latter have gone higher, but the trade finds trouble in buying what it needs, for offerings are very irregular. Buyers and sellers are widely apart in their ideas, but the latter usually has his way. On call Saturday $1.89 was bid for cash No. 2 yellow, but the best offer was at $1.95. Same grade in transit was offered at $1.94. Oats have firmed up considerably and track stuff has been scarce, resulting in some stiff prices paid by dealers who could not wait for cars to come in. Cash No. 3 white sold as high as 78½. For cash No. 1 oats 80c was asked and 77¾ was bid, while 77½ was bid for No. 2. July shipment No. 3 red was offered at 72½c for July shipment.

TOLEDO.

Carl Bryant, Correspondent.

Bill Cummings and Joe Streicher, of J. F. Zahm & Co., had to stay up all night to convince their out-of-town guests that Willard is no longer a moving picture star.

Kent Keilholtz and John Luscombe upheld their firm's slogan, "There's Worth in Southworth Service," by advising their friends to bet on Dempsey. They were bullish on the challenger and pyramided on the advancing Jack.

A few of the out-of-town visitors at the big show July 4th were: John Morrow, of Wabash, Ind.; Rube Smith, Edgerton, O.; W. H. Pickard, Bowling Green, O.; John Monroe, Archbold, O.; Pete Hipp, Napoleon, O.; Lee Noragon, Butler, Ind.

Local inspections of all grains were light this week and competitive bidding on the small supplies has been light. A car of No. 1 yellow corn sold Saturday at $1.85¾, basis Toledo rate 23c to New York. Sample grade mixed corn, 15 per cent moisture, musty and sour, brought $1.61, basis rate of 30c to New York. Beginning of the wheat movement is expected the present week from points south, while Michigan wheat will be ten days later. No. 1 white oats sold at 72½c; No. 2 white, 72c, and No. 3, 71⅜c. Receipts for the week: Wheat, 2 cars; corn, 10; oats, 45; rye, 2; barley, 2.

Markets were crowded out of the limelight in Toledo town this week, and your correspondent found difficulty in securing any "news" except about the big fight and everybody was willing to talk about that The scrap was won and lost a hundred times every day on the local floor. Some fellows won't believe Willard was knocked out until they have to pay their bets. Dempsey didn't have the "reach." Willard had everything but speed and youth. A local trader, who is a physician, had a ringside seat and was prepared to give first aid in pulling Willard's fist out of Dempsey's neck.

After following Guy Purcell, of W. H. Small & Co., Evansville, Ind., around the Inverness golf course Saturday, we have a better understanding of the source of all the "pep" emanating from that Hoosier town lately. Aside from giving the Toledo boys a run for their money, Guy, who made the Woodpecker famous, found time to inspect odd patches of clover, turn a few somersaults down hills, jump over tree stumps, and discourse on his favorite sport, that of hunting rattlesnakes and grizzly bears. Any information Guy lacked on this subject was promptly supplied by his friend, Fred. Lilly, of The Holt Seed Co., Caldwell, Ida., who, it seems, is an ardent believer of specializing in hunting as well as in business. He took pains to explain the pastime to Joe Streicher and Joe will probably dream of rattlesnakes for the next ten days. After the ninth hole Fred. declared he would play the next nine in the shade keeping guard over Fred. Mayer's locker. The party included Dick Sheldon and Bob Burge, of the S. W. Flower Co.; Arch Johnson, of the Albert Dickinson Co., Chicago; Rad Burge, of the Toledo Field Seed Co., and Carl Bryant, assistant secretary, Produce Exchange.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

Prices on straw are barely holding steady because receipts continue heavy. Demand is very light and further supplies will mean a cut in prices next week.

Among the visitors to the floor of the local exchange during the last week were W. E. Mohr of Lawrenceburg, Ind., a guest of A. F. Fischer, and A. Lehman of Kenton, Ohio, a guest of C. W. Fischer.

The receipts of shelled corn are light, but enough is arriving to supply the demand. Bids of $1.89½ are being made for No. 2 yellow, but sellers are demanding $1.92½ a bushel. No. 3 yellow is held at $1.89@1.91 a bushel.

Quotations on oats are slightly lower than last reported, owing to a very liberal supply and a declining demand. The prices have been reduced to conform with asking rates, but only an occasional car can be placed, as buyers for oats simply are not in the market at this time. The best grades are selling at 76@76¼c a bushel with No. 2 at 75@76c.

SIOUX CITY, IA.

Paul Larson, Correspondent.

Le Roy D. Godfrey, president and general manager of the Godfrey-Blanchard Co., has made application for membership to the Sioux City Board of Trade.

In anticipation of a big flow of grain to this market during the current year the board of directors of the Terminal Grain Corporation authorized the construction of additional storage amounting to 270,000 bushels, thus increasing the capacity of the plant now being erected to 750,000 bus.

F. R. Warrick, of Kansas City, Mo., who had twenty years' experience in the grain business, was elected general manager of the plant now being erected by the Terminal Grain Corporation. He will begin his service about August first, a short time before the elevator will be equipped and in readiness for operation.

Visitors of the floor during the week were Chas. Gill, of Elk Point, S. Dak.; Chas. Corr, of Salix, Iowa; D. J. Kennedy, manager of the Atlas Elevator Co., of Minneapolis; Chet. Williams, manager of the Farmers Elevator Co., Hurley, S. Dak.; Wm. Verzani, of New Castle, Nebr.; Sam Lassen, manager of the Farmers Elevator Co., Pierson, Iowa.

Several of the grain men who have been out in the country looking over the wheat fields, report that wheat will not make over half crop due to the black rust and blight. They report that some of the wheat fields are not as bad as others, but discouraging fields are found through South Dakota and northern Iowa. They report corn looking fine and in good shape.

NASHVILLE.

John Leiper, Correspondent.

Receipts of grain at Nashville last week were 129 cars. Stocks at the end of the week were as follows: Wheat, 56,000 bus., decrease 49,000; corn, 92,800 bus., decrease 120,200; oats, 168,000 bus., decrease 20,000.

Southeastern corn mills, with capacity of 131,700 bus., reported output last week of 25,239 bus. of meal, or 19.1 per cent of capacity. This compared with 20,671 bus., and 18.6 per cent of capacity of mills reporting the preceding week. Bolted corn meal, sacked, is quoted $4.10@4.30 per 100 lbs., f. o. b. Ohio River points.

Mills are beginning to sell new soft winter wheat flour for July and August shipment. Demand is fairly active, due to stocks of old flour being low. Quotations are: Fancy patents, 98 lbs. cotton, $11.30@11.70; 100 per cent flour, $10.90. Southeastern mills with capacity of 181,170 bbls. reported output last week of 21,898 bbls., or 12.08 per cent of capacity, which, compared with 40,745 and 21.4 per cent of capacity the preceding week and 18.1 per cent of capacity the same week last year.

General grain trade was of moderate volume last week. Corn continued at the highest mark of the year. Scattering cars of new wheat were received with quality fair. Weight is generally light. Farmers are showing inclination to hold wheat. Oats were in strong demand, and prices firm. Quotations: Wheat—Local, No. 2 red, $2.10@2.20. Corn—No. 2, white, $1.97@2; No. 3 white, $1.94@1.97; No. 3 mixed, $1.90@1.95. Oats—No. 2 white, 79@79½c; No. 3 white, 78½@79c; No. 3 mixed, 78@78½c. New Texas red oats are offered at 74½c, but buyers show practically no interest.

BUFFALO.

E. Bangasser, Correspondent.

Some inquiry for rye but no sales were reported. No. 2 northwestern in store was offered at 4c over Chicago August. There is quite a supply of rye here waiting for a favorable turn in the market.

Squire M. P. Ryley brought in from his farm, just outside of Buffalo, a sample of his coming crop of spring wheat which he planted last fall. It is the most promising looking field in this part of the state. He says he is going to plant nearly everything in the fall and show the farmers something new.

This market is getting more split cars of odd descriptions of grain than ever sold here and not a few heat damaged and musty cars of corn, smutty wheat and bin burned oats. It looks as if shippers were cleaning up and making this the dumping ground. Prices received, however, seem to be satisfactory to the shipper.

Oats under quite liberal offerings and little eastern demand were kept within a cent of last week's prices. The oatmeal buyers took quite a few cars and at the close of the week some outside orders came in with buyers more inclined to pay a fraction advance. The general feeling was that prices were too low here. Closing: No. 1 white, 75½c; No. 2 white, 75c; No. 3 white, 74c, on track, through billed.

Although the general disposition was to hold corn for higher prices, buyers followed the market reluctantly. In fact, never reached the advance in the West. Receivers wanted to clean up daily and took the best bids and as a rule waited until late in the day. The mills seem to be in no hurry to buy corn. Prices were about 3½c higher than last week. No. 1 yellow, $1.92½; No. 2 yellow, $1.92; No. 3 yellow, $1.91; No. 2 mixed, 90c on track, through billed.

Inspection track receipts for the week: No. 1 red, 8 cars; No. 2 red, 3 cars; No. 2 mixed, 1 car; sample spring, 3 cars. Corn—No. 1 yellow, 2 cars; No. 2 yellow, 27 cars; No. 3 yellow, 6 cars; No. 4 yellow, 4 cars; No. 6 yellow, 13 cars; sample yellow, 8 cars; No. 1 mixed, 1 car; No. 2 mixed, 2 cars; No. 3 mixed, 5 cars; No. 6 mixed, 1 car; sample, 4 cars; No. 1 white, 1 car; sample, 1 car. Oats—No. 1 white, 4 cars; No. 2 white, 98 cars; No. 3 white, 63 cars; No. 4 white, 4 cars; sample, 4 cars.

MILWAUKEE.

E. E. Meyer, Correspondent.

Milwaukee flour mills produced 10,700 bbls. of flour this week, of which 7,600 bbls. were wheat and 3,100 bbls. rye flour. The production for the previous week was 13,000 barrels and 2,500 a year ago.

Grain receipts in Milwaukee for the period were 149 cars barley, 38 cars corn, 127 cars oats, 15 cars wheat, 30 cars rye, 2 cars flax: total, 359 cars, against 795 cars the week before, 374 cars a year ago and 740 cars in 1917.

The Milwaukee Chamber of Commerce closed Friday in observation of Independence Day and the Saturday session was adjourned so that members enjoyed a vacation from Thursday afternoon until Monday morning.

Shipments of grain from Milwaukee consisted of 737,200 bus. oats, 68,710 bus. corn, 323,555 bus. barley, 14,500 bus. wheat, 4,050 bus. rye: total, 1,148,015 bus., against 1,686,438 bus. the preceding week and 380,265 bus. a year ago.

In the cash grain market value for the week ruled stronger under light receipts, as the demand is good, farmers everywhere being busily engaged. Barley for this period shows improvement of 2@3c, oats 2½@3c, corn 6@7c, rye 3c, wheat 8@9c. Crop reports are generally satisfactory and show improvement. The hay crop in this state is excellent.

Visitors registering at the Chamber of Commerce during the week included the following: F. P. Spikins, Chicago, Ill.; F. E. Stanchfield, Wauseca, Minn.; F. C. Yerges, Reeseville, Wis.; M. S. Bassett, Springfield, Ohio; W. P. Broughton, Sioux Falls, S. D.; A. E. Anderson, Algona, Ia.; H. V. McFayden, Gregory, S. D.; A. H. Betts, Mitchell, S. D.; F. E. Hoenmann, Columbus, O.; F. E. Stoppenbach, Menominee, Wis.; J. T. Barret, Montello, Wis.

The Federal Shipping Board has sent word to Secretary Frank Barry, of the traffic division, Milwaukee Association of Commerce, that it would place vessels at the disposal of local shippers to give direct boat service to Liverpool. Operations are to start July 20 and will be continued if adequate tonnage is assured. Only bulk shipments will be accepted and from 1,000 to 1,200 tons for each boat are required. The inauguration of the lake and ocean shipping marks the beginning of Milwaukee as an ocean port.

The new enlarged quarters of the Milwaukee branch of E. W. Wagner & Co., Chamber of Commerce building, were officially opened with an elaborate housewarming this week. W. E. Schroeder, manager of the Milwaukee branch, was host to a large number of clients and brokers who were entertained with music and other features. Among those present were Collector of Internal Revenue Paul Hemmy, Danforth Armour, connected with the Chamber of Commerce since the day it first opened its doors at 1 Spring street; Archie McFadden, doorkeeper of the Chamber for fifty years and now retired; George Sawyer, Postmaster Frank B. Schutz, O. R. and George Lonsdorf, James Leedom, Emil Schandein, Richard Knowles, John Berger Charles Coughlin, Detective Matt Dolan Ernest Busby, Frank Ramler, Robert Harper, R. C. Rhode, Samuel Brockman, Sandie Hunter, William Koepp, Carl Baumann, Joy Hackler, Adolph Kern, Patrick Donohue, Edward Conley, Con Koch, A. W. Starke, Lawrence Murphy, Walter Rice Hugo Stolle, William Hottensen, Andrew Lowry, Matthew Kaiser, James Mallon, E. Endres, T. James and F. Flynn, G. A. Miller, Frank Phelan, Ray and Joseph Riley William Kellogg, Frank Bell, Al Taylor Arthur Kuehn and Dr. J. H. Hennekens.

DULUTH.

S. J. Schulte, Correspondent.

Application has been made for the transfer of the Duluth Board of Trade membership of J. M. O'Gorman to George Dlo of the Hallet & Carey Co.

Percy Ginder, vice-president of th United States Grain Corporation, has returned from a vacation trip in the East He left with the Duluth delegation at th beginning of June to attend the conference of grain men at New York to settl upon methods for the handling of the 191 wheat crop.

Operators of elevators at Duluth and Superior were pleased over the announcemen of Railroad Director Hines that the demu rage charges on cars will be reduced to $ a car for the first four days and $5 fo each day thereafter, instead of the preser basis of $3 a car for the first four days, $ for the next three days, and $10 for eac day thereafter. The new rates will be ef fective here on July 20.

The rye market here was a variab proposition during the last week, tradin in it covering a range of 9c on the fiv days' operations. Spot No. 2 rye sol down to $1.35¼, advanced to $1.44 and the eased off to $1.42¼. The development eastern bidding and dry weather repor from parts of western North Dakota co tributed to the upturn after the break the beginning of the week.

Supplies of wheat in Duluth elevators a now reported at 315,000 bushels, includi just 74,000 bushels of spring wheat. Th movement of wheat this way has been be ter of late, and the local mills have bee able to pick up enough on track to kee them going on their present reduced ope ating basis. The mills here have been o fered new fall wheat, but they are refu ing to pay the present going premiums u on it.

Julius H. Barnes, national wheat dire tor, is scheduled to arrive here next we for a vacation to be spent at his home. H is the mainspring in several industrial e terprises at the Head of the Lakes, inclu ing the McDougall-Duluth Co.'s shipbuil ing plant and the Klearflax Rug Co., whi has attained to the status of a million-do lar proposition and affords a market farmers over the Northwest for their fl straw, after it has been cut into sho

UNION TRUST COMPANY CHICAGO
A BANK OF STRENGTH AND CHARACTER

The B L Bank of Chicago

With the prospect of bumper grain crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding special facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

NEW ORLEANS, LA.

lengths after passing through the threshing machine. Prior to the establishment of that plant at Duluth, that straw had been simply a waste product for farmers to be gotten rid of through burning.

Duluth grain men have been in receipt of discouraging reports regarding the outlook over Montana, and in some districts in western North Dakota. Advices received by McCabe Bros. Co. from a traveling representative received last week said that the crop outlook in Montana is hopeless as a result of drought. The news is, however, optimistic from over other parts of the territory tributary to this market. A farmer from the vicinity of Fargo, N. D., who was a visitor on the Duluth market recently, asserted that he hoped to thresh out a crop of 40 bushels of wheat to the acre. That would be about equal, he asserted, to the record set by him last fall.

BOSTON.

R. S. Wallace, Correspondent.

Alfred P. Sinclair, of the firm of Safford & Sinclair, with offices in the Chamber of Commerce Bldg., died June 28 after a long illness.

Stocks of grain in regular elevators June 30 were: Wheat, 56,739 bus.; corn, 1,205 bus.; oats, 184,027 bus.; rye, 970 bus.; barley, 459,786 bus.

Exports of grain and flour for the month of June, 1919, were as follows: Wheat, 1,477,991 bus.; oats, 394,209 bus.; barley, 389,630 bus.; oatmeal, 2,950 bus.; flour, 174,965 sacks.

The following were visitors on 'Change during the past week: O. A. McCree, Minneapolis, Minn.; George E. Lake, Groveland, N. Y.; E. K. Irving, Seattle, Wash.; B. B. Sheffield, Minneapolis, Minn.

Receipts of grain and flour for the month of June, 1919, were: Flour, 99,270 barrels; wheat, 478,965 bus.; corn, 9,060 bus.; oats, 233,135 bus.; rye, 34,325 bus.; barley, 831,975 bus.; malt, 57,800 bus.; cornmeal, 230 barrels, 4,290 cases; oatmeal, 2,000 sacks.

Very little business reported in corn during the past week with prices considerably higher and offerings light. Prices at the closing being quoted about as follows: No. 2 yellow corn, $2.05@2.07 per bu.; No. 3 yellow corn, $2.03@2.05 per bu. Receipts for the week ending July 5 were 1,500 bus.

Oats continue rather quiet, with prices quite some higher than last week and quoted as follows: Fancy 40-42-lb. clipped white oats, 83½@84c per bu.; fancy 38-40-lb. clipped white oats, 83@83½c per bu.; regular 38-40-lb. clipped white oats, 82@82½c per bu.; regular 36-38-lb. clipped white oats, 81½@82c per bu. Receipts for the week ending July 5 were 40,630 bus.

BALTIMORE.

Robert C. Neu, Correspondent.

The first new rye of the season to reach the Baltimore market came to hand on July 1 from St. Mary's County, Md., and sold at $1.50 per bushel.

W. E. Grant, of the Van Dusen-Harrington Co., grain merchants of Minneapolis, Minn., was a visitor on the floor of the Baltimore Chamber of Commerce last week.

The rooms of the Baltimore Chamber of Commerce were closed on July 4 and 5, and many of the grain merchants took advantage of a three-day holiday at the seashore.

Jas. E. Cairnes, of Jackson Bros. & Co., Chicago grain merchants, maintaining private wires in Baltimore, New York and other places, spent several days visiting in this city last week.

The names of Frank J. Otterbein and George E. Morrison are posted on the official bulletin of the Baltimore Chamber of Commerce as applicants for membership in this organization.

The following gentlemen comprise the committee on hay and straw quotations of the Baltimore Chamber of Commerce for the month of July, viz.: Messrs. Thomas W. Campbell, Harry E. Elgert and M. R. Schermerhorn.

Wheat exports from the post of Baltimore for the first six months of the calendar year amount to 10,166,320 bus., compared with 2,478,778 bus. shipped in the corresponding time last year.

According to figures of the secretary's office, the receipts of baled hay in the Baltimore market for the month of June were 2,337 tons, compared with 3,997 tons arrived in the same month last year.

Owing to the large quantity of wheat in sight, the Grain Corporation has notified the trade here that it will not issue any more permits for coarse grain, there being already a large volume of coarse grain "permitted" via Baltimore for export.

The name of J. Lee Murphy, for many years with the grain exporting firm of John T. Fahey & Co. of this city, is posted on the official bulletin board of the Baltimore Chamber of Commerce as an applicant for membership in the organization.

I. Panzer, formerly American representative of J. Goldstock & Co., European agents specializing in the guaranteeing of the outturn of grain cargoes, but now at the head of his own concern in New York City, the Superintendence Co., was a visitor on 'Change here last week.

Col. H. C. Jones, head of the grain and hay commission house of H. C. Jones & Co., Inc., of this market, and who has been in the thick of the fray on the other side for the past eighteen months, returned to this country on July 1, and after spending a few days at camp in New York, returned to his home in Baltimore. Col. Jones was one of the first Marylanders to get into active service when this country entered the war, and one of the last to leave France, where he was in charge of debarkation at Bordeaux during the last few months. His reception when he made his first appearance on 'Change here was rousing. Col. Jones is expected to tell of some of his experiences before the coming annual convention of the National Hay Ass'n at Detroit.

DETROIT.

John Barr, Correspondent.

Barley is inactive and steady at $2.30@2.40 per cwt. for cash No. 3.

John Coop, chief buyer for the Stott mill, has returned from a fishing trip in northern Michigan.

All life has gone out of the bean deal. Immediate and prompt shipment beans are quoted at $7.15.

Mark Bates, representing W. G. Press & Co., Chicago, was a visitor on 'Change last week. He still preaches $2 corn.

While activity and strength were shown in some lines of grain, the rye deal here is dull as ever. No. 2 is quoted nominal at $1.42.

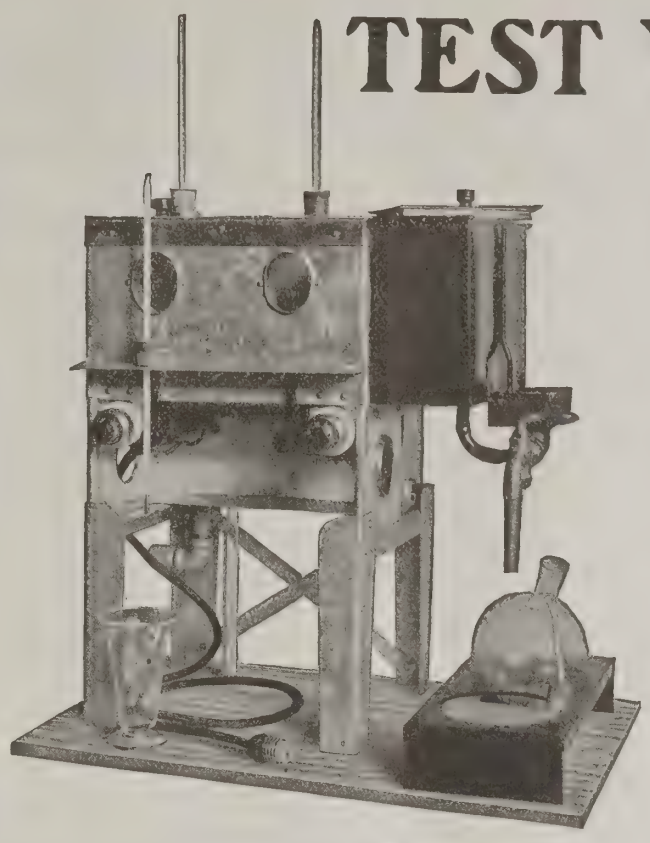
The wheat market is lower, but not any more active. No. 2 red is quoted at $2.35; No. 2 mixed at $2.33 and No. 2 white at $2.33.

Demand for oats has increased, but is still local. Shippers are not interested here. Receipts have not been large and the price shows a gain of 2½c for the week. Quote: No. 2 white, 73½c; No. 3 white, 73c; No. 4 white, 72c.

Buying of corn has not increased much, but the market has followed the general trend and higher prices are quoted. Receipts are very small and there is nothing doing with the East. Quote: No. 3, $1.86; No. 3 yellow, $1.88; No. 4 yellow, $1.86; No. 5 yellow, $1.83; No. 6 yellow, $1.80; No. 3 white, $1.89.

Walter J. Stegmeyer has returned from France to the cash grain department of the Burdick-Thorne Co. He enlisted shortly after the outbreak of the war and was sent overseas almost immediately. His knowledge of the German language, combined with a course in wireless telegraphy at a school in Langres, France, caused his assignment to listening post duty. He saw active service in the St. Mihiel sector, at "Radio Hill" when the Yankee drive began there and followed the push as far as Fairicourt. At the conclusion of the drive he was engaged as an interpreter in the German prison camp near Toul, France.

ST. JOSEPH, MO.



W. H. Moore, Correspondent.

C. A. Addington, formerly with the Keystone Elevator and Grain Co., is now employed by the Holdridge Grain Co. His successor has not yet been selected.

C. D. Gilbert, with the St. Joseph Hay & Grain Co., has just returned from a two months' trip throughout Kansas and Oklahoma. He reports oceans of wheat in this territory—most of it promised to St. Joseph.

Frank Gilmore, formerly with the Excello Feed Milling Co., has made arrangements to handle the hay department for the Helm Grain Co. Mr. Ungelbeck, who was with the Excello mill for several years, has returned to the company to take Mr. Gilmore's place.

Another new grain firm will open its offices at 1110 Corby Forsee Bldg. July 15, under the name of Thomas Grain Co. J. M. Thomas, the originator and manager, has had many years' experience in the grain business. His St. Joseph connections have been with the A. J. Brunswig Grain Co. and Gregg Grain Co. Mr. Thomas states that for the time being he will limit his business to consignments.

Cash Markets.

Wheat: Wheat receipts continue light, but indications are that a large number of cars of new wheat are in transit to St. Joseph and that they will meet with a good demand. Judging from samples received, the Oklahoma crop will be of fine quality, but mostly mixed, soft and hard winter wheat. Cash quotations: No. 1 dark hard, $2.46@2.51; No. 2 dark hard, $2.45@2.47; No. 3 dark hard, $2.34@2.40; No. 4 dark hard, $2.24@2.32; No. 5 dark hard, $2.19@2.23; No. 1 hard, $2.44@2.49; No. 2 hard, $2.43@2.45; No. 3 hard, $2.32@2.38; No. 4 hard, $2.22@2.30; No. 5 hard, $2.17@2.21; No. 1 red, $2.30@2.31; No. 2 red, $2.25@2.27; No. 3 red, $2.23@2.24; No. 4 red, $2.20@2.22; No. 5 red, $2.18@2.20.

Corn: Cash corn for the past week has kept time with futures in their continuous advance towards the $2 mark. Receipts continue light and hardly sufficient to supply the demand. All grades and colors are wanted, but white corn still maintains its premium. Cash quotations: No. 2 yellow, $1.86@1.87; No. 3 yellow, $1.82@1.84; No. 4 yellow, $1.80@1.81; No. 5 yellow, $1.77@1.79; No. 2 white, $1.88@1.89; No. 3 white, $1.86@1.88; No. 4 white, $1.83@1.85; No. 5 white, $1.80@1.82; No. 2 mixed, $1.84@1.85; No. 3 mixed, $1.81@1.83; No. 4 mixed, $1.79@1.81; No. 5 mixed, $1.76@1.78.

Oats: Receipts for the past week have been light and the demand urgent; inquiries being mostly from local consumers and mills. Cash quotations: No. 2 white, 72@72½c; No. 3 white, 71@71½c; No. 2 mixed, 71@71½c; No. 3 mixed, 70@70½c; No. 2 red, 70@71c; No. 3 red, 69@70c.

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

No markets on the 4th and Saturday was a holiday in Virginia. Prices quoted here at close of markets July 3 as follows: No. 1 red wheat, $2.38; No. 2 red wheat 3c less; No. 2 rye, $1.50@1.55; No. 2 white oats, 80c; No. 3 white oats, 79c; No. 3 white oats, August shipment, 75c; standand middlings, $50; reddog, $63; bran, $40; rye middlings, $42; No. 1 timothy hay, $40; light mixed hay, $38.

You will note Richmond is now a full-fledged market with Federal inspection department, fully equipped to render proper inspection on everything according to the Government standards; also we have two hay inspectors who have been approved by the National Hay Ass'n.

The most important item of interest we have to report is the fact that a number of Richmond capitalists have decided to build here a very large and modern grain elevator, 500,000 bus. capacity; also a large hay warehouse and feed warehouse combined. They hope to have this plant ready for business by January or February next, and when the promoters appeared before the Richmond Grain Exchange at their annual business meeting and told of their project, they were given a most cordial welcome and by a rising vote the Exchange unanimously indorsed the move and promised their most hearty co-operation. Elevator builders and equipment manufacturers will do well to get in touch immediately through The Price Current-Grain Reporter with the promoters of this enterprice, as the outlay will possibly be somewhere around $500,000, possibly more.

Wheat is being threshed very fast, but we are told the yield is very poor, although a good crop of straw.

Cornfields looking fine. Hay full of weeds and fine grass.

Oats crop fair. Very little rye.

The demand for grain is picking up, and we are looking for good business throughout the whole summer.

Annual Meeting of Grain Exchange.

At the annual meeting of the Richmond Grain Exchange, held in the rooms of the exchange, the following officers and committees were elected for the ensuing year beginning July 1: President, W. T. Selden; vice-president, W. F. Ferrell; secretary-treasurer, W. F. Green. Board of directors—S. T. Beveridge, R. L. Chenery, T. L. Moore, W. F. Richardson, Jr., W. D. Saunders, W. C. Todd, H. G. Carter, C. W. Wingfield, W. P. Wood. Committees: Executive—W. D. Saunders, C. W. Wingfield, H. G. Carter, N. R. Savage, Nat. Frazer. Quotation—S. T. Beveridge, R. L. Chenery, C. W. Wingfield, W. C. Todd, W. D. Saunders. Grain—S. T. Beveridge, W. F. Ferrell, Aubrey Hawkins, W. C. Todd, W. G. Bragg. Hay—R. L. Chenery, H. E. Kasten, H. G. Carter, W. C. Todd, I. L. Sutherland. Arbitration—T. L. Moore, S. T. Beveridge, W. L. Lefew, H. M. Martin, W. F. Richardson, Jr. Appeal—A. C. Diggs, W. P. Wood, Geo. D. Morgan, W. F. Ferrell, W. G. Bragg. Trade—W. F. Richardson, Jr., W. F. Ferrell, W. S. Flournoy, J. L. Koiner, H. M. Martin. New members—W. D. Saunders, E. M. McGeorge, A. S. B. James, John T. Anderson, R. D. Harlow, C. F. Morriss, A. L. Franklin, F. H. Garber.

This exchange now has a fully equipped U. S. grain inspection department, W. F. Green having been licensed by the U. S. Department of Agriculture to inspect and grade shelled corn, wheat and oats. Also a national hay inspection department, both the chief inspector, C. L. Gregory, and deputy, W. F. Green, having been approved by the National Hay Association.

The matter of building a grain elevator here of 500,000 bus. capacity with every modern equipment was endorsed by this exchange; also a hay storage house; and President Selden appointed the following committee to assist in the enterprise: W. F. Richardson, Jr., T. L. Moore, S. T. Beveridge, C. W. Wingfield and W. F. Ferrell

NEW YORK.

J. M. Nugent, Correspondent.

Cash oats rule quiet but firm. Domestic demand showed some improvement, but trade was limited. Export business is somewhat disappointing. No. 1 whites were quoted at 80¾c; No. 2 white, 80¼c; No. 3 white, 79¾c; No. 4 white, 79¼c, all elevator.

Trade in the corn goods market was confined to a small local demand. Stocks here are not large, and in fact mill offers are also small, but even so, supplies are in excess of demands. The pronounced strength in cash corn caused an advance in prices, however, and the market was generally higher for all grades.

James Cairns, of Jackson Bros., Chicago, motored from that city to New York and arrived during the week. Mr. Cairns was accompanied by T. M. Howell, also of Chicago. These gentlemen described the trip as quite enjoyable, and they also stated that crops in the states through which they passed were in generally good condition.

The following gentlemen were visitors upon the floor of the Produce Exchange during the past week: W. E. Harris of Baltimore, J. L. Street of Newport News, Hon. F. A. Crerar, Minister of Agriculture of Canada and president of the United Grain Growers, Ltd.; Capt. P. C. Band of Toronto and W. L. Tomlinson, also of Toronto.

Trade in domestic cash corn during the week was quiet, owing to the scarcity of offerings. American corn appears very scarce, and now sizable quantities are offering. Argentine corn on spot here rules strong, prices having advanced sharply, due to the strength of this cereal in the southern grower. Values for domestic corn follow: No. 2 yellow, $2.05; No. 3 yellow, $2.04; No. 2 white, $2.08; No. 3 white, $2.07; No. 2 mixed, $2.04; No. 3 mixed, $2.03.

A somewhat firmer tone prevailed in the local market during the past week as far as mill offers on old flour were concerned. In a number of cases these were advanced from ten to twenty-five cents per barrel, as mills maintained that they were running short of wheat, and were also paying premiums for new supplies, and there was little available at that. Buyers here are not inclined to follow the advance and it is safe to say that most of the business was done at the old levels. The Government came into the market for first clears, and while the volume of sales was not announced, the appearance of this demand stiffened the market for this character of flour quite materially. Clears have been going begging here for some time, but when the Government began to buy, consumers began to take more interest, at least in the better clears. Offers of new crop flour were not of great volume, and prices covered a wide range. Hard wheat flour was offered all the way from $10.75 to $11.50, while soft flours were quoted around $10 to $10.25. Some business was done for forward shipment, but as a rule leading mills were awaiting developments and buyers again showed their determination to act in a conservative way until the new crop situation had shaped itself more definitely.

WESTERN CANADA.

A. Caldwell, Correspondent.

In Saskatchewan there has been a marked improvement in the central districts. The eastern side of the province is very good, but the western and southwestern districts poor and much of the crop is ruined.

General conditions as regards the crops in Manitoba continue excellent. With favorable weather from now on Manitoba has every prospect of reaping a bumper crop. All grains are reported to be heading out, growth is rank and the only danger is that rust may step in and spoil a most brilliant prospect.

The appointment of a trade commission with wide powers to investigate and remedy such matters and an amendment to the Canada Grain Act with the view of reducing the enormous profits of the terminal elevators in the matter of overages are other matters that are interesting the grain growers and dealers at the present time.

Alberta as a whole is facing a crop failure. Crops in the Peace River district are said to be good, but development there is only in its infancy and the grand prairie is not yet among great producing areas. Edmonton district is fairly good, but outside of the irrigated country the rest of the province will have very little grain to market.

The original estimate of 300,000,000 bushels of wheat for the prairie provinces may be reduced to 175,000,000, perhaps less. It has not been the lack of moisture that has been so ruinous, for we have seen fair crops on well-farmed land in the west under conditions quite as arid, but the heat in June was unprecedented. It was a combination impossible for plant life to fight against.

The market during the week was only for two days, Wednesday and Thursday, and trade was naturally of an evening-up character except in the case of flax. Cash flax advanced over 70c a bushel and October futures over 50c. Such fluctuations can only be brought about by manipulation by the crushers who have practically all the cash flax in sight and have considerable stocks of oil on hand. The whole affair looks like gross profiteering and tends to cause popular indignation against the grain trade as a whole.

RECEIVERS AND EXPORTERS

WHEAT - CORN - OATS - BARLEY

CONSIGNMENTS AND C.I.F. OFFERS SOLICITED

PRODUCE EXCHANGE NEW YORK

KANSAS CITY.

T. J. Tanner, Correspondent.

James Russell, for several years chief grain sampler for the Board of Trade, has been appointed by D. F. Piazzek, zone agent, as wheat buyer for the United States Grain Corporation in Kansas City during the coming year. Harry J. Smith had the position last year.

Members of the Grain Handlers' Union are agitating for a new scale of wages and hours at Kansas City elevators for the coming year. Present wages are 50 to 60 cents an hour. The new objectives are 60 cents an hour, an eight-hour day and time and a half for overtime. No strike is anticipated.

Edgar H. Sullivan, of the Hodgson-Davis Grain Co., is an applicant for membership in the Kansas City Board of Trade. Mr. Sullivan bought the certificates of R. E. Kidder, a retired miller, for $13,000. New members admitted to the exchange during the week were: Charles H. Kinser, Peter E. Bowers and Frank W. McCoy.

F. R. Warrick, manager of the shipping department of the Moore-Lawless Grain Co. for the last two years, has accepted a position as manager of the Terminal Grain Corporation, at Sioux City, Iowa, to take effect August 1. Mr. Warrick has had 20 years' experience as an elevator man here and at St. Louis, Mo. The Terminal Grain Corporation is increasing its elevator in Sioux City to a 750,000-bushel house.

The Fowler Commission Co. had the distinction of marketing the first car of new wheat in Kansas City this year. On June 30 the company received a car of No. 2 red from Fort Gibson, Okla., which tested 58½ lbs. a bushel and brought $2.21 at auction. The wheat was of good quality, but contained 12½ per cent moisture and showed 4 per cent dockage on account of oats mixture. A year ago the first car of new wheat arrived June 27.

Charles T. Neal, of Kansas City, zone agent for the United States Grain Corporation at Omaha, who went to Europe several months ago, is expected home in a few weeks, after which he will resume his work at Omaha. Mr. Neal's letters tell of his being ordered by Herbert C. Hoover from London to Hamburg to carry out the terms of the Brussels agreement, which provided for the delivery of foodstuffs to Germany in return for 2,500,000 tons of German shipping. He also supervised the delivery of foods to Czecho-Slovakia over German railroads.

Total receipts of leading grains in Kansas City during the crop year ended June 30 were 95,269,600 bus., the third largest in the history of the market. Wheat arrivals were 54,106,650 bus., against 22,226,400 a year previous; corn, 19,956,450 bus., against 28,323,750; oats, 16,606,900 bus., against 18,484,100; kafirs, 1,800,700 bus., against 2,239,800; rye, 471,900 bus., against 558,800; barley, 2,324,000 bus., against 820,000; flaxseed, 3,000 bus., against 75,000; millfeeds, 20,180 tons, against 32,360; flour, 539,825 bbls., against 527,475. The total output of flour by Kansas City mills was 2,544,800 barrels.

Kansas Wheat Crop Saved.

Wheat harvesting in the southwest reached its zenith this week and the shortage of men to handle the great crop of Kansas produced a crisis. It looked for several days as if a heavy loss of grain would be suffered in the western and northern counties, but the danger was finally averted, in the main, by offers of higher wages and by the authorization of special trains by the Railroad Administration for harvesters from Kansas City and other labor centers. Originally the farmers intended to pay 50 cents an hour, with board and lodging. Rains delayed the harvest and checked the first movement of men to the fields. Then the wheat ripened suddenly and everybody wanted help at once. The wage scale began to rise and agents were sent out to enlist recruits, guaranteeing a refund of carfare. Sixty and 70 cents an hour became common wages. As much as $10 and $15 a day was paid in the western portions of the state where the harvest is still going on. According to the latest advices, the 229,000,000 bushel crop will be saved. Rains during the week were light, favoring the harvest. The most serious crop complaint was from southwestern Kansas, where grasshoppers caused some damage.

Cash Grain Markets.

Wheat—Receipts for four days were 10 cars, against 84 for the full previous week and 193 a year ago. The increase included a few cars of new hard and red from Oklahoma and a cleaning-up of scattered old supplies. The first offering of new wheat was on Monday, when No. 2 red sold at auction for $2.21, or 6c over the Government basis. At the same time old No. 2 was quoted nominally at $2.29@2.31. Later new No. 2 brought $2.22, the offerings going mainly to outside mills. At the close red wheat was generally 5@9c lower than a week ago, with No. 1 quoted at $2.28 and No. 2 at $2.22@2.28. Three cars of new No. 2 hard from Oklahoma arrived Thursday and sold at $2.31, or 16c over the guaranteed price. The same grade of old wheat was worth $2.43@2.45. Hard wheat closed generally at $2.48@2.55 for No. 1 and $2.3@2.50 for No. 2. These prices were 1 higher to 14c lower than a week previou Millers and shippers were the buyers. Ne hard tested 58½ lbs. a bushel, with $12.5 to $13.50 per cent moisture. New re showed about the same weight, but slight less moisture content. The first car of ne red was docked 4 per cent on account oats mixture. Millers here declare they a selling flour for deferred shipment exce on the basis of Government prices. Ir mediate flour business is light. The wo has been given out that northwestern mi ers, who will need some new wheat in t southwest before the maturity of the spri wheat crop, are averse to paying any co siderable premium. As the bulk of t southwestern harvest has been accor plished, and as cars are in good supply, big movement of wheat is likely duri the last half of July, unless rains again b come too numerous. Local stocks of whe decreased 37,000 bus. for the week, to 25 000 bus., against 41,000 a year ago.

Corn—Receipts, 150 cars, against 230 week ago and 102 a year ago. In both ca corn and futures there were strong ma kets. Futures made new high records a cash corn reached the best level since Se tember. Demand, however, was limited the choice samples, and low grades went elevator men. No. 2 yellow scored t best rise, closing 4½@5c higher, at $1.8@1.87. The final price of No. 2 mixed w $1.82@1.84, or 1½@3½c higher. No. white finished 2@3c up, at $1.89@1. Seventy thousand bushels were deliver on Kansas City July contracts. Stocks creased 42,000 bus., to 330,000 bus., agai 1,217,000 last year. Record prices for ho belief that old corn supplies in all positio are small and the disappointing estima on the new crop were the bull influenc The weather conditions were very fav able for the growing crop in the southwe

Oats—Receipts, 49 cars, against 103 week ago and 19 a year ago. Very li sympathy with the corn strength w shown by oats, because the new crop mo ment is too near and the old reserve is large. Shipping sales here, however, exceeded arrivals, as reflected by a decre of 76,000 bus. in stocks to 706,000 bus. 2 white closed 1½@2c higher, at 71½@ No. 2 mixed, unchanged to ½c lower, 69@70c; No. 2 red, unchanged to ½c high at 70@71c. Some of the shipping orc came from Texas, where it was said t dealers had sold short and had been dis pointed in the early movement of Te oats.

Kafir and Milo—Receipts, 49 cars, aga 18 a week ago and 13 a year ago. Increa offerings accounted for decline of 10@25 kafir and 6c to 22½c in milo. Clos prices, per cwt., were: No. 2 white ka $3.20@3.22½; No. 3, $3.16@3.20; No. 2 m $3.20@3.22½; No. 3, $3.17@3.18. Shipp and local demands were good on recessi Stocks decreased 11,000 bus., to 46,000. crop damage reports were heard.

KAFFIR CORN
MILO MAIZE GRAIN
B. C. CHRISTOPHER & CO.
KANSAS CITY, MO.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for six days ending July 3 were: Wheat, 417,236 bus.; rye, 34,285 bus., and 150,000 bus. of barley.

Ambrose B. Commer, secretary of the Commercial Exchange, is located with his family at Trevose, Pa.

F. W. Behrens of the Commercial Exchange has gone with his family to their cottage in the Pocono Mountains.

John K. Scattergood, of S. F. Scattergood & Co., grain dealers, is spending the summer with his family in Atlantic City.

Louis J. Graffe, ex-president of the Commercial Exchange, has gone with his family to Quebec, Canada, where they will spend the balance of the summer.

At a meeting of the Commercial Exchange held on Tuesday last, it was decided to close the rooms from Thursday evening, July 3, until Monday morning, July 7.

Receipts of flour and grain for the month of June were: 728,207 bbls. flour; 2,592,524 bus. wheat; 276,938 bus. corn; 1,880,787 bus. oats; 1,405,916 bus. rye, and 191,503 bus. barley.

Receipts for four days ending July 3 were 700 bbls. and 12,302,956 lbs. of flour in sacks; 4,129 bus. wheat; 6,951 bus. corn; 298,036 bus. oats; 18,474 bus. rye; 204,725 bus. barley; 12,500 bus. malt, and 160 tons feed.

C. E. Remey, grain dealer of Boston; Robert Andrews, grain dealer of Allentown, Pa.; J. Cains, representing Taylor & Bornique Co., Chicago; W. S. Jewell, Lynch, Md., and Emerson Richards, Atlantic City, were visitors on 'Change during the week.

John Pugh, for over 55 years engaged in the grain business at Conshohocken, Pa., celebrated his eighty-first birthday on Wednesday, July 2, and when he appeared on 'Change was given a rousing reception, the members wishing him many happy returns.

H. D. Irwin, second vice-president of the Food Administration Grain Corporation, addressed a meeting of the grain trade on Tuesday, July 1, in which he suggested certain plans for facilitating the issuance of permits on shipments of grain from the West and nearby points.

Stocks in public warehouses July 1, 1919, were: Flour, 185,587 bbls.; and on July 1, 1918, 123,182 bbls.; 836,525 bus. wheat, compared with 16,785 bus. on July 1, 1918; 36,739 bus. corn, as against 68,937 bus. on July 1, 1918, and 1,416,208 bus. oats, compared with 1,011,671 bus. the same time last year.

President C. Herbert Bell of the Commercial Exchange has appointed the following committee to attend the annual convention of the National Hay Ass'n, which meets in Detroit, Mich., on July 16, 17 and 18 next: Chairman, N. Holland; John Kilpatrick, William H. Hobson and Jos. F. Huey.

Exports of flour and grain for the month of June were: 365,544 bbls. flour, compared with none the same time last year; 1,548,486 bus. wheat, against 90,887 bus. in June last year; 107,775 bus. corn, compared with 634,030 bus. in June last year; 846,465 bus. oats, against 1,685,506 bus. same time last year; 1,395,065 bus. rye and none in June last year; 60,000 bus. of barley, with none shipped in June, 1918.

CINCINNATI.

George Mosbacker, Correspondent.

Will G. Stueve, John Collins, Jr., Lew McLaughlin and Frank Palmer attended the Indiana Grain Dealers' meeting at Indianapolis, Ind., last week.

State Secretary of Agriculture Shaw estimates that Ohio's wheat crop this year will exceed 50,000,000 bushels for the first time in history. The crop will have a value of $113,000,000 on the basis of the fixed price of $2.26.

The Cincinnati Grain and Hay Exchange followed the action of other grain and stock exchanges throughout the country and adjourned over July 4th and 5th. Hay trading at the plugging tracks was also suspended.

A new high record was established for shelled corn here the past week when a sale of No. 2 white at $1.94 was posted. The premium for top grades of white was extended 5c over yellow and nearly 7c over mixed. Receipts of all kinds were light, totaling only 38 cars for the four trading days.

According to the latest report issued by the United States Bureau of Labor Statistics, Cincinnati ranks third among 50 leading American cities in the relative low retail cost of 50 principal food products—and even with this enviable record prices for foodstuffs in Cincinnati have increased 89 per cent since 1914. A survey of the statistics of the country at large shows that the total retail cost of a given quantity of 40 principal food articles in Cincinnati is $11.13, as compared with an average cost of $11.34 in the Upper Mississippi Valley section and a total of $11.68 in the country as a whole.

S. S. Reeves, traffic manager of the Grain and Hay Exchange, notified the members of the trade the past week of the decision of the U. S. Railroad Administration to lower various traffic charges. The reduction in car demurrage charges will become effective July 20, 1919, and will be on a basis of $2 per day for the first four days and $5 for each succeeding day. He also announced that the new bills of lading will become effective September 8 instead of August 8, in order that all shippers using forms printed by themselves can arrange to comply fully with the provisions of the new rulings. The committee for handling the permits on grain shipments to Cincinnati will consist of John A. Morris, chairman operating representatives; O. S. Lewis, traffic representatives, and Miles Todd, U. S. Grain Corporation representatives. The committee has thus far not received the plans to be put in force in this market, but pending the final instructions no permits will be necessary to make shipments.

The expected early arrivals of new wheat in this market had a depressing effect on prices of old the past week, and though a sale of No. 2 red on auction at $2.37½ was recorded, it was very doubtful if the same figures could be realized for a similar car. Only an occasional spot offering for immediate shipment found a sale. Threshing operations are reported as quite general in nearby sections and while new wheat grading No. 1 will probably command a premium for first arrivals, a decided break in present values of old to conform with new crop is generally anticipated by the trade.

The advertisements of Cincinnati's hay merchants contained in the pages of this week's issue of the Price Current-Grain Reporter is a concentrated effort to make business and to create and increase the general prominence of Cincinnnati as a grain and hay market. The local trade wants the business, and are making it known through a trade paper, which asks recognition for its advertisers upon the merits of its publication. The liberal use of "space" must forcefully suggest to shippers and buyers in attendance at the National Hay Association convention that Cincinnati is in the business and on the map and that a National Hay Association meeting can be arranged here with less time and expense to delegates than any other convention city in the country.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

Dan McKinnon, manager for Thomson & McKinnon's Minneapolis office, left for Winnipeg Saturday.

L. A. Howard, of L. A. Howard & Co., left Saturday to spend a month's vacation at Alexandria, Minn.

W. A. Poehler, of the Pacific Elevator Co., returned last week from a vacation spent in Northern Minnesota.

The Delano (Minn.) Farmers Co-operative Elevator Co. opened bids today on the construction of a new elevator. A certified check for $300 was required with all bids.

A farmers co-operative company has been formed at Stephen, Minn., with T. Thorkildon, president, S. D. Lincoln, vice-president, and D. Eastburn, secretary. It is planned to erect a 50,000 bushel elevator.

C. E. Lewis & Co. announce the withdrawal of John E. Fritsche from the firm and the inclusion of Leonard S. Allen as one of the partners. Mr. Fritsche has made no announcement of his plans for the future.

The underpinning of the Farmers Elevator Co.'s elevator at Ruthton, Minn., started to give way last week and the stockholders are considering the erection of a modern cement elevator at a cost of $20,000.

The new grain pit on the trading floor of the Minneapolis Chamber of Commerce association has been completed and the telegraph offices have been moved to the center of the trading room. Other work is being rushed.

The Producers Elevator Co. has been incorporated with a capital stock of $2,000 by C. C. Chambers and J. F. O'Meare of St. Paul and R. T. Hart and others of Withrow, Minn. The elevator will be operated at Withrow.

J. H. Riheldaffer, formerly Minneapolis manager for McCabe Bros. Co., Duluth, is now associated with R. B. McClean, Winnipeg, as the R. B. McClean Grain Co. J. R. C. McCrea succeeds Mr. Riheldaffer as manager of the MCabe Bros. office.

Cash Wheat. The demand for choice wheat remains good and prices are holding firm. Lower grades are still in rather sluggish demand and show a tendency to sell lower. Local millers were the the best buyers and took care of the bulk of the daily offerings. Orders from outside mills were chiefly for top grade wheat for mixing. The demand for winter wheat was slow on account of the lack of definite promise as to the quality to be delivered on contracts. Offerings were quite heavy. The movement of old crop spring wheat is fair and will probably continue so for a week or more. Mills here are putting aside some good old crop wheat for mixing purposes. The demand for durum wheat is slack and featureless.

The new crop is quite badly infected by black rust and unless the weather conditions are entirely favorable the trade looks for another bad rust year. Reports are coming from all over the Northwest. Some of the new crop wheat is close to maturement, but the heads are running very uneven and small yields are looked for in light soil sections.

Corn. The demand for lower grade corn was slow for a time, but today it was good and prices advanced sharply, some sales indicating 15c advance over last week's values. Top grades were in fair to good demand and today advanced 2@3c. Receipts are moderate.

Oats. The market for oats holds unchanged in character. There is a good demand for the selected offerings and for the poorest oats the demand is rather slow on the average. Prices are based on the September future with No. 3 white selling at 1½@2c under. No. 4 white oats sell at 1@4c less. Crop news spotted. Many fields are heading out very short.

Rye. The deman for rye is good and elevator companies are the chief buyers. Deliveries on contracts were small, much smaller than expected, about 330,000 bushels. Millers were fair buyers of choice rye. No. 2 sells at 1½@2c under September, No. 3 at 1@1½c less.

PEORIA.

L. L. Eckard, Correspondent.

Oats receipts were 2 cars with no sales, although 70½ was bid for 2 white.

Wheat harvesting in this vicinity will be completed by the middle part of the week. Threshing in some parts will also start before the end of the week. Growing corn doing exceedingly well considering the late start.

The Turner-Hudnut Co. and Rumsey Moore & Co., two well known grain firms of Peoria, have consolidated their offices on the fourth floor of the Board of Trade building. N. R. Moore will be associated with Turner-Hudnut Co. in official capacity, and will personally supervise their business.

Thomas O'Loughlin, manager of the Rumsey, Moore & Co. Futures Department, will continue with the new firm and all open trades and funds as margins were turned over to Turner-Hudnut Co. July 1st. W. H. Perrine, president and H. A. Rumsey, vice-pres. of Rumsey, Moore & Co., will also have an interest in Turner-Hudnut Co.

According to rumors the past few days there is a possibility of the large Douglas company plant moving to Peoria. This company uses from 20,000 to 22,000 bushels of corn per day manufacturing starch, stock feed and corn oils for cooking and table use. Representatives of the company were in Peoria two weeks ago looking over the ground, but to the present date their decision has not been made public.

Messrs. Turner-Hudnut Co., being one of the oldest and strongest grain firms in central Illinois, has, in the past devoted their energy largely to export and domestic shipping, but under the new arrangement will continue a general receiving and consignment business directed by Robert S. Turner, a wide-awake hustler with years of experience in the terminal market. R. S. Turner will also be in this department, assisted by J. D. Canty, who has handled their cash grain on "Change" for years.

The Peoria corn market was very strong at the close Thursday, for receipts were light with only 29 cars of corn. The demand was very good from local industries and the market showed an advance from 2 to 2½ cents per bushel. No session was held Friday and Saturday, in accordance with the actions of other markets Peoria voted to close. Corn sales were as follows: 2 white, $1.88½; 2 yellow, $1.86; 3 yellow, $1.86; 4 yellow, $1.85; 6 yellow, $1.83; 2 mixed, $1.86; 6 mixed, $1.83; sample grades, $1.75 to $1.82. Consignment notices indicate a light run of corn for the next few days.

ST. LOUIS.

E. E. Reeves, Correspondent.

J. L. Burns, of Troy, Mo., who had a case in the Federal Court here last week, was on the floor of the Merchants Exchange Thursday, looking after some trades he had placed through Tommy Lahey, of T. E. Price & Co.

Ed. F. Manglesdorf, of E. F. Manglesdorf & Bro., seed dealers, of Atchison, Kansas, has opened a branch office in St. Louis on Main & Victor streets, and is an applicant for membership in the Merchants Exchange.

E. M. Kelley, president of the Millers National Federation, who also is president of the Liberty Mills, of Nashville, Tenn., came to St. Louis to spend the Fourth, and was among the visitors on the floor of the Merchants Exchange Thursday.

The first car of new Missouri wheat arrived July 1 from Charleston, Mo., consigned to the John Wahl Com. Co. It graded No. 2 red, 58 lb. test. It was auctioned off by P. P. Connor and brought $2.41, which was 3c under the market for old No. 2 red.

Phil. Rothrock, federal supervisor of grain at St. Louis, will tender his resignation to become associated with the Graham & Martin Grain Co. Mr. Rothrock is well and favorably known to the grain trade in the country and will be a valuable acquisition to his new associates. He has filed an application for membership in the Merchants Exchange and will assume his new duties July 15.

The "ship-by-truck movement" which has been started by the Firestone Company, is finding great favor with wheat growers in this vicinity, and promises to develop into a big factor in the moving of the grain crops, as it will relieve the overburdened railroads of a large amount of the work of bringing the grain crops to market, and will prove an important adjunct to the Federal Barge Line.

The first car of new wheat of the 1919 crop was received last Monday by Geo. J. Schulte & Co. As customary with the first car of new wheat, it was sold at auction by P. P. Connor, the veteran auctioneer of the Exchange. The bottom of the car was damp and heating. It graded red winter sample grade and sold for $2.18. The arrival of this car caused a drop of 2c in the cash wheat market. No. 2 red dropped from $2.44 to $2.42. This car was purchased by G. A. Veninga & Co.

Bert Lang, vice-president of the Grain Corporation, when asked in regard to the restrictions on the marketing of the wheat in the district near Belleville, Ill., which was affected by the Australian take-all, said that his department had no instructions to follow wheat in this district to its destination as it had last year, but that Dr. Leightly, agronomist for the Department of Agriculture, had said that this wheat would be taken by the Government to prevent contamination of other wheat.

At the special election held Thursday, July 3, for the purpose of amending paragraph 7 of section 2 of rule VIII, members of the Merchants Exchange voted 3 to 1 against the proposed amendment. The present rule, which will remain unchanged, reads as follows: "Regular contracts for oats delivery on and after Jan. 2, 1915, shall, unless otherwise mutually agreed between the contracting parties, be for 'Contract' oats, which shall comprise No. 1 white oats, No. 2 white oats, standard oats or No. 3 white oats, in whole or in part."

An announcement on the bulletin board of the Merchants Exchange Thursday instructed grain dealers to avoid bidding for wheat to arrive until Monday, July 7, when the regulations will be put into effect and the rules strictly enforced. These regulations were suspended while the Government had charge of the wheat situation. At a meeting of the to-arrive committee last Monday, it was decided to put these rules and regulations into effect, beginning Monday. Geo. C. Martin, Jr., chairman of the to-arrive committee, tendered his resig-

NEW WHEAT

We are prepared to handle heavy consignments of the new crop to the complete satisfaction of shippers, and in conformity with the desires of the United States Wheat Director.

We are in the market for good HAY, OATS and BARLEY at all times.

Edward A. Smith, Mgr. Hay Dept.

BURLAP BAGS
Bosworth Bag Company
MEMPHIS, TENN.

nation as chairman and Nat. L. Moffitt was appointed to succeed him. Mr. Martin is traveling for his firm in the grain belt.

The Missouri Court has upheld the "Honest measure law," which was enacted by the St. Louis Board of Aldermen at the request of former Commissioner of Weights and Measures Henry L. Weeke, and John Dower, Super. of Weights of the Merchants Exchange. In its decision the Court holds that "It is entirely within the discretion of the city government to provide against imposition they thought might occur in the sales of produce in short measures to the ultimate consumer, even where the original purchaser of the short weight package was aware that it was not full measure. Their discretion and judgment in providing against possible fraud in the matter, whether sound or otherwise, is not for the court to determine."

John L. Edmiston, in charge of the Grain Inspection Department of the State of Illinois, at East St. Louis, returned Thursday from a meeting of the Board of Warehouse Commissioners, at Springfield, and announced that the inspection fee on grain would be changed Aug. 1st. Inspection fees for wheat, corn and oats on and after Aug. 1, will be $1 per car instead of 90c as at present. Inspection fees on rye and barley will be 75c per car an advance of 10c from the present rate. All duplicate certificates asked for after the original and duplicate have been furnished, will be charged for at the rate of 10c each. The Commission made some changes on the grades of barley, but these changes have not yet been published. The question of the inspectors delivering samples of the grain on the grain exchanges was brought up, but any order issued on that subject will apply to Chicago, and not to St. Louis. The sampling at St. Louis will continue under the direction of Charles Wilson.

LOUISVILLE, KY.

Arthur W. Williams, Correspondent.

Grain and feed houses, mill and elevators were closed from July 3 to July 7, starting with the night of the third. As Saturday is generally a half holiday business suspended in Louisville, with the banks and newspapers about the only organizations showing any activity.

The Louisville mills got started again today after a layoff of several days while waiting for new wheat. Early last week the first arrivals came on, whereas the mills were besieged with load after load of wheat on large trucks during the end of the week and this week.

Fine weather during the past ten days has enabled wheat growers to cut and harvest nicely. In some sections of the state harvesting is being done at night under search lights. A considerable amount of threshing has already been done. Mills are paying $2.13 for wagon wheat.

Corn and oats are in fair demand, with receipts of corn fair, but of oats heavy. Offerings of oats ars also heavy. The demand for corn is running almost entirely to white milling corn. Prices are strong and showing signs of further advance. Mills are busier on corn grinding than for some time past. Elevators are not very busy.

Capt. R. O. Gathright, who for several years operated a large mill at the Falls of the Ohio, near Louisville, died last week at the age of 79 years. Capt. Gathright served through the Civil War with the Confederacy and for a time with Gen. Morgan. The mill burned fifteen years ago when struck by lightning.

The Central Kentucky Millers Ass'n at a recent meeting in Lexington, Ky., elected W. B. McKinney, Stanford, president; Nelson Wolcott, Lexington, vice-president, and John D. Allen, Lexington, secretary-treasurer. J. W. Morrison, Lexington; H. M. Renich, Paris; M. T. McEldowny, Winchester; William Anderson, Danville, and Allen Zaring, Richmond, are members of the Executive Committee.

CHICAGO.

Among recent visitors on the Chicago floor were E. E. Buxton, Memphis and D. A. Mowbray of Creston, Ill.

All the exchanges of the country were closed July 4 and 5 giving the employes an opportunity for a three-days' outing.

Newly elected members of the Chicago Board of Trade are Louis C. Dillon of Culver, Ind., and William Tomlinson of Gary, Ind.

L. A. Bowman of the Peoria grain trade, who recently covered Knox, Stark and Peoria counties, reports an improvement in the oats condition.

Charles Requa, prominent in the grain trade, was elected foreman of the July grand jury which was impaneled this week by Chief Justice Marcus Kavanagh of the Criminal Court.

July 7 was the date of the first arrival of new wheat to this market as compared to July 6 last year. Sales ranged from $2.25@2.29, and the wheat tested 60 to 60½ lbs. with 12.60 to 12.80 per cent moisture, grading No. 1 hard. James E. Bennett & Co. received the shipment.

"Herb" Mayer of Mayer, Holbrook & Co., back from a trip through Illinois and Missouri country points, finds the oats crop good and the wheat field enormous with dockage reductions to play an important part. Illinois wheat shipping trade has not been accustomed to the latter but is resigned to such losses which will, however, be more than made up for in the increased farm production and guaranteed prices.

A. K. Taylor of Taylor & Bournique states that in a comparatively recent Ohio and Indiana trip a spotty oats condition was prevalent. His wide spread reports from their several branch offices likewise suggests that much of the new oats is heading out short. The analysis of these factors however and rumors based therein relative to the reduction of oats yield is not in Mr. Taylor's opinion sufficiently definite to bear close scrutiny.

A recent Price Current-Grain Reporter announcing Wegener Brothers, a new Chicago grain firm with an old established clientele will be recalled. The details of the business have fast shaped up and "Pete" Eschenburg and his son, M. W. Eschenburg, will be associated with the Wegeners. These names are too familiar with the personnel of the Chicago grain commission business for the past 25 years to require any further introduction.

GRAIN CORPORATION GRAIN AND MILLING REPORT.

The weekly bulletin of the Food Administration Grain Corporation gives figures covering the wheat and wheat flour movement throughout the United States for the week ending June 20, as follows:

	1919.	1918.
Receipts from farms, bus.	2,320,000	1,695,000
Stocks in mills and elevators	43,234,000	14,321,000
Decrease for the week.	6,399,000	4,278,000
Flour made, week June 13, bbls.	1,670,000	1,383,000
Barrels made July 1 to June 13	119,605,000	113,973,000

The law of rotation in the Federal Trade Commission has made Gov. John F. Foot chairman of that body. Gov. Foot was at one time governor of New Jersey and also judge of the Supreme Court of that state.

PHILIP ROTHROCK RESIGNS.

Philip Rothrock, Division Federal Grain Supervisor of the Bureau of Markets at St. Louis, has designed to go into the cash grain business. He will be connected with Graham & Martin at St. Louis. No successor has yet been appointed to fill the vacancy thus created. Mr. Rothrock has been connected with the Department of Agriculture for the past ten years, having joined the staff of the Grain Standardization at Washington at that time.

Hay Trade at Houston, Texas.

To facilitate the handling of grain at Houston, Texas, a movement has been started to establish a hay and grain inspection bureau there. A committee of the Chamber of Commerce has been appointed to investigate the situation and report to the dealers.

Threshermen in Jackson County, Ind., have been demanding 9c a bu. for wheat; 12c for rye and 5c for oats.

Trade Mention

The Union Iron Works, Decatur, Ill., with offices in several important grain centers, state they are handling the largest business of their history in equipments and supplies for elevating, conveying and power work in elevators, mills and feed plants. A recent issue of this paper commented on their Snap Corn Separator, a new machine coming into natural popularity in the South. The machine only added, however, to a line already complete, as those making increases in their plant equipment or erecting new elevators are discovering this year. The Union Iron Works prides themselves in maintaining large stocks so that prompt shipments can be made, taking care of the unfortunate buyer who waits too long and also those equally unfortunate in suffering breakdowns. If you are in either class, send them a wire and we are confident you will get delivery the same day or very shortly if your needs are at all special. That is the kind of business the Union Iron Works, Decatur, Ill., are noted for.

A CONVENIENT MACHINE.

Unique in the grain conveying equipment of the country is the Portable Car Loader manufactured by the Maroa Mfg. Co., Maroa, Ill., which handles ear corn and loose grain of all descriptions without the least injury to the grain. The loader may be used two ways. It will handle grain directly from farmers' wagons to the railroad cars in instances. where there is no elevator located at a station, thereby probably saving a long haul to some station elevator. Then too there are many of these loaders in continuous daily use at many country elevators for unloading the grain from the farmers' truck or wagon, as the case may be, directly to the elevator bins and then later on loading cars, all at an average working capacity of 1,200 bus. an hour. The entire process is accomplished without any scooping, nor does the grain pass through the fan indicated in the engraving herewith; it is simply carried on by the air from the fan in such manner that it is guaranteed to do its work without injury to the most tender grain.

The Portable Car Loader may be readily termed a safe bit of insurance, for if listed as part of the live equipment of a grain dealer the fire hazard need have no terror for him; for should a fire destroy his elevator it need not also cripple his business during adjustment period. He will be enabled to hang out the "Business as Usual" sign and have the Portable Car Loader take care of incoming crops. If desired the Loader may be equipped with a grain cleaning device. It can be bought fully equipped with a Cushman Engine also, mounted conveniently on the same truck. Write to the manufacturers and find out more about the "something different" method of handling the harvest.
HAY ISSUE

MAYFIELD IN CASH GRAIN.

Mayfield & Co., 513 Postal Telegraph Bldg., Chicago, Ill., with firm members who have been identified with the Chicago future market, now announce a cash grain department. George M. Brunfleck, a cash grain man lately with W. P. Anderson & Co., will handle the Mayfield cash grain trade. Our readers will recall reference in this paper to the organization of this firm some time ago by Messrs. McNamee and Mayfield, both of whom have been identified with the speculative grain trade of the Chicago market for many years. It is therefore the natural outgrowth of their affairs and will take full advantage of the enormous crop movement that will soon start to see their interest in cash grain as well as futures. Proper floor representation with the Chicago cash grain crowd has been arranged and the company solicits consignments and sales to arrive. On the present grain movement, and with big business in sight for all, it is the hope of these men to participate in handling cash grain as well as futures and with their full knowledge of the business and excellent financial arrangements, there is no reason why they should not do so.

"Milt" Crowe at Frankfort.

Recently a PRICE CURRENT-GRAIN REPORTER mentioned the fact that Milton Crowe of Buffalo would soon be back in his old Indiana territory on his own hook; and we are now glad to announce that he has opened an office at Frankfort, Ind., and will continue his former office at Piqua, Ohio. A general brokerage business at both places similar to his former trade, several years back, before "Milt" went to Buffalo, will be his game, and we need not hint to his long list of old friends and customers that he will handle it right. We might suggest that on the present crop movement, with its uncertainties and high prices, the assistance in marketing crops of a man with his broad experience should be sought by all.

The wheat midge or red weevil is reported in Ohio wheat fields this year in some localities as reported in 1918. The midge attacks the kernels but no serious damage is anticipated this year.

Wheat Quality Will Be Poor.

As we have indicated in our former letters, the quality and yields of this crop of wheat will be disappointing. In many important sections of the Central West, yields will be hardly half of last year, though increase in acreage will make up some of the loss; it is a case of rank straw and small head. There is considerable damage to quality by too much rain, generally lodging, blight, red and black rust and scab. Spring wheat in this territory is almost a failure but gives fair promise in the Northwest. Low grades will predominate, especially if there is much more rain; bad storms are predicted from July 6th to 9th. It is impossible to predict what the discounts of the low grades will be; we must wait until wheat begins to arrive freely so as to see what its condition and mixing value is and the proportion of low grades to the No. 1, No. 2 and No. 3.—*W. H. Perrine & Co., Chicago.*

The weekly report of the American Steel & Wire Co. says that grasshoppers are doing considerable damage to alfalfa and vineyards in California while in the central states the alfalfa is being damaged by cut worms.

We carry large stocks of feed—prompt service. Manufacture stock feed of quality for Horses, Dairy Cows, Calves, Hogs and Chickens.

VAN DUSEN HARRINGTON REPORT.

The Van Dusen Harrington Co., Minneapolis, in their crop report for July 2 say that during the previous week the weather conditions were favorable for the crops of Minnesota, South Dakota, and eastern half of North Dakota. There was little rain and the weather was hot and windy. This dried, to a great extent, much of the territory that has too much moisture.

In northwestern North Dakota good rains fell. One or two days the temperature was very high, accompanied by hot winds which have no doubt had some effect on small grain. Southwestern North Dakota and the entire state of Montana are badly in need of rain. In Montana many streams which have in the past supplied water for irrigating purposes in the valleys and basins have almost dried up. With the exception of a very few localities the state will have one of the lightest crops in its history. In many districts throughout the Northwest wheat is all headed. In the Eastern and Southern territory is in an exceptionally good shape and with the forcing weather we have had recently, harvest will be about as early as the average.

Cereal Values Require Readjustment.

Taking current cash prices for corn and rye and the Government guaranteed price for wheat (ignoring existing premiums), we find that in the Chicago market wheat costs $75.32 per ton; corn, $65.00; and rye, $52.15. If the hungry Scandinavian, the starving German or the thrifty Dutch, accustomed to rye bread from infancy and preferring it to wheat, will pay a premium for wheat of 44 per cent; if the farmers in this country will sell their rye and use corn at a price 25 per cent higher, when for feeding purposes rye equals corn, then current values are right, otherwise a sharp readjustment is due.—*Blodgett-Holmes Co., Janesville, Wis.*

At the request of the C. & O. R. R. the Cincinnati district freight traffic will consider the proposition of establishing milling and transit arrangements car lots originating in Illinois and reaching the C. & O. for connecting lin Through rates and routes by way Cincinnati and Louisville with stops Huntington, W. Va., when product destined to Atlantic Coast points.

NEW INSPECTOR AT DES MOINES.

Chas. F. Lias, assistant chief grain inspector of the Chicago Board of Trade, has been appointed chief grain inspector of the Des Moines Board of Trade and will assume his duties about the 15th of July. Mr. Lias has had a thorough training in his chosen field and about 16 years ago was appointed inspector and registrar of flax seed of the Board of Trade of the city of Chicago to succeed the late S. H. Stevens. He was chosen for this position from six candidates, which proved his worth and he is considered an expert judge of flax seed. Later he was appointed assistant chief grain inspector of the Board of Trade and through his careful and painstaking work has gained the confidence of the entire trade. Mr. Lias is a native of Pennsylvania, having been born in 1868.

The inspection department of the Des Moines Board of Trade will be equipped with a modern, up-to-date outfit which Mr. Lias has purchased from the Seed Trade Reporting Bureau of Chicago and comprises two 6-burner testers, a mixer, complete grading equipment triers, dockage sieves, etc.

New York Oats Market.

Oats receipts at New York last week were 1,046,000 bus., being for four days only, and indicating that a large volume has been in transit for export use, and probably a liberal amount still running. Stocks will, undoubtedly, show a further increase at this port. New business for export, however, has been disappointing, and there are rumors that the business may be curtailed through lack of available tonnage, as the Wheat Director will no doubt require an unusual amount when that crop starts to move.

The new record prices made for corn have, naturally, influenced those for oats also; but there has been additional strength because of a growing and somewhat well-founded belief that more or less deterioration has occurred, and the outcome of the growing crop will reflect a much smaller yield than was anticipated. Spot oats, however, while 1½ to 2c higher, based on the advance of the future markets, have ruled dull, and local dealers seemingly are well supplied. Cash transactions for the week unusually small, and there has been a further decrease in premiums asked.—*L. W. Forbell & Co., New York City.*

BROOM CORN.

The period for planting is drawing to a close, says *The Broom Corn Review,* and from now on will no doubt be limited.

Marketing continues light owing to the wheat harvest, and will so continue until farmers can and are willing to make deliveries. Prices paid show the same relative mark as heretofore, ruling usually from $65 to $100, with occasional lots commanding better values. Some farmers are still asking $125 to $150 and above.

No change is noted in the Wichita market, prices ruling principally from $75 to $250, the cheaper end of the holdings offered from $75 to $100, the bulk at $85 to $100, with better stock at $120 to $140 and upward according to grade, with Lindsay stock around $250. In Central Illinois some little corn has moved at $150@200. Growing conditions are excellent.

Beef Cattle to Advance.

Bankers in the grazing districts have advised cattlemen to stop sacrificing their cattle and to hold them over until fall; therefore, there will be no more sacrificing of beef cattle for the summer, and as the Texas range cattle have all been marketed, beef will continue to advance from now on. There is but one side to meat foods, until Europe is able to help themselves by their own productions. When that will be, the future must answer. For the present, all the United States can produce in the way of food will find an anxious foreign demand at high prices. Shortly the blockade with Germany will be raised and a full realization of the opinions which we have been expressing for months will be had. We have said many times that Germany could take all the lard we have in stock. We believe that as soon as the blockade is raised, every pound of lard in this country will be taken at once by Germany.—*W. G. Press & Co.*

SAMUEL HASTINGS CO.
RECEIVERS—SHIPPERS

CAIRO, ILL.

The first wheat reported marketed in Oklahoma came from Frederick, Tillman County, to Oklahoma City and sold

South Dakota Rye.

In South Dakota the rye crop is th best in the territory. Some of the co respondents of Van Dusen Harringto Co., Minneapolis, advise that it ma average in their districts from 25 to 3 bus., while in others it is estimate from 10 to 15 bus. In Minnesota an eastern North Dakota the crop, as rule, is thinner and estimates ar around 15 bus. average. In the weste part of North Dakota the hot wind have damaged the rye considerably a it was in a stage susceptible to th heat.

Application for wheat handlers licenses should be made at once to zon agents if the licenses have not alread been delivered. All new institution which may not be upon the zone agent records should make applications a once.

BRITISH BREAD SUBSIDY.

A "White Book" recently published by the British government has given the history of the food side of the war from the English point of view, up to March 31, 1918. The trading account shows that the purchases of frozen meat between September, 1914, and March 31, 1918, amounted to £133,069,740. The bulk of the supply was issued on repayment to the War Office, Admiralty and Allied governments, but considerable quantities were sold to the civilian population and on these a profit of £1,264,767 was made.

The bread subsidy, which came into operation on Sept. 17, 1917, falls under two main headings—(a) the amount by which the cost of cereals imported by the government exceeds the price at which they are sold to millers and (b) the amount by which the price paid by millers for home-grown and imported cereals, together with the cost of milling, including millers' profits, etc., is in excess of the fixed price at which the resulting flour is sold by them to bakers.

It appears that it was not possible to ascertain the exact cost of the subsidy, because of the impossibility of keeping separate the identity of those cereals destined for the loaf and those destined for other purposes, but the estimated cost for the year to Aug. 31, 1918, was considered to be £40,000,000 ($200,000,000), subject, however, to a saving to arise under the Wheat Executive pooling arrangements.

The trading accounts of the Ministry of Food show that during 1917-18 the purchases, including a reserve for insurance, amounted to £65,703,660, the sales to £46,278,570, and the stocks in hand at the end of the year to £20,974,116, while the general administrative charges, including such items as rationing and propaganda expenses, were £1,415,663. The net outcome on the trading accounts is a profit, or a reserve for contingencies carried forward to the next year's account, of £133,363.

There was a loss of £18,967 on vegetable preservation. The Food Production Department has obtained authority for the establishment of a large number of vegetable drying stations, a considerable demand for the product from the army having been anticipated. This demand did not materialize. The Central Live Stock Fund, which arranged for the pooling of all costs of distribution and administration in order to insure the equitable distribution of meat, showed a net deficit of £453,429.

The sugar supply trading account from August, 1914, to March 31, 1918, shows an expenditure of £152,745,927, and a net profit of £6,668,993, equal to about 4½ per cent on the turnover.

Dealing with the operations of the Food Production Department, the Auditor General states that the trading accounts and balance sheets furnished to him for the year 1917-18 showed that the total net cost of various trading schemes undertaken by that department amounted to more than £1,000,000. There was a very heavy loss on motor tractor plowing, the net cost borne by the department being £839,970

The selling force of the National Cash Register Co. in the past six months have sent in 669 suggestions, of which 122 have been adopted by the Company at Dayton for the betterment of their business. The campaign is stimulated by a contest between the various departments as well as rewarded by cash money prizes for particularly fine suggestions. An ever increasing volume of sales of the N. C. R. is reported by this very progressive firm.

Argentine Wheat Exports.

The following are the totals by weeks of the exports of wheat and flour from Argentina for the past three years:

Week—	1918.	1917.	1916.
July 13.....	3,157,000	307,000	1,568,000
July 20.....	5,429,000	497,000	1,656,000
July 27.....	7,568,000	223,000	1,696,000
Aug. 3.....	6,184,000	278,000	1,512,000
Aug. 10.....	2,823,000	88,000	368,000

The State Board of Agriculture of Missouri has adopted regulations requiring the testing of stocker and feeder cattle for bovine tuberculosis before leaving the yards, to conform to the new Federal regulations effective as of July 1. These regulations, of course, do not apply within the state but only for cattle moving interstate.

DISTRIBUTION OF CANADIAN WHEAT.

The *Monthly Bulletin of Agricultural Statistics* of the Canadian Dominion Bureau of Statistics, edited by Ernest H. Godfrey, F.S.S., contains in the April number an inquiry into or calculation of the quantities of Canadian wheat available for seed, home consumption and export. This table, reproduced below, deals with the wheat crops of the years 1915, '16, '17 and '18, covering the greater part of the war, and are for the years ending Aug. 31. In this table the final balance shown as "available for food" is obtained after adding the quantity imported and allowing for loss in cleaning, deducting grain of non-merchantable quality and deducting also the quantity exported. From the gross estimated production there is deducted 3 per cent to allow for loss in cleaning, while the deduction for grain of non-merchantable quality, which varies with the season, is that which is annually reported at the end of March by the correspondents of the Bureau. The imports and exports include wheat flour in terms of bushels. For seeding the allowance is the average of 1¾ bus. per acre.

In previous calculations the quantity allowed for food had been 6¼ bus., the assumed annual average per capita consumption which experience previous to the war had indicated as prevalent in Canada. But during the war the increasing scarcity and dearness of wheat, as well as the military importance of maintaining overseas supplies resulted no doubt in a lower consumption, and allowance is made because of the alteration in the standard of flour the milling extraction being considerably higher. Taking all these things into consideration, therefore, the assumed average per capita consumption during the war years and especially the later war years, is regarded reduced from 6¼ bus. to as low as 3.95 in a single year. Over the four years ending Aug. 31, 1919, the quantities available for food represent an average capita annually of 4.93 bus. The population for 1919 is estimated as raised to 8,600,000 by natural increase and by returning soldiers.

The figures for the season 1918-19 to show imports, exports and seed of 1¾ bus. per acre are of course estimated for the unexpired term. The table is therefore as follows:

DISTRIBUTION OF CANADIAN WHEAT CROP, 1916-1919.

	1915-16. Bus.	1916-17. Bus.	1917-18. Bus.	1918-19. Bus.	†4 years. Bus.
Gross production	393,542,600	262,781,000	233,742,850	189,075,350	1,079,141,800
Imports of wheat and flour	276,360	309,032	261,531	*300,000	*1,146,923
Total	393,818,960	263,090,032	234,004,381	189,375,350	1,080,288,723
Loss in cleaning, 3 per cent	11,806,278	7,883,430	7,012,284	5,672,259	32,374,251
Balance	382,012,682	255,206,602	226,992,097	183,703,091	1,047,914,472

Andrew Boss, vice-director of the Minnesota Experiment Station, has entire confidence in the future of barley. Only a small portion of the barley, he says, has ever been used for brewing purposes and now its value as a feed grain for beef making has become recognized, ample market is anticipated for that purpose as well as for use in the dairies. In some states in Canada barley is very successfully used as a hog feed.

Based on the testimony of the ... rector General of Railroads before t... House Committee last week another ... vance in railroad rates is about d... The Brotherhoods have not been hea... from.

COTTON REPORT.

The Crop Reporting Board of the Bureau of Crop Estimates, of the United States Department of Agriculture, estimates, from the reports of the correspondents and agents of the Bureau, that the AREA OF COTTON in cultivation this year (1919) in the United States is about 33,960,000 acres, as compared with 37,207,000 acres, the revised estimates of acreage in cultivation a year ago, being a decrease of 3,247,000 acres, or 8.7 per cent. The condition of the growing crop on June 25, was 70.0 per cent of a normal condition, as compared with 75.6 on May 25, 1919, 85.8 on June 25, 1918, and 80.3, the average condition for the past ten years on June 25.

A condition of 70.0 on June 25 forecasts a yield per acre of about 156.4 pounds and a total production (allowing 1 per cent from planted area for abandonment) of about 10,986,000 bales. That is, the final outturn will probably be larger or smaller than this amount according as conditions hereafter are better or worse than average conditions. Last year the production was 12,040,532 bales, two years ago 11,302,000, three years ago 11,450,000, and four years ago 11,192,000 bales.

Details by States follow:

*000 omitted. †Nine-year average. ‡Lower California (about 86,000 acres) included in California figures, but excluded from United States total.

The acreage in sea-island (including Mead) is about 65,000, compared with 279,000 last year; in Egyptian 97,000 compared with 79,000 last year. Forecast of production, sea-island (including Mead) 15,000 running bales, compared with 52,200 bales last year; Egyptian 45,000 bales against 36,200 bales last year.

Government estimates of acreage and yield, together with the percentage conditions for July during the past ten years, follow:

Year.	Crop, Bales.	Acreage, Acres.	Cond'n, Pct.
1919	10,986,000	33,960,000	70.0
1918	15,325,000	37,073,000	85.8
1917	11,285,399	34,925,000	70.3
1916	11,449,930	35,994,000	81.1
1915	11,191,820	32,107,000	80.2
1914	16,134,930	37,406,000	79.6
1913	14,156,486	37,458,000	81.8
1912	13,703,421	34,776,000	80.4
1911	15,692,701	36,681,000	88.2
1910	11,608,616	33,418,000	80.7
1909	10,004,949	32,292,000	74.6

For purposes of comparisons, the condition of the cotton crop in the United States monthly and the estimate yield per acre for a series of years are given below:

Years.	May 25.	June 25.	July 25.	Aug. 25.	Sept. 25.
1919	75.6	70.0	....	....	....
1918	82.3	85.8	73.6	55.7	54.4
1917	69.5	70.3	70.3	67.8	60.4
1916	77.5	81.1	72.3	61.2	56.3
1915	80.0	80.2	75.4	69.2	60.5
1914	74.3	79.6	76.4	78.0	73.5
1913	79.1	81.8	79.6	68.2	64.1
1912	78.9	80.4	76.5	74.8	69.6
1911	87.8	88.2	89.1	73.2	71.1
1910	82.0	80.7	75.5	72.1	65.9
1909	81.1	74.6	71.9	63.7	58.5
1908	79.7	81.2	83.0	76.1	69.7
1907	79.5	72.0	75.0	72.7	67.7

Owing to weather conditions the harvest came on rapidly in Kansas and there is a heavy demand for laborers who are receiving the highest wages on record, running to $5 and $6.25 per day.

News of the Country Grain Trade

ARKANSAS.

Conway, Ark.—The Jones Milling Co. has purchased a site on which it will erect a brick buildng for its grain and feed business.

GEORGIA.

Macon, Ga.—The Modern Flour Mills have started work on the foundation of a 100,000-bushel elevator. The capacity of the mills when completed will be 650 bbls. daily. It is expected to complete the elevator by Sept. 1.

Atlanta, Ga.—The Burrell Engineering & Construction Co. has been awarded the contract for the erection of a 200,000-bushel elevator by the Atlanta Milling Co. It will be constructed of concrete with steel reinforcements and its storage facilities will consist of 30 bins, each with 6,600-bushel capacity. The structure will cost $85,000.

ILLINOIS.

Dwight, Ill.—The Farmers Elevator Co. of Dwight have completed plans and arrangements for a modern brick office.

Clarksdale, Ill.—The Farmers Grain Co. of Clarksdale was reorganized by the stockholders, J. J. Achenbach, L. D. Hewitt, J. E. Larkin and Geo. Parrish, who sold their interests to the other stockholders.

Hermon, Ill.—The Hermon Farmers Elevator Co. was issued a license by the secretary of state to deal in cement. Capital stock is $50,000. Incorporators: H. E. Roberts, Jos. T. Tucker, J. E. Brown, F. K. Janvrin and Fred B. Rogers.

Elmwood, Ill.—Confusion in state directory listing (not The Price Current-Grain Reporter) prompts Chas. G. Kennel, manager of the Elmwood Elevator Co., advising us again that the Elmwood Co. bought the elevator of Wiley & Day about two years ago. They anticipate big business at this station on the present crop movement.

INDIANA.

Otterbein, Ind.—The Farmers Elevator Co. has increased its capital stock from $30,000 to $100,000.

Lebanon, Ind.—The Pike Elevator, owned by F. P. McComas of Frankfort, has been sold to W. B. Foresman & Co. of LaFayette, Ind.

Greensburg, Ind.—T. R. Anderson has resigned as manager of the Sandusky Elevator and has left for Vona, Ohio, where he has accepted a similar position.

Rochester, Ind.—The Rochester Co-operative Elevator Co. has been incorporated with a capital of $40,000. Directors: James M. Downs, Norman D. Storer and Milton Smiley.

Jonesville, Ind.—J. P. Sohn of the Columbus Milling Co. has nearly completed the erection of a new grain elevator at this place. It has a capacity of from 25,000 to 30,000 bushels.

Swanington, Ind.—The W. B. Foresman Co. of LaFayette, Ind., have purchased the Doan & Day elevator at Swanington and have incorporated it to be known and operated as the W. B. Foresman Grain Co.

Warsaw, Ind.—The grain elevator of the Little Crow Milling Co. was recently destroyed by fire. Loss is estimated at $25,000, including the damage to the machinery and 15,000 bushels of grain that were consumed. Loss was only partially covered by insurance.

Oxford, Ind.—Fire, said to have been caused by overheated machinery, destroyed the large elevator of the Oxford Grain Co. here. Loss on the building is estimated at $13,000 with $8,000 insurance. Two thousand bushels of wheat and 6,000 bushels of oats were destroyed. Plant will be rebuilt.

IOWA.

Bussey, Ia.—The Wilkin Grain Co. has sold its elevator here to Lewis Kendall.

Hampton, Ia.—The large elevator belonging to J. R. Reeve was destroyed by fire of unknown origin. Loss is estimated at $12,000 with about $5,000 insurance.

Atlantic, Ia.—A $25,000 farmers' co-operative elevator company has been started here by farmers. A temporary organization has been made with Chas. Balentine secretary.

Sac City, Ia.—W. W. Cooper of Bowman, N. Dak., has succeeded Earl Galbraith as manager of the Farmers Independent Elevator at Sac City. Mr. Galbraith has purchased an elevator at Newell.

KANSAS.

Atwood, Kans.—Edwin Lyman has purchased the elevator owned by the Shannon Grain Co.

Gaylord, Kans.—J. M. Farrell has been employed by Baker-Crowell to manage their elevator at this place.

Eureka, Kans.—Arley Burt and John Roby are completing arrangements for the erection of an elevator in Eureka this summer.

Cawker City, Kans.—Chas. E. Press has leased the Comfort Elevator in this city for the coming season. Karve Pargett has been employed as manager of the Farmers Union Elevator here.

Eudora, Kans.—The Farmers Union is erecting an elevator which will consist of two tile tanks 14x40 feet, one to be divided into four bins; also three overhead bins. Capacity will be 15,000 bushels.

Larned, Kans.—The Associated Mill & Elevator Co. of Kansas City, which is planning the erection of a number of grain elevators in this territory, will erect an elevator with a capacity of 500,000 bushels.

Holton, Kans.—The Western Elevator Co. has sold its elevators at Larkinburg Circleville and Holton to the Jackson County Co-operative Co. Possession was given July 1. The new company enters the field with W. E. Beightel as manager.

Olathe, Kans.—The Stanley Grain Co. has elected the following directors: E. N. Divelbiss, president; J. L. Chaney, secretary-treasurer; Harry Donham, Ralph Williams, C. D. Sechler and O. H. Beardslee. Work has begun on the 23,000-bushel elevator.

Hoisington, Kans.—E. J. Price and J. E. Callogne, representing the Associated Mill & Elevator Co. of Kansas City, are looking for a site at this point for the erection of a large flour mill. The matter has been taken under consideration by the Commercial Club.

MICHIGAN.

Negaunee, Mich.—The Marquette County Milling Co., which was recently organized here, expect to erect a new mill.

Lansing, Mich.—Chatterton & Son of Mt. Pleasant, Mich., have moved their main office to 123 W. Washtenaw Ave. Lansing, Mich., where they are now located, change taking place Monday, July 7.

McBain, Mich.—Jay H. Taylor is the new manager of the McBain Grain Co.'s elevator and warehouse at this place. He succeeds A. E. Schefers who is to become general superintendent of the different warehouses owned by the Chatterton interests north of Lansing.

MINNESOTA.

Fergus Falls, Minn.—The elevator of the Red River Milling Co. was destroyed by a tornado. Loss is estimated at about $30,000.

Belle Plaine, Minn.—The Farmers Elevator Co. at its annual meeting paid the stockholders 6 per cent. The stock will be increased from $10,000 to $20,000.

Bronson, Minn.—C. E. Schoutz sold his grain elevator to the farmers who took charge last week. They will operate it as a Farmers Co-operative Elevator.

Field Seeds

Argentine Linseed.

A cable from Buenos Aires July 4 says flaxseed has been advancing rapidly since July 1 under pressure of heavy export orders.

Detroit Seed Prices.

Grass seeds at Detroit July 3 closed at the following prices: Clover seed—Cash, $27.00; October, $27.50; timothy seed, $5.60.

Buffalo Seed Prices.

Grass seed prices at Buffalo July 2 were as follows: Timothy, ch., 5.70@6.40; cloved, red, ch., $27@28.50; alfalfa, $15@16 per bu.; red top, $14.50@16; white clover, $45@50 per cwt.

Canadian Seed Prices.

Farm seeds remain steady with fair demand for the season. Prices in Toronto are quoted by the Montreal Trade Bulletin as follows: Alsike, No. 1 fancy, $17.00@17.50 per bushel; No. 1 ordinary, $15.75@16.25; No. 2 ordinary, $14.50@15.50; red clover, $18.00@24.00; timothy, $4.00@6.00; sweet clover, $8.00@9.50.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending July 5, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary Chamber of Commerce:

	Receipts. 1919.	Receipts. 1918.	Shipments. 1919.	Shipments. 1918.
Timothy, lbs...	.....	.....	31,290	.....
Clover, lbs.	5,593	.....	1,350	.....

Chicago Seed Market.

The timothy market opened the week rather quiet in tone, but as the week progressed a firmer tone developed, especially in the deferred futures. Cash sales of seed were made during the week over a range of $10@11.25. Country lots of seed were quotable at $9@12 for qualities ranging from poor to choice. There was a strong undertone to the clover market at the opening Monday which steadily increased each day of the week. Country lots of clover were offered at $25@40 for poor to choice seed. The millets were firm in tone; white quotable $2.75@3; golden $3.50@5; broom corn or hog millet $3@3.25; Siberian $3@3.50. Buckwheat is quotable $2.85@3 for good quality.

Daily range of prices on timothy and clover follow:

Timothy—	June-July.	Sept.	October.
June 30	$13.00A	$13.85A	$13.00A
July 1	13.00A	13.75A	13.00
July 2	.....	.....	.....

December	5.85	5.70	5.70	5.80
March	6.05	5.95	5.95	6.00

Kansas City Seed Market.

KANSAS CITY, July 5.—Except the imminence of the blue grass seed movement, the seed trade is in a between-season position. Recent rains have interfered with the blue grass harvest, but not seriously, and a good yield is expected. Dealers are still reluctant to make quotations on rough seed, declaring that little is offered. It is supposed that a considerable amount has been contracted for later delivery.

The small acreage of meadow fescue made a good crop. This seed usually goes for export, but there may be a very little surplus this year, as old fields, turned under for wheat last fall, may be restored, and this year's seed will be required for resowing.

Reports from Salina and other points in Central Kansas say the second crop of alfalfa reached the blooming stage a week ago. Harvesting of the second cutting in Oklahoma and southern Kansas, as well as in Missouri, has been carried out with good results. Declines in all kinds of hay are regarded as more favorable for the reservation of acreage for seed. There is a probability of liberal sowing in August, which will be dependent upon old seed. The market is firm, with quotations from first hands ranging from $11 to $18 per cwt.

Clover seed production this year is a future problem, with favorable prospects, on the whole, though the acreage available is moderate. Cutworms and grasshoppers damaged the first cutting of hay in Missouri and Kansas. There has been very little new hay on the market. Dealers are making no quotations on old or new seed.

Forage seeds have practically passed over the period of activity. They will not again be in demand unless a calamity should overtake the corn crop.

Seeds are quoted in Kansas City as follows:

Alfalfa—Per cwt., $11@18.
Timothy—Per cwt., $9@11.50.
Blue grass—No quotation.
Cane seed—Per cwt., red top, $4@4.50; orange, $3.50@4; amber, $2.25@2.50.
Millet seed—Per cwt., golden, $4@4.50; Siberian, $3.25@3.75; common, $2.50@2.75.

Duluth Flaxseed Market.

DULUTH, July 5.—The pot boiled over in the flaxseed market during the last week, advances extending up to 52 cents in quotations being registered in the four days' trading. New high records in prices of seed were set, and as specialists viewed it, there did not appear to be any top to the market. It is now freely predicted that a mark of $6 will be set in the July future before it goes out, and any belated shorts are consequently very much on the anxious seat.

A number of bullish influences that had been previously commented upon further developed. In the first place, there was continued active demand for linseed oil, both from domestic sources and for export. To meet that supplies of seed are limited, and operators were compelled to do some climbing whenever they went out to pick up anything. Crop reports were discouraging, and it is now generally conceded that the do-

Chicago Seeds Movement.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

mestic production of flaxseed cannot exceed last year's low figures to any extent even under the most favorable growing and maturing conditions from now on. The crop in Montana will be a failure owing to the drought conditions, and yields will also be light in some parts of western North Dakota for the same reasons. The news from over the Canadian West was also discouraging, and that contributed to a sensational bulge of 60 cents in July and 33 cents in the October on the Winnipeg market on Wednesday as compared with the close there on the previous Saturday. Buenos Aires also contributed to the week's upturns, that market recording substantial gains during each day's trading.

Outstanding contracts in July flaxseed are estimated at around 225,000 bushels, and it is thought that some settling up will be in order in view of the small quantity of free supplies in sight and the probability that receipts from the country will show any material improvement. Deliveries of seed on July contracts on Wednesday were 23,000 bushels.

Receipts of flaxseed at Duluth elevators during the week aggregated 55,787 bushels, and supplies in the elevators at the end of the week were 118,000 bushels.

Closing prices of flaxseed on the Duluth market on Thursday, as compared with the previous Saturday and last year, were:

	Thursday.	Wk. ago.	Yr. ago.
On track	$5 56	$5.05-7	$4.13-14
To arrive	5 55	5.05	4.13
July	5.55	5.05	4.13
September	5.42	4.91	4.19
October	5.18	4.70	4.14
November	5.04	....	4.06

Louisville Seed Market.

LOUISVILLE, KY., July 7.—Fine weather during the past two weeks has made the orchard and bluegrass seed crops, although orchard grass is not threshed out except in a few instances. Stripped bluegrass is curing nicely.

Prices on orchard grass are not available, as none has been reported as sold. Bluegrass prices are quoted at around 1.75 for stripped seed, but without sales. A bluegrass pool in the Mt. Sterling district is getting a good deal of seed pooled, but the crop is large and there is a large Western crop, with the result that the pool can hardly be expected to hold. Kentucky will have something more than 600,000 bus. this year.

Reports on redtop are to the effect that a large crop of fine seed is in prospect, with a good holdover crop on hand.

Argentine Linseed.

We are of opinion that possibly 10 or 15 per cent more land will be placed under linseed this year than last, which, after all, is only a reasonable measure. The United States will have little linseed for many a month to come, given the fact that the guarantee of wheat has influenced farmers to put all the available territory under that cereal. The opportunity for this country is enormous, and we trust that our agriculturists will not let it slip. We should like to see a record area of linseed planted. There is no doubt that next year there will be a plethora of wheat in the world, but there is no reason to expect a plethora of linseed. The farmer who looks ahead will place his faith in linseed in Argentina, in the expectation that the United States will not be a competitor for many a month to come. This country should be able to rule the linseed price up to July, 1920.—*Times Argentina, June 2.*

Clover Seed Market at Toledo.

Clover seed certainly traveled some last week. It was a short week as far as business is concerned, but not a week for the shorts. Total amount of trading in futures does not foot up large at all, and that of itself explains the rapid advance—a few buying orders coming on a market that was practically bare of offerings. Short sellers are about as scarce as they were when the price was lower, and what seed does come out seems to come from those who were fortunate enough to buy lower down.

There was very little change in the crop news from a week ago, although there is more said about the acreage being short. Alsike showed a decline in October and December early in the week, followed by a sharp advance, due mostly to the advance in red clover. The big discount for the alsike makes it rather attractive, and some have been trying to buy it on that account, but the offerings have been light, and are likely to be until more is known about the crop.—*J. F. Zahm & Co.*

What Is Thought of Timothy.

"More than likely timothy will work higher if very much of it is exported," thinks Ohio dealer. "In this section the fields look good but certainly the acreage is much shorter than last year. The old hay is practically all used up. Farmers will fill the barns first with hay and only the surplus will go for seed."

Timothy is in exactly the opposite condition from clover. Large stocks prevent wide fluctuations. Stocks at Toledo decreased last week 1,800 bags. —*Southworth & Co.*

St. Louis Seed Market.

ST. LOUIS, Mo., July 5.—The seed market continues to be dead dull, with no offerings except out of store, and no demand to speak of.

In the absence of sales, prices are unchanged and are entirely nominal, and are as follows: Stock peas, whippoorwill or new era, $8@8.25 per 100 lbs.; mixed, $7.80@8; golden millet, $4.75@5.25; Siberian, $3.50@3.75; hog millet, $3@3.15; white rice popcorn, $6.50 per 100 lbs. for shelled; soy beans, $5.25; timothy, $11@11.50 for choice seed per 100 lbs.; clover, $25@30 for good seed; alfalfa, $15@24 for good seed; poor quality or trashy seed less, according to quality.

Minneapolis Flaxseed Market.

MINNEAPOLIS, July 7.—Prices advanced sharply on Argentine news and crushing bids declined compared with the futures. There was a good demand for choice seed. Receipts much heavier than the trade thought possible. Bad weather in Canada affected the futures, but the cause of the sharp advance was chiefly the big gains in Argentine markets. Reports of rain in Canada late last week caused a setback in the deferred futures, but today the market was strong again. Crop news from the Northwest is spotted and no large return is expected, as considerable of the acreage suffered from drouth. No. 1 seed quoted at 3@5c under Duluth July, to arrive at the same discounts.

Evansville Seed Market.

Our Indiana correspondent writes from Evansville that the trade there report a brisk demand for orchard grass, red top and clover for summer planting, and also a good demand for timothy seed for fall sowing; in fact, the demand for timothy exceeds trade expectation. It is remarkable how the trade on late-planting forage seed keeps up. Stripping is proceeding fast with a larger yield than anticipated by many in the trade, and Evansville's location, midway between northern and western and eastern and southern seed territory, lends something more than ordinary interest to the local situation.

A CORRECTION.

On page 45 of THE PRICE CURRENT-GRAIN REPORTER, bearing date July 2, statement was made that the Rudy-Patrick Seed Co. of Kansas City had purchased property at Ft. Madison, Ia., which was being subjected to improvements and alterations preparatory to the company's locating their plant there. The item was condensed from a statement to that effect in a Ft. Madison paper, which, however, as it turns out, was rather more enthusiastic than accurate in its welcome of the Rudy-Patrick Seed Co. to their city. It appears, in fact, that the property has been taken over by that company, but they will use it merely as a branch cleaning and storing plant. We make this correction because it is possible that the item referred to may lead some to think that the Rudy-Patrick Seed Co. have moved their entire business to Ft. Madison from Kansas City, which of course is not the fact.

GERMAN CROPS.

Herr Schmidt, Food Minister of Germany, says the agricultural production of that country has been held up to a high mark and has been maintained to a record remarkable under all the circumstances, by using every available plot of ground for the growing of something to sustain life. For this season the crop start was very much better than the average, but crops generally have been more or less checked by the bad weather prevalent in Europe in May and may be still further adversely affected should a drought set in. The quality of the wheat also has been affected by lack of fertilizer, which had a notable effect upon the kernel of the wheat.

It seems like a paradox, but it is a fact that in spite of the food scarcity in Germany and the necessity of unusual native production to play even, that there are thousands of idle men in the cities who absolutely refuse to go to the country. It is a fact, however, that the farmers who have returned from the army as well as the women of Germany have been very diligent and have been doing everything possible to insure a good harvest. The objections of men going to the country are the same that prevail everywhere, that they are wholly unfamiliar with farming and that the occupation is distasteful; but the difficulty of getting men back to the farm and keeping them there is the greater in Germany because of the miserable housing conditions in certain sections, notably in East Prussia and West Prussia, the land of the Junker, the men who have bossed the Empire during the past generation, and who are responsible in a certain sense for the war. These houses, Herr Schmidt says, were so filthy and primeval that the Polish and the Russian laborers refused to use them and, of course self-respecting Germans absolutely refuse to live in them.

Herr Schmidt in an interview with an Associated Press agent lamented the Allied peace conditions, which alienated from Germany the large territories of Silesia, Posen, West Prussia, East Prussia, etc., all of which are large agricultural regions, and the loss of their products, he said, would be keenly felt; but it is difficult to understand why because an imaginary line has been erected between these deleted provinces and Germany there should be any difficulty in Germany obtaining from them sugar, potatoes, grain, etc., as heretofore. He said, however, that for reasons he did not make very clear: "Free trade in all products cannot yet be permitted or the poor will be deprived of bread and potatoes, two of their most important foods."

Herr Schmidt said the next harvest, especially as to wheat, will be "middling good." Potatoes will be somewhat more plentiful, although importations will still be necessary. The harvest begins in mid-July and is usually finished about the middle of September, potatoes and sugar beets maturing in October. In the meantime Germany is relying upon its slender resources of food and help obtained from abroad, chiefly from America. Half of the food expected to arrive from America to tide over this interval is now in German harbors or in course of distribution, Germany paying therefor the sum of 1,054,000,000 marks in gold, approximately $263,000,000.

We have now received particulars of acreage for the years 1914, 1915 and 1916 which enables us to give the area and crop yield in quarters of eight bushels for the whole war period as follows:

	1918. Acres.	1917. Acres.	1916. Acres.	1915. Acres.	1914. Acres.
Wheat	3,545,334	3,571,800	3,964,845	4,667,541	4,615,714

WHEAT CONTROL IN ENGLAND.

Judging from the official replies to questions asked in the House of Commons recently with reference to the control of wheat, there appears to be little probability of same being taken off for some time. Mr. Roberts, the food controller, stated that the policy of his department was to relinquish control when they were satisfied that it tended to keep up prices, and that decontrol would give an assurance that prices would be reduced. In regard to the question of prices, the two main factors are the sufficiency or insufficiency of available supplies and the amount of shipping room obtainable. The number of steamers available for the grain and other trades is steadily increasing month by month, so that the position in this respect is materially improving.

With regard to supplies of wheat, the surpluses in North America, Australia and Argentina are ample to satisfy all requirements up to July 31, the end of the present season, and to leave at least a fair quantity to be carried forward. As to the new season, commencing Aug. 1, the American winter wheat crop, sown on a much larger acreage than ever before, is reported to be in better condition than usual, and the area to be sown to spring wheat is also expected to be several million acres in excess of any previous year. In Canada the 1919 yield will be considerably larger than in 1918. The Indian crop, unfortunately, is bound to be a very small one and will probably be insufficient for the home requirements, even after allowing for the considerable reserves of old wheat. As far as Europe is concerned, present indications are that the crops will be somewhat smaller in the United Kingdom, France and Italy, whilst quite small crops are expected in Russia, Germany, Austria-Hungary, etc.—*London Grain and Seed Reporter.*

GERMAN WAR PRODUCTION.

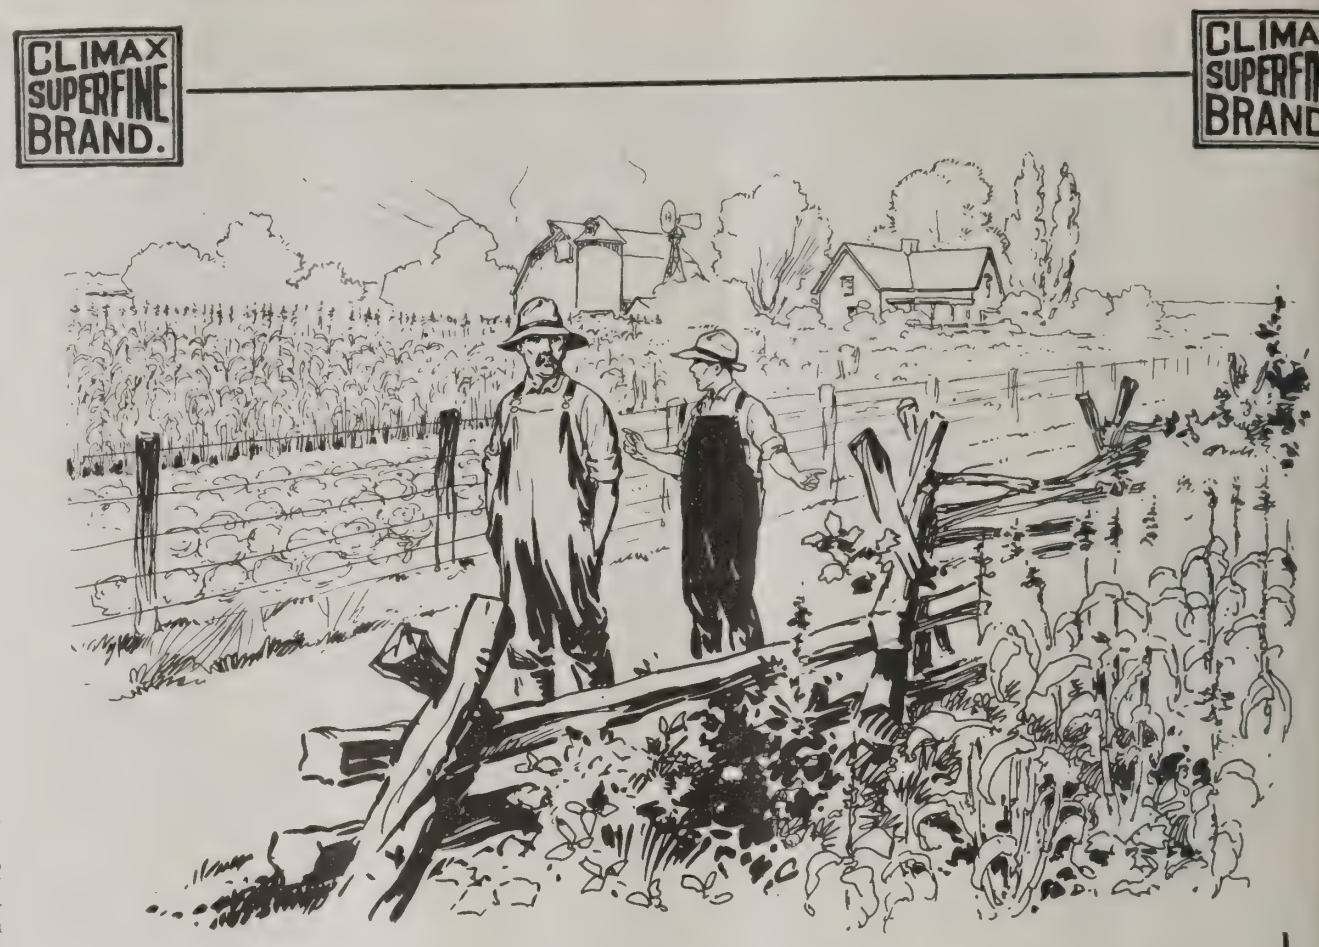
The origin of the following statement is unknown to the writer, but it is telegraphed to the *Journal of Commerce* from Washington as a "statistical report" of German agriculture during the war. If authentic it shows how fatally the government conducted its agricultural policy. Every line of production decreased from year to year as the struggle went on. The wonder is that the German people did not starve themselves into surrender sooner than they did. Conscription of agricultural labor and the inefficient results from women labor and confused management of crop programs steadily reduced the output of food staples so that wheat production finally was but 50 per cent of normal. Rye fell 57 per cent, barley 50 per cent, oats 62 per cent and potatoes 53 per cent. Even in 1918, when weather conditions were wholly favorable, the output of food crops was very poor. Part of the trouble was due to the shortage of farm animals and poor cultivation by women and children.

The following tables of foodstuffs production from 1913 on through 1918 given in long tons tells the story graphically:

Year—	Wheat.	Rye.
1913	4,417,918	12,129,505
1914	3,789,662	10,549,481
1915	3,705,926	9,094,339
1916	2,999,885	8,902,843
1917	3,226,005	6,977,191
1918	2,458,418	8,009,090
	Barley.	Oats.
1913	3,564,576	9,504,002
1914	3,049,616	8,846,987
1915	2,415,672	5,890,129
1916	.....	6,928,298
1917	1,957,058	3,628,253
1918	3,258,255	4,680,755
	Potatoes.	Sugar beets.
1913	52,854,688	.....
1914	44,696,408	10,876,982
1915	52,880,181	10,955,568
1916	24,691,170	10,137,975
1917	34,410,982	9,987,321
1918	29,469,718	9,883,800
	Clover.	Hay.
1913	10,929,926	28,047,208
1914	10,660,249	28,000,119
1915	7,519,719	23,174,120
1916	10,052,047	27,707,899
1917	7,999,451	21,646,289
1918	6,585,816	21,414,969

Sugar beet production held up better than other crops, decreasing but 9 per cent during the war. The clover yield in 1914 and 1916 was nearly normal, although in the other war years the drop was heavy, about 40 per cent. The hay crop decreased from 28,000,000 tons in 1913 and 1914 to 21,414,960 tons in 1918. These reductions are attributed in part to the decrease in the acreage cultivated.

The following table shows even better than the former the actual decrease from year to year in yield per acre in bushels of various foodstuffs and fodder in 1913 and during the war period:



Wheat—	1913.	1914.	1915.	1916.	1917.	1918.
Winter	36.44	30.7	30.0	28.33	23.5	26.9
Summer	34.6	47.0	27.4	29.4	20.8	23.7
Winter rye	31.1	27.0	23.3	24.2	20.6	22.6
Sum'r rye	21.4	19.9	16.2	18.8	13.6	15.2
Sum'r b'rley	43.1	37.4	29.0	....	24.1	28.4
Oats	62.4	60.5	51.2	55.2	29.4	42.8

It is announced by the Grain Corporation that it will not buy wheat at Buffalo, Cleveland, Toledo or Mansfield, O.

A South Australian government statistician estimates the wheat yield of the past season of that state at 23,0[illegible] 000 bu., an average of only 10½ [illegible] This is 5,000,000 bus. less than the [illegible] vious crop.

Going for Profiteers.

A bill was introduced in Canad[illegible] Parliament on July 2 requiring t[illegible] elevator companies by compelled to [illegible] turn $15,000,000 in excess of legitim[illegible] earnings. This charge was aga[illegible] terminal elevators.

This is a one act play with just one scene. It does not ordinarily require more to prove up with **SMALL'S FIELD SEEDS.**

The two fields above show on one side the prosperous looking natural results obtained by the successful farmer.

The other field is weedy and badly run down, and as it is only across the road, we can hardly blame the soil, or difference in rainfall or sunlight. It must be something else.

The farmer and his son are talking things over and the latter has just returned from the poor field and in speaking to his father says: "Dad! Let us buy Small's seeds again. Look at the difference between our fields and John Smith's." Father knew all about this difference before it was called to his attention, but is frank enough in getting down to brass tacks to admit in replying to his son, "There is a **DIFFERENCE IN SEEDS,** and we'll quit monkeying around with any old seed and **BUY** all of ours from **SMALL'S.** Their quality and service can't be beat."

Beans and Potatoes

Potato blight is reported in several counties of England.

The Michigan Weather and Crop Bulletin dated July 1 says that beans have germinated well and have made a fair growth but need rain.

The new law of Minnesota provides for a seed potato certification. The handling of this feature of the law is by A. G. Tolaas, chief inspector of the University Farm, St. Paul, who has announced that the time for applications for certification has been extended to Aug. 1. Applications for certificates must give variety grown, acreage, history of the seed, performance, approximate yield percentage of disease, etc.

BEAN SITUATION.

BEAN ACREAGE SHORT.

MICHIGAN (9).—The bean acreage in his vicinity is about one-third of what t was a year ago.—*M. D. Holbrook, Dryden, Mich.*

LITTLE DEMAND FOR BEANS.

MICHIGAN (5).—There is very little emand for beans and little stock left n farmers' hands. Acreage about three-uarters of normal; crop looks fine but eeds rain.—*Isabelle County Farmers rain Co., Mt. Pleasant, Mich.*

BEAN ACREAGE REDUCED.

MICHIGAN (5).—The acreage of beans n Michigan is much less than last ear, not over 50 per cent. So far the eans are doing fairly well, although n many of the fields they are just peep-ig through the ground, and it is there-re at this time impossible to estimate ie final outturn.

A large proportion of the last year's op which was on hand at the begin-ng of June was shipped out during at month. The amount, as we are liably informed, being about 225 cars, aving the stocks now in elevators and owers' hands very low. The market is ruled rather steady at around $7.50 r cwt. track Michigan points, during e past month. The crop has practi-lly moved out of the state, and we ok for a scarcity, and materially gher prices before the new crop will mmence to move in October.—*J. B. awford, Ithaca, Mich.*

BEAN AND POTATO PRICES.

Quotations follow for lots of good ality and condition beans and pota-s, sacked per cwt., unless otherwise ted, as of July 5:

ans—

uffalo—Marrows, $10@10.50; mediums, $7@7.50; pea beans, $7@7.50; wh. kid-ney, $11@11.50; red kidney, $11@11.50.
hicago—Prices steady dmd. slow. Pea beans, hand-picked, ch. to fancy, $7.25 @7.50; fair to good, $6.50@6.75; brown Swedish, $5@6; red kidneys, $11@11.50.
incinnati — Navies, $8; marrowfats, $12.50@12.75; red kidneys, $12.50@12.75; limas, $10@10.50.
enver—Pintos, paid to jobbers, $4.25@ 4.50; navies, $6.50@8.50; limas, $9@10.
etroit—H. p. pea beans, $7.15 cash.
inneapolis—Navies, $8; brown, fcy., $6; Calif. limas, $11; soy beans, $5.
ontreal—The market continues steady for hand-picked beans. Business reported in jobbing lots of Ontario handpicked beans at $4.25 to $4.50, and in car lots at $4.00. Quebec beans have sold in small lots at $3.50 to $3.75, as to quality.—Trade Bulletin.
w York—Calif. limas, $9.25@9.50; pinks, $7.50; red kidneys, ch., $12.75@13; ordi-nary, $11.25@12.50; pea beans, ch., $7.50 @8; ordinary, $6.75@7.25.
Louis—Quote white beans in c. lots — h. h.-p. Mich., $8.50; prime m.-p., $8; orders and small lots higher; pintos, $6.
rom store—Scotch peas, 7½c per lb.; split peas green at 17c and yellow 7½c per lb. Per cwt., Calif. black eye, $5.50; ch. limas, $9.50; Calif. pinks, $7.50; wh., $8.—Market Reporter.
n Francisco—Limas, $9.50; lge. wh., 5.75; sma. wh., $6.50; black eyes, $3.75; inks, $5.80; red Mexican, $4.25; cran-berries, $5.75; red kidneys, $11.50; eparies, $2.50.

toes—

ston—Maine, $1@1.25 for old stock. ew—East'n Shore, $6@7; Norfolk, $5 06.
ffalo—Va., bbl., $6.75@7.

Chicago—New—Market steady. Okla.-Ark. Tri., $3@3.40; La.-Tex. Tri., $2.50 @3; Miss. Tri., $3.15; Va. Cobb., bbls., $5.75@6; N. C., Cobb., $4@5.

Cincinnati—Mich., Wis., rnd., wh., $1.35 @1.50 for old. New—Ala. Tri., $2; Ok.-Ark. Tri., $3.25; N. C. Cobb., No. 1, bbl., $4.75@5.

Denver—Wholesale prices to jobbers—Colo. wh., $1.75@1.80; red McClures, $1.85@2.10; burbanks, $1.75@2.15. New—Calif., $4@5.

Indianapolis—New—North'n 150-lb. bg., $3.50@3.60; Va.-Bell, bbl., $7.50@7.75.

Kansas City—New—Tex. tri., $3@3.25. White, $2.50@2.75.

Minneapolis—New—Tri., $3.25.

New York—New—East'n Shore, bbl., $5@6; Va., bbl., $4.50@7; N. C., bbl., $4@6. Old—Blk., 180-lb., $1.25@2.25.

Montreal—Receipts, last week were 7,867 sacks, against 8,362 sacks the week previous, and 409 sacks for the same week last year. The market is demoralized owing to farmers crowding in supplies of old stock that they should have sold when they could have realized higher prices. Quebec stock in car lots have sold at 75c to $1.25, as to quality. The demand now is for new potatoes.—Trade Bulletin.

Pittsburgh—N. C., cloth top slats, $4.50 @5; East'n Shore, No. 1, bbl., $6@6.25.

Philadelphia—S. C., $2.50@5 bbl.; East Shore, bbl., $5@6; N. J., ⅝ bsk., 85c@ $1.20.

St. Louis—Old—North'n Rurals, $1.75; Burbanks, $1.50 but only occasional sales old stock. New—Skd. tri., $2.90; h.-g., early Ohios, $2.60@2.85; Okla. tri., $2.25@2.90 trk.; La. tri., $2.50 del.—Market Reporter.

San Francisco—Ore. burbank, $2@2.25; gems, fcy., $2.10@2.30. New—Garnets, $3@3.25; whites, $2.75@3.

SHIPPING POTATOES.

The Agricultural Dept. has published Bulletin 1050 on "Handling and Loading Southern New Potatoes," by A. M. Grimes (deceased), a summary of which says:

Much of the loss in Southern new potatoes in transit and in the markets is caused by field cuts and bruises and by the practice of allowing the potatoes to remain exposed to the sun after digging.

Careful grading will increase the grower's profits and will make a surer and more constant market for his product.

It is important to keep the skin of a potato intact. In handling new potatoes this requires great care.

Cars should be loaded to secure the maximum amount of ventilation throughout the load and to avoid methods that allow shifting and breakage in transit. The double-headed U. S. Standard barrel is the most satisfactory package for new potatoes. The heads should be secured by "headliners." Barrels which are loaded on end carry better than those loaded on their sides. Cloth-topped barrels do not protect their contents as effectively as those having double heads. Sacks do not sufficiently protect new potatoes from cuts and bruising. If they are used, those holding from 90 to 120 pounds are the most desirable from the standpoint of careful handling and ventilation of the contents. Hampers should not be used for shipments. If crates are used they should be so made as to protect the potatoes from too rapid evaporation and consequent shriveling.

Packages should be marked with the weight or dry measure of their contents.

If stock cars are used, it is generally advisable to protect the potatoes from the sun and weather by lining certain of the open parts with strong building paper.

An appointment of an agent of the Grain Corporation to buy wheat at Sioux City, it is said, will be dependent upon the amount of storage capacity that will be available.

Feedstuffs

The Spring Valley Co-operative Association of Spring Valley, Wis., has voted to close out the stock and quit business. They handle flour and feed.

Grubb & Son have sold their feed and coal business at Enid, Okla., to C. W. Pittman and John E. Dosney. Mr. Pittman has been connected with the Enid Milling Co. for a number of years.

The alfalfa plant of North Bros., at Kansas City, Mo., will be completed very shortly. The plant represents an expenditure of $50,000. The firm is also enlarging the capacity of the warehouse which adjoins the mill property.

Cottonseed Feeds Display Quiet.

KANSAS CITY, July 5.—Only scattered sales were made in the market for cottonseed cake and meal in Kansas City this week. Current offerings are extremely light, but with an absence of buying the market displays a weak tone. Southern jobbing and brokerage interests continue to offer cake and meal for October and November delivery around $63 to $65 a ton for 43 per cent protein feed, but no sales are being made with Kansas City handlers.

THE FEED SITUATION.

By SAMUEL SOSLAND.

Activity in the market for bran and shorts in the United States centers around developments in the deferred delivery trade. Interest in mill offal for prompt shipment is almost neglected. But this rather peculiar situation does not reflect an entire lack of demand for current offerings, nor a tendency among the trade to make purchases of a speculative character. There is only a very small volume of business being transacted in bran and shorts for immediate shipment. In the case of bran, this is attributed to light buying, the result of an abundance of pasturage in the country and utilization of new green feeds. But in shorts the small volume of business is accounted for by an extreme scarcity of offerings. Buyers are eager for the heavier of mill feed, but millers and jobbing interests are in a position to fill only a small portion of the requirements of the trade.

Naturally, with such a condition prevailing in the market and new wheat moving, buyers turn their attention to the future trade. Southwestern mills and jobbing interests in the winter wheat territory are receiving an unusually large number of inquiries from the trade in the East, Southeast, the South, from the Central States territory and from other sections of the United States which draw the bulk of their millfeed supplies from mills of the Southwest. And the inquiries are not of a character indicating a desire among the trade merely to obtain a knowledge of the general sentiment of the industry regarding prices for deferred months. The inquiries indicate a desire to contract for deferred shipment. On the whole, a fair volume of business in July and August bran and shorts is being booked by both mills and jobbers.

For shipment during July, bran is selling around $1.70 to $1.72 per cwt., in sacks, basis the Kansas City market, which shows a discount of 3 to 5 cents under quotations prevailing for the lighter mill offal on a prompt shipment basis. For the first half of August, the trade is making sales around $1.68 per cwt., while for the last half of August the discount under immediate shipment prices is about 10 cents, at $1.65, Kansas City.

The discount on shorts, as naturally expected with the present abnormal difference in prices for the mill offals, is wider than on bran. For instance, brown shorts are quoted at $2.30 per cwt., in 100-lb. sacks, basis Kansas City, for immediate shipment, while sales for the whole of August are being made on the basis of $2.05 to $2.10. No brown shorts is available for delivery in July. On gray shorts the market is quoted around $2.30 to $2.40 for last half of July shipment, basis the Kansas City market; at $2.30 to $2.35 for first half of August and $2.20 to $2.25 for delivery the latter half of August. A keen demand prevails for gray shorts at the present time for immediate shipment around $2.50 to $2.55 per hundred pounds, Kansas City.

While the prices quoted on both bran and shorts may appear attractive to the miller, it is surprising to note that flour producers display a reluctant attitude in contracting for shipment of millfeed the last half of July or for August. This doubtless is the result of the extremely quiet tone in the market for new crop flour, both for prompt and deferred shipment. The majority of millers in the Southwest apparently fear to make contracts on bran and shorts without a knowledge of the extent of their sales of new crop flour during the delivery period, and, therefore, are rejecting all bids on future trade. On the other hand, the view is held by some mills, that if they are fortunate in selling ahead their bran and shorts production for the next two months, they can figure more accurately their flour prices, and will possibly be in a position to sell at a slight discount. This, of course, is dependent more or less on fluctuations in prices within that time. In this connection, it is interesting to note that many mills are refraining from quoting prices on new crop flour for delivery beyond 30 days, with some not inclined to push trade even for immediate shipment until wheat prices recede to the government basis.

Activity of mills, both in the spring wheat section and in the Southwest, and elsewhere in the United States, has been extremely light the past month. It is safe to estimate the operations of mills over the country as a whole at around 35 per cent of capacity, or probably less. Mills entered the new crop with practically no shorts on hand; in fact, many found they booked ahead of their production. Bran stocks carried into the new crop year also were light. The wide difference between bran and shorts prices served to attract interest of buyers in the lighter feed.

Whether future quotations on bran and shorts prevailing at the present time accurately reflect the actual market in August is conjectural, of course. Uncertainty permeates the trade, and while market students are inclined slightly to the bearish side, owing to the approach of offerings from a record production of wheat, there are other influences which some millers and dealers consider as more than an offset to the prospects of a huge supply. The first and second marketable yields of alfalfa hay were extremely light, owing to heavy damage to the crop, and instead of an abundance of alfalfa, the outlook at the present time points to a shortage. This is further strengthened by drouth situation in the Northwest, which, unless conditions improve soon, may play as important a part in determining prices as did the Southwestern drouth situation of the past three years. The drouth is serious in portions of Montana, Idaho, the Dakotas, northern Colorado and Utah, and hay that normally would move to the Southwest and East is being diverted into the drouthy areas. This, of course, will broaden the demand for bran.

Prospects of continued high corn prices is yet another influence, and no less consideration must be given the lofty market for hogs which is expected to continue for some time in the United States. High feed prices in general would tend, of course, to maintain the present market values of both bran and shorts. But actual demand and supply of these feeds will determine the prices in the end, so it is a question whether the production of bran and shorts by mills will more than meet the consumptive demands of the country.

FEED DEMAND HEAVY.

TOPEKA, KANS.—Growing corn is very backward, and while pastures are good we expect a good demand for new crop feeds at higher prices even for bran than now prevail.

The high price for pork products is certain to cause heavy mill feeds, shorts and middlings to stay on a high level and perhaps advance considerably, although taking into account present conditions as affecting the beef industry we do not expect as much advance in bran as in the heavier mill feeds.

Corn will require to be brought into Kansas to satisfy feeding demand this fall.

Certainly with corn chop around $3.50 per 100 lbs., basis Missouri River, bran at current quotation of $1.70 per 100 lbs. is away below its real feed value.—*Thomas Page Milling Co., by D. G. Page, Topeka, Kansas.*

FEED MARKETS.

NEW ORLEANS, LA.

New Orleans, La., July 5.—Due to wet weather, wheat harvesting has been greatly delayed, and, in consequence, mills are behind in offering mill feeds for shipment. While flour has been offered and sold for first half and last half July, mills have refused to commit themselves on mill feed offerings. At the present it is hard to arrive at any fixed figure for either bran or shorts.

BOSTON.

Boston, July 5.—Feeds of all kinds in quiet demand with offerings rather light and prices generally higher. Prices were quoted about as follows: Bran, spring, $43 per ton; bran, winter, sacked, $43; middlings, sacked, $49@54.50; mixed feed, sacked, $50@53; gluten feed, sacked, $64.92; red dog, sacked, $64; stock feed, sacked, $63; oat hulls, reground, sacked, $29; hominy feed, sacked, $73.40; cottonseed meal, sacked, $73@77. Receipts for the week ending July 5th were 28 tons; for the month of June, 1919, were 547 tons.

PHILADELPHIA.

Philadelphia, July 3.—The market for feedstuffs is dull but offerings are light and prices well sustained. Winter bran, in 100-lb. sacks, spot, $43@44 per ton and $42.50@43.50 per ton to arrive; spring bran, in 100-lb. sacks, spot, $42@43 per ton; do., to arrive, $42.50@43 per ton.

Quotations for feedstuffs in 100-lb. sacks, to arrive, are as follows: Standard wheat middlings, $50@51 per ton; flour middlings, $57@58 per ton; red dog, $64.50@65 per ton; low grade flour, $63.50@64.50 per ton; rye middlings, $44.50@45.50 per ton; fine yellow hominy, $70@71 per ton; fine white hominy, $71@72 per ton; reground oats feed, $31@31.50 per ton; cottonseed meal, 36% protein, $73 per ton; cottonseed feed, 20% protein, $53@54 per ton.

BALTIMORE.

Baltimore, July 4.—The spot feed situation is fairly firm under encouraging Western advices, although the demand for bran and middlings here is not very urgent. Western spring wheat bran is quoted at $42@43 per ton; Western middlings, $48@50; city mills' winter wheat bran, per ton, in 100-lb. sacks, $47; brown middlings, per ton, in 100-lb. sacks, $50; white middlings, per ton, in 80-lb. sacks, $57@58.

CHICAGO.

Chicago, July 5.—The mill feed market has stiffened somewhat due to the supply not being over plentiful. The demand is reported as good. Sacked bran is quotable at $38; middlings, $47.

MONTREAL.

Montreal, July 3.—There is less demand for bran this week, sales being reported at $40 in carlots, and shorts at $44.—Trade Bulletin.

SEATTLE.

Seattle, July 1.—Mill feed, $40 per ton; scratch feed, $80; feed wheat, $91; all grain chop, $67; oats, $61; sprouting oats, $67; rolled oats, $68; whole corn, $75; cracked corn, $77; rolled barley, $65; clipped barley, $70; alfalfa meal, $37; egg mash, $72; cocoanut meal, $56; cottonseed meal, $72; meat scraps, $117; fish meal, $67; chick feed, 100-lb. sacks, $90.

DULUTH.

Duluth, July 5.—A fair demand from dairymen over this district was met with for feeds during the last week, but beyond that little has been doing. Operations at the mills at this point have been at a minimum owing to light supplies of wheat. Beyond an advance of 75 cents in rye feeds $35.75 prices are unchanged as follows: Bran, per ton, $38; ground oats, per ton, $36.25; No. 1 ground feed, per ton, $58.50; No. 2 ground feed, per ton, $55.50; No. 3 ground feed, per ton, $52.50; shorts, per ton, $44; red dog, per ton, $52; Boston mixed, per ton, $44; cracked corn, per ton, $51.50; rye feed, per ton, $35.75.

MEMPHIS.

Memphis, July 5.—There continues to be small feature to the feed business. Cotton seed meal is very scarce and prices are dictated by those who hold the small lots still to be sold. Some are asking as high as $65 a ton for 7 per cent meal, while others have been gradually selling off a little less. Demand is fairly good. Wheat bran is scarce, but buyers are taking as little as they can get by with, hoping for lower prices when new wheat grinding starts. On call today bran in transit was offered at $40, but only $34 was bid. Shorts are scarce and practically nominal, being offered today on track at $ a ton. Demand comes from the manufacturers of special balanced feeds. For cotton seed hulls there is little demand and prices have dropped again, now being $5 to $6 a ton loose in car lots.

NEW YORK.

New York, July 5.—Prices for millfeed developed decided strength during the week, and were marked up a dollar or more per ton. This was due more to a scarcity of offers on the part of millers, than to any noticeable improvement in the demand. Mills are running low on their supplies of wheat, and consequently, the amount of feed they have to offer is limited. Buyers were very cautious about paying higher prices, and the volume of business was down to a minimum in consequence.

NASHVILLE.

Nashville, Tenn., July 7.—Wheat bran and middlings are in demand, but scarce because of mills being closed down waiting for new wheat. Other ground feed is in good demand, and $1 per ton higher as a rule, with fair supply. Quotations: Wheat bran, 100 lb. bags, per ton, $42.50 @ ; middlings or shorts, $52.50@55; horse mule feed, $51@63; poultry feed, $73@ 0 dairy feed, $50@62; hog feed, $60.

MILWAUKEE.

Milwaukee, July 5.—Although the demand for mill feeds at this season is limited due to the grass season, supplies of offers are limited because of restricted milling operations and prices are again improved for the week. The market closed strong and higher. Current quotations are: Bran, per ton, $37@37.50; standard middlings, $46.50x47; flour middlings, $50@ red dog, $59; hominy feed, $68.50; rye feed, $41; old process oil meal, $70; cottonseed meal, $62.50@67.25 brewers' dried grains, $50; gluten feed, August shipment, $0, all in 100-lb. sacks.

TOLEDO.

Toledo, July 5.—Outside inquiry for mill feeds is quiet and local interests are taking all the supplies. Mills running light. Prices are firm. Bran quoted $42 and middlings $52, bag basis, per ton, f.o.b. Toledo.

PITTSBURGH.

Pittsburgh, July 5.—There has been very little interest in the local feed market during the week just closed with only about 10 cars of all grades coming in. Demand is light and prices remain about what they have been for the last month. White middlings are in fair supply, with very little bran at this tme.

ST. LOUIS.

St. Louis, Mo., July 5.—All kinds of wheat feeds continue scarce and firm, but oat feed is weak. Prices are as follows: Bran, $39; middlings, gray, $49@50; brown, $47@48; mixed feed, $35@37 for prompt shipment. Oat feed, $21@21.25; hominy feed, $64@65; whole ground barley feed, $52.

LOUISVILLE, KY.

Louisville, Ky., July 7.—There is a fair demand for mill feed, but manufactured feed is quiet. Supplies of mill feed are light, with quotations withdrawn, as mills have been down and jobbers as well as millers stocks have been shot to pieces. Mills resumed today, and quotations should be available by the end of the week, although production for the start will be sold up.

MINNEAPOLIS.

Minneapolis, July 7.—The millfeed market is strong in tone as offerings are light and a general demand is prevailing. Buyers in the eastern and central states are more active and there is a good demand from western and northwestern territory. Mills are running moderately and the output at present is light. Owing to the dry weather in Montana the movement in that direction is quite liberal. Cattle and sheep are badly in need of feed as the ranges are dry. The demand for heavy feed is greater than the supply.

Quotations in carlots, f. o. b., Minneapolis, in 100-lb. sacks: Bran, $36; standard middlings, $45.50@46.50; flour middlings, $51@52; red dog, $57.50@58; rye middlings, $41@42; ground barley, $51@52.

Says Self-feeder Adds to Profits.

By handling immune hogs, feeding a mixed and well-balanced ration, supplied through a self-feeder, F. W. Thorman, a young stock farmer of Washington Co., Kans., finds hogs profitable. Ninety days ago Mr. Thorman bought a carlot of immune hogs on the Kansas City market, and 60 days ago he took out another carload, and besides, he had a good many on hand at the time he made these purchases.

"These hogs made a fine gain in weight and proved money makers," Mr. Thorman said. "They were fattened on tankage and corn, fed through a self-feeder. The self-feeder is a time-saver, and saving time means adding to the profit in feeding. The tankage seems to form a well-balanced feed when mixed with corn, so my hogs made a daily gain of about 1½ lbs. to the head." —*Clay, Robinson & Co.*

The Grain Corporation has announced that beginning on July 1 the Corporation will make limited purchases of hard and spring wheat first clear flours. Offers will be submitted and purchases will be made subject to all terms, conditions and specifications of the flour purchase plan of Feb. 18 last, except that shipments will be required 10 days from date of acceptance. Prices quote f. o. b. Boston, New York, Philadelphia or Baltimore for export. Flour shall be put up in 140-lb. 10½-oz. export quality double calendered jute or 12-oz. common, except that first clear flour on hand already packed in 10½-oz. common jute will be acceptable.

It is reported in Parliament that the wheat acreage of England indicated a probable reduction this year of 10 per cent compared with last year.

FATTENING HOGS.

In putting fat on a hog one day's poor feeding will more than offset two days of good feeding. Corn is a mighty fine feed for the purpose of fat making, but it is a mistake to rely wholly upon it. I have known some to feed their hogs entirely on corn and after a while the animals were "burned out" and not gaining a bit. Their appetite and digestion were impaired and the animals came to a "standstill" and it was a good while before they overcame the backset. Corn is one of our best fattening feeds; in fact, we may consider it the best, but unless we feed it as we should we are not going to get the best results from it. When hogs have not been used to corn at every feed or have not had any for a long time, it should be fed in small quantities at first, gradually increasing the amount as the animals become used to it until they are on full feed.

I never feed my hogs very much corn until about four weeks before they are to be slaughtered. Then I keep corn before them all the time and in addition I supply them with mill feeds, alfalfa and clover hay steamed until tender, turnips, artichokes, peas and, in fact, any kinds of feeds that will put fat on them and make wholesome meat. A variety of feed will put fat on a hog more quickly and cheaply than any single kind. It does not take long to fatten a hog if it is given a variety of wholesome feeds and the meat is well streaked, juicy and tender and weighs well in the scale.

The cost of meat depends upon the cost of the feed consumed by the hogs. Anything that cheapens the cost of the feed makes the meat cost less if it is not done at the expense of the health of the animals. No one who wants to put fat on the hog at the least expense and in the shortest time is going to compel the animal to stand in a pen with his feet six inches deep in mud and filth. Clean pens and clean surroundings are too important to be neglected. I give my hogs a good deal of skimmilk and buttermilk in the sloppy portion of their ration. I know there is no better or cheaper feed than such milk, but no matter if the animals do get plenty of milk, they want clear water to drink just the same. Three times a day I give my hogs all the clear water they will drink at each time and when the weather is cold I warm the water enough to take the chill off before giving it to them. I also warm the sloppy portion of their feed in cold weather. Warming the water and the feed is a little trouble, but I am sure it pays to do so. Charcoal, ashes and salt help to keep the hogs in a good, thrifty condition, and then they make better gains. My plan is to mix a quantity of these and keep the mixture before the animals all the time. Every fall every farmer should fatten enough hogs to supply the family with meat and lard for a year. These products can be grown much cheaper than they can be purchased from the butcher or the merchant.—*A. O. Choate, Hoard's Dairyman.*

Visible Supply of Wheat.

Official statement of visible supply of wheat in the United States, weekly, for four years:

Sept.	.....	.....	1,779,000	387,000
Oct.	.....	.....	5,911,000	536,000
Nov.	.....	.....	4,525,000	555,000
Dec.	.....	.....	8,007,000	1,204,000
Tot. yr.	.....	.....	55,034,000	10,070,000

French crop reports continue fine as to weather but the rain supply is insufficient to relieve the drought which is general throughout the country. Autumn sown grains look comparatively well and are suffering less for moisture than the spring grains.

Alfalfa Department

Baker, Ore., reports new crop alfalfa in the stack, but none being baled.

Lewistown, Mont., reports alfalfa with some rain may make a second crop.

Farmers in Ohio County, W. Va., are holding alfalfa meetings to take up the question of planting this forage in that section.

A portable alfalfa mill operated by G. F. Brown of Salida has been grinding alfalfa in the Lodi section of California for ranchers.

G. C. Funk, producer of Elkhorn Valley Hay at Atkinson, Nebr., produces yearly from 1,000 to 1,500 tons of hay and has 1,000 tons storage.

Wallace B. Wood of Fayetteville, Ark., has purchased an interest in the Denver Alfalfa Milling Co., at Lamar, Colo., and will have charge of the Kansas City branch.

Reports from Comanche County, Kans., say that the first cutting of alfalfa was harvested about 10 days ago; second crop coming on fine. The season has been very wet.

The Weather Bulletin of Iowa reports damage to alfalfa by army worms and the variegated cut worms. These have about run their course and are disappearing but the damage has been very serious.

Farmers in Chase Co., Kans., have made second cutting of alfalfa. As the cutting of some of this crop began as early as June 21 the record is said to have been the earliest for second crop cuttings.

Cattle shippers from Clay Co., Ia., say the first cutting of alfalfa in that neighborhood was heavy but difficult to harvest owing to rains. The second crop has been destroyed by the army worm which has cleaned up whole fields.

It is reported that the Natomas Company of California will plant 15,000 acres of its land in the upper section of its district in the Sacramento Valley to alfalfa. This should add about 150,000 tons to the state's output of this hay.

Kennewick, Wash., reports shipping surplus of alfalfa will be about the same as last year. The first cutting was in the stack and the second in progress about the first of July but very little hay has been baled as yet and still less sold.

Great Falls, Mont., reports very poor prospects for second cutting of alfalfa, irrigated lands being practically out of water with the first crop ready to cut. New hay choice quality is now offered at $30@31 delivered at Great Falls from Idaho but no timothy is moving.

The county agent of St. Louis county, Minn., says that farmers in that county are passing up a great opportunity to make good wages either with the scythe or the mower by not cutting the roadside hay, the quality of which is very good and hay is not particularly abundant.

Alfalfa is said to be one of the street products of Tuscaloosa, Ala. Sweet clover also is popular in that town; which suggests the remark that alfalfa lands are in lively demand in that part of Alabama and numbers of Northern and Western farmers are taking advantage of the comparatively low prices.

Our San Francisco reporter says that alifalfa from the interior has been in good demand and that there is also inquiry for the river product but very little other than first cutting is ready on the River and this hay is heavily laden with foxtail which renders it unfit for anything but stock feed and is practically unsalable in the city.

Spokane, Wash., reports some new alfalfa hay arriving but demand poor at $24 per ton as against Ellenberg timothy at $33. Seattle reports demand at the lowest point of the season, practically nil. Local buyers are taking hold of Yakima alfalfa very gingerly on account of the presence of cheat. They report also finding of about 12,000 tons of last year alfalfa still on hand in the Kittitas Valley and about three tons in the Yakima Valley.

ALFALFA AT SIOUX CITY.

No. 1 alfalfa hay was quoted the last week in June at $25 per ton, reaching the highest level of prices ever known in that market. Even at that price very little has been offered of late, the supply of good choice alfalfa being so limited that for the first time in the history of the Sioux City hay market alfalfa has been brought to that market from northern Wisconsin. There is, however, and has been a considerable supply of the poor grades but these have been in comparatively slight demand.

The weather no doubt has been the cause for the scarcity of high grade hay in addition to which the hay now in the stack is of course unfit for baling. Dealers generally estimate that about 75 per cent of the first cutting likely to move to Sioux City will be more or less damaged.

The trade anticipates also that unless better grades are procured from the second and third cutting the market is likely to suffer from a hay famine unless supplies can be brought west from Wisconsin, Illinois and Indiana. There are many good size orders for good quality alfalfa held by dealers at Sioux City which cannot be filled on account of scarcity of offerings.

THE ALFALFA SITUATION.

We have found the alfalfa hay situation is about as follows: Northern Colorado, Wyoming and Idaho—Dry, first cutting short, good quality. Southern Colorado, New Mexico, Western Kansas—First cutting very heavy, extra good quality. The rain belt territory, Kansas, Nebraska, Oklahoma—First cutting very heavy, poor quality owing to frequent rains.

Farmers universally are holding their hay in the expectations of last year's high prices, and very little hay is moving anywhere in the country at this writing. This is due perhaps as much to the extraordinarily heavy wheat harvest now on as to anything else.

What little hay is moving is selling at about twice the ordinary price at this time of year.

Owing to the above unsettled conditions, we are not going out with meal quotations as yet nor will until the market settles.—*The Haywood Alfalfa Warehouse Co., Bryan Haywood, Kansas City, Mo.*

Differ on Alfalfa Meal Prices.

KANSAS CITY, July 5.—A wide disparity in prices as quoted by mills and jobbing interests as quoted by buyers is limiting the trade in alfalfa meal in Kansas City to only scattered transactions. There is a difference of $5 to $7 a ton between the bid and ask quotations. Mixers in the East, Central States and Southeast, while reported as holding moderate stocks of old meal, have made practically no purchases of new meal. California mills are making sales in the Southeast at a discount under prices quoted by Colorado.

Choice alfalfa meal was quoted at $38@39 a ton, in carlots, new sacks, basis Kansas City; No. 1, $35@36; No. 2, $29@30; and brown, $27@28. Practically no choice meal was quoted, and few mills in Colorado were in a position to make prompt shipment.

A moderate demand prevailed for alfalfa mixed feeds. The high level of corn prices supplied an important factor in the broadened trade which mixers have recently enjoyed. Many buyers who normally consume corn are taking alfalfa molasses and alfalfa grain molasses feeds. Prices were unchanged, as follows: No. 1 molasses alfalfa feed at $38.50@39.50; No. 2, $37@38; brown, $35@36; alfalfa grain molasses feed, $45@54.

St. Louis Alfalfa Market.

ST. LOUIS, Mo., July 5.—The alfalfa feed market continues steady, but the demand is limited, and offerings are liberal enough to insure prompt deliveries. Owing to the double holiday at the close of the week there was little business reported. Stocks of mixed feeds are light, and choice alfalfa meal is scarce, but there are large offerings of No. 2 meal. Prices are as follows: Molasses grain mixed horse feed, choice, $59; No. 1, $50; No. 2, $46. Straight alfalfa molasses feed, choice, $45; No. 1, $42; No. 2, $39. Alfalfa meal, choice, $38; No. 1, $36.50@37.50; No. 2, $30@31 per ton.

Alfalfa hay continues quiet, as the demand is confined almost exclusively to good No. 1 to choice hay, while the offerings are mostly poor hay that is weedy, discolored or otherwise more or less out of condition, and such hay is slow of sale.

Prices are nominally as follows: Choice, $34@35; No. 1, $33@34; standard, $32@33; No. 2, $25@28 per ton, on track.

Alfalfa in the Pacific Northwest.

Spokane, Wash., reports that new alfalfa from the Yakima Valley is now on the market offered at $24, which is about $2 under old hay. Demand however is light. At Seattle the same hay is being offered freely at $24.50. At Walla Walla old hay is being held at $25@26 but the new cut, although it yielded heavily, is not yet ready for shipment. Some sales of the new hay are reported from $15@16 in the stack. New alfalfa at Lewiston, Ida., is quoted at $25@26. At Elmira, Wash., some alfalfa is being shipped in but the demand is light. At Early there is a fair demand for alfalfa; at Hermiston new alfalfa is moving steadily, first cutting however is cheaty and offered at $20 f. o. b. From Klamath Falls, Ore., a recent frost is said to have caused some damage to alfalfa. New alfalfa is now being shipped from Meridian, Ida., to northern Idaho and Montana at prices from $19@20 with growers disposed to sell the hay in the field to avoid stacking.

Payette, Idaho, reports a large increase of alfalfa over last year's yields. Prices are not yet established but farmers expect to open the season at $10@12.50 in the stack.

Our San Francisco correspondent reports that the chief activity in alfalfa is on the part of mills who are buying to convert it into meal.

The Iowa Weather Bureau reports that worms thought to be army worm has been particularly destructive to the alfalfa in small areas of the southern half of the state.

The army worm is reported doing considerable damage in alfalfa in Leavenworth County, Kans.

Reports to the American Steel & Wire Co. from Utah say that conditions were very favorable to the cutting of the first crop of alfalfa.

Continued wet weather in Arkansas has put the alfalfa crop in bad shape as it could not be cured. At Knobel settled say it is the worst season they have experienced.

Farmers at Ridgefield are trying out alfalfa this year and generally throughout Clarke County, Wash., there is more of this fodder grown than ever before.

From Lawton, Okla., considerable damage by army worm is reported but it has not affected the hay as in some other states.

Hog Sense Makes Dollars For Dealers

No feed dealer can afford to be without a protein feed. Hog instinct demands it as part of the ration. Experienced breeders always feed it. It is in demand in every experimental station. Any hog knows that

Standard Digester Tankage

is the most perfect balance for his corn. Guaranteed sixty per cent protein, combined with phosphate, lime, ash and fibre. Put it in a trough and he feeds himself just the right amount.

Get the free booklet, "Bigger Hog Profits."

Write at once for samples and quotations. We want live dealers.

Standard By-Products Co.
Incorporated
Live Stock Exchange Bldg., Louisville, Ky.

Ask Your County Agent

Full Confidence Feeds

You can make any man happy by winning his confidence. Every feeder of live stock who buys and feeds "Happy Stock" feeds is simply hilarious over the results he gets from his feed investment. That proves that "Happy Feeds" win their full confidence.

These are the BEST NAMFD feeds in the world. When we found that they were so near to being all that any feed should be, we were so happy over it that we just naturally had to select the name "HAPPY" for this line.

We do not buy nor use any oat hulls, cottonseed hulls, rice hulls or any other low grade feeding materials of any description. That is why we do not oppose the feed bill now pending in Congress. We hope it will become a law.

There is no better balanced ration feed in the world than "Happy Stock Feeds." We do not know of any that is as good. At the present time there is a big need throughout the dairying sections for our—

Happy Cow Feed

This famous dairy ration is rich in digestible proteins. It is a true production feed, containing not only the sustaining, but also the growthy or production proteins and fats.

You should lay the foundation for the biggest dairy feed business you have ever known by pushing HAPPY COW FEED.

If you want a straight car, we will ship it to you promptly. If you want a mixed car containing other Happy Feeds, just say the word and we will divide the car to suit you.

You will sell every bag of Happy Feeds with the assurance they will win the full confidence of the feeder.

Write or wire today for prices.

Address Dept. 39

Edgar-Morgan Company

MEMPHIS, TENN.

There is more feed produced in Memphis than any other city.

Hay Department

Stock buyers at Marion, Ia., report the hay crop there heavy with the acreage small.

Army worms in Kane County, Ill., are reported to have destroyed on one farm of 50 acres hay valued at $2,500, the damage having been done in a single night.

The Iowa Weather Bulletin reports an unusually heavy crop of hay is showing the effects of dry hot weather. They need rain badly in the Southwestern counties.

A stock feeder of Lawrence County, Mo., says that orchard grass meadows were never better than this year. This is a hardy grass which makes excellent pasture and very good hay.

The hay crop at Morning Sun, Ia., is said to be heavy and is generally a mixture of timothy and clover. Some stock men say they never saw a better crop than the one now ready to harvest.

A decrease in the hay acreage is reported from Monticello, Ia., many farmers having practically abandoned hay growing on the plea that the land is now too valuable to "fool with an uncertain crop."

The old crop of timothy at Bozeman, Mont., is reported practically gone and new crop considerably below that of last year. In fact the timothy yield outside of the irrigated districts will be very short.

Denver *Record-Stockman:* The country all over the western part of Colorado and over much of Utah is very dry. Pastures are burning up in many sections, and it seems to have forgotten how to rain.

Under the arrangements for shipping hay from northern to southern Alberta to relieve the famine there, 12,555 cars or 132,600 tons of hay were recorded as shipped, but this amount is not believed to have included much more than half of the hay actually forwarded to dealers and others, the amount stated being only the shipments under the free tariff, the others being of course paid for.

E. W. Kinney, representative of the United States Government at the hay recompressing plant at Montreal as inspector, has been transferred to New Orleans where he will have charge of inspection for all forage for the Government.

A stock dealer at Arvada, Wyo., says that country was never before as dry as now in our recollection. "There is not a bit of grass and no hay in the Powder River country and the Powder River itself is practically dry. In a distance back 10 or 12 miles there is no grass to be found anywhere.

In the northwestern Pacific section the hay situation is said to be very unsettled but it is apparent that many districts in Oregon and Washington which shipped in hay last year will not be required to do so this year. The shortage however in Montana will be greater than ever, the affected districts reaching down into the Yellowstone and Gallatin Valleys which last year were able to ship in considerable quantities. Some sections of Idaho also report a shortage of irrigation water. At Yakima it is stated that the marketing of the cheaty hay is becoming a real problem, chiefly on account of the high prices however, and growers are very firm in the notions of values.

HAY SITUATION.

OLD HAY USED UP.

NEW YORK (5).—Old hay is practically all gone—forwarded. There are perhaps 10 to 20 cars still in this territory. The new crop harvest is well under way and will cut a good, fair crop.—*Atwater Bradley Corporation, Genoa, N. Y.*

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

"The next few weeks will witness a larger movement of all varieties of hay from Kansas to the Kansas City market," declared Harry J. North of the Midwest Hay Company, who returned late last week from an extended trip in Central and Southern Kansas. "Excellent weather has recently been enjoyed by farmers in these sections of the Sunflower state, and with most of their wheat out of the way, they are giving time to the preparation of alfalfa, tame hay and prairie for shipment to market. The yields generally are good, and quality of the hay is about normal. Much alfalfa was destroyed by army worms in central and southern Kansas; in fact, the worms damaged the crop to such an extent that many farmers were unable to gather their usual second crop. However, the worms have since disappeared. In instances where farmers killed the pests by a poison mash, the alfalfa plant appears in a healthier condition, and a better quality hay is being produced."

Representation of the Kansas City market at the 1919 convention of the National Hay Association is still uncertain. With the movement of hay increasing after a long period of delay owing to excessive rains, there is danger that dealers will be so absorbed in handling pressing business here as to find it necessary to give up plans for attending the Detroit convention. No matter what the attendance of this market at the meeting, the wishes of the local trade are for a successful convention. The dealers here hope the National will grow in value to the hay industry. With several exceptions, the relations between this market and the National are ideal. It is within the power of Secretary Taylor to cement more strongly the relationship between this market and the National and it is confidently expected that, with proper support, the secretary will add to the number of friends to which that organization can point in Kansas City.

"Alfalfa seems to have reached a stable level, though this cannot yet be said of the prairie market," remarked J. C. Glover of J. C. Glover & Co. "The movement of prairie to market is beginning to reach a normal volume and with a comparatively light demand it is probable that further recessions in prices will be witnessed. The Northwestern drouth situation is a factor in the strength in the alfalfa market."

Shippers who consign their hay to Kansas City will continue to enjoy the comparatively low commission charges which have been in force here for many years. At a vote taken in the directors' room of the Kansas City Hay Dealers' Association, an amendment to increase the charges for handling consignments from 75 cents to $1 a ton on hay and from 50 cents to 75 cents a ton on straw was rejected. A two-thirds majority was required for the passage of the amendment. It was maintained by those in favor of the increase in commission charges that the present rate for handling consignments failed to pay expenses of dealers incident to the disposition of the hay; owing to the increase in wages and interest requirements on money as well as advances on other items. But the opposition, and the victorious forces, held to the theory that a consignment market is an attractive and upbuilding feature of Kansas City, and that an advance in the charges would tend to stimulate selling in the country. It was pointed out that during the period of high prices, the bulk of the arrivals represented country purchases while consignments make up approximately half the arrivals during a declining period in the trade.

COMPARATIVE RECEIPTS AND SHIPMENTS OF HAY, CHICAGO

The following is a table showing the total monthly receipts and shipments of hay, in tons, in the Chicago market, for the year 1919 and four previous years

	1915		1916		1917		1918		1919

OMAHA HAY NOTES.

J. C. PEDERSON, CORRESPONDENT.

Some new Prairie hay arrived this ek but it is hard to move as it is re or less in a heating condition. e weather is hot and sultry.

E. P. Palmer, manager of Dyer & Co., s arrived home from his trip out st and looks fine. He is ready to into the harness again for the new p.

On account of the 4th of July coming Friday the Hay Exchange decided to se up business on Thursday night i not report until Monday, July 7th, ing their employes a short vacation.

On account of the continued moisture l wet weather the situation as per- ned to the prairie hay crop may be nmed up in stating that it will be of oarser and more rank growth, and siderably impaired by a mixture of eds and foreign material.

The army worm, which was reported t week as prevailing in Iowa and braska, is now appearing in other tes, such as Kansas, Oklahoma, Wyo- ng and Colorado, thereby damaging siderably the second and third har- t of alfalfa. Continued hot weather y eliminate this pest, and of course present moisture will then cause a re favorable situation when the sec- l and third crops of alfalfa are ready be harvested.

Statistics from the Bureau of Mar- s indicate the possibility of having larger crop of forage the coming son than ever before in the history the industry. The approximate har- st will be near 116,000,000 tons, or % more than the normal supply. nsiderable trouble will be experi- ed in harvesting and marketing this p because of the unavailable labor l the apparent shortage of equipment which to move the crop to the various rkets. The forage crops in the vi- ity tributary to Omaha are report- to be in a very favorable condition. previously reported, the second cut- g of alfalfa was harvested during tinued wet weather, which resulted a severe loss, although the total ld was quite heavy.

Receipts of Prairie hay on the local rket continued to be of a scattered ture and consist of very poor quality, reby leaving no fair basis upon ich to place our quotations. Ar- als on the market during the week luded cars from various sections of country, and seem to be "clean-up" s, some of which, from their appear- ce, may have been in the barns for eral years. Continued shipments of rthern Wisconsin and Michigan hay arriving, but meet with very poor e, especially in view of the limited nand at present for forage of any ure. The ending of the teamsters' ike relieved the situation somewhat, ofar as the local buyers are now e to remove their purchases, which the past has caused more or less of ongestion on the market.

Hay Markets

NEW ORLEANS, LA.

uly 5.—Very little new hay being of- ed. Quote our market on old hay $43.00 No. 1, $41.00 for No. 2 and $40.00 for 3. No. 1 alfalfa hay offered from .00 to $29.00 per ton delivered.

DETROIT.

etroit, July 5.—Fair receipts coming n Canada. Demand active and market y. Virginia is taking a good deal of from this market. Quote: No. 1 tim- y, $36.50@37; standard timothy, $35.50 5; No. 2 timothy, $34.50@35; No. 1 ed, $33@34; No. 1 clover, $30@31 per

MILWAUKEE.

uly 5.—Business in the local hay mar- is slow with but a light movement, ough the supply is scarce. Prices de- ed again during the past week, due to t demand because of outdoor feeding l the prospects of a big crop which will due shortly. Current quotations are: oice timothy hay, $30@30.50; No. 1, .00@29.50; No. 2, $27.00@28.00; No. 1 ver, $20.00@21.00; light clover mixed, $26.00@27.00; red top and timothy mixed, $25.00@27.00; stained timothy, $12.00@15.00; marsh feedings, $15.00@17 00; packing, $10.50@11.50; rye straw, $9.50@10.00; oat straw, $9.00@9.50.

NASHVILLE.

July 7.—No material change is noted in hay, prices being maintained. Quotations: No. 2 timothy, $40@43; No. 2 clover, $38@42. Receipts of hay at Nashville last week were 14 cars.

ST. JOSEPH.

July 5.—The hay market continued about steady with some weakness in the prairie. Receipts while not heavy, showed considerable gain over supplies a week ago. Little change is apparent in the alfalfa division; supply being just enough to take care of the demand. We are looking forward to a more active demand in the coming week and also heavier receipts. Shippers are reluctant to sell at present market prices, and we look for an advance in the coming weeks. The tame hay division showed a fair demand, absorbing the present receipts readily. Some weakness was apparent in the lower grades which moved slowly. Hay quotations: Prairie, choice, $29.00@30.00; prairie, No. 1, $27.50@29.00; prairie, No. 2, $22.00@27.00; prairie, No. 3, $12.00@20.00; Midland No. 1, $16.00@17.00; Midland, No. 2, $10.00@15.00; alfalfa, choice, $30.00@31.00; alfalfa, No. 1, $27.50@28.50; alfalfa, standard, $23.00@26.00; alfalfa, No. 2, $15.00@20.00; alfalfa, No. 3, $12.00@14.00; timothy, No. 1, $30 00@31.00; timothy, standard, $27.00@29.00; timothy, No. 2, $24.00@26 00; clover light mixed, No. 1, $28.00@30.00; clover light mixed, No. 2, $22.00@24.00; clover No. 1, $24.00@25.00;Clover, No. 2, $15.00@22.00; straw, $9.00@9.50.

PITTSBURGH.

July 5.—The local market has become so fully stocked that local brokers are advising shippers to withhold anything less than the very best grade of timothy hay, which is already in good supply here. The demand is nothing to speak of and buyers are taking what they need in very small quantities. The result is that a liberal accumulation of various grades has been in progress for more than a week. Prices have received another cut, with the best grades at $38.50@39 a ton. The next is $35@36.50. Split cars containing mixed and clover hay are being moved only at buyers' offers.

MEMPHIS.

July 5.—Old hay is scarce and high, with prices nominal, and there is but little new hay of good quality here yet. Some shippers of timothy in Kentucky and Indiana have been asking for bids on early shipments, but the trade here is not taking hold much yet. There is expected to be plenty of new alfalfa of good quality here soon, but so far receipts have been light. For cash No. 1 alfalfa today $30 was bid, while the only thing offered was some No. 2 at $26. For the latter $25 was bid.

DULUTH.

July 5.—Only three cars of hay were received during the four days this market was open last week. With abundance of new grass available over the district, the demand was almost nil except from city customers of dealers in a few quarters. Prices are urged as follows: No. 1 timothy, $28@30; No. timothy, $24@28; No. 1 mixed timothy, $24@28; No. 2 mixed timothy, $20@23; No. 1 prairie, $26@28; No. 2 praire, $23@26; No. 3 praire, $18@20; No. 1 mdland, $18@22; No. 2 midland, $10@12; rye straw, $9@10; oat straw, $9@10.

BUFFALO.

July 5.—Prices are being cut here and the demand is naturally falling off. No. 1 is quoted at $35@36; No. 2, $33@34 and No. 3, $30@31 per ton.

TOLEDO.

July 5.—Receipts of hay are practically nil and dealers believe the old crop has been cleaned up. They do not anticipate relief from advancing markets until the arrival of new hay. Prices are unchanged from last week. No. 1 timothy, $37; No. 2 timothy, $35; No. 1 light mixed, $36; No. 1 clover, $34 per ton, f.o.b. Toledo rate point.

SPOKANE.

Spokane, July 3.—Timothy, del., $33 per ton; barley, rolled, $60; corn, $80; cracked, $82; oats, $58; steamed rolled, $58@60; oil meal, $98.

OMAHA.

July 5.—Receipts of both prairie hay and alfalfa are light and the demand continues quiet and market dull. Some new prairie hay is arriving and moving slowly as it is in a heating condition, causing prices to decline. We quote:

No. 1 upland prairie hay, $30@32; No. 2, $20@24; No. 3, $10@14.

No. 1 midland prairie hay, $26@28; No. 2, $18@21.

No. 1 lowland prairie hay, $18@21; No. 2, $10@14; No. 3, $8@10.

No. 1 alfalfa, $22@25; standard, $20@22; No. 2, $15@18; No. 3, $10@14.

Straw—Oat, $9@10; wheat, $8@9.

BOSTON.

July 5.—On account of increased receipts and quiet demand during the past week the local hay market is easier with receivers finding it more difficult to obtain extreme quotations than was the case last week. The general range of prices is nominally unchanged from last week, but there is some pressure on the part of receivers to make sales and concessions are made, especially on the lower grades, of which there is now some accumulation at the various railroad terminals, notably the Boston & Maine Railroad. The holiday this week also affects the local demand, trade being slow and of small proportions. New hay is appearing in some of the outside markets, although none as yet in the local market. Pasturage conditions are good and there is little barn feeding of hay in consequence. No. 1 timothy hay in large bales is nominally quoted at $43@45 per ton for the small amount offering, but the hay has to be exceptional in quality in order to bring the extreme quotation. No. 2 timothy ranges at $38@40 with most sales at the inside quotation. No Aroostook No. 1 hay offering. No. 1 Eastern hay is quoted at $37@39, with No. 2 Eastern at $33@35; No. 3 hay about $30@32. A full range on all grades of clover mixed is $33@36, with fine hay held at $30@33 for poor to choice. Receipts for the week ending July 5th were: Local, 162 cars; for the month of June, 1919, were: Local, 582 cars.

The straw market is quiet and unchanged. Choice rye straw is quoted at $16@17 per ton, with oat straw at $13@14. Offerings in excess of the demand. Receipts for the week ending July 5th were: Local, 7 cars; for the month of June, 1919, were: Local, 29 cars.

MONTREAL.

July 3.—As the new crop of hay is commencing to come into the city loose by nearby farmers, it is having its effect upon the prices of baled hay, which have further declined during the past week, sales being reported at $33@34 for best timothy, and $32 for good No. 2, $28@30 for No. 3, and mixed clover at $25@27. There is every prospect of a big crop of hay in Canada, and especially so in this province and Ontario. Quite a few fields have been cut, the quality being very fine, especially timothy.

The receipts of hay during the last week at Montreal were 3,633 bales, against 10,170 bales for the same week last year.

The market is difficult to quote, as carlots of baled hay are being offered on this market without finding a buyer. In fact, country dealers shipping hay to Montreal have ordered it to be shipped across the line on account of there being no sale for it here. The position is simply this: there is ample hay held here costing $25 to $35 per ton, which holders hope to get rid of between now and harvest, and until this is worked off there will be no money in shipping hay to this market. Prices, therefore, are purely nominal at present. —Trade Bulletin.

CINCINNATI.

July 8.—Local hay trading was of small volume the past week, but the fact that little was accomplished was due mainly to the holiday conditions, and only four days of trading. Receipts totalled only 109 cars. Though showing an inclination to decline, the market held fairly steady, and closing prices compared about the same as a week ago. Buyers appeared interested only in top grades of timothy and light mixed, but at the liberal concessions freely absorbed the medium and common stuff to the extent of completely clearing the plugging tracks of offerings on Thursday, the last business day of the week. Shipping orders were limited, and the greater percentage of the inferior quality was absorbed by warehouse men. Closing quotations: No. 1 timothy strictly, $38@39.00; standard timothy, $37.00@38.00; No. 2 timothy, $36.00@37.00; No. 3 timothy, $31.00@34.00; threshed timothy, $21.00@26.00; light clover mixed, $35.00@36.75; No. 1 clover-mixed, $34.00@35.00; No. 2 clover-mixed, $31.00@33.00; No. 1 clover, $25.00@27.00; No. 2 clover, $21.00@24.00; sample, grassy, $23.000@27.00; No. 1 local alfalfa, $28.00@29.00.

LOUISVILLE, KY.

July 7—Receipts have been better and the market is slightly weaker, but holding its own well. Demand is good. Straw is weaker as new straw is coming on. Rye straw is very scarce and high, but baling is starting.

Quotations, baled, car lots, are: No. 1 timothy, $39.50; No. 2, $38; No. 3, $35; mixed, No. 1, $36; No. 2, $34; clover, No. 1, $29; No. 2, $26; local alfalfa, No. 1, $30; wheat and oat straw, $8; rye, $14.

PHILADELPHIA.

July 3.—Baled Hay and Straw.—The market for hay continues weak and unsettled. Straw dull and weak.

Timothy hay (according to location)—No. 1, $40@41; No. 2, $38@39; No. 3, $35@36.

Clover mixed hay—Light mixed, $38@39; No. 1, $35.50@36; No. 2, $33@35.

Straw—No. 1 straight rye, $13@13.50; No. 2, $12@12.50; No. 1 tangled rye, $12.50@13; No. 2, $11.50@12; No. 1 wheat straw, $12@12.50; No. 2 wheat straw, $11@11.50; No. 1 oat straw, $12@12.50; No. 2, $11@11.50.

BALTIMORE.

July 4.—The past week was one of dullness in the local hay market with a light inquiry from every direction and present supplies of hay, therefore, more ample for trade requirements. Under these conditions, and coupled with the fact that some loose new hay is coming in from nearby points by farmers' wagons, and sharply underselling old baled hay, prices generally lack support.

Straw of all descriptions is selling sparingly with stocks on hand sufficient for the present needs of the trade. Quotations follow:

Timothy No. 1, $38; standard, $37@37.50; No. 2, $36@36.50; No. 3, $30@33.

HAY SHIPPERS TALLY BOOK

SPENCER, OHIO

No. 1 light clover mixed, $34.50@35; No. 2, $33@34.

No. 1 clover mixed, $33.50@34; No. 2, $29@32.

No. 1 clover, nominal, $31; No. 2, $28; No. 3, $26.

Straw—No. 1 straight rye, $15@15.50; No. 2, $14@14.50; No. 1 tangled, $12.50@13.50; No. 2, $11.50@12; No. 1 wheat, $8@8.50; No. 2, $7.50@8; No. 1 oat, $11.50@12; No. 2, $11@11.50.

KANSAS CITY.

July 5.—Hay prices continued on a downward scale this week. Prairie declined $3.50 to as much as $10 a ton, alfalfa closed unchanged to $1 lower and timothy was steady to $2 lower than in the past week. A larger movement to market is being witnessed, and advices to the trade indicated a sharp gain in the shipments from the country within the next few weeks. Arrivals this week amounted to 439 cars, compared with 368 cars last wek and 293 a year ago. Millers were in the market for good, well cured alfalfa, and shipments of the hay are being made to the East and Southeast. With drouth in portions of the Northwest, no large movement of hay from Idaho and Colorado is expected. Tame hay displayed a strong tone, with the new offerings, which are grading generally high, meeting with a good demand from the South and Southeast. Straw was unchanged.

Prairie—Choice, $28@29; No. 1, $26@28; No. 2, $20@25.50; No. 3, $18@19.50; packing hay, $5.50@7.50.

New midland prairie—No. 1, $16@18; No. 2, $9@15.

Alfalfa—Choice, $28@30; No. 1, $26.50@27.50; standard, $20.50@26; No. 2, $14.50@20; No. 3, $11@14.

Timothy—No. 1, $29@30; standard, $26.50@28.50; No. 2, $22.50@26; No. 3, $15.50@22.

Clover mixed—Light, $28@30; No. 1, $25@27; No. 2, $18@24.50.

Clover—No. 1, $23@25; No. 2, $15@22.50.

Straw, $8.50@9.50.

SPOKANE, WASH.

July 3.—Market still quiet. Some new alfalfa arriving, but demand poor being offered at $24; timothy from Ellensburg district being offered at $23.

SEATTLE, WASH.

July 1.—Demand for hay is at the lowest point of the season, practically no business being done. Due to excellent pastures, the general opinion is that present conditions will not improve for two or three weeks. Buyers not contracting freely for Yakima alfalfa on account of presence of cheat. Stocks carried over from last year are reported heavier than the carryover of the previous year, being about 12,000 tons in the Kittitas valley and about 3,000 tons in the Yakima valley.

DENVER.

July 1.—Hay, per ton—North Park wire grass, $30; South Park choice, $33; No. 1 South Park, $32; No. 2 South Park, $28; upland, No. 1 choice, $28; upland, No. 2 choice, $27; second bottom, $26; No. 1 Gunnison, $28; No. 2, $26; timothy, choice, $33; No. 1, $30; No. 2, $28; No. 3 and native mixed, $26; alfalfa, baled, choice, $22; No. 1 to choice, $20; No. 2, $18.

NEW YORK.

July 3.—The New York Hay Exchange Association reports the hay situation as follows:

	Hay tons	Straw tons
Receipts for week (5 days).	3,436	340
Receipts last week.....	4,271	340
Receipts Sept. 1 to date....	191,685	12,098

General remarks on trade conditions will be found elsewhere. Quotations follow:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$42.00	$40.00@41.00
No. 2 hay.....	38.00@40.00	35.00@37.00
No. 3 hay.....	32.00@35.00	30.00@32.00

Standard alfalfa..		24.00
No. 2 alfalfa.....		22.00
No. 3 alfalfa.....		18.00

SAN FRANCISCO.

July 2.—Practically all of the receipts now are from the new crop. The receipts are very light for this time of the year and in consequence arrivals have moved without difficulty at prevailing prices. The lack of receipts has been caused mainly by farmers not being ready to haul, as well as by some difficulty being experienced in getting cars to load as soon as wanted.

Several purchases have been made in the country districts for immedate shipment. These purchases being made only where prompt shipment has been promised. The majority of dealers feel that prices on grain and hay will be easier as soon as the normal receipts are available on this market. Whether or not this idea will mature remains to be seen later. Sales have been made in the country in some instances on a basis of what hay the seller will place aboard cars within ten days, etc. This indicating that the buyer expected possible decline. Fancy wheat and red oat hay have been in light supply and that which has arrived was sold without difficulty.

Alfalfa from the interior has been in good demand and considerable inquiry for the river product, but very little other than first cutting is ready on the river and this cutting is heavily laden with foxtail, which renders the hay unfit for anyth but stock feed.

We quote wholesale prices in carl lots for new crop hay: Fancy wheat h (light 5 wire bales), $17.50@18 per t No. 1 wheat or wheat and oat hay, $1 17; No. 2 wheat or wheat and oat h $12@14; choice tame oat hay, $15@ other tame oat hay, $12@14; wild oat h $10@12; barley hay, $11@13; alfalfa h $14@16; stock hay, $9@11; No. 1 bar straw, 50@80c per bale.

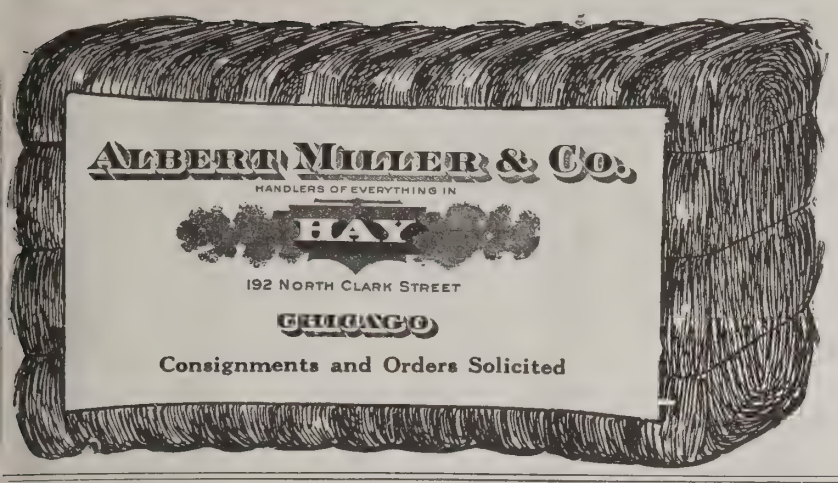
ST. LOUIS.

July 5.—The receipts of hay during past week have been moderate in amou consisting principally of hay of North growth.

Timothy hay market continues to r strong, with an active local demand good No. 1 timothy hay. Medium gra are quiet. Low grade hay is in libe supply, dead, dull and irregular in pr being hard to place. The trade looks continued firm values on good hay.

Light clover mixed hay continues to steady on the better grades which are excellent local demand. Low grade dull slow.

Heavy clover mixed hay quiet, dem being limited. An occasional car of heavy clover mixed hay is arriving, when in good condition, selling fairly w



Pure clover hay quiet and slow, dem being rather limited. Some new clover riving, but is out of condition and is sel at low values. The trade here does advise shipment of new clover unless is cured sufficiently well to arrive here and sweet.

Alfalfa hay continues in scant offer with an excellent demand for good N to choice alfalfa hay. The only offeri of alfalfa are poor hay, hay that has b discolored by rain, weedy and out of c dition. This class of hay is difficult place at all. The better grades are urgent request and if here would well.

Prairie hay market nominal. None offe but if here a limited amount would readily.

Straw—Scarce and wanted.

Track sales: Timothy—No. 1, $37@ Standard, $34@36; No. 2, $32@34; No $24@28; Headed, $24@28; Threshed, $

Light Clover Mixed—No. 1, $34@35; . 2, $30@31. Heavy Clover Mixed—No. $32@33; No. 2, $28@29. Clover Hay—oice new, $25@26; No. 1, $24@25; No. 2. @21; Heated, $10@12. Alfalfa Hay—oice, $34@35; No. 1, $33@34; Standard, @33; No. 2, $26@28. Prairie Hay—Choice nsas, $31@32; No. 1, $29@30; Standard, @28; No. 2, $24@25. Straw—$9.50.

Exports of Wheat.

Weekly exports of wheat and flour eat from sixteen United States and nadian ports, in bushels, as reported *Bradstreet's*, were as follows:

RUSSIAN AGRICULTURE.

An electrical engineer who spent some time in Russia as agent for a large American company recently expressed his belief in New York that "the Russian people will simply return to the agricultural life." Russian people in fact have never abandoned the agricultural life. All authorities who know about Russia have placed 85 to 86 per cent of the Russian people in the agricultural class, which is an exceedingly large proportion devoted to agriculture in any country and is the best evidence in the world that the Russian people have little industrial genius. As a class however the Russian peasants have been compelled to rely upon the landlords and upon their bankers for even such characteristic operations as the threshing of their grain.

The particular engineer mentioned thinks that Bolshevism will not leave any permanent mark on the form of new Russia, it being his idea that the communistic government of the local leaders, the Bolsheviki, has been convinced that the proper way and the quickest way for all to enjoy perfect peace and comfort and abundance of riches is to destroy the industries in the towns and particularly to disorganize and in part destroy the railways, The difficulties at this time in Russian cities is not, as other dependable travelers remark, a real shortage of foodstuffs in Russia but rather are due to the fact that the crazy industrial soviet form of government is a typical Slav form. This is no doubt true as to the village organization, the mir, or land holdings, being a very old institution. It needs no argument however to show that the soviet form of government in the towns is not only not a natural one but an impossible one, absolutely destructive of industry and of the means of communication; and therefore the surpluses of the farm are held on the farm for sheer want of ability to move them to the towns where they are needed. The rotten money from Bolshevik printing presses is also refused by the peasants who are sane enough to at least know good money when they see it, and to demand it for their goods.

Movement of Corn.

Following is a statement of the receipts and shipments of corn at the primary markets of the West for the weeks named:

QUICK RETURNS AND BEST RESULTS

WAGON LOADS RECEIVED,
A book for the use of country grain buyers in keeping a record of grain received from farmers.
Its column headings are: Month, Day, Name, Kind, Gross and Tare, Net Pounds, Bushels, Pounds, Price, Dollars, Cents and Remarks.
The book, 9½x12 inches, 160 pages, 20 lines to each page, giving room for recording 3,200 loads, is printed on Linen Ledger Paper and is well bound in strong board covers with leather back and corners. Order form 80. Price, $1.50.
PRICE CURRENT-GRAIN REPORTER, 227 So. La Salle St., Chicago, Ill.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, July 7.—Action of the provision prices was reversed last week, owing to the advance in corn and hogs, the latter to the highest known and corn to the best of the season. The selling pressure which has been strongly in evidence for several weeks was not in evidence and the buying power increased. Prices moved up readily with a liberal volume of business and closed well toward the top with July pork $2.40 and September $1.50 higher. Lard gained $1.07½ to $1.32½, the latter on October, and short ribs finished 77½ to 92½c higher, the latter on July.

Lard was bought freely by commission houses early in the week, but some of them turned sellers at the close, satisfying all buyers without depressing values more than 2½ to 5c from the top. The main feature was the reduction in the run of hogs and a growing belief that the summer supplies have been about all marketed and the receipts are likely to decrease for some time to come. Country packers sold lard to a fair extent and cash lard was July price to a shade under early and closed about even with July with loose lard at 90c to $1 under July. Lard stocks at western packing centers July 1 were 50,364,000 lbs., an increase last month of 7,482,000 lbs., and are 14,426,000 lbs. short of last year. Supplies are regarded as light for this time of the year and were it not for recent tanking of fat backs production would not have increased to any extent.

Trading in meats was of moderate proportions, although the Armour trade review said there was a good domestic demand for pork products, indicating that buyers are regaining confidence in the stability of present prices. Western stocks of meats are 407,078,000 lbs., an increase last month of 3,718,000 lbs., compared with 84,164,000 lbs. decrease last year and an increase of 23,625,000 lbs. two years ago. Short ribs increased nearly 1,000,000 lbs. and were 6,522,000 lbs., or nearly 14,000,000 lbs. short of last year and the smallest at this time in many years. Total dry salted meats increased 4,273,000 lbs., against a decrease last year of 60,284,000 lbs. The total is 218,130,000 lbs., compared with 236,556,000 lbs. last year. Supplies of pickled meats decreased slightly and are 188,948,000 lbs., against 151,371,000 lbs. last year, when total stocks of all meats were 387,927,000 lbs., or 19,151,000 lbs. less than at present.

It is claimed that there is a wall of lard and hog meats around Germany awaiting for the Germans to sign the peace treaty which is expected to permit free imports.

Kansas City Provision Review.

KANSAS CITY, July 5.—A strong tone prevailed in the market for provision products in Kansas City this week, prices rising in sympathy with the sharp upturn in live hogs. Provision requirements of harvest workers in Kansas, Oklahoma and other surrounding states were an important factor in the trade. Prices rose ½c to ¾c for the week, with fresh pork cuts showing the principal rise. Demand for fresh pork was moderate locally, while fair shipments were made to the East. Dry salt and heavy smoked meats continued to move in liberal volume to the South. Lard was up ¾c, with a good demand prevailing. Fancy hams and bacons are finding a broadened outlet, due to higher temperatures in the larger consuming markets.

Stocks of provisions in Kansas City at the opening of July amounted to 86,837,200 pounds, compared with a total of 86,052,800 pounds on June 1 and 66,115,800 pounds on July 1 a year ago. Lard holdings increased from 4,708,711 pounds on June 1 to 5,478,093 pounds at the opening of July.

PROVISION STOCKS.

Following is a statement of provision stocks on hand at Chicago on July as reported to the Board of Trade and collated by John Tredwell & Co:

Cash Meats.

On Monday there was a strong undertone to the hog products market influenced by a fair demand and rather limited offerings. Interest in mess pork was mainly in the September contract. In contrast to pork and lard, there was an easier tone to the short ribs market. Quotations Monday were as follows:

M. pork, new	$53.50@.....
Lard, round lots	35.15@35.20

Live Stock Markets

CHICAGO LIVE STOCK.

CHICAGO, July 7.—Hogs jumped up $22.25 at Chicago last week and $23 Pittsburgh, setting new records. T Stock Yard people are predicting 2 for hogs here. Prices were up 95c fr the previous Thursday and the av age on Thursday, which was the cl ing day, the Stock Yards not being op for business July 4 and 5, was $21. against $20.65 a week ago. Average the week was $21.30, the highest knov compared with $20.80 the previous we and $16.75 last year. Supplies were l large and the quality not up to the cent run. Packers were moderate b ers, the Armour interest taking 17,2 Swift 14,200, Wilson 10,300 and Mor 8,100. Total for all packers 105,5 against 149,900 the previous week a 123,900 last year. Average weight the week was 238 lbs., compared w 236 lbs the previous week, and 238 l last year.

A better tone developed in the cat market with steers 75c to $1 high the top for the week being $15.75, m on Thursday. Average for the week v $13.85, or 20c better than the previ week, and $1.95 under last year's. S plies were lighter and the impress is that the lowest prices of the sea have been made.

Cows and heifers sold to better vantage, regaining a good part of recent decline, with choice heifers up $14.25. Two loads of Dakota heif averaging 544 lbs., sold Thursday $11. The plainer grades sold arou $8.75 to $9. Bulls sold largely at $ to $9.25, the market being stronger, was also the situation in canners cutters. Stockers and feeders were moderate request with 5,000 head carr over on Thursday, including few st able for the feeder trade. Choice l grades sold at $12.25 to $12.75.

Sheep and lambs advanced and clo 25 to 50c up for the week with the bi of lambs selling at $16 to $17.40, w the top $17.60, and averaged $13 against $12.25 the previous week a $18.60 last year. The bulk of sale of sheep were at $7.75 to $9.25, aga $7 to $9 the previous week with t top $9.75, and average $8.80, or 5c b ter than the previous week, compa with $12 last year.

Kansas City Live Stock Marke

Sanders Sosland, Correspondent.

Kansas City, July 5.—Hogs and c shared honors in price movements fra upward direction this week. Prices o hogs reached a new high level, scori top of $21.75, while cattle, which has e extremely weak since April, scored a bound on a sharp decrease in recei The sheep market was again weak, n suffered further declines.

The hog market in Kansas City ros to 75 cents, both heavy and light weig sharing in the upward trend of the tid It was not unusual to find heavies n lights scoring the top quotations each Shipping demand was strong. The mar here had lately been above the parity i Chicago, but it was behind both Chi and St. Louis this week, thereby enc aging shipping demand. The average of droves for a day rose to a point as as $21.46. The demand for stock hog creased, and sales around $21 were ported. Receipts of stock hogs light. The total arrivals showed increase over last week and a ago in the face of the restriction the movement resulting from harvest of wheat. It appears that wheat harvest areas of Kansas have market hogs on hand.

The sharp decrease in receipts of c was attributed to a feeling of hopefu among producers of the Southwest. I auguration of a campaign to aid the ket and the drouth situation in the N west were bullish influences. Receip cattle were 19,900 head, compared 29,770 head last week and 32,700 a ago. Rush of the wheat harvest also fected the movement. Prices started sl ly higher, closing 35c to 75c highe steers, with weighty bullocks bri $14.60 and ranges up to $12.60. L weight steers scored the sharpest Butcher grades also shared in the up movement, showing a rise of as muc $1 for the week. Choice cows bro $11.75, with heifers at $14 and n yearling steers and heifers at $ Calves were strong. Stockers and fe

ted the strong tone in the beef cat-
market. Prices rose 25c to 40c, with
up to $12.50.
e sheep market declined 25c to $1,
the losses principally 75c to $1. The

th Worth, July 3.—A very remarkable
vement was noted in the cattle mar-
this week. Undoubtedly, the chief
for the activity and the upward trend
lues, may be attributed to the moder-
eceipts. The daily average for the
has been around 3,000 cattle and
quite a reduction from the recent
ge, and a sharp decrease compared
the corresponding period a year ago.
f steers of all classes are selling
50 to 75 cents higher than at the
time of last week. On that basis,
have been in demand, and the mar-
has experienced active sessions daily.

t. Louis National Stock Yards.

N. L. Wyatt, Correspondent.

ional Stock Yards, July 5.—With
market days cut out of this week
thing has pretty much of a holiday
rance at this writing. The trade
ally has been notified not to have
ing on the market until Monday and
consequence is a short supply this week and prices today have advanced correspondingly. The market is closing 35c to 50c higher for the week. Oklahoma cattle and some from the Flint hills in Kansas are beginning to arrive. They should be coming in fair volume by the middle of the month. Those that have come so far show flesh and finish and as they are selling on the native side we anticipate that they will sell well up with the native offerings.

The hog market is again the center of attention. Prices are the highest in the history of the trade and there seems to be no reason to expect a change in this condition. Each day since last Saturday has set a new record, the one today being $22.35 which was paid on several loads of good heavy hogs. Today's quotations are: Mixed and butchers, $21.75@22.25; good heavies, $22 25@22.35; rough, $17.50@20.25; light, $21.75@22.25; pigs, $16.50@20.75; bulk, $21.75@22.25.

In the sheep house the demand just now is for good lambs. For the past week or ten days the market has experienced a sharp decline, but in the last two days it has been checked and at this writing the market is about 50c higher than last Tuesday. The top for the week is $16.75 paid on Tennessee lambs. Sheep prices are on a steady basis. The feature in the aged sheep department is the increasing demand for good brewing ewes.

Barley

The Van Dusen Harrington crop report says that barley is a little thin in some places but on the whole is satisfactory. Some of the late barley in North Dakota has been damaged by grasshoppers but the damage by these pests has been in spots and is more severe on ground where crops were stubbled in. The farmers are still using poison, doing all they can, in this way, to stop the damage.

Barley Prices.

Following is the daily range of barley, spot malting quality and future quotations, at Chicago:

June 30	$1.16@1.21	July 2	$1.17@1.24
July 1	1.17@1.22	July 3	1.18@1.22

BARLEY MARKETS.

MINNEAPOLIS.—There was a good demand for barley last week and prices held firm to strong. Today there was a slightly easier feeling at the opening, as there were 354 cars received, but before the close the market rallied again and closed firm. Shippers are busy in the market. Deliveries on July contracts to date total 340,000 bus.

MILWAUKEE.—There was a brisk demand from shippers and industries for barley during the past week and under light receipts prices are higher and the marekt closed steady and firm. The demand was particularly good for malting grades but other offerings were also absorbed and the market is well cleaned up. For the week prices improved 2@3c. Receipts for the first four days of the week were 149 cars. Current quotations are: Good to choice, 48 to 50 lb. test, is quotable at $1.22@1.24; bright, $1.24@1.26; fair to good, 45 to 47 lb. test, $1.19@1.22; low, 41 to 44 lb. test, $1.15@1.20; feed, $1.14@1.18. Iowa quoted $1.16@1.25 for light to fancy; Wisconsin, $1.18@1.26; Minnesota, $1.15@1.24; Dakota, $1.15@1.24; feed and rejected, $1.14@1.18.

DULUTH.—Offerings of barley were in substantial volume during the four days in which this market was open last week, receipts amounting to 167 cars, against only 11 during the same period last year. Good Eastern buying was met with, and receipts were readily absorbed with quotations showing advances of 3@4c at from $1.07 to $1.17. Specialists in the trade here are looking forward to a good movement of barley to this market for a short time yet, as farmers are reported to still have considerable supplies to dispose of.

TOLEDO.—The local barley market is dull and uninteresting. Dealers are taking the waiting attitude, declaring present high levels are against much business being worked in view of the nearness of the new crop. No. 2 grade is worth about $1.23 basis in store Toledo.

BUFFALO.—Barley dealers had nothing to say but were of the opinion that the market would go higher regardless of what might happen to brewing in this country. The export inquiry was good and some maltsters took a few lots of barley, evidently having orders for malt for the old country. Feed men took a few cars. The range was from $1.23 to $1.33 for good feed to fancy malting, Buffalo.

KANSAS CITY.—Barley had a further decline of 2c this week, but the market was in better shape than a week ago, as receipts decreased to 7 cars. A car of No. 1 arrived Wednesday and sold at $1.15 a bushel. At Thursday's close No. 3 was quoted nominally at $1.11@1.12 and No. 4 at $1.10. Since the recent heavy recession feed manufacturers have not shown a disposition to reduce prices of their product accordingly. Evidently it was believed that the barley market would recover, in view of corn strength and the possibility that beer manufacture would be resumed. However none of the barley sold here is for malting purposes. Local stocks are unchanged, at 2,000 bus. Crop reports from western Kansas continue favorable, and it is expected that Iowa and Nebraska will have good yields. Drouth reports from Colorado and the Northwest were adverse.

OMAHA.—Market has been quiet but firm to higher as to prices, with No. 4 at $1.12, and No. 3 at $1.13. This cereal, says the Geo. A. Roberts Grain Co., is for sale. This cereal is becoming more popular daily for hog feeding and it can conscientiously be recommended to the farmers. "We ourselves have shipped any number of cars out in the state for that purpose and everyone has been well pleased with the results." What to do with barley, now that the brewing demand is eliminated, is a question. In a recent test at the Wisconsin Experimental Station, twelve lots of pigs were re-fed, using ground barley in the ration, and the return for each pig over the cost for feed was $14.38 for the barley fed pigs, and $12.38 for the corn fed pigs.

PORTLAND.—Barley crop conditions in the Pacific Northwest, as reported by that most dependable authority, the *Commercial Review*, are bad. "The North Pacific crop has had a serious setback in the past few weeks, and, no doubt, has been cut down fully 50 per cent in a great many sections, hot winds and drouth being the chief causes of the same. Nevertheless, this territory will have ample barley for all requirements, and whatever surplus is not needed for feeding purposes at home can be exported. As brewers are a thing of the past and will not be in the market for supplies, exporters will have to look to new fields in disposing of the surplus raised in this territory." The season of the 1918 crop closes with next to no barley on hand, and what is needed until the new crop comes in must come up from California. Just now it looks as if the market has been cleaned up regularly and prices are on the mend again, after showing up soft for a week or ten days. So far there has been little report of export demands. Prices for Standard A are $56 per ton and feed $55 per ton.

SAN FRANCISCO.—The *Commercial Review* says: "There is not much activity in the barley market here and at times quotations are withdrawn. Harvesting continues under more favorable conditions but yields are very uneven throughout the state. Early sown wheat and barley are showing up very favorably but late sown barley is being cut for hay. Harvesting in Northern California of wheat is in full sway and a difference of opinion exists as to the average amount of bushels per acre, but reports state that they run from 20 to 25 bushels, and this applies to summer fallowed land, but a conservative estimate was made by Geo. R. McLeod, head of the Sperry Agricultural Department, who claims that the crop will be somewhere in the neighborhood of 11,000,000 bushels; last year the crop was only 6,500,000 and it looks as if this year's crop has almost doubled that of the previous season. Prospects of a good crop of wheat was very favorable early in the season, and the cool weather has helped out considerable." Prices on the new crop range for feed from $2.45 to $2.55 per cental, and on the old crop about $2.60 per cental for feed and $2.70 for shipping grades.

CHICAGO.—The barley market faced a short week, but was very active and strong during the session. The export demand was peculiarly active and bids for the feed varieties were notably strong, showing an advance for the week of about 4c, whereas the other advances were only about 1@2c. The malting varieties had some support on the decision of the Circuit Court of appeals not to interfere with the manufacture of 2¾ per cent alcohol beer. The week's market closed on Thursday rather quiet as to business, but with a firm undertone. Monday's prices showed no particular change. Elevators were bidding well for No. 3 at an advance of 4@4½c over the July. The malting demand was less active, but the exporters were still in the market for the feed varieties and were reported to have taken 75,000 bus. Offerings were more liberal. Monday's sales were reported at 52 cars of the malting varieties at a range of $1.15@1.22; screenings quoted at $1.03@1.10. Futures closed with a firm tone; July, which opened at $1.15 and sold down to $1.14 closed at $1.14¼; September opened at $1.19½ and closed at $1.18¾, the range for the day being $1.18½. Exports from Atlantic ports for the week were 2,300,000 bus., compared with 608,000 bus. a year ago. The total visible report increased 641,000 bus.; local stocks decreased 46,000 bus.

First cutting of alfalfa, a farmer from Oakland, Neb., reports, was stacked nevertheless the greater part of it is to be left on the ground three weeks on account of wet weather and is practically a loss.

BUSINESS AND TRADE CONDITIONS

THE German National Assembly on July 9 ratified their representatives' signatures to the Peace Treaty and on the same day the President of the United States returned to his own country; and in general rather than in specific terms he has since told the Senate what he had done, asking their ratification of his acts. The work of reconstructing the material world, thrown into confusion and ruin by the Germans, has already begun, without waiting for the American Senate to act. On Saturday, July 12, the Council of Five raised the trade blockade against Germany. The French government authorized the resumption of intercourse by its people with their late enemies. In the United States, Acting Secretary of State Polk announced that blanket licenses will be issued for trading as soon as the legal experts shall decide whether a Presidential proclamation is necessary to permit similar resumption of trade relations with the Germans, except as to imports of dyestuffs, chemicals and potash. The English resumed trade immediately the treaty was signed. A new world era has begun.

But with liabilities magnified many fold, Europe is in the position of our own South after Appomattox. The South had only its land and some buildings left; but by a merciful provision of Federal law the South was forbidden to pay her war debts, domestic or foreign, and there were no indemnities. She stood bare-handed but free. The Germans have both debts and indemnities; but the other nations, with their debts alone to be taken care of, are not visibly in a much more enviable position. It is not saying anything new to repeat that Continental Europe is substantially bankrupt. No one can read Mr. Vanderlip's frank statements in his "What Happened to Europe" and avoid that conclusion. In most of the Allied countries of the Continent the finances had been badly managed for a generation and the limit of safe taxation had been almost reached before the war began. This was the most conspicuous result of the progress of democracy in Europe since 1848 and 1871—the accentuation of extravagance on the army, on colonizing ventures that paid no dividends, on public works of doubtful value, waste on Government-owned railroads, increase of artificial employment in order that every locality might share in the beneficence of government, so that countless millions were squandered either in purely government work or by inordinately increasing local subventions, by rendering gratuitous public services which once had paid their own cost at least, in multiplying unnecessary government employes—all in strict obedience to the law that democracies are always spendthrift and that as the field of business competition is narrowed by the entrance of the government into business, the field of competition becomes political, man's success then depending not on his capacity as a business man but upon his vote-getting power. These old extravagant habits of deputies still remain to plague finance ministers in the face of dire necessity for economy.

Finance Minister Erzberger on July 8 faced his troubles with praiseworthy candor, when he told the Weimar Assembly the naked truth (a condition which other Continental finance ministers have not as yet been brave enough to expose so frankly as to their own difficulties), that Germany must pay and that he could hold out no "promise of any feat of financial legerdemain that would transmute nothing into something," that Germany should set itself firmly to the great task ahead; the rich should put aside all thought of luxury; the whole nation prepare to tread the path of strict economy. Property and capital, he said, would bear the heaviest burden, for the income of the government must be increased 900 per cent. Unemployment grants would be gradually cut down, and the itemized budget must be made to contain the fewest possible non-productive appropriations. The proposition to make a capital levy has been rejected, as it has been in both England and France also, but that step seems hardly necessary immediately, though it may yet come of necessity. Though the interest on bonds goes into one pocket, most of it will come out of the other to pay that interest; net profits will be small; real estate and improvements which are immovable will pay less net income, whereas the workman, when the subtractions from his earnings exceed his will to pay may move out. The men who really caused the war—the merchant and manufacturing class and the ever greedy junker—will pay; the others have already paid and in any event will get their "irreducible minimum" of wages.

The pitiful Dernburg is pessimistic, of course. He doubts if the nation "can bear it all. We can only pay when we have a surplus of exports over imports. . . . We must have more credits than debits." Of course; and of course at the moment Germany has not much to export, though she has her factories and mines intact. But Germany's resources other than industries are ample. Her coal and potash alone are enough. In Rhenish-Westphalia there is estimated to be 500 billion dollars worth of coal priced at $2.50 per ton and in North Germany 125 billions of potash at the same value per ton. It is only a question of the period allowed for payments and of being permitted to earn the payments and to trade for her creditors' benefit, since it is only through a return to unrestricted international trade that the indemnities can be paid without demoralizing all trade and especially the industries of the peoples to whom the indemnities shall ultimately go.

The President set another entirely new precedent on Thursday by personally delivering the German treaty to the Senate. As this was the first treaty personally negotiated by any President, so, too, its manner of presentation to the Senate for ratification was quite as unusual. Mr. Wilson seems to delight in dramatics of this sort. The setting of the Senate chamber was typical of the august occasion; but the message accompanying the delivery was not illuminating as to the points of objection raised by the recalcitrant senators. The President attempted only a general characterization of the scope and purposes of the treaty, being content with the truth, to him obvious, that a League of Nations is "a practical necessity," "an indispensable instrumentality for the maintenance of the new order" in the world of civilized men and recognized as "the hope of the world." On this he will appeal to the nation.

And he is not likely to appeal in vain. The objections of Senators Knox, Lodge, Borah, Johnson, Sherman, etc., are so palpably partisan only that the public have long since declined to take the objections seriously. The public turn rather to those who recognize the Treaty's and the League's shortcomings but also the latter inevitableness. It is. And it will last in some form. The Germans destroyed for the moment the old body of international law, but humanity recognizes now as it never did before that, "An injury to one is the concern of all;" and no exigency of pee-wee American politics can override that tremendous fact. In view of what is going on in Europe now, even after four years of misery unspeakable, "no one looks upon war as a moral impossibility." The future is full of menace: and as *The Review* has said: "The Covenant does not profess to be capable of bringing force swiftly to bear against a determined violator of the world's peace; it reckons not on instant and irresistible repression but upon the deterrent effect of the fear of ultimate consequences." The League, with the tripartite agreement of England, the United States and France to protect France in the event of a wanton attack by Germany, constitutes the sole assurance men can have of world's future peace, at least of immunity against a repitition of the horrors of the past four years. Already the opposition to the League in Washington has gone stale, even before the real battle against it has begun. "That there should be more delay inspired by party politics," says the *Unpartisan Review*, "is an infamy."

The ratification of the treaty by Germany has been regarded in all quarters as having an important bearing on trade and industry. The blockade has been lifted and goods are loading for the Central peoples. The tide has turned again toward normal trade. Prices show no decline anywhere. Indeed all Europe is in a turmoil over the constantly rising cost of living, Italy being in a peculiarly unhappy state, although in France and England also the distress is acute. But the world has ceased to look for any price recessions until labor begins to produce more abundantly, although one English commodity index number recorded a decline of 5.5 points in May. The effect of the ratification is expected to be a broadening of the export trade in iron and steel, of which the United States is now the greatest producer, in the proportion of 45 to 9.6 million tons annually in England, or to 14.9 in Germany and 1.9 in France, or as 45 is to 27.3 for all. On June 30 the unfilled orders of the Steel Corporation were reported as 4,892,855 tons, an increase of 610,545 over May 31, and the first showing of an increase of any size since June 30, 1918. Building activity shows an increase in spite of the endless strikes and excessively high prices of materials and labor which augur continued high rentals or losses ultimately to investors. At any rate, the demand for all building materials is becoming more urgent. Copper also has advanced, reaching 20½c last week for September delivery. Cotton in like manner noted an advance on heavy buying orders from Liverpool, the labor situation in the British spinning trade having distinctly improved of late, while the Continental demand cannot be long delayed. The Federal Reserve Board continues to frown upon the heavy operations on the Stock Exchange, reminding operators that it is not a function of the system to provide cheap money for stock speculation and that the needs of trade and of the Government are such that "flurries in the rates for call money on stock collateral are inevitable as long as the present methods of financing and settling speculative transactions in stocks are persisted in. As things are now they can be guarded against only by such methods as were adopted during the war, providing a reasonable supply of credit for carrying stocks, but contrariwise taking effective measures to prevent undue speculation or expansion of the loan account; but it would be in every way undesirable and unfortunate to perpetuate in peace times such arbitrary meas-

---

THE corn acreage in the South this year does not show any increase as anticipated. Counting 14 states,

the preliminary estimate shows 43,451,000 acres vs. 43,921,000 acres harvested as per Dec. 1, 1918, report. The condition is better and shows a forecast of 866,000,000 bus. vs. 736,000,000 as estimated at Dec. 1, 1918.

RULE FOR DISTRIBUTING CARS

THE attorney of the farmers' associations has been fighting the car distribution rules of the Commerce Commission, as announced in 47 I.C.C. 475, known as "South Dakota case," ever since that ruling was announced. Recently for that purpose the former intervened in *Tanner & Co.* et al vs. *C. B. & Q. R. R. Co.* (53 I.C.C. 401), recently decided, wherein the Nebraska Railroad Commission's rule was attacked. That rule, it will be remembered, bases distribution of cars as between individual houses as the station on the score of a "past business" as well as grain offered for immediate shipment. The Commission, however, has refused to set aside the former ruling and sustains the previous ruling in 47 I.C.C. 475, to the effect that "the amount of grain on hand conveniently located for prompt loading is the basis for grain car distribution between individuals in times of car shortage." The Commission adds, however, that, "The Director General is not a party defendant to this proceeding and no order for the future will be made." We assume, therefore, that unless the Director General shall make specific orders to the contrary, the rule stated above will obtain.

BUREAU OF MARKETS AT IT AGAIN

THE Bureau of Markets is again breaking out with crop condition reports, the last from Oklahoma. As hitherto remarked in these columns, two different crop reports from the Agricultural Department is something that ought not to be tolerated. The Bureau of Markets has no facilities for gathering crop data, and if the Secretary of Agriculture has any regard for the reputation of his Department as a crop reporting institution (through the Bureau of Crop Estimates), he will call a halt to the Bureau of Markets attempting this work. Two "official" reports on the same subject and not in agreement make both worthless. The Bureau of Markets is not succeeding so well with its own specific duties that it has any energy to spend on officious crop reporting, which so far as the Department of Agriculture is concerned should be confined exclusively to the Bureau of Crop Estimates which is alone equipped to do such work and do it right.

CONCRETE STANDS THE WIND TEST

OUR terminal correspondence in this week's issue reports the complete loss during a storm of a grain elevator constructed by local contractors, which serves to emphasize the stand always taken by us, advising the employment of only recognized elevator builders when erecting new properties or making additions. We are not acquainted with the full circumstances, the velocity of the wind or other conditions causing the above mentioned loss; but it so happens that another article in today's PRICE CURRENT-GRAIN REPORTER refers to the fact that an elevator and mill remain standing in a Western town, going through a tornado when all surrounding property was demolished. This is the experience ordinarily of concrete elevator owners and should indicate to those tempted to place their contract with a "barn builder" that they are taking long chances by doing so.

THE *Daily Bulletin* and associates who make up the world's wheat visible, credits Australia with 143 million bushels available. We have every reason to believe that this total is too large by any amount in excess of 125 millions as a maximum. Not that it matters a great deal. There will probably be plenty to go round, even with the disappointment in American fields. Broomhall's *Corn Trade News* June 24 estimated that all Europe will grow this season in excess of 400 million bushels with importers' requirements of 440 millions, all of which North America should be able to supply, leaving 150 millions in the Southern Hemisphere, with the possibility of adding 100 millions more from next December harvests. So there is apparently plenty of slack to supply shortage by over estimating the Australian supply and the disappointment in this year's American field.

LICENSING THE PACKERS

A BILL for the "rigid licensing" of the meat packing industry has been introduced in the Senate by Mr. Kenyon of Iowa and in the House by Representative Anderson of Minnesota. It is said to have the "full approval" of the Federal Trade Commission, which ought to be enough in itself to condemn it. There is also another, known as the Kendrick bill. Should either become law every phase of the industry would be brought under the control of the Agricultural Department, acting through a Commissioner of Foodstuffs, who would have control of stock and refrigerator cars, railroad terminals and all the collateral lines of the meat industry, as well as cold storage houses, and the distribution of their products. This commissioner would, "on finding any violation of the law," make complaint to the Secretary of Agriculture, who would have power to revoke licenses, the holders of which, however, by one bill, are graciously given the expensive right of appeal from the Secretary to the U. S. Circuit Court of Appeals, although it is the purpose of some advocates of this legislation to take away even the right of such appeal.

Now, this paper holds no brief from the packing industry or any part of it; nevertheless it would enter here a protest on behalf of a certain type of business interests liable to suffocation of their existence by this kind of law-making. The bill is simply another of the paternalistic Agricultural Department's subterfuges to obtain power to meddle with and control to lines of business in which the farmers are indirectly interested. It has no possible justification. If there be at any time any "violation of the law," there is ample statutory and common law to punish violators. But as all recent efforts of the Department of Justice and the unctuous Trade Commission to break down the packing industry have been failures the present legislative undertaking is simply an effort to avoid or to sidestep all such difficulties by giving the Secretary of Agriculture plenary power over the industry as a whole, including scores of men and firms against whom no complaints have ever been made or likely to be made. The proposed Commissioner of Foodstuffs could proceed as the Federal Trade Commission now does, "on complaint" of anyone, responsible or irresponsible, to libel individuals or corporations and force defendants to prove themselves not guilty; whereas in this country the method of procedure has always been to require the prosecutor to prove guilt before a man shall be condemned. It is another endeavor to break down the old and established defenses of the individual against official abuse and to extend the inquisitorial method and process of department *ex parte* enquiry and judgment against business houses which now exists but which is insidiously breaking down the hitherto jealously protected privileges of individuals to absolute protection by the courts.

There has been enough of this sort of injustice by the Trade Commission and the enforcement Divisions under the Food Administration to make it certain that such legislation would be highly dangerous No line of business will be safe if precedent of this sort is established, since the argument for it can have no limitation of application, and demagogs are no respecters of persons. Once the meat packers come under the ban, the grain trade would immediately follow, and no one knows where the curse of the politician would find a halting place.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures fro various statistical exhibits appearing weekly in detail "The Price Current-Grain Reporter," these figures repr senting the past week, the preceding week and corr sponding time last year, here assembled for ready refe ence:

	July 12.	July 3.	July 13, '1
Wheat—			
Primary receipts	2,801,000	1,022,000	4,725,0
Primary shipments ...	838,000	488,000	575,0
Receipts since July 1.	3,832,000	1,022,000	6,468,0

EDITORIALETTES

FIRE losses in June amounted to $20,476,000 a for the half year to $131,017,000, compared wi $24,890,000 and $144,083,000 for same perio of 1918—a sufficient commentary on American thr and carefulness.

PERHAPS Vice-President Lang's letter to Se Cuthbertson of Illinois may relieve the tensi somewhat which buyers of wheat have felt as handling the unpriced grades of wheat.

THE "General Review of Crop Conditions" by t Bureau of Crop Estimates on another page tells t story of June's performances. Some considerable d clines are recorded and some improvement of con tion, but Montana's shrinkage of 34.7 in conditi putting her average of all 13 crops at only 46.7, sho that that state has been hit pretty hard this year.

THE grain dealer is not always friendly for o vious reasons to the miller's desire to export whe only in the form of flour; but the proposal has t virtue that it would keep the offals and the la fertility at home, and both are needed. The elimi tion of the brewers' and distillers' grains from t feedstuffs supplies creates a new condition whi can be most easily and immediately relieved by creasing the supply of millfeeds and a lowering possible of their price.

THE Inspection Survey Committee, headed by mer Hutchinson of Indiana did a commendable se ice in calling the attention of the managements each of the 28 inspection departments which t committee visited, to the specific defects which t committee conceived to be needed to bring each to the proper standard of efficiency. These lett are not mimeograph duplicates. Each letter was w ten to fit the one market addressed. They were n perfunctory epistles, of the nature of "bread and b ter" letters with a "moral." For that reason they a truly "as others see us," and should have a distin value and corrective influence.

THREE DOLLARS a year in the United tates and Mexico; $4.00 a year for Canada, 5.00 United Kingdom, the Continent of urope, Australia, and other countries in the niversal Postal Union. Less than a year at ie same rate. Single copy 10 cents.

LETTERS on subjects of interest to those ngaged in the grain trade, news items, reports i crops, grain movement, new grain firms, ew grain elevators, contemplated improve- ents and cars leaking grain in transit are olicited.

THE ADVERTISING value of The Price urrent-Grain Reporter as a medium for aching the buying power of the grain eleva- or men is unquestioned. The character and umber of advertisements in its columns tell ! its worth. If you would be classed with ie leading firms catering to the grain trade, lace your announcements in the trade's only eekly, which is always first to get the live, p-to-date news to its readers.

ADVERTISEMENTS of meritorious grain levator machinery and supply houses and of esponsible grain firms who seek to serve rain dealers are solicited.

CHICAGO, JULY 16, 1919.

GRAIN TRADE REVIEW

Sentiment in regard to the course of orn and oat prices has changed ma- erially in the last few weeks. A short hile ago the trade in general were ooking for lower levels, in view of the upposed release of the surplus grains n other countries, which would be vailable for Europe. Australia has a airly liberal quantity of wheat, partly f doubtful quality. Argentina has a ood amount that can be secured, pro- iding sufficient ocean tonnage be avail- ble; but aside from these two coun- ries it is up to the United States to houlder the burden of supplying Eu- ope. Finances are a dominating fac- or. As far as Australia is concerned he United Kingdom can secure all the wheat necessary, as Australia owes that ountry money, but in Argentina the ituation is somewhat different.

Grains advanced for over three years because the Allies had to be fed, and now the Central Empires are added to the list. The exhausted reserves in Eu- rope are the prime factor in making for high prices for all commodities. Food stuffs are rather scarce of all kinds, par- ticularly bread and feeding grains and oats. Europe is willing to pay the price asked; and while business in some lines is rather slow to develop, it is generally expected that shortly an im- mense amount of wheat will begin to clear from this country. Canada is at a great disadvantage in not being able to ship through American ports, although it is probable that Portland, Maine, will be used by that country. The United States, however, will commence to ship in volume before Canada completes her harvest. Trading in wheat for future delivery at Winnipeg is expected to start on July 21, with certain restric- tions. If prices are lower there than in the United States there will be consid- erable complaint from the producers there, and also from consumers here; if higher, producers in this country will complain bitterly. Already Canadian farmers are raising objections.

While consumption may be reduced somewhat by the high prices, the eco- nomic unrest demands that foodstuffs of good quality be available for the masses in Europe. Wages in this coun- try are high, and the average man gen- erally able to secure sufficient food, but in Europe there have been many bread riots and wages have not kept pace with the price of foodstuffs. This may demand a revision of prices somewhere, or an advance in wages. It would be very hard to convince farmers in this country that they should take a lower price, although the Grain Corporation might proceed to cut the price of the grain to consumers and stand the loss; but the Corporation will not do this un- less forced to do it.

Further reduction in the prospective yield of winter and spring wheat is un- der way. In the Northwest dry weather has prevailed in many sections, and there has been some damage by black rust, although the latter is not proving as bad as expected as yet, the change to dry and hot weather preventing its spread. In the Central belt spring wheat is proving a poor crop in many in- stances, and the private reports re- ceived of late indicate that it is possi- ble the final yield of both spring and winter grain may not exceed 1,100,- 000,000 bu. and may fall to 900,000,000. This, however, would give an exporta- ble surplus of around 300,000,000 to 500,- 000,000 bu., a quantity that could scarcely be cleared even though ocean tonnage and financial conditions were normal, which is not the fact in either case.

Corn prices are the highest known for futures, and with one exception the highest on record for the cash. Corn has advanced to a point where pound for pound it is selling equal to low grade wheat, and the latter may be sub- stituted for corn as feed in some places. A crop scare is in the making, as ex- tremely high temperatures have pre- vailed in the southwest, and there is a dry area of considerable proportions east of the Mississippi. Corn can stand considerable dry weather, but if the crop is tasseled, and there are hot winds the Southwestern yield may be cut down radically in a few days. At the moment the Southwest has an excellent prom- ise. Taken as a whole the corn belt is in the most excellent condition, and needs one or two good rains to bring the crop through to maturity.

A scare of no mean proportions has developed in oats, and with a fairly active export demand due to the cut- ting down of the feeding grain crops in the United Kingdom and France, prices have advanced at a very rapid rate. The country has been sending in damage reports and buying orders, and farmers have found out through recent experience that they can easily control the market. At the same time there is every indication of a very heavy move- ment of the new crop within a few weeks, as the sales to arrive have been about normal for this season. This grain was hedged in the pit, and if con- tinued it will take considerable new outside buying in order to absorb it. Rye and barley have also been affected by the bullish crop outlook, although it seems almost impossible that better than an average crop of oats, rye or bar- ley should not be secured. Blight has been the main cause of the reduced esti- mates on oats, and the extremely high temperatures have also affected rye and barley. The three grains can be secured in this country in volume by importers, and nowhere else. Very few people ex- pect to see export business in corn either on the present or the new crop unless there is a radical change in con- ditions.

Grain Market Summary.

Primary receipts of wheat, corn and oats for the week follow:

	July 12, 1919.	July 3, 1919.	July 13, 1918.
Wheat	2,801,000	1,022,000	4,725,000
Corn	3,436,000	2,253,000	4,950,000
Oats	5,178,000	3,213,000	3,566,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	11,415,000	13,321,000
Preceding week	6,468,000	10,059,000
Since July 1	17,883,000	23,380,000

All deliveries of corn sold at new high records the past week. Bullish sentiment predominated, and with gen- eral covering by shorts and a marked broadening in the outside buying, espe- cially in the December, prices moved up readily. The bulge brought out liberal profit taking in the old crop futures, and they reacted very sharply at times, although closing with net gains of 7¾@ 10⅞c, while the December was up 2⅛c. At no time was the September as low as the previous week's close, while the December was off 5½c at one time due to selling on the excellent crop outlook. High temperatures in Kansas and short covering made the bulge, and the best figure was made and maintained at the close on Saturday. Prices are far above last year's.

Oats futures closed at the top with net gains of 8@9⅝c, the latter on Decem- ber. Market was a big, broad affair, and prices were on the upgrade the greater part of the week due to reports of damage in many sections of the belt. Blight has cut down the prospective yield materially. Drought in western Europe has caused heavy damage to all feeding grains there, and oats were partly de-controlled in the United King- dom. The latter country was a free buyer here, both cash and futures. Country offerings to arrive much larger and were mainly hedged in the Sep- tember.

Cash wheat prices declined sharply due to larger receipts from the new winter crop. Mills were active buyers but were not inclined to absorb the of- fering at the recent big premiums over the guaranteed figure, and it is expect- ed that before long practically all of the business will be at the minimum figure. Red winter is already selling at that figure to a shade over in the leading markets. Flour demand is better. Trad- ing in wheat for future delivery will commence at Winnipeg Monday, July 21, without restrictions. Export offers of Canadian wheat are already being made abroad with the idea of finding out what buyers are willing to pay. Range of prices the past week follows:

			Close		
Corn—	High.	Low.	July14, 1919.	July12, 1919.	July15, 1918
July	$1.99⅛	$1.86¼	$1.94¾	$1.87	$1.60
Sept.	1.98	1.85	1.95¾	1.84⅞	1.60½
Dec.	1.65	1.57	1.65	1.62½	.....
Oats—					
July	.79	.70¾	.79	.71	.75⅛
Sept.	.79⅛	.70¾	.79	.71	.70½
Dec.	.81	.72⅜	.81	.72⅜	.....

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to July 12	3,823,000	6,468,000	3,527,000
P. shipments to July 12	1,326,000	819,000	3,135,000
P. stocks on July 12	2,409,000	461,000	2,457,000
P. consumpt'n to July 12	3,030,000	5,234,000	2,224,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to July 12	140,207,000	221,390,000	188,477,000
P. shipments to July 12	84,595,000	116,685,000	101,361,000
P. stocks on July 12	3,812,000	8,251,000	984,000
P. consumpt'n to July 12	55,917,000	96,628,000	86,981,000

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	4,048,000	539,000	4,992,000
P. receipts to July 12	285,664,000	324,434,000	294,493,000
P. shipments to July 12	223,254,000	242,663,000	257,072,000
P. stocks on July 12	11,598,000	4,710,000	1,308,000
P. consumpt'n to July 12.	54,860,000	77,600,000	41,105,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to July 12, 1919, with comparisons with 1917:

	1918-19.	1917-18
Chicago	205,000	66,000
Milwaukee	77,000	7,000
Minneapolis	1,478,000	1,449,000
Duluth	200,000	6,000
St. Louis	843,000	1,372,000
Toledo	21,000	21,000
Detroit	14,000	6,000
Kansas City	790,000	3,144,000
Peoria	13,000	1,000
Omaha	82,000	241,000
Indianapolis	100,000	155,000
Total	3,832,000	6,468,000

Receipts of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	July 12, 1919.	July 5, 1919.	July 12 1918
St. Louis	796,000	47,000	1,270,000
Kansas City	681,000	109,000	2,460,000
Omaha	52,000	30,000	166,000
Toledo	14,000	7,000	6,000
Detroit	4,000	10,000	3,000
Indianapolis	87,000	13,000	138,000
Peoria	12,000	1,000	1,000
Chicago	151,000	54,000	58,000
Milwaukee	45,000	32,000	5,000
Minneapolis	828,000	650,000	615,000
Duluth	131,000	69,000	3,000
Total	2,801,000	1,022,000	4,725,000
Shipments	838,000	488,000	575,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago spe- cially reported for this paper by George Broomhall's service:

	July 12, 1919.	July 5, 1919.	July 13, 1918.
American	8,278,000	4,376,000	2,055,000
Indian	.....	.....	310,000
Argentine	3,120,000	3,594,000	3,157,000
Australian	1,432,000	1,448,000	840,000
Others	116,000	112,000	46,000
Total	12,946,000	9,530,000	6,408,000

Exports of wheat since Aug. 1, com- mencement of European crop year, com- pared for three seasons:

	1918-19.	1917-18.	1916-17.
American	351,972,000	228,549,000	333,972,000
Indian	5,099,000	13,450,000	33,514,000
Argentine	75,593,000	71,378,000	58,463,000
Australian	70,053,000	36,943,000	18,258,000
Others	4,048,000	3,328,000	10,238,000
Total	506,765,000	353,648,000	484,445,000
Season	.....	376,524,000	501,414,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	July 12, 1919.	July 5, 1919.	July 13, 1918.
American	.....	107,000	462,000
Argentine	735,000	1,505,000	.....
African	97,000	148,000	48,000
Total	832,000	1,760,000	510,000

Exports of corn since Nov. 1, 1918, compared with last year and year be- fore:

	1918-19.	1917-18.	1916-17
American	3,455,000	24,082,000	36,726,000
Argentine	43,769,000	13,156,000	53,805,000
African	4,738,000	2,450,000	.....
Others	.....	94,000	2,044,000
Total	51,962,000	39,782,000	92,575,000
Season	.....	52,393,000	106,985,000

World's Oats Exports.

Exports of oats last week, compared with previous week and a year ago:

	July 12, 1919.	July 5, 1919.	July 13, 1918
American	1,874,000	718,000	1,361,000
Argentine	.....	.....	185,000
Others	.....	.....	.....
Total	1,874,000	718,000	1,846,000

Exports of oats since Aug. 1, 1918, and comparisons for three years:

	1918-19.	1917-18.	1916-17
American	87,921,000	118,565,000	116,400,000
Argentine	23,539,000	14,788,000	38,612,000
Others	.....	880,000	50,000
Total	111,460,000	134,233,000	155,062,000
Season	.....	140,826,000	162,753,000

Chicago Grain Stocks.

Wheat stocks in all positions in Chi- cago decreased 62,000 bu. last week, rye 613,000 bu. and barley 7,000. Corn in- creased 243,000 bu. and oats 128,000 bu. Details follow, the last three ciphers omitted, except in the totals:

	Public	Priv.	Total.	Last yr.
Wheat	.....	109	109,000	29,000
Corn	353	1,511	1,864,000	4,605,000
Oats	728	4,547	5,275,000	2,726,000
Rye	637	343	980,000	384,000
Barley	721	745	1,466,000	239,000

WHEAT SHORTAGE COMING

An Estimate by a Bureau of Markets Itinerant in Europe of the State of Wheat Supplies.

The Bureau of Markets, a Washington report says, has assembled and published a "survey" of the world's wheat supply, the foreign demand, guaranteed prices and freight rates, from which it is indicated that the American export price of wheat will be very much in advance of the present guaranteed price. The report which follows does not quite support this view of prices, but it says:

"The situation throughout the world results from the policy of all countries to encourage the production of wheat by guarantees to producers of a minimum price, or by fixing a minimum selling price, and also by the practice of regulating distribution by Governmental agencies working in co-operation with the Inter-Allied Food Commission. The effect of stimulation of production by war needs has appeared more decisively in countries far removed from the war territory, and also it appears that the greater the guaranteed price the larger has been the production.

"Canada is a single exception to this owing to partial failure of the crop. In countries involved in the war production was lessened, due to loss of territory in the theatre of operations and the withdrawal of men to fight. In some countries the effect of guaranteed prices did not have the same effect as in the United States, because of the high cost of labor and other operating costs on farms. The general deduction from the entire survey of the world's crop of wheat is that there is a shortage of 36,170,000 bushels.

"The production of wheat by fiscal years, in bushels, comparing a three-year average production with the production for 1918, is given below:

Country.	Production. 1911-13. Bushels.	Production. 1918. Bushels.
Algeria	23,198,000	49,199,000
Argentina	166,521,000	219,431,000
Australia	88,961,000	114,864,000
Austria-Hungary	247,141,000	199,220,000
Canada	228,933,000	189,301,000
Chili	21,409,000	28,292,000
Egypt	35,792,000	32,555,000
France	324,137,000	233,781,000
Germany	160,237,000	90,330,000
India	369,946,000	379,829,000
Italy	190,840,000	176,368,000
Japan	26,305,000	32,923,000
Roumania	88,491,000	78,658,000
Russia in Europe and Asia	727,133,000	721,106,000
Spain	123,560,000	135,709,000
United Kingdom	61,397,000	93,099,000
United States	704,995,000	917,100,000
All others	226,273,000	97,159,000
Total	3,825,096,000	3,788,926,000

"All others include Brazil, Belgium, Bulgaria, Denmark, Greece, Morocco, Netherlands, Portugal, Serbia, Sweden, Switzerland, Tunis, Uruguay, Union of South Africa, etc., for which separate official statistics are not available.

"The Government guaranteed prices for the years 1918 and 1919 in the various countries were as follows:

"Algeria, $2.36; Argentina, $1.55; Australia, $1.14; Austro-Hungary, $2.21; Brazil, $2.65; Belgium, $2.15; Canada, $2.25; Denmark, $1.97; Egypt, $2.67; France, $3.94; Germany, $2.10; Italy, $4.33; Morocco, $1.58; Netherlands, $3.23; Portugal, $3.83; Spain, $3.96; Sweden, $2.95; Switzerland, $3.25; United Kingdom, $2.28; United States, $2.395.

"The fixed minimum export price for Argentine wheat is $1.55 per bushel at Buenos Ayres, and the price for domestic consumption is about $1.20 per bushel. While the British Government guaranteed a minimum price of $1.14 to the Australian producers at Australian ports, three million tons were sold to the Imperial Government at $1.16 per bushel, and other amounts at from $1.50 to $1.66 per bushel. Sales to Sweden have been made at $1.40 per bushel and to India at $1.34 per bushel, all at Australian docks, except shipments to India, which were to be delivered at Indian ports. The British Government's minimum guaranteed price to Australia for the season of 1919-20 is 0.972 per bushel, and the Prime Minister of the Commonwealth has been authorized to offer the British Wheat Commission 74,666,667 bushels at $1.20 per bushel."

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle:*

	July 11, 1919. Bales.	July 4, 1919. Bales.	July 12, 1918. Bales
Port receipts	116,267	101,367	32,962
Since Aug. 1	5,744,592	5,611,113	5,716,106
Port stocks	1,206,867	1,258,484	1,069,010
Int. receipts	68,392	68,946	23,317
Since Aug. 1	6,505,739	6,421,125	7,770,028
Int. shipments.	108,088	104,325	60,527
Interior stocks.	980,757	1,027,232	781,041
Amount brought into sight	154,599	151,703	99,105
Since Aug. 1	11,185,857	11,019,845	11,915,579
Northern spinners' takings.	10,657	32,997	34,374
Since Aug. 1	2,056,444	2,045,787	2,739,216
Southern consumption	56,000	56,000	83,000
Since Aug. 1	3,309,000	3,253,000	4,086,000
Expts. to Great Britain	131,812	71,403	19,462
Since Aug. 1	2,474,184	2,342,372	2,219,979
Exp. to France.	33,114	None	12,200
Since Aug. 1	748,611	715,497	634,911
Exports to Continent	13,038	97,921	13,828
Since Aug. 1	1,967,393	1,954,355	1,280,975
Total week's exports	177,964	169,324	45,490
Tot. exports since Aug. 1	5,190,188	5,012,224	4,135,865
World's visible supply	5,034,743	5,092,947	3,370,211
Of which Amer.	3,380,743	3,409,947	2,212,211

N. O. stocks	377,100	404,810	360,362
On shipb'rd waiting clearance.	171,315	189,196	52,588

Broom Corn.

The Bureau of Crop Estimates notes a material reduction in the broom corn acreage for this year, the cause being the large wheat acreage and the demand for forage and feed crops. Weather conditions since the report was issued have been hot and dry in the Southwestern section and the growth is being watched with lively interest, as the tonnage will depend upon conditions during this month and August.

The marketing has been comparatively light during the past week. Buyers are finding only small amounts, but no material change in prices except some of the better grades have advanced a little, the range being from $60@100 for average qualities. The Wichita market has been quiet with only a small movement. Prices range from $75 for Western to about $250 for the best Lindsey available. The better end of the offerings has been sold at from $175@250. In the Illinois district the acreage has been reduced. Marketing has been quiet during the week; one large crop was sold at $245; some other smaller lots at prices ranging from $150@200. Growing conditions have been good and the crop looks fine.

Nebraska State Report.

The Nebraska Board of Agriculture in a report issued Jan. 11 says Nebraska will be disappointing in both the yield and quality, the yield reduction being about 25 per cent. The production of 67,725,000 bus. is forecasted. The estimated production of spring wheat on July 1 condition is figured at 12,141,000 bus., making a total of 79,866,000 bus. of wheat for the state compared with 43,141,000 a year ago. The corn acreage is estimated at 6,745,000 compared with 6,954,000 bus. a year ago. A forecast of 8,392,000 bus. of barley is made. Oats reports are generally favorable and a production of 78,763,000 bus. is forecast compared with 56,188,000 a year ago.

Grain Corporation Licenses.

The Grain Corporation gives notice that. "All Food Administration licenses in effect July 1, including wheat and wheat flour, will be continued until the President proclaims the state of war between the United States and Germany terminated. The license under the Wheat Director, effective July 15, is in addition to licenses effective prior to July 1. Therefore, dealers in wheat and wheat flour must have two licenses until the proclamation aforesaid has been proclaimed, and after that, the one license under the Wheat Director will be sufficient."

A TESTIMONIAL TO CONCRETE CONSTRUCTION.

Last month a cyclone did a great deal of damage to the town of Fergus Falls, Minn., destroying a great many dwellings and business blocks and also a grain elevator. We present herewith an engraving which illustrates more clearly than pen can describe the havoc wrought by this disastrous storm, and it stands also as a testimonial to the strength and durability of concrete construction.

The plant of the Fergus Falls Milling Co. was directly in the path of the cyclone. It is a five-story building of reinforced concrete. The mill building not only stood up during the storm but it so split the force of the storm that five residences in the immediate lee of the mill were left standing. The wooden elevator, as will be noted to the left, or

EFFECTS OF TORNADO AT FERGUS FALLS, MINN.

the remains of it, was totally wrecked. The steel window sashes in the mill were twisted out and the doors were twisted from their hinges. A 20-foot section of the fire-wall projecting above the roof slab was torn off and a round hole about 10 feet in circumference was taken out of the roof slab proper. The ⅜-inch reinforcing bars in the roof slab were sheared off as though they had been sawed. In the office, which is in the concrete building, all of the counters and partitions were cleaned out. But notwithstanding all this, the building itself does not show a twist or crack.

It certainly must be a comfortable feeling to the many country grain men who have concrete plants to feel that they are practically immune from such destruction and from being put out of business by a cyclone.

REDUCED WHEAT YIELD IN KANSAS.

KANSAS CITY, July 14.—[Special Correspondence.]—Kansas, which is noted for its surprises, agricultural and political, has sprung another joke—this time on the wheat producers. Instead of the 229,600,000 bushel crop predicted by the State Board of Agriculture, or even the 200,000,000 bus., regarded as possible by the Bureau of Crop Estimates, the reaping and threshing machines are proclaiming that the yield may fall far below the 200,000,000 bushel mark. Some pessimistic observers are placing the production between 150,000,000 and 175,000,000 bus. This is partly the result of premature ripening or blight in the central, northern and western counties, where wheat was late and ran into some very hot weather just before it was ready to cut. The reduction is also due, in a large measure, to the effects of wet and stormy weather in May and June, which flattened the crop in the central, eastern and southern portions two or three times, and to ravages of grasshoppers in the southwestern district, especially in Fo County. Many advices indicate th fields which were expected to make or 40 bus. an acre are turning out to 20 bus., and even less.

The quality of the wheat also sho disappointingly, ranging from 58 lbs bushel down to 46, as a rule. The are a few instances of heavy yields a 60-pound wheat, but the crop genera is below normal, according to preli nary returns. However, the flour-m ing quality of the grain is good, so as millers have tested it by grinding.

The lowering of the yield and wei will cost the Kansas farmers a rou sum financially, and the handlers wheat will feel the deficiency of volu Nevertheless, Kansas has an enorm crop of wheat—much above the avera

T. J. TANNER

GRAIN BUYERS OF CANA HOLD CONVENTION.

The third annual convention of Order of Grain Buyers of Canada brought to a close on June 20th. organization unanimously extended invitation to the members of the G War Veterans' Association to enter grain buying business and offe those who took up the profession assistance of members of the organ tion in making them proficient in department of the grain trade. An matters dealt with at the conven were the bonding question, the re of weights, grade, dockage, and shr age, automatic scales and residences buyers. A special committee was pointed to deal with each of t matters.

The report of the secretary-treas showed that over 300 buyers in t prairie provinces have affiliated the order since December last.

The officers for the ensuing year elected as follows: President, Wil Rothwell; vice-president, P. May Fred. Hicke, who has been secre treasurer for the last eight months, made permanent secretary-treas The directors are W. H. Newkirk, Stacey, Geo. H. Orp, G. Wallace John Laing.

Inglis' Report.

John Inglis' report on Northwes and Central Indiana is as foll "Corn stand and condition perfect; vanced fields tasseling. Oats n lighter than last year but will yield ter than they look. Will cut some week. Threshing wheat running t ty to thirty-five bushels. Heavy crop. Spring wheat blighted."—*L & Bryan.*

Bill of Lading Effective Date Changed.

The Commerce Commission has poned the date from Aug. 8 to Se when the new uniform bill of la will become effective. This chang date has been made in order to shippers loss on supplies of old bil ready on hand.

The Letter Box

In the Grain Trade.

Price Current-Grain Reporter: Rus-l M. Lutz has entered the grain busi-ss at this place.—*John G. Ulrich, resco, Mich.*

Wheat Yields.

Price Current-Grain Reporter: Wheat reshing has begun and is yielding ound 25 bus. to the acre.—*Andrew hr, De Graff, Ohio.*

Sold Elevator.

Price Current-Grain Reporter: We ve sold our elevator to the Glasford nner Farmers' Elevator Co.—*A. ghtbody & Son, Glasford, Ill.*

Crops Good.

Price Current-Grain Reporter: All ops are good in this section except ts and spring wheat, due to the outh.—*Charlevoix Elevator Co., Charoix, Mich.*

Too Many Mills.

Price Current-Grain Reporter: We ink it of vital importance that some un should be found to prevent the ilding of more flour mills, but to en-rge the capacity of those already ilt. We expect to make no repairs is year.—*The Hanley Milling Co., Coocton, Ohio.*

Threshing Begun.

The Price Current-Grain Reporter: reshing begins today, July 9, with out 50 per cent shrinkage under first imation, striking an average of from to 15 bus. per acre. Fair milling ality of wheat.

Corn needing rain.—*Citizens Lumber Supply Co., by R. H. Atwood, Chester, br.*

Will Locate at Wellington, O.

Price Current-Grain Reporter: I wish announce that after July 15 I will located at Wellington, Lorain Co., io, where I have bought a warehouse d feed mill and will do a wholesale d retail business in hay, feed, grain, c. I have been for several years with e Dewey Bros. Co. of Blanchester, io.—*J. W. Greenfield, Wellington, io.*

Disappointing Yields.

Price Current-Grain Reporter: Wheat reshing starting here; quality and eld very disappointing. Large amount straw to run through, but the yield e-half to two-thirds less than estiated before threshing started. There ve been no changes in the ownership elevators at this station and no new ildings contemplated.—*Bryant Elevar Co., Bryant, Ill.*

Big Feed Crop Outlook.

Price Current-Grain Reporter: Will y that Texas, so far as we can under-and, has about the best prospects this ar for feed crop, but the recent conued rains have damaged a great deal the oats and wheat in the shocks, d we hear some very discouraging ports in regard to same, but we hope e damage will not be so great as it uld seem at this time.—*E. A. Johnn Co., Dallas, Tex.*

In Northwest Missouri.

Price Current-Grain Reporter: The st load of new wheat was brought in July 5. Very heavy rains had made tting extremely slow and there were any fields blown down also, which ill not be cut. Several new threshing tfits have been bought in this vicinity tely. Corn is looking well, except that hich is taken by the weeds.

There is a big demand for cane seed be used where cornfields are too eedy and will be plowed up and seeded cane and millet. Timothy and clor prospects look good so far as do e pastures also.

Our watermelon growers have had to plant two to four times, as they have had trouble with seed getting rotten on account of so much rain.—*Geo. R. Lingle Seed Co., Clinton, Mo.*

Alabama Hay.

Price Current-Grain Reporter: There has been too much rain to cure hay in this neighborhood and 80 per cent of it has been cut. Alfalfa is the best on account of recent rains; the second cutting also is heavy, but planters are having trouble in saving it. We had another big storm on July 4, damaging the last cut. This rain, however, will give the next cutting a good start and is also fine for the growing Johnson hay.—*W. A. Bacon, Gallion, Ala.*

Will Build Elevator.

Price Current-Grain Reporter: Jas. Carlon is wrecking his old house at this place and building a new 20,000 bushel modern house, equipped with automatic weighing out scale and 10-ton Howe wagon scale and truck dump.

The wheat crop in this locality is very badly hurt; do not expect more than one-third of a crop, and the quality will be very poor. Oats and barley, also corn are very good.—*Farmers Elevator Co., per Wm. R. Hanson, Mgr., Delmont, S. Dak.*

Quebec Crops.

Price Current-Grain Reporter: Hay cutting is now in full blast and a lot of it is being stored in excellent condition, the weather up to the 11th being most favorable. We will have the largest crop on record running principally light mixed.

Oat and barley crop almost a failure due to late seeding, but the heavy showers of the 11th and 12th will help a little. The straw will be very short. Wheat and peas are good.—*Lefebvre & Mahon, Howick Station, Quebec.*

Rains Help Saskatchewan.

Price Current Grain Report: Saskatchewan crops have been greatly relieved and revived by recent moisture over most of the province. In many cases drought had done its work; the rains were too late.

The sum total will be considerably below normal and will add no great burden to the market. As there has been no frost to check growth all crops are full ten days ahead of the usual time.

Except for a streak of hail, crops in this locality are good, oats about usual average and wheat 90 per cent or more.—*George H. Baxter, Lipton, Sask., Canada.*

Wheat Cut—Alfalfa in Doubt.

Price Current-Grain Reporter: The wheat harvest is practically over, as far as cutting is concerned, but the quality is not nearly going to come up to expectations, nor is the yield, on account of too much rain.

The most of the second crop of alfalfa has been cut, and it now depends on the weather condition what the third crop will do as to seed. If favorable weather continues there ought to be a normal crop of seed.

The forage crop is looking good, and the corn crop, although the acreage is small, could not be any better at this time.—*Lindsborg Hdw. & Seed Co., Lindsborg, Kans.*

Corn Coming On.

Price Current-Grain Reporter: With moisture enough in the ground to feed the roots, hot days and nights above, the corn crop is doing the best job of growing imaginable. Early planted fields are already showing tassels. Mr. Farmer has done all he can for his corn fields; nature must now complete the work unassisted by further cultivation, and she seems now to be in a kindly mood, and the prospect is for a good crop in the fall.

Recent reports from Illinois as well as from several other Western large oat-raising states confirm previous estimates of a smaller yield of lighter weight and poorer quality than the last crop. Some farmers are talking now of carrying over to next winter some of the choice oats grown in 1918; they still are the cheapest food for farm animals as well as for humankind. The foreigners know this, too, and are buying more freely of late.—*H. I. Baldwin & Co., Decatur, Ill.*

From Southeast North Dakota.

Price Current-Grain Reporter: Rye is a light crop, thin stand; some rye cutting is now under way.

Barley is ripening and is a fair crop. There will be some barley cutting this week.

Oats are a fair crop and the early stuff is ripening.

Wheat has been damaged by hot winds, and the grasshoppers are damaging some fields quite badly. A half a wheat crop is expected with favorable wheat weather.

Flax is doing fine in growth, but the grasshoppers are beginning to destroy some of the fields.

Corn is a fine crop—never looked better.—*Farmers Grain and Seed Co., H. A. Jacobs, Mngr., Mantador, N. D.*

Reaches Many Readers.

Price Current-Grain Reporter: Since the publication in the June 11 issue of THE PRICE CURRENT-GRAIN REPORTER of the excellent article announcing the formation of the W. L. Richeson Co., Inc., this company has received numerous letters from people and firms in various sections of this country stating they had read of the formation of this company in THE PRICE CURRENT-GRAIN REPORTER, all of which attests the value of your periodical to the grain trade.

As a particular demonstration, however, of the wide circulation of THE PRICE CURRENT-GRAIN REPORTER, we wish to attach herewith exact copy[1] of cable received from Georges Levy, 15 Louvre Paris, France, which you will note gives reference to our advertisement in THE PRICE CURRENT-GRAIN REPORTER. Undoubtedly, this will prove a source of much gratification to you, and we take pleasure in passing it on, at the same time extending our congratulations to you on the extensive field covered by your publication.—*The W. L. Richeson Co., Inc., by W. L. Richeson, President, New Orleans.*

[1]M. Levy says: "Referring advertisement 'Price Current' ask France Agency for your grain export business. Cable."

Visible Grain Supply.

The following table shows the stock of grain in bushels in public and private warehouses at the principal ports and in transit by water on the dates named, with comparisons, as compiled by the secretary of the Chicago Board of Trade for the week ending July 10, 1919 (000 omitted):

Wheat Futures at Winnipeg.

Winnipeg wires say that the members of their exchange have decided to resume trading in wheat, thereby carrying out the wishes expressed by the Acting Minister of Trade and Commerce. The date of resumption has not been fixed.—*Pope & Eckhardt Co.*

IMPORTANT RULING OF INTEREST TO WHEAT BUYERS FROM THE PRODUCERS.

Sec'y W. E. Culbertson of the Illinois Association has published the following communication from Bert H. Lang, zone agent at St. Louis and second vice-president of the Grain Corporation, clearing up some open questions as to grain buyers' duties and rights:

My Dear Culbertson: I think I am prepared now to clear up the points that were submitted at Springfield and on which I was not ready at that time to give a definite ruling.

1. In the event of a complaint on buying basis, this office will make a survey and fix the buying basis for No. 1, which shall govern all future transactions but will not be retroactive. (Of course, you understand, that the dealer always has the right of appeal to the Wheat Director from decision on buying basis.)

2. If a producer makes no complaint, either as to price, grade or dockage, at the time of delivery, he forfeits his right to make complaint thereafter.

3. Wherever producer is dissatisfied with the price, grade or dockage, the dealer has the right to decline to unload the wheat, provided state laws do not impose an obligation to unload. In commenting on this, New York uses the following language: "Of course, if it was found that a licensee was mususing his facility upon which the farmer must depend to market his crop, his license might be revoked by the Wheat Director, or the Wheat Director might exercise his right of requisitioning the facility, in order to make effective to the producer the Government guarantee." In this connection, though, it is hoped and believed that the dealers will recognize that they are in a way a public grain handling facility, and will take in the grain and let us adjust the difference in the prescribed way.

4. It is perfectly satisfactory to the Grain Corporation to have the dealers handle the farmer's crop on a commission basis, but such opportunity must be offered to all. The charge they make, however, for this service, is a point subject to review by the second vice-president.

5. The dealer has a right to demand of the producer that he come in at the time his first wheat is delivered, to the end that an understanding as to grade, dockage and price may be reached before his entire crop is delivered.

I think that this fairly covers all of the doubtful points, and there is really nothing more to say on them except that should it be determined at some later date that the licensee had misrepresented facts or had been in any way guilty of fraudulent methods in satisfying the producer that he was paying the full price and properly grading his grain, then the case in point might be re-opened.

Now, Mr. Culbertson, this entire ruling is for the Agreement licensee, for you will understand that the Agreement licensee is alone committed to a definite plan of grading, deducting dockage, price differential and adjustment of difference where the producer is not satisfied with the price. The Agreement dealer alone is obligated to place before the farmer, in the shape of the prescribed placard, the method of procedure in the event of dispute.

So then, the dealer who has not signed the agreement simply rests his case in the seventh paragraph of his license conditions, namely: "That the licensee shall not engage in any unfairly discriminatory or deceptive practice or device, or make any unjust or unreasonable rate, commission, or charge, or exact an unreasonable profit or price, in handling or dealing in or with wheat, wheat flour, bran or shorts," and as I see it, his case can only be handled in this way. At any time during the life of his license the Wheat Director, through his representative, with full access to the licensee's books, may make a complete check, and if he finds licensee has been guilty of any unfair buying practices, can force him to make restitution to the producer who may have suffered through the licensee's unfairness.

In view of these distinct advantages, or perhaps it might be better to say, in view of the Agreement licensee's definite obligations, I rather feel that dealers who haven't signed the Agreement will want to immediately embrace it.

World Records in Wheat Growing.

The largest yield of wheat ever recorded was 117.2 bushels per acre. It was produced in 1895 in Island County, Washington, on an 18-acre field. The largest yield of wheat over a period of years of which the world has any record is that of 36½ bushels per acre at the Rothamsted Experiment Station, in England. This yield is the average for a period of 60 years. Ordinary unfertilized land in England does not do that well. In fact, the average yield of unfertilized land for the same period of years was only 12½ bushels. The extra 24 bushels was the result of an annual application of fertilizer containing nitrogen, phosphoric acid and potash.—*"H." in Ohio Farmer.*

JULY CROP REPORT.

The Bureau of Crop Estimates makes the following estimates from reports of its correspondents and agents for the United States:

Crop—	Acreage, 1919—Per cent of 1918.	Acres.	Condition—July 1, 1919.	July 1, 1918.	July 1, 10-yr. av.
W. wheat	133.3	48,933	81.0	79.5	80.5
Sp. wheat	100.8	22,593	80.9	86.1	83.5

SPRING WHEAT IN LEADING STATES.

Minnesota	99	60,956	61,451	78,336
No. Dakota	85	86,918	86,406	101,010
So. Dakota	92	52,385	48,684	69,356
Montana	33	11,522	23,908	17,250
Washington	75	26,582	30,714	17,005
U. S.	80.9	322,096	343,181	358,651

Wheat did not maintain the high promise of June 1, having suffered severely from many causes during the month, particularly from red or leaf rust in the East, South and West-Central States, drouth in the West and Northwest, scab in many North-Central States extreme heat at the filling period States, and in large areas of the Central following heavy rains, with a resulting loss of 54,000,000 bus. of winter wheat and 21,000,000 bus. of spring wheat, compared with the June 1 promise.

The threat on June 1 of serious rust damage seemed to lessen later, but harvested wheat in many states is now showing unexpectedly light heads with much shriveled grain. The moist season stimulated a heavy growth of straw, especially where planted on the richer lands, and the storms of May and early June resulted in a great deal of lodging and consequent damage throughout a large part of the North-Central group of states. Scattered reports of black stem rust are received from North Dakota. That state is also suffering from a serious invasion of grasshoppers, which are also present in numbers in Kansas and other states. In Nebraska and some other states extreme heat at filling time seems to have done a great deal of harm, forcing the wheat to a blanched maturity instead of its normal golden ripening.

Notwithstanding all of the evils besetting it, the crop still gives promise of the greatest production in the country's histroy. A bumper crop has already been realized in the Southwestern wheat district of Texas, Oklahoma and New Mexico and a full crop or better is promised in Ohio, Michigan and Pennsylvania.

[1]000 omitted.

The condition of corn July 1 was 86.7, slightly better than average at this date. In the Eastern and Northern States it was planted late, owing to the excessive rain and low temperatures of the early part of the season, and much replanting was necessary over a large part of the country. It has suffered almost everywhere from lack of cultivation, due to the frequent rains, and is very weedy. The lowland plantings have been damaged in many states by flood, and corn planted on flat ground poorly drained shows unsatisfactory color. The last week or ten days of June were very favorable, the warmth and abundance of sunshine greatly improving the crop. The pressure of work, from grain harvesting in much of the corn belt, has prevented farmers from taking full advantage of the favorable weather for cultivating corn and similar neglect in the South arises from the need for cultivation of cotton.

88.8	1917	86.0	88.8	84.3	79.4	....	14.
84.1	1918	85.8	85.8	83.6	80.8	....	14.
89.0	1919	90.6	95.3	93.5	85.7	....	..

Condition of Hay.

Average condition of hay and averag yield per acre in tons as reported b Bureau of Crop Estimates on dates i dicated:

Year.	Acres.	May.	June.	July.	Aug.	Yi
1919	71,224[1]	94.3	94.1	91.1	....	[1]1.
1918	55,971	89.6	89.0	82.2	82.3	[1]1.
1917	55,203	88.7	85.1	84.3	84.6	[1]1.
1916	55,721	88.4	90.3	93.4	95.5	1.
1915	51,108	89.8	87.8	85.2	89.0	1.
1914	49,150	90.9	88.7	80.8	86.7	1.
1913	48,954	88.5	87.5	85.0	81.8	[1]1.
1912	49,530	85.7	89.8	85.2	91.0	1.

[1]May estimate, 1919; other averages a made Dec. 1 of year named, final estimate 000 omitted. [2]Tame only as estimate finally, Dec. 1 in tons per acre.

Wheat on Farms.

The July Crop Report showed the fo lowing estimate of wheat on farms July 1, 1919, and previous years:

	%	Bushel
1919	2.1	19,644,0
1918	1.3	8,063,0
1917	2.5	15,720,0
1916	7.3	74,731,0
1915	3.3	28,972,0
1914	4.2	32,236,0
1913	4.9	35,516,0
1912	3.8	23,876,0
1911	5.5	34,925,0
1910	5.3	36,199,0
1909	2.3	43,608,0
1908	5.3	33,797,0
1907	7.5	54,853,0
1906	6.7	46,053,0
1905	5.0	24,256,0
1904	5.7	36,630,0
1903	6.3	42,500,0
1902	7.0	52,440,0
1901	5.9	30,798,0

ARGENTINE CORN SURPLUS.

Although the present surplus of co in Argentina amounts to less than average yield for the state of Illino the problem of disposing of this su plus, particularly this year, is a serio one. We learned from recent travele in Argentina that a great deal of co is being used at this time in lieu coal as fuel. Furthermore, the *Tim of Argentina* in a recent number te us that an arrangement has been ma with Armour & Co. whereby that co pany will select and purchase hogs be distributed among the chacareros f feeding purposes. The tenant farme will make known their wants or th feeding capacity, and in the order their application for them animals wi be sent out through the Italian far ers' organization, the society paying f the hogs and shipping them for feedi purposes and will accept notes, or th payments, in liquidation of the de incurred.

BARLEY MARKET.

DULUTH.—Business was in large volume in barley on the Duluth market during the last week. Receipts from the country were heavy, amounting to 47 cars, as compared with only 6 cars last year. The call from Eastern operators was strong, and as a result everything coming on track was promptly disposed of at advancing prices. Spot barley closed on Saturday 8c up at from 1.15@1.25. Dealers here are impressed with the interest being shown in the barley market by the trade for feeding purposes.

MILWAUKEE.—The local barley market is firm and higher, with a good demand chiefly from shippers for export particularly for good malting. Receipts have been moderate and all offerings are readily absorbed. Prices for the week advanced 8@10c. Receipts for the period were 233 cars, against 199 cars a week ago and 11 cars in 1918. Current quotations are: Good to choice, 48 to 50 lb. test is quotable at $1.30@1.32; bright, $1.32@1.34; fair to good, 45 to 47 lb. test, $1.28@1.31; low, 41 to 44 lb. test, $1.25@1.28; feed, $1.24@1.28. Iowa quoted $1.26@1.33; for light to fancy; Wisconsin, $1.26@1.34; Minnesota, $1.24@1.32; Dakota, $1.24@1.32; feed and rejected, $1.24@1.28.

TOLEDO.—The barley market has been a weak proposition in relation to corn and oats and is still the cheapest feed in the market, says George Woodman of the Rice Grain Co. Some good Western barley is being worked at $1.30 basis Toledo rate point. Receipts are light.

BUFFALO.—Barley dealers here are getting bids from outside buyers, but little interest is shown locally except by the feed men. In the interim prices keep going up and the general opinion here is that barley is a good buy. Choice to fancy malting was held at $1.38@1.40; fair to good, $1.30@1.35, and feed, $1.25@1.28, track or store Buffalo.

PORTLAND.—The local barley market was more active last week and the demand was especially noticeable for the feed qualities. Standard A for malting was also in good demand and values reported by the *Commercial Review* range from $58 for Standard A with $57 for feed. The rains are reported to have come too late to do very much good in the Northern states and the *Review* estimates the crops of Oregon, Washington and Idaho will not exceed 7,000,000 bus.

KANSAS CITY.—Affected by the bullish spirit of other coarse grains, the barley market ruled strong this week, recovering 4c to 7c of its recent decline. However, there was no special demand, and elevator men were among the buyers, as reflected by an increase of 3,000 bus. in stocks, to 5,000 bus. Receipts were 7 cars, the same as a week ago. Offerings were practically all No. 4, which sold at $1.14@1.17 a bushel, while No. 3 was quoted nominally at $1.16@1.19. The possibility of a liberal interpretation of the prohibition law, permitting the manufacture of beer containing 2¾ per cent alcohol, was a bull factor. Advices pertaining to the Kansas crop were favorable for a record yield, which is officially estimated at 18,107,000 bus., against a five-year average of 5,639,000 bus. Nebraska will have 8,392,000 bus. and Iowa 9,492,000 bus. Manufacturers and dealers noted some increase in the demand for barley feeds, the price of which was advanced 10c per cwt., to $2.80.

SAN FRANCISCO.—Prices are firm and quoted from $2.95@3 per cental, but holders are not selling very freely. The crop is rather better than last year, which was a short one, but not quite equal to trade expectations. It is estimated that about 60 per cent of the crop has already left growers' hands, but offerings are only fair.

CHICAGO.—The market has been very strong all week, following, or leading, outside markets which have in like manner been very firm to advancing. During the greater part of the week the maltsters were in the market, taking all the better grades and there was an active demand from shippers in the elevator interests. Friday however the market was not so keen, the advance from 1@5c not being followed by the shippers and exporters, and by this time the maltsters had apparently secured their requirements. Receipts were light and the quality rather inferior so that at the close of the week only the shippers and the industries were conspicuous in the market. The week closed however strong, with 1c advance for Saturday. Monday's market continued the advance of the past week, choice barley bringing from 1@2c more than on Saturday. The medium grades were stationary, while the black oat mixtures were practically unsalable. The advance during the past ten days has brought top prices for barley up as high as the highest point made by the crop last April. Although Monday's market was strong there was no indication that the exporters had decided to accept the advance. The range for the sale of 19 cars was from $1.24@1.32; screenings 95c@$1. Futures closed firm. Exports from Atlantic ports were 1,453,000 bus. compared with 988,000 bus. a year ago. The visible supply is given in another column.

MINNEAPOLIS—The shipping demand is not as active at present and receipts are holding heavy. There is a fair local demand on the declines, but on the advances the elevator buyers drop out. Deliveries light so far this month.

OMAHA.—The barley market has been strong and advancing all week. Sales on Monday of No. 3 were made at $1.16, while rejected on Saturday brought $1.18 and No. 3 on Friday $1.19 with good demand for all arrivals.

Barley in Minnesota suffered a serious setback in June on account of wet and unfavorable weather condition, July 1 condition being only 88, as compared with 95 on June 1. This indicates a crop of only 88,444,000 acres, compared with 33,404,000 a year ago.

The barley crop in Indiana shows a decline during June of six points owing to rains and hot weather. The present indications are for a crop of 1,156,600 bus.

There has been considerable inquiry for Canadian barley in England, and sales are reported of No. 4 Canadian Western for July shipment to London at 71s. 6d. per 400 pounds, and No. 3 Canadian Western, July and August shipment, at 70s. 6d. per 400 pounds. In this market, No. 4 Canadian barley is quoted at $1.37@1.38, and No. 3 Ontario extra at $1.42@1.42½, and No. 3 at $1.40@1.41½.—*Montreal Trade Bulletin.*

Mail advices say the long drought in France was broken on June 25. The change in the weather came just in time for the crops were suffering badly and the ground was beginning to crack.

Crop Reports

Compiled by GEO. A. WELLS

The following general reports in regard to yields per acre and quality of the winter wheat, the growth condition of oats and corn and any unfavorable or critical conditions affecting wheat, oats and corn are as follows:

OHIO.

Circleville (6): The yield per acre of winter wheat in this territory will be about 20-30 bu. per acre. The quality will be No. 2 grade and better if the weather continues dry. The growth condition of oats and corn is excellent. No critical condition now existing.

Camden (2): Wheat yielding about 75% of expectations. Quality good, an average of No. 2. Smut more prevalent than usual. Would estimate average yield of 16 bu. per acre. Corn has made a rapid growth, is one good color and well cultivated. Soil now too dry. Oats acreage short, probably 75% of average with condition of 70%. Weather has been too hot.

Ansonia (2): Wheat about ¾ cut and in shock. The blight and worms hurt wheat very badly, some fields won't make over ½ crop. Corn doing well but we need rain for corn, tobacco and young clover. Pastures short. Weather fine.

Portsmouth (6): Wheat yield about 19 bus. Considerably short of last year. Quality exceptionally good. Corn and oats look fine. Acreage about as usual.

Blanchester (3): Wheat all cut. Threshing general this week. Wheat very dry. Quality of that already received good, grading No. 1 and No. 2. Oats and corn looking well.

Rockford (1): Winter wheat here is not very heavy in sheaf. The wheat will run about 30 bu. to the acre. Oats are heading out and will be a good average crop. Corn is growing good but needs rain.

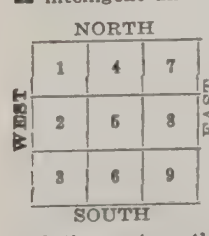
Greenville (2): Only a little threshing done. Yield 15 to 20 bu. Quality poor, shriveled and smutty. Corn making good growth and clean. Oats look well. Weather hot and farmers fear light weight. The heads are short.

Xenia (3): Wheat yielding around 20 bu. per acre. About 20% less than expected. Quality not as good as last year, will probably grade No. 2 red after cleaning. Corn and oats doing nicely. Corn would be a little better with rain but is not suffering to any appreciable extent as yet.

Eaton (2): No threshing has been done here yet. Think the quality will be fair. Oats are in fine condition. Not ripe yet. Corn good but getting too dry for the growth just now.

Upper Sandusky (4): Wheat crop is nearly all cut. There is a heavy growth of straw. Oats have been injured some by extreme heat but promises well. Corn will be an average crop and so is barley and grass. Not critical condition yet.

Ansonia (2): Wheat averaging 19 to 34 bu. per acre but some smut. Corn and young clover need rains very badly.



Agosta (5): Wheat about all cut. None threshed. Does not seem to be equal in quality of last two years. Small grains are shrunken somewhat. Corn from one to two weeks late. Doing well now. Oats —25% of fields good as usual, 50% only fair, 25% poor. Will likely make around 75% crop on the whole.

Bryan (1): With good weather here this week will see the wheat crop all in the shock. Threshing has started only today. Expect an average yield of 35 bu. per acre. Wheat has been affected by scab to some extent but not so badly as with smut as nearly all wheat that has been cut reports some smut. We are beginning to feel the effects of dry weather and especially need rain for oats that are filling. Early oats and corn way ahead of normal growth but late oats and corn suffering for rain and growth below normal. It will take the most favorable weather conditions to make some fields of corn other than for ensilage feed.

Sidney (2): Winter wheat yields very disappointing. 12 to 20 bus. per acre where 18 to 40 was expected. Quality only fair. Growth and condition of corn and oats now are satisfactory but the crop is not made yet and this dry hot weather may play havoc with both. The wheat "corpse" that so much fuss was made over sometime ago will not be so burdensome.

LOCATION KEY.

Explanation.—In order to give the reader as intelligent an idea of the districts from which all crop and local trade condition reports are received, they are numbered to correspond with divisions shown in the accompanying diagram, the numbers 1, 2 and 3 representing the western one-third of the state from north to south; 4, 5 and 6 in central third, and 7, 8, 9 the eastern third. Figures indicating these locations will appear in all crop reports, in letters referring to trade situations in beans, feed, hay, etc. Each state will be treated as a square body.

INDIANA.

Winamac (1): No wheat threshed. Yield will be less than expected sometime ago. Oats fair but needing rain. Corn doing well.

Tipton (5): Wheat in shock. June 1st estimate 28 to 30 bus. General estimate last week 18 bus. Too hot the last days of May. Oats look well. Corn prospects never better this time of year.

Jasper (3): Threshing has commenced. So far the yield has been about 12 bus. per acre. Quality we think will mostly grade No. 3. Oats are not as good as expected. Corn acreage 90% compared to last year. Stand good. Looking fine.

Princeton (3): Threshing of wheat not far enough advanced to make an accurate estimate of the average yield, probably 12 bu. per acre. Quality No. 3. Oats 100%. Quality good. Harvest now on. Corn improving rapidly especially where well cultivated. Growth condition 100%. Soil condition and temperature for corn 100%.

Lawrenceburg (9): No threshing done as yet. Oats and corn doing fine. No critical condition existing just now.

Winchester (8): Winter wheat is just about all cut and probably threshing will begin the last of the week. There is a wide difference of opinion as to the quality of wheat per acre and it varies from practically nothing to thirty or forty bus. per acre. In our opinion think the yield will be about 15 to 20 bus. per acre and fair quality. Samples that have been threshed out by hand show the wheat to be dry and in good condition.

Angola (7): Winter wheat not all cut. Threshing begins this week. Yields will be good. Many fields will yield 35 bus. per acre. Corn is fine. Normal height and growing rapidly. Oats headed and fair crop but short straw. 700 acres of spring wheat in this country and promises large yield. Getting dry but no damage yet. No damage from worms or bugs.

Kentland (1): No threshing yet. Think wheat will be disappointing. Probably 20 bu. per acre. Oats short. Hurt by dry weather. Corn fine but did not get enough plowing and will not stand protracted drouth.

Brook (1): Winter wheat hurt by heat. Will probably yield 20 to 25 bu. Poor quality. Oats looks like fair crop. Corn excellent.

Waveland (2): Very little wheat will grade above No. 3. Yield about 20 bu. Do not think yield will be nearly as large as last year and grade not as good. Corn and oats doing good. Corn needs rain.

Rushville (8): Wheat is yielding 10 to 30 bus. and tests 48 to 63 lbs. per bu. Oats look fair. Corn is good but we need rain very badly. Everything looking good but we want rain.

Marion (5): Wheat not threshed but will be poor in quality. Yield will be reduced at least ⅓ from former estimates. Oats and corn doing well.

Delphi (1): Yield of winter wheat light and quality poor. Conditions oats and corn good to date. Wheat will be poor both in yield and quality.

South Whitley (7): Have not started to thresh wheat yet but will start about July 10. From all appearances the wheat in this locality will not make more than half a crop. Oats look fairly well. Need rain. Corn is doing fine but needs a rain.

Decatur (7): No threshing done yet. Look for lower yield than last year. Too dry here for corn and oats.

Rensselaer (1): Wheat threshing will commence within the next day or two and promises about 50 to 60 of last year's yield with quality generally very poor, testing around 50 to 54 lbs. Oats have deteriorated rapidly and present indications point to a yield of not to exceed 50% of last year's, testing probably 24 to 27 lbs. Oats have ripened unnaturally fast and harvesting will commence the latter part of this week. Corn has made a wonderful growth and condition is up to normal for this season of the year. Rain will be needed soon for corn.

Wabash (4): No wheat threshed yet. Quality likely to average one grade below last year which was excellent. Corn and oats doing fine. Weather may be a little too hot for oats to fill properly.

Kendallville (7): Wheat is just being harvested. Nothing threshed yet but there is a great deal of our wheat hurt by blight or scale and we think it will reduce the yield fully 25%; besides there will be considerable poor quality on account of it.

Frankfort (2): Wheat harvested but not threshed. Oats not ripe. Some damage from heat. Corn in fine condition, average growth.

Monticello (1): No wheat threshed here. Have examined several fields. Wheat will be light weight. Small berry, short heads, low yield. Think will be 40% less than expected. May not hold ten year average of 16 bu. Oats short straw and uneven. Corn growing well and looks fine.

ILLINOIS.

Belleville (3): Winter wheat is threshing out average 18 bushels to acre mostly No. 2. This is less than we expected. Oats turns out about 40 bushels to acre, hot weather the last few weeks cut down the yield. Corn is fine excepting a few fields could not get cultivated, having been too wet in low lands and is now some weedy. Weather fine.

Odell (7): Winter wheat all cut, have threshed. Looks like 25 bu. Spring wheat cut, looks like half a crop. Oats cutting well, and will be in in a day or so. Yield will be around 40 bu. Corn looks good but could be helped by rain.

Pocahontas (3): Winter wheat probably will yield 18 bu. per acre all around. Quality is varied from light test 48 to 61 lbs. Oats being cut quite freely. Corn, backward condition, weedy and small, acreage not large, late planting of corn, will probably not mature. Oats will be all right.

Marshall (8): Wheat yields from 8 to 18 bu. per acre. Quality good. Test 56 to 61 lbs., but that has come to 59 to 61 lbs. Oats harvest on crop light. Corn small, growing fine. Weather favorable.

Decatur (5): Winter wheat all cut, threshing this week looks like average 25 bu. Spring wheat and oats poor one-half to three-fourths crop. Corn condition good though bottom lands were drowned out last week of June. Will replant with millet or buckwheat.

Wenona (4): Winter wheat will be cut within a few days with an indicated yield of about 20-25 bu. per acre. Spring wheat has been severely damaged by heat blight and will be almost a failure here. Oats crop short straw, not heavy crop. Corn condition improving and a good average prospect.

Ashland (5): Winter wheat in shock, threshing will be general this week. Yield good quality, promise to be below last year, fortunate if we can get a No. 2 grade. Spring wheat a failure. Oats cutting this week. Yield and quality far below last year. Corn promise is average on much smaller acreage. Weather ideal for corn.

Minier (5): Wheat all cut and shocked. Estimated yield about 20 bu. Much shriveled wheat on account of scab. Oats about two-thirds of normal crop beginning to cut early oats this a. m. Estimated yield about 35 to 40 bu. Corn condition 100% some weedy but looking good, acreage reduced about 20%.

Riggston (5): Threshing is just beginning and yield is just beginning and yield is about one-fifth short from estimates, not enough threshed to give you a good idea. South of me in our county they say from 7 to 10 bu. Only piece here I have the yield was 15 bu., man expected 20.

Mattoon (8): Only three crops wheat threshed as yet. Yield of those from 15 to 30 bu. Will grade No. 3. Corn condition excellent. Oats fair. Will begin cutting this week.

Ashton (5): Yield of winter wheat should be 25 to 35 bu. Quality fair. Spring wheat badly damaged by blight and heat. Oats mostly short straw, some blight. Corn growth and condition excellent.

Earlville (4): Winter wheat is all cut and will prove a good yield. The spring wheat will not amount to one-half crop account of blight. Corn is above average. Oats will be fair crop.

Lostant (4): Winter wheat fine. Spring wheat very small crop. Corn looking fine, never had a better start around here. Oats will be a short crop.

Sparta (6): Not enough wheat threshing to give definite yet. Oats now being harvested give promise of full average crop. Corn will not be over 50% with favorable season.

Rockport (2): It looks like 12 bu. per acre was going to be a fair average in the locality of wheat. Nothing to what was expected. Corn looks very good. There will be very few oats in this locality.

Princeton (4): No threshing done yet. Wheat looks 25 bu. to acre, quality not as good as last year. Oats not cut yet, looks 75% of crop, very short straw. Corn condition good. Looks 100%.

Rantoul (5): Fall wheat, failure. Spring wheat no good. Oats hurt. Corn O. K.

Mount Pulaski (5): Most wheat straw very heavy but yield may be disappointing, as heads are short, around 25 bu. Quality still a matter of conjecture. Oats only fair. Corn in excellent condition. Lowlands badly damaged by recent heacy rains. That not affected looks 100%.

Eureka (1): My impression is wheat crop will be quite a disappointment as to yield and quality. Lots of straw but bundles light.

Sidell (8): Corn condition 100%, making excellent growth—good color and stand fairly clean fields. Oats cutting not commenced, probably about July 15th—expect quite little damage account hot weather with test weight and yield light. Winter wheat cut but no threshing as yet. Expect normal yield with fair quality—possibly No. 2 and No. 3. Spring wheat badly damaged—expect half yield with very poor quality—looks like sample grade.

Nashville (3): Only a few lots of wheat have been threshed, not enough to form any opinion as to the probable yield per acre. The quality will be fair. Oats we expect will prove an average crop. Corn about 75 to 80%. Much is quite weedy on account of so much rain. Farmers crowded with work.

Freeport (4): Winter wheat crop very light in this section Believe yield and quality will be good. Now being harvested. Reports concerning oats uneven. We do not look for a big crop. Corn doing well. No critical conditions.

MISSOURI.

Marinville (3): There has been no threshing done in our vicinity. We expect an average of about 12 bu. per acre. Quality only fair to medium. Oats lots of straw but grain light. Corn late but with plenty of moisture will make good yield. Acreage short.

Chillicothe (1): All winter wheat in shock. No threshing done. Quality will be uneven. Too much wet weather wheat and oats. Corn in good condit but late.

Harrisonville (1): Our winter wheat probably run close to 18 to 20 bu. Qua good. Oats, now report one threshing probably run 30 to 40 bu. Corn is lo ing well. Needs rain.

Sedalia (5): We have received ab 7,000 bus. of wheat so far. Reports yield run quite different as wheat is yie ing all the way from 8 to 20 bu. in crops that we have bought. Wheat gr ing from No. 2 to No. 4, running from dockage to 2%. However, wheat seems be in fairly good shape as far as dryn is concerned.

Clinton (1): Wheat badly damaged ing to wet weather which has made it possible to cut thousands of acres. He rains during blossoming period have cut yield 40%. Wheat is making from 12 18 bu. per acre according to reports on little amount now threshed. Oats splendid but small acreage. Corn is do fine but acreage only about 60% of l year.

Lamar (3): There have been only few crops of wheat threshed as yet, test on same has been running 57 to lbs. to the bu. About 16% moisture te Yields running very uneven, 11 bus., bus. and 2 bus. Average about 16 b The indications are with favorable weat for threshing. The quality will run fai good, mostly ranging from 56 to 59 on test. No oats threshed yet. Beli they will be of fairly good quality and run about average yield of about 25 30 bus. on an average. Most of the o are now in the shock. Corn where it b been cultivated is making rapid grow Great deal of corn is real late on accou of wet weather interfering with planti Quite an acreage of corn will be abandoned account weeds overtaking the pla Inability to cultivate.

Elsberry (8): Winter wheat grad No. 2 and 3 with yield disappointing, 15 16 bus. per acre. Oats are being harve ed. Fair crop. Corn needing rain, ac age smaller than usual. Rain is v essential in few days to assist the yo corn out. No spring wheat in this secti

Charleston (9): Threshing about h done. Yield 5 to 25 bu. Average will about 12 to 15 bu. Average grade here 3. First threshed tough but now d About 60% acreage corn. Crop 60% n mal, was worse but since rains be worked as much as possible and now better shape.

Paris (5): Estimated yield of wheat bus. 75% grades No. 2 and 25% No. Threshing just began. No oats thresh yet. Corn growth and condition abo normal. Acreage decreased.

Carrollton (2): No wheat threshed. Loo like 15 bus. per acre. Grade low, not mu better than No. 3. Oats all in shock a looked fine before cutting. Having much rain for threshing. Corn could look any better but needs more cultiv ing.

Corning (1): No threshing done here this date. Wheat all cut and shocked. R cent heavy rains will retard threshing. looks now as if the yield of wheat w be lighter than anticipated. Oats are lig and small acreage. The recent big ra have put new life in the corn and it doing fine.

Salisbury (4): Wheat all cut. Thres ing begun. Wheat will not grade as go as last year. Oats look good. Acrea small. Corn spotted. Some needing ra Growth uneven. Some will not make co

Bethany (1): No threshing. Hea rains. Expect yield will be light, abo one-half crop. Corn coming fine, one-h acreage. Oats will be light yield and lig weight.

Columbia (5): Oat crop is fine, or third cut. Will be good yield. Corn co so far very fine. Fine cool weather al plenty of moisture.

Higginsville (2): No threshing is t section owing to rains 4th. Oats are lig Corn is in good condition.

IOWA.

New Hampton (7): Spring wheat is ing well. Corn on corn land is doing f but on other land it is very small and y low. Oats are reasonably free from ru and, like corn, it is spotted. Some go and some very poor.

Wright (5): Oats will average about 6 of normal. 35 and 50% blighted. Win wheat average about 75% of normal. Es mated 25 and 35% blighted grains. Co looking good, 100% of normal. About t days late.

Henderson (3): Threshing has not sta ed here. Believe wheat will run a lit light in weight. Corn is up to avera Oats are looking fine. There is nothi serious affecting growth of crops at pre ent.

Belmond (4): Very little winter whe but spring will yield normal. All sm grain has been hurt by the excess rain f lowed by too hot weather. Corn very u even. 25% of acreage above normal this time of year. 30% normal, balan backward.

Arthur (2): No winter wheat, spri wheat practically total failure. Early oa and barley badly damaged. Corn doing f now, acreage decreased some by wor and floods.

Wall Lake (2): Wheat crop was hard. Think yield 10 to 12 bu. per ac fall wheat. Spring wheat not so much.

Randolph (3): Wheat is not as good was expected. Think the yield will about 20 bu. with a considerable per ce grading No. 3. Spring wheat is not good as expected in quality or yield. Co looking fairly well. A little late.

Whitten (4): Acreage of winter whe

ry small but in good condition Oats mak- good progress with exception of few ces of very early oats which were dam- ed some by hot weather. Corn two eks earlier than normal and making endid progress. Best prospect for years.

Oakville (9): Wheat nearly all in shock. ne threshed. Many blighted heads owing which will cut the yield below ex- tation. Oats are being cut now. Very ort straw and a very disappointing yield. rn has made a remarkable growth in the t week and is looking fine, although ne rather small. Farmers are too busy h harvest to give the corn the atention should have in the way of plowing.

Marcus (1): Early oats seem to be very at and lots badly down. Late oats seem be filling better. Corn looks fine. Grow- good and most fields are clean.

New Sharon (5): Winter wheat being now. Some fields indicate 25 to 30 bu. ile others look 15 to 20 bus. Spring wheat l be pretty much a failure. Oats shock- up rather light. Occasional field heavy. general yield will be 25% light from sent indications. Corn looks great. uldn't ask for better prospect.

ull (1): Crops of all kinds could not be king very much better than they do h the exception of wheat, as it looks as it is blighted some pieces and others k good. Some corn is tasseling and the s are looking exceptionally good so far. ne are changing color and ripening and crop is good.

ama (5): Corn looks good with a loss perhaps 5% being drowned out. Winter eat good. Spring wheat damaged by wet weather. Oats fair crop. De- orated 10% last week account rust.

Vashington (8): Winter wheat looks d but it is hard to make an estimate of d per acre from appearances at har- t. Oats are quite short and yield ex- ted to be small and quality light. Corn s good.

efferson (5): Too early to give yield of eat. Oats have been damaged some by weather. Corn is wonderful, at least higher than normal at this time of r.

lbert (5): No winter wheat cut yet. s beginning to ripen. Cannot say as to d. Think the oats were hurt some by t. Corn fine and one week to ten days ad of average.

nawa (2): Winter wheat is hurt about by the excessive heat the forepart of e following the very wet period at that e and the spring wheat is hurt very h more with several fields not worth ing. Would call the spring wheat pros- t not over 25% of normal.

pencer (1): Only small amount of eat and much of that blighted. Will go 8 bus. per acre. Oats and corn in d condition. Oats now starting to turn. ks as if yield will be good. Corn on low some in tiled land yellow and back- d. Balance at least 90%. Corn aver- condition 85%. Very little corn below high on July 4. Some fields of oats hting.

ilison (4): No wheat this point. Corn oats are looking good. Corn is getting ned up in good shape but is late.

sceola (6): 75% wheat cut, none eshed, yield and quality will be lower n indicated by last report. 40% oats quality and yield fair. Corn crop con- ions better than last report.

dianola (6): Threshing will begin 14. Wheat will run from 5-10 bu. to bu. Think 15 bu. will be average.

MINNESOTA.

armington (9): Spring wheat is thin the ground, blighted quite a little and ly rusted in places. All grain has head short. Some oats not over one foot . The corn is very backward, about e weeks back of what it should be. t farmers claim the grain crop is not r 50% of the last year standard.

ondon (6): Growing condition of oats corn are good so far. Some rust in at is heavy. Corn never looked any er. Hay will be a big crop here.

utchinson (6): Oats is fair. Corn is d. Lots of dead heads in wheat a little k. If weather permits it will be fair).

den Prairie (6): Corn looks fine. Best six years. Oats fine. Spring wheat be about one-half crop.

ipestone (3): No winter wheat raised . Oats very rank. Corn thin but d.

nneota (3): Black rust showing up in ng wheat, also scab on heads. Wheat headed out. Hot weather in June ned crops too fast. Wheat will make than half crop. Oats will make fair . Corn that was not drowned out will e good crop as it is now well advanced.

onnelly (2): All grains are looking fine. critical conditions regarding any of the n.

arren (1): Growth condition oats 90%, corn 70%. Four inches of rain in one r July 2, followed by showers. Fields er water for two days. Some water yet ow spots.

enderson (6): Winter wheat blight re- es yield fully one-third. Making qual- very light weight. Spring wheat show- some blighted heads but not effected h as winter wheat. Oats promises fair l. Corn doing well except on low spots that will be no good.

bert Lea (6): Oats fair. Prospects for g corn crop. Stand perfect. Spring at only fair stand and there seems to something wrong. Quite a few unfilled d heads, may be joint worm. Weather ect.

ior Lake (6): Winter wheat will yield t 26 to 28 bu. per acre. Oats and corn ing good. General conditions favorable.

ayward (6): All grains are in good dition. Corn good stand, about two weeks early. Hay crop bigger than for many years.

NORTH DAKOTA.

Ashley (6): No winter wheat here. Corn fair and small yield. Oats fine.

Great Bend (9): Weather is favorable for filling spring wheat and the soil conditions are O. K. We figure a 70% crop, taking 1918 crop at 100% standard. Corn and oats following step to the spring wheat and are enjoying the same conditions.

St. Thomas (7): Spring wheat 90% compared with 100% last year. Hot weather killed the stools. Weather favorable at present for all grains. Oats 80% compared with last crop 100%.

Sheyenne (5): Condition of all small grains fair. Some fields thin but with favorable conditions will make average crop. Flax very good.

Cavalier (7): All grains look well and indications are that a full normal crop will be harvested. We have plenty of moisture now to carry crop through to maturity, in fact, think that it would be better for our crops if we did not get any more rain.

New Rockford (5): Oats and other crops good here now. Several reports of grasshoppers around but not many in this immediate vicinity.

Blabon (7): Spring wheat heading and so are oats and looks like a 100% crop.

Lakota: General condition of all crop good.

SOUTH DAKOTA.

Brentford (7): Oats and corn condition about 100%. Wheat damaged by hot weather about 10 to 20%.

Clark (7): Corn in good condition. Oats good. Spring wheat damaged some by wet weather and hot wind. Wheat harvest will begin about July 25-30.

Aberdeen (7): Owing to the ravages of cut worms the acreage of corn will be reduced 25%. Growth condition of wheat, oats and barley is normal. Ample moisture for present needs.

Brookings (8): Corn and oats fields vary, some very good, some poor, depending on lay of land. Considerable red rust on spring wheat which under favorable conditions might easily develop into black rust and make the situation very serious. Our wheat is just heading out.

Flandreau (8): Weather has been favorable past week for all grains, also has enabled cultivation of corn. Some have gone through corn five times and all fields now fairly clean and corn growth to shoulder high and good prospect. Oats also are healthy and vigorous.

Armour (9): Spring wheat damaged 25% by two days of scalding weather, heavy dews, no air and hot sun. Late sown wheat all right yet and with favorable weather will make good crop.

Yankton (9): The writer examined a piece of wheat one week ago that showed a prospect of at least 20 bu. per acre. Was in the same field yesterday and I very much doubt if the field will be cut (field contained 80 acres.) The same condition seems to be general in this locality. Blight very much in evidence in practically all spring wheat. Oats show some blight but on a whole are very promising. Corn is making a wonderful growth and considerable is being laid by as it is too large for cultivation. Winter wheat is now being cut and will make a fair yield though our acreage in this locality is not worth mentioning.

Elk Point (9): Winter wheat is poor and won't average over 12 bu. per acre, very poor quality. Early sown spring wheat is very poor. Won't yield over 5 to 10 bu. and will be shriveled up and light. There are many fields that won't pay to harvest. Oats are looking good and corn is excellent.

Bridgewater (8): Spring wheat crop about a failure on account of rust and blight. Oats doing well. Corn making good progress.

Hurley (9): Spring wheat very poor, some fields not worth cutting. Corn all right where ground could be plowed. Some on low lands abandoned.

Mitchell (8): Spring wheat is hurt badly by scale and blight. Oats good. Corn coming fine. Some corn still weedy. Small acreage, lost probably 5%.

NEBRASKA.

Belden (7): Oats are coming good. Prospects for a bumper crop. Corn growing good and in good condition, fully up to last year.

Broken Bow (5): No harvesting done here yet. Small grain and corn were never better than now. Plenty of rain.

Nebraska City (9): Harvesting will be completed this week. Have heard of no threshing but farmers are complaining of the yield of wheat being much less than expected. We look for a variety of grades this year. Think yield will average around 20 bu. Oats ripening fast but not as good as expected. Corn very uneven but looking fine and growing fast.

Fairmount (9): There is lots of complaints about the condition of wheat. It undoubtedly will be very uneven in grade and yield caused by red rust. Too much standing water and some fly with sudden change in temperature to very hot. Think 15 bu. will about catch our yield.

Neligh (7): Threshing will not commence here for ten days. Expect yield to be cut. Look for 12 to 15 bu. wheat. Oats damaged by rains and wind, 75% will be all can expect. Corn doing well at present, 95%.

Harvard (9): Average yield of wheat about 10 bu. per acre. Everybody cutting wheat now. Oats better than average this year, well filled and will yield about 25 bu. per acre. Corn doing fine since we had a nice rain last week, practically all above knee high. Most fields are clean and free from weeds. Could use 50 men in the harvest fields.

Superior (9): No threshing done here as yet. Going to be quite a little low test wheat and the estimated yield is about 85 bu. per acre. Oats crop is doing fine and while the corn acreage is small the weather is ideal for rapid growth.

Roseland (9): Wheat crop is not by half that the prospect was a month ago. Rust hurt it, straw is weak and breaking down. Wheat shriveled and partly filled heads. Threshing time will tell better.

Beatrice (9): Cannot tell in regard to yield of wheat until more is threshed. Oats are fine and corn doing well.

Pierce (7): Cannot yet state yield of winter wheat. Harvesting of same still in the future. Heads are small but well filled. Oats crop looks favorable. Corn is growing nicely but very uneven. Many fields are late and weedy while others are "laid by." Spring wheat is generally looking rather poor. Red rust and "joint worm" are causing many of the heads to blight.

Ashland (9): Average yield of winter wheat 25 bus. Quality and grade will be No. 2 and 3. 25% corn late and weedy otherwise condition good. Oats condition good.

Central City (9): Hot, dry weather of about ten days ago forced the maturing of wheat too rapidly and cut the yield decidedly, probably ¼ to ⅓, in some instances much more. No threshing done yet but farmers all feel that the yield has been reduced about a fourth. Rains of July 4 and 5 helped corn and oats and think the oats will probably yield pretty well. Corn is coming splendidly. Weather now very hot and more rain will be needed shortly.

Oakland (7): No wheat or oats cut as yet. Wheat badly rusted here. Oats will be an average crop. Corn best ever seen.

Winnetoon (7): Winter wheat about 65%. Some sort of an insect working in the last joint. Spring wheat 50% is badly blighted. Oats 80%. Corn 100%.

Schuyler (7): Too early to know yield per acre of wheat or oats as just beginning to cut here. Looks very heavy, however. Corn is late about ten days but has an excellent color and will come out O. K. if seasonable weather from now on.

Superior (9): No threshing, cannot say about yields. Oats are being cut now and look like a good crop. Corn is up to normal and promises well though getting dry and rain is needed for best results.

KANSAS.

Junction City (7): Yield per acre of winter wheat is disapointing. Most of the fields which have been threshed have yielded considerably less than expected. Corn is making excellent growth at this time and most of the fields are reasonably free from weeds, considering the season. Should say the condition of corn has improved 5% in this vicinity during the past thirty days.

Pleasanton (8): Weather has improved and have had a week of sunshine. Wheat threshing commenced last week. Condition good. Yield 18 to 20 bu. Some wheat badly mixed with oats. Corn in good condition but acreage only 50% of normal.

Ashland (3): Yield per acre is very disappointing of wheat which we thought would make 30 bu. per acre is turning out 15 to 20 bu. A large per cent will grade No. 3. Hot weather cut both quality and yield. No oats threshed yet. Corn is making a good growth but grasshoppers have been doing some damage.

Jetmore (2): No threshing yet. Hoppers taking ¼ of our crop. Some fields that looked good will not be cut.

Uniontown (9): Threshing commenced last week. July 3. Wheat is making 20 bus. per acre so far. Quality is fair. Quite a lot of wheat to cut yet owing to so much rain fields are very soft. Oats seem to be fair. None threshed yet. Some fields of corn are good and some just planted. Some are 3 and 4 ft. tall and have never been cultivated.

Wellington (6): Crop conditions in this section at present are a little unsatisfactory. Rust and too much rain have damaged our wheat considerable. Very little threshing has been done yet so it is hard to arrive at just what our wheat will be. We have heard of yields on the wheat from 10 to 15 bus., one case as high as 18 bus. Wheat is testing from 51 lbs. to 60 lbs. We think the general average wil be No. 3 wheat. Oats are about all harvested and the corn is coming along in good shape.

Alta Vista (8): Wheat threshing has just started. The upland wheat I think will yield from 15 to 25 bu. per acre. There are spots of wheat that are on the bottom land and on the very rich ground that will not go 5 bu. per acre and a very poor grade at that. Think that the upland wheat will grade No. 2. Oats look good and will be a big crop. The oats are about one-half shocked. Corn looks good, clean of weeds and I never have seen it look better. Has a good color and is growing fast with plenty of moisture.

Athol (4): Winter wheat will yield 20 bu. per acre. Oats will yield 40 bus. Corn while rather small for the time of year is doing fine and the soil is in almost perfect condition.

Plainville (4): Just started to harvest. Corn O. K. and doing well. Wheat deteriorating. Rank growth and shortage of rains.

Wichita (6): Wheat is being threshed very slowly on account of wet weather. The yield is about 12 to 20 bus. per acre of wheat. 50 to 58 lb. test. Corn is fine. Oats are good.

Greensburg (6): Oats and barley all cut. Yield 40 to 50 bu. 50% of wheat cut. Quality and yield greatly reduced by rust. 12 to 20 bus. per acre of wheat that will test 54 to 60 lbs. is about all that we can expect. It is getting dry but corn looks good yet. Grasshoppers doing lots of damage.

Mahaska (4): Wheat about 75% cut. Yield will be disappointing account all heavy down, wheat did not fill. Quality not as good as average. Corn about one-third replanted and small. Getting too dry. Cannot possibly raise good crop of corn here. Oats good. Will be ready to cut last of week. Weather fine but rain needed badly.

Logan (4): Harvest on in full blast at this time. Some complaint of damage from black rust and shriveled grain caused by excessive heat for the last few days. Our estimate is 15 bus. of wheat per acre. No threshing done yet. Oats are good but nothing threshed yet. Corn is late but showing good growth at present. Would say that an early frost would get a large percent of the corn and forage. This is good harvest weather but a little dry for corn and forage.

Concordia (4): Harvest well under way. Threshing likely last of this week. Considerable amount of wheat down and damaged. Oats and corn conditions good.

Minneapolis (4): Few early threshings of wheat indicate that yield will not average over 15 bus. Oats fine, light acreage. Corn in fine condition. Has made remarkable growth in past ten days.

Madison (9): Wheat bu. per acre 15 bus. Oats good growth. Corn looking fine. Still cutting wheat. Begin threshing here today.

Seneca (7): Are in the midst of harvesting wheat. Too early yet to make an estimate of the yield per acre. Corn is backward but growing fast. Owing to the wet weather farmers have not been able to keep it as clean of weeds as it should be. Oats seem to be all right but this is not an oats county. Farmers raise only enough for their own use.

Clay Center (4): Winter wheat yield 20-25 bus. per acre. Mostly grading No. 3. Oats rather light owing to extreme wet weather just while the grain is maturing. Corn looks good as yet though most of it is thin caused by cut worms taking a portion of it during the cool weather.

Neodesha (9): 35% of wheat is not cut yet. The fields are soft and it rains every second or third day. The wheat is falling and of course dead ripe.

Oswego (9): Wet weather has damaged our wheat crop 10%.

OKLAHOMA.

Enid (4): Wheat threshing just begun averaging 12 to 15 bu. of fair quality, testing from 54 to 59 lbs.

El Reno (5): Not much threshing as yet. Weather very favorable, hot and dry. Yield disappointing, running about 20 to 25% less than expectations. Yields from 15 to 20 bu. reported.

Kingfisher (4): Prospects of wheat crop reduced 25% account of too much rain. Oats fair.

Geary (2): Harvesting of wheat and oats completed. Wheat threshing now in progress and yield averaging 20 bu. Wheat testing 54 to 59 lbs., color good and milling quality should be satisfactory. Oats quality good, average yield 35 to 40 bu. Corn condition excellent at present but will need moisture soon to keep up condition.

Enid (4): Crop conditions are good. Threshing is getting under full heading and results are disappointing. Lots of light test wheat and yield about one-third less than expected. However, weather conditions good and there will be a heavy run of wheat from this time on.

Marshall (5): Wheat yields range from 12 to 29 bu. per acre. The average, however, will be around 18 bu. Oats harvested but none threshed. Quality good. Corn doing well and in roasting stage. Weather has cleared off and prospects good for threshing this week.

Altus (3): Judging from threshing returns now made, wheat in the country will yield not less than 18 bu. per acre, possibly as high as 20 to 21. Oats yielding around 50 bu. Corn and other row crops making good growth.

Miami (7): All wheat (red winter soft) cut and a good part of the oats. Wet weather has put wheat in the shock in precarious condition, also the cut oats and has delayed threshing. Wheat will probably average 18 bu. and oats 35. Condition of corn is very good but allowed to get weedy because of excessive rains. Some corn is unusually early being now in the silk. Seems to be intention of most farmers to dry out shocks of both wheat and oats and stack as soon as possible. This upon advice of all grain dealers and county agent.

News of the Terminal Markets

CAIRO, ILL.

J. E. Clancy, Correspondent.

The first cars of new wheat were received on June 29th. One car graded No. 2 red testing 50 pounds and had 12.40 per cent moisture. The other graded No. 4 red and tested 54½ pounds.

Local interests are ship-shape to handle their full share of the movement in grain, alfalfa hay and meal, believing the market's location is exceptionally good this years with surplus here, shortages there and prevailing high prices generally.

The Cairo elevator, which has been operated by the Pendleton Grain Company for the past year, has loaded out all the grain that they had stored. It is understood here that they will operate the house again this year and will store wheat for the grain corporation.

A sixty mile an hour windstorm struck here on the 11th, doing considerable damage. The steamer Liberty, a large excursion boat, was blown from her moorings and crushed a fine Alton, Ill., yacht. The storm did considerable damage to corn in southeast Missouri.

Samples of wheat shown here are varying in weight from 54 lbs. to 59 lbs. Very few samples are testing good enough to grade No. 2, the average being around 57 lbs. The wheat has less garlic and onions than usual and there is very little smut. The yield is disappointing, averaging five bushels less per acre than last year.

NASHVILLE.

John Leiper, Correspondent.

W. F. Akin has sold his interest in the Lillie Milling Co., Franklin, Tenn., to C. H. Corn, and will remove to Chicago.

Receipts of grain at Nashville last week were 96 cars. Stocks at the end of the week were as follows: Flour, 8,600 bbls., decrease 4,400; corn, 73,000 bus., decrease 19,800; wheat, 11,000 bus., decrease 41,000; oats, 146,000 bus., decrease 22,000.

Grain trade was of moderate volume last week, with corn and oats strong and tending to higher levels. Quotations: Wheat--Local, in wagons, $2.10@2.15. Corn—No. 2 white, $2.03@2.05; No. 3 white, $2@2.03; No. 3 mixed, $1.97@2. Oats—No. 3 white, 80½c; No. 3 mixed, 79½c. Buyers are beginning to buy new Oklahoma red oats, which are offered for July shipment at 77c.

The volume of business continues small at corn mills. Prices are higher, with bolted meal quoted $4.30@4.40 per 100 lbs., sacked, f. o b. Ohio River points, and plain meal $4.10@4.20. Southeastern corn mill with capacity of 129,000 bus. reported output last week of 21,410 bus., or 16.5 per cent of capacity, compared with 25,238 bus., and 19.1 per cent of capacity of mills reporting the preceding week.

Southeastern flour mills are beginning to grind new flour. The movement of wheat has been slow getting under way, but it is thought that supplies will be adequate this week for mills to run at full blast. Buyers have been booking contracts for flour for July and August shipment freely, with 100 per cent flour quoted $10.20@10.35, f. o. b. Ohio River points, and fancy patents 50c@$1 higher. Southeastern mills, with capacity of 190,890 bbls., had output last week of 16,955 bbls., or 8.8 per cent of capacity of the mills reporting, compared with 12 per cent the preceding week and 20.3 per cent the same week last year. Farmers are said to be showing disposition to hold wheat.

MILWAUKEE

E. E. Meyer, Correspondent.

The steamer Thomas Davidson loaded 170,000 bushels of oats at Elevator A this week. The consignment went to Buffalo.

Milwaukee flour mills produced 11,600 bbls. of flour during the past week, consisting of 9,500 bbls. of wheat and 2,100 bbls. of rye flour.

The W. M. Bell Co., Milwaukee, has filed amendments to its articles of incorporation by which the capital stock is increased from $100,000 to $150,000.

Grain receipts at Milwaukee for the week ending July 12 were 233 cars barley, 77 cars corn, 258 cars oats, 32 cars wheat, 26 cars rye, 4 cars flax; total, 630 cars, against 359 cars the week before, 334 cars a year ago and 612 cars in 1917.

Shipments of grain from Milwaukee during the past week were 563,990 bus. oats, 106,550 bus. corn, 265,900 bus. barley, 23,750 bus. wheat, 24,300 bus. rye; total, 984,490 bus., against 1,148,015 bus. the preceding week and 646,782 bus. a year ago.

In cash grain markets ruled strong during the past week, ratification by Germany of the Peace Treaty resulting in stimulating prices with heavy export sales. Barley for this period is 8@10c higher, corn 10@12c, oats 8@8½c, rye 20c and wheat strong. Crop news is mixed, though the July Government report promulgated this week was bearish.

Visitors registering at the Milwaukee Chamber of Commerce during the last week included the following: Paul J. Mathews, Kansas City, Mo.; H. H. Huber, Darien; A. A. Fritchen, Union Grove, P. J. Stuppel, Lomira, Wis.; John Dumphy, Elkhorn, Wis.; Harry Klein, Chicago, Ill.; E. K. Stratton, Minneapolis, Minn; F. M. Durkee, Lake Geneva, Wis.; Arthur Hake, Grand Rapids, Mich.; J. C. Hoffman, Middleton, H. F. Hoffman, Madison, M. Menger, Allenton, Wis.; A. Blanchard, Lake Wales, Fla.; J. A. Butler, Minneapolis, Minn.; A. A. Lee, Zenda, Wis.; C. M. Kerndt, Lansing, Ia.; R. A. Strong, Earlville, Ill.; E. H. Ladish, Chicago, Ill.; Jas. Irwin, Oshkosh, J. J. Martens, Kaukauna, F. H. Huebner, Ixonia, Wis.

Foreign Grain Freights

Grain Forwarding

NEW ORLEANS, LA.

WESTERN CANADA.

A. Caldwell, Correspondent.

In Saskatchewan the situation is mixed, conditions varying from excellent to poor. The same may be said of Alberta but the area of good in Alberta is very small. On the whole the Alberta crop is a failure.

Manitoba crop conditions continue good, the weather has been breezy and cool and there is for the present no fear of serious damage from rust though orange rust has appeared in scattered localities. Growth is extraordinarily rank. The hay crop very heavy.

The coarse grain market has advanced during the week and closed strong on Saturday in all lines except flax. Flax made sensational advances during the week, but at the week end there was a sharp reaction. Whatever is behind the gyrations in flax Canadian crushers have been consistent buyers of all cash flax offered. There has been a good demand for cash oats with offerings light and premiums have advanced. Cash barley has been quiet.

Winnipeg.—The proposal to reopen the wheat market is the chief matter of interest in grain trade circles. The Dominion government favors the change; traders are anxious to resume business but the organized farmers are fearful of a slump in prices and demand a continuance of government control. The farmers have long been a pampered class in Western Canada but the general public has had enough of government control and prefers to take a chance on an open market as eventually likely to bring down the cost of living and there will be an open market in the near future. October wheat would appear on the call board of the Grain Exchange tomorrow if there was a chance of arriving at wheat values. With fixed prices in both England and America this is a difficult matter. In the meantime the Canadian banks will be very chary in their advances on warehouse receipts. The financial side of the question is difficult of solution but with the beginning of a real export trade in American winter wheat the situation should clear to a considerable extent.

MEMPHIS.

George Williamson, Correspondent.

Walter Browne is attending the annual meeting of the National Hay Association in Detroit, being the only local man there as far as known.

Weather conditions have been better during the past week, and some much needed cultivation of crops was done, but there are still some very bad corn crop advices. Unless there are excellent conditions for late corn, there will not be a large yield in this territory.

In a thunder and wind storm here late Thursday the new grain elevator just completed at the corner of Thomas street and the Belt Line was demolished, involving a loss of something like $50,000. It was erected by Capt. H. B. Nedaroy and Marshall Nott, and had just been opened for business.

Reports of disappointing yields of wheat and oats have been coming here, but there has been better weather for threshing. Hay advices have been favorable and lots of alfalfa has been cut, but all has been consumed at home or disposed of without shipment. The cotton outlook, except in the weevil territory, is improving, but the best is already taking big toll.

Demand for white corn for milling purposes has been one of the few features of that market. Offerings have been light and for No. 3 white around $2.05 and $2.06 has been asked, with No. 2 white a cent or so higher. For yellow grades prices are around $2 and a little less. Demand has been moderate, as most people who use corn made their purchases some time ago and their receipts show them enormous profits.

Oats are coming in a moderate way, with prices on the ascending scale. Three white cash oats sold at 82c Saturday and the market was reported firm. The feed manufacturers have been taking most of the grain and using it instead of corn. The trade is bullish and seems to be looking for narrowing of differences between oats and corn. There are offers of red oats from Oklahoma, but they are not going very well, as some of the trade seem to fear they will not come up to grade. Oklahoma No. 3 red shipment in July sold Friday at 74c.

BUFFALO.

E. Bangasser, Correspondent.

There is no demand for rye here and holders were anxious to sell. The asking price was 4c over Chicago August for No. 2. There were occasional flat prices which, although lower, failed to bring out buyers.

Some interest in wheat but it seems impossible to get anywhere near a fixed price on soft winter. Reports were discouraging concerning the coming crop. Old No. 1 red sold here at $2.35 and No. 7 mixed $2.31, and only a few cars wanted.

The light receipts of corn gave sellers the chance to advance prices somewhere near the value according to shippers ideas and there were sales before the week closed at 12c over last week, with buyers in the market for any quantity. The truth is that everybody here is in need of corn and taking anything as soon as offered. This was not unexpected by those who were in the game. Closing: No. 1 yellow, $2.05½; No. 2 yellow, $2.05; No. 3 yellow, $2.04; No. 2 mixed, $2.03, on track, through billed.

Inspection trade receipts for the week were: Wheat—No. 3 soft white, 1 car; No. 1 red, 4 cars; No. 2 red, 2 cars; sample mixed, 1 car; No. 1 mixed, 1 car; No. 2 durum red, 1 car; No. 4 durum, 1 car. Corn—No. 1 yellow, 9 cars; No. 2 yellow, 18 cars; No. 3 yellow, 6 cars; No. 4 yellow, 3 cars; No. 6 yellow, 4 cars; sample yellow, 7 cars; No. 2 mixed, 3 cars; No. 6 white, 1 car; sample mixed, 1 car. Oats—No. 1 white, 14 cars; No. 2 white, 45 cars; No. 3 white, 22 cars; No. 4 white, 1 car; sample, 3 cars. Rye—No. 1, 1 car.

Oats buyers were slow in following the advances in the market, but when the receipts dropped off almost entirely they became anxious and it was easy toward the close of the week to get 5c over last Thursday's market, which, however, was considered still too low. Millers wanted track oats and took everything offered today. A good business was done in store offerings, but as a rule stocks here are held higher than buyers will pay at the moment. Closing: No. 1 white, 84½c; No. 2 white, 84c; No. 3 white, 82c, on track, through billed.

TAMPA, FLA.

Leonard Selz, Correspondent.

On account of strikes among dock laborers, firemen, engineers and oilers on coastwise steamers, considerable uncertainty is attached to scheduled sailings from New York and New Orleans to this port. Vessels operated by the Shipping Board will not be affected, it is understood. The sailing of the regular steamer from New York to Tampa has been cancelled for this week.

The Cumberland & Liberty Mills Company and Henderson-Bushnell Company have remodelled their warehouses to give more office room. Mr. Householder, manager of Cumberland & Liberty Mills, advises that he ordered additional office space in order to accommodate the vastly increased number of lady callers who are collecting funds for the public good.

Scratch feeds have gone practically out of sight as to price but the demand still continues fair. Even the lowest grades of wheat are unobtainable for feeding purposes and it is only occasionally that a car is offered and that is always snapped up when the price is anywhere near the price of scratch. The steamer "Lake Fossil" arrived this week with a heavy miscellaneous cargo, of which a heavy tonnage was feedstuffs. About 4,000 bags of scratch feed was discharged.

There has been a good demand during the week for grain and feeds of all kinds; the demand for corn, however, was not in proportion to oats. The rapid advance of corn has placed it beyond the views of feeders in this territory to a great extent. However, Florida does not consume a great quantity of corn during June, July and August. No. 2 mixed corn is offered today at $2.12½, sacked 100-lbs., delivered Tampa. Receipts did not exceed eight cars for the week. Oats enjoying steady demand from country points and receipts have been heavy. No. 3 whites @ 91¾c, delivered, sacked 100-lbs. Receipts 9,200 bags. Some Texas No. 3 clipped Rustproofs were offered here today for shipment this month at 87½c, delivered Tampa, via New Orleans, sacked 100-lbs., and met with some sales.

INDIANAPOLIS.

Myron R. Green, Correspondent.

The wages paid by farmers in the vicinity of Monoquet, Ind., run from $4 to $7 a day and board.

Henry Kelsomer, age seventy-two, shocked ninety acres of wheat and forty acres of rye this season without assistance, in addition to assisting a crew of harvesters three days.

Authorities at Purdue University have received a telegram from the Department of Labor at Washington, asking that Indiana assist in enlisting 50,000 men for work in the harvest fields of Kansas.

Frank N. Wallace, entomologist for the state conservation commission, has returned from Greene county, where he was called upon to look at the depredations of the chinch bugs, which are appearing in great numbers in the county.

Ten acres of wheat in shock were de stroyed by fire on the farm of Curt Drake, starting from a passing Pennsy vania freight train. Men in the field p the fire out after half of the twenty acr was destroyed. The loss is estimated $500.

Cutsinger-Thompson, a milling firm Shelbyville, Ind., will erect a 200,000-bush capacity concrete elevator in that cit Work on the building is to be started abo August 15. The new building will co about $85,000. The firm already owns o large elevator.

At a meeting of the Bartholomew Coun Farmers' Association at Columbus, In the following committe was appointed arrange for a seed wheat treating st tion: Harden Linke, Clarence Thompso and James Talley. It was also decided buy fertilizer for the 700 members of t association.

The wheat harvest in Elkhart county nearing an end, and in general the yield disappointing, being far below expect tions, especially in territory east Goshen, Ind., where in most instances t crop is one-third smaller than that ha vested last year. Much smut has be found in the wheat.

Indications are now that the wheat cr in Adams county, which seemed to pro ise a bumper yield, will not yield more th a quarter of the average crop. One co servative farmer, who expected forty bus els per acre, found a yield of only te The lack of rain is believed to have be the cause of the heads to fill out properl

CLEVELAND.

F. R. Sowers, Correspondent.

A. G. Oatman, of the firm of Oatman Monfort, left Cleveland this week with f family for a month's vacation.

Announcement is made that C. J. Steff is now traffic manager of the Clevela Milling Company, succeeding C. E. Arth

The past week has witnessed the a rival of the first new wheat to this mark consigned to the Cleveland Milling Co pany.

W. C. Seaman, general manager of t Herrman-McLean Company of this ci has gone with his family to Cedar Poi for a vacation.

The Grain and Hay Exchange has a pointed a committee to arrange for outing on the Lake Shore for its membe their families and employes.

F. W. Blazy, general manager of t Star Elevator Company, has returned his office after having spent a month tra eling with his family in the west.

The Grain and Hay Exchange is prepa ing to install analyzing service on flour a feed. Dr. H. O. Way, city bacteriolog for the past several years, will be charge.

The Cleveland Grains Drying Compa report their plant at Wellington sold wi the expectation of going into somethi much larger. This company maintains principal drying plant in Cleveland.

The following delegates have been a pointed to represent this Exchange at t National Hay Convention at Detro Messrs. A. A. Kemper, H. M. Strauss, G. Oatman, F. W. Blazy and O. W. Tra

The few recommendations of the Mar Survey Committee, which visited this c in the spring, have been fully compli with, which makes this a 100 per cent po in providing satisfactory inspection serv on grain.

President Robinson, treasurer, F. Blazy and Secretary Sowers of the Cle land Grain and Hay Exchange, will atte

he National Hay Association convention n Detroit in addition to the authorized ive delegates from the exchange.

L. Wood, city sales manager for the Union Elevator Company, while returning rom a fishing trip in the Adrondacks, was slightly injured in the train wreck of the New York Central at Dunkirk, New York, but has been able to be in his office this veek.

Frank Baer, track commissioner of the Cleveland Chamber of Commerce, represented the grain interests of this city at Toledo, Ohio, July 10th, in conference with reference to ex-lake and reshipping rates on grain from Cleveland and other Lake Erie ports to trunk line territory.

Under ruling of the Food Administration Grain Corporation, no new wheat will be bought at Cleveland this fall. However, Cleveland will be in the oats and corn market. Quite a lot of new oats has been booked by the larger grain dealers of this city and this is taken as an indication that Cleveland will be an important oats market throughout the season.

A general survey of the harvest and grain being harvested, as noted by a representative of the firm of Shepard, Clark & Company, indicates that wheat is not running as expected. Most of it, thus far, will grade about No. 3 Red Winter, due principally to its being shrunken, which is accounted for by the hot wave the first part of the month of June. The outlook for corn and oats in northern Ohio is very good.

BOSTON.

R. S. Wallace, Correspondent.

Exports of grain for the week ending July 12th were as follows: Wheat, 113,416 bus.; oats, 184,028 bus.; rye, 30,000 bus.; barley, 145,000 bus.

Stocks of grain in regular elevators July 5th were: Wheat, 75,497 bus.; corn, 2,294 bus.; oats, 186,027 bus.; rye, 39,528 bus.; barley, 791,208 bus.

The following were visitors on 'Change during the past week: J. E. Cairns and N. J. Brogan, Chicago, Ill.; F. A. Hubbard and G. W. White, New York City; R. M. White, Duluth, Minn.; W. H. Terwilliger, Milwaukee, Wis.; W. H. Duffett, Rochester, N. Y.

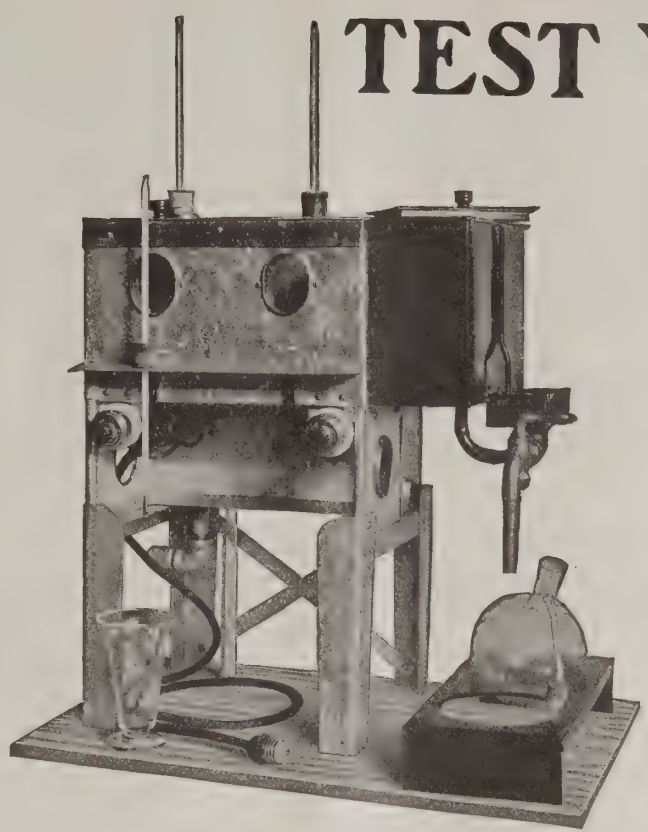
The market on corn is quite some higher than last week with a slight improvement in the demand and offerings rather light. Prices ranging as follows: No. 2 yellow corn, $2.14 to $2.16 per bushel; No. 3 yellow corn, $2.12 to $2.14 per bushel. Receipts for the week ending July 12th were 550 bushels.

An improvement in the demand reported for oats with prices much higher and ranging as follows: Fancy 40/42 lbs. clipped white oats, 90½ to 91c per bushel; fancy 38/40 lbs. clipped white oats, 90c to 90½c per bushel; regular 38/40 lbs. clipped white oats, 89½c to 90c per bushel; regular 36/38 lbs. clipped white oats, 89c to 89½c per bushel. Receipts for the week ending July 12th were 50,850 bushels.

DULUTH.

S. J. Schulte, Correspondent.

Commission houses on this market have received advices that the Goodrich Minn., Farmers Elevator & Milling Co., incorporated some time ago, expects to be in business on an extended scale during the coming fall season, as crops in the vicinity of Goodrich are reported to promise well.



Julius H. Barnes, president, and A. W. Frick, treasurer, of the United States Grain Corporation, are spending vacations in Duluth. Mr. Barnes expressed the opinion in interviews that the European demand would prove to be on a sufficiently broad scale to take care of the expected large surpluses of wheat and other grains in this country for the present season.

The New Canadian Northwest wheat crop for the present season will aggregate from 235,000,000 to 250,000,000 bushels, in the opinion of Charles H. Thornton of Winnipeg, who was a recent visitor upon the Duluth market. He admitted that the flaxseed crop has been badly cut down up here through drought over a wide area of territory contiguous to Montana.

Application has been made for the transfer of the Duluth Board of Trade membership of Parker M. Paine to W. E. Craig of E. S. Newell & Co. That firm is successor to the Paine Commission Co. on this market, its dissolution having been brought about through the retirement of Parker M. Paine to become a member of the Logan & Bryan House at Chicago.

Benjamin Stockman, president of the Duluth Board of Trade and manager of the Duluth-Superior Milling Co., expects to be back here in about two weeks. He has sailed from Liverpool for New York on the Adriatic. Mr. Stockman left here on April 1st to make a visit to his old home in Scotland and to get into touch with his company's British flour trade connections in order to further develop export business.

The joint state board of grain appeals held its annual meeting in Duluth last Saturday. It was decided to adopt for the new season the Federal grades on wheat, corn and oats. The barley grades were changed slightly so as to make the grading easier in the lower grade grain. R. Ziesemer of Minneapolis was elected chairman of the joint board for the ensuing year and Hans P. Bjorge of Duluth was elected general secretary. All the members of the joint board were present, including J. F. Ingersoll, John Owens and Hans P. Bjorge of Duluth, and R. Ziesemer, J. P. O'Neil, and F. Evenson of Minneapolis.

The railroads at the Duluth-Superior terminals are not entitled to make a charge upon cars of grain held on track for inspection purposes, according to a decision just handed down by the Interstate Commerce Commission. The case had been pending since April, 1917. It had been proposed by the roads to make a charge of $2 for the first day of detention, and progressing upward to $5 a day until disposition of the cars had been given. The Duluth Board of Trade opposed the proposal at the time, and its imposition was held in abeyance until now, when by the decision of the commission, it is wiped out entirely. Consignees under the ruling are allowed a reasonable free time in which to obtain the inspection of their cars.

NEW YORK.

J. M. Nugent, Correspondent.

Prices for corn goods of all kinds were marked up in accordance with the advance in the price of cash corn, but business was again small and largely of a domestic hand-to-mouth nature.

Trading in cash corn continues on a very limited scale owing to the scarcity of offerings. No. 2 yellow is quoted at $2.11¾; No. 3 yellow, $2.10¾; No. 2 white, $2.15¾; No. 3 white, $2.14¾; No. 2 mixed, $2.09¾, and No. 3 mixed, $2.08¾.

The following gentlemen were among the visitors upon the floor of the Produce Exchange during the past week: Claude B. Davis and J. L. Jeffery, of Chicago; L. W. Lake and Nesbit Grammer, both of Buffalo; A. L. Stanchfield, of Minneapolis; A. G. Thomas, of New Orleans, and B. W. Heyman, of Philadelphia.

There was a moderate business doing in spot oats during the week, with values generally firm. The tone of the market remains very firm in sympathy with the strength in futures. Export trade was on a large scale with the United Kingdom the principal buyer. Quotations as follows: No. 1 white, 86½c; No. 2 white, 86c; No. 3 white, 85½c, and No. 4 white, 85c.

The volume of business in the flour market showed further increases last week and, while business was far below normal for this time of the year, it showed a very gratifying improvement over the recent long period of dullness. Old wheat flour was very firmly held, but the business was comprised largely of sales of new hard winter wheat flours from the Southwest. These are growing in popularity, and while a good many complaints had been received regarding the quality of the new flour, samples showed the new flour entirely satisfactory. Local buyers again displayed a tendency to operate with caution and it is the consensus of opinion that there will not be a repetition of last year's overbuying as there is a large element of uncertainty in the situation this season which has a tendency to make the trade more conservative.

DETROIT.

John Barr, Correspondent.

F. E. Nowlin, grain dealer at Albion, was a visitor on 'Change last week.

O. T. Watts, representing the Louisville Seed Co., was here on business last week.

Interest in the rye market has increased, although there has been little business because of small supplies here. The price was bid up to $1.58 by shippers. Local millers were not in the market.

Robert L. Hughs represented Detroit at a meeting of transportation officials at Toledo last week, where the question of rates from Detroit and Toledo was discussed. Mr. Hughs was well pleased with the results attained.

The buying of oats is active and all offerings are promptly taken. The market has been strong all week. Receipts were small. A little trading was done with the East, but most of the business was for local consumption. Quote: No. 2 white, 79½c; No. 3 white, 79c; No. 4 white, 78c.

The demand for beans has increased and the market gained 10c at the close of the week, bringing the price up to $7.35 for immediate and prompt shipment. Offerings have been small for several days and dealers do not expect much more business until the new crop moves. Michigan bean acreage this season is only about fifty per cent of normal. The land is being devoted to other crops.

W. R. Campbell, of the Commercial Milling Co., discussed the relationship between the buyer and seller in marketing Michigan's 1919 wheat crop at a meeting of grain dealers and millers held in this city last week. During the afternoon a grain grading demonstration was given by H. B. English, grain supervisor, Washington, D. C. Government rules and regulations were discussed at the same meeting in their bearing on the marketing of the Michigan wheat crop. The meeting was well attended.

Some time ago J. S. Lapham & Co., local grain dealers, received a shipment of several cars of corn from Elkhart, Ind. The cars were delivered to the Chicago & Alton with no directions as to routing. At Springfield, Ill., the corn was delivered to the Wabash railroad, although it could have been sent to Detroit over two cheaper routes. The rate of the Wabash was 14.7, against 10.5, had the grain been routed by either of the cheaper roads. J. S. Lapham & Co. refused to pay the 14.7 rate and the Wabash took the matter into court, obtaining a verdict. The judge stated that the Wabash was not at fault. The initial road, he claimed, had a duty to perform

in that it should have arranged for the cheaper transportation. He stated that the grain company's action should have been directed against the Chicago & Alton. Correspondence is invited with The Price Current-Grain Reporter from others up against similar cases.

Corn is very scarce in this market and business slow. The market was strong early in the week and several advances were made in price, but weakness came Friday and a decline of 5c Saturday brought an advance of 2c. The East is not buying here and local consumption is not large. Quote: No. 3, $1.95; No. 3 yellow, $1.97; No. 4 yellow, $1.95; No. 5 yellow, $1.92; No. 6 yellow, $1.89; No. 3 white, $2.

Wheat is inactive and easy. No. 2 red is quoted at $2.23, No. 2 mixed at $2.21 and No. 2 white at $2.21. Flour and millfeeds are easy.

BALTIMORE.

Robert C. Neu, Correspondent.

Reports from some of the best wheat-growing sections on the eastern shore of Maryland indicate a yield far short of earlier expectations.

Charles Minnegerode, flour and feed broker of this city, and C. E. Clifton, of Washington, were elected to membership in the Baltimore Flour Club last week.

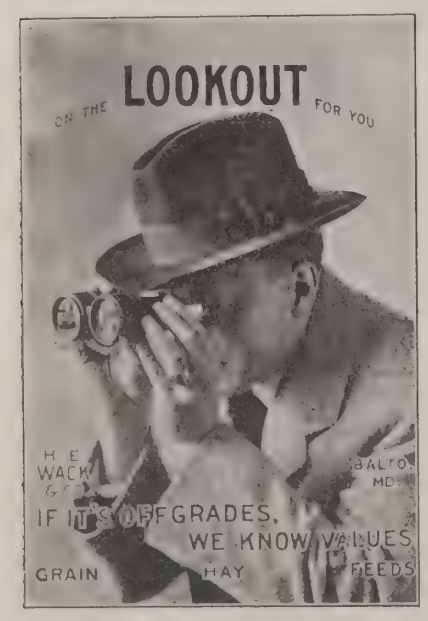
Corn prices reached their high point on the crop last week in this market when sales of yellow corn were made at $2.08 and of white at $2.05 per bushel, in carlots.

The receipts of new water-borne wheat in the Baltimore market so far this season amount to 140,000 bushels, compared with 100,000 bushels arrived up to the corresponding time last year.

Hay Inspector C. R. Melcher of the Baltimore Chamber of Commerce has been appointed by President Hayward to represent the inspection department of this organization at the forthcoming annual convention of the National Hay Association at Detroit.

Oscar M. Gibson, with C. P. Blackburn & Co.; Harry E. Elgert, traveling representative of J. A. Manger & Co.; E. H. Beer, of Chas. England & Co.; and H. A. Lederer, of Lederer Bros., are among the Baltimore grain men at present traveling in the West on business for their respective firms.

With the change to hot, summer weather the receipts of new wheat in the Baltimore market show a gratifying increase, quite a few full cargo lots being noted now from day to day, and from this out 25,000 to 40,000 bushels a day from nearby territory are looked for. The grading of the wheat is improving also.



President William H. Hayward of the Baltimore Chamber of Commerce has been named by the mayor of Baltimore as a member of the Baltimore Free Port Committee to assist in safeguarding the interests of the municipality in the legislation before Congress looking to the establishment of free ports along the Atlantic coast.

The following well known members of the hay and grain trade will attend the 26th annual convention of the National Hay Association at Detroit, July 16 to 18: Charles England, Herman Runge, Egil Steen, George H. Morrison, Gustav Herzer, Clarence A. Euler, George A. Hax, Harry E. Elgert, Walter F. Macneal, Colonel Harry C. Jones, and Jas. E. Murray.

Capt. Philip C. McIntyre, late of the 115th Infantry, who was cited for meritorious conduct while in action on French battlefields, has returned to his former connection with Hammond, Snyder & Co., Inc., grain receivers and exporters of this market, and was warmly welcomed by his colleagues when he reappeared on 'Change for the first time last week in civilian dress.

Bolle-Watson Co., Inc., grain exporters and importers of New York, brought a cargo of about 20,000 bus. of Argentine corn to Baltimore on July 7 per schooner "William A. Naugler," which was en route from Buenos Aires 56 days. The corn was bought by the Baltimore Pearl Hominy Co. Considering its long voyage, it arrived in excellent condition, showing less than 15 per cent weevil cut grains.

Donald K. Belt, formerly with Wm. G. Scarlett & Co., seedsmen of this city, has severed his connection with this firm and will engage in the business of wholesale distributors, recleaners, exporters and importers of seeds under the style of the Belt Seed Co. Mr. Belt is equipped by both long years of experience and intimate knowledge of the seed business to take care of the needs of his customers and his friends in the trade bespeak for the new firm a successful career.

ST. LOUIS.

E. E. Reeves, Correspondent.

The Marshall Hall Grain Co. unloaded several cars of new wheat in the Burlington Elevator this week.

R. C. Jackman, a prominent miller of Lawrence, Kansas, is among the applicants for membership in the Merchants Exchange.

Martin J. Mullally returned Tuesday from a trip to Denver and Colorado Springs, where he reports he had a "hot old time."

Big Dan Mullally, the genial hay man of Langenberg Bros. Grain Co., returned Wednesday morning from a short vacation on the Pacific Coast.

Corn struck the long-promised $2 mark in the St. Louis market Wednesday, when No. 2 white corn sold at that price, repeating the performance on Thursday and broke the record on Saturday by selling up to $2.05.

Chauncey J. Gundlefinger and Charles H. Appel, of Newman & Malkemus, are applicants for membership in the Merchants Exchange. Mr. Appel has purchased the certificate formerly owned by W. E. Newman. Another applicant is Marshall B. Lusk, of the Lusk-Stokes Grain Co.

George Bauer, who has been assisting Mark Gautier as doorkeeper of the Merchants Exchange, on Saturday was promoted by Secretary Smith to stock board clerk, a position made vacant by the resignation of Harold McCune. George was one of the most popular boys ever on the door.

George C. Martin, Jr., of Goffe & Carkener, returned this week from a business and pleasure trip to Chicago and northern points, but knowing George as we do, it is safe to say that he kept a weather eye on crop conditions. In commenting on the outlook for Goffe & Carkener Co., whose interests are directed by Mr. Martin, he says that the St. Louis facilities and location should be even more widely used on the present crop movement than during any recent year.

Edward Keiser, of Memphis, a member of the United States Grain Standardization Bureau, and Reginald Tolston, of the St. Louis Federal Grain Supervisor's office, assisted by County Agent Kinsey of the St. Louis County Farm Bureau, held four demonstrations last week in the county showing farmers, grain buyers, millers and elevator men the proper methods for grading wheat and other grain. These meetings were held at the Chesterfield Elevator, the Anglum Elevator, Manchester Mill and the Eureka Elevator, all in St. Louis county. They were well attended and proved of great interest to the spectators.

Although the "To Arrive" Committee of the Merchants Exchange had their rules and regulations for making "to arrive" bids to the country in the hands of members on Tuesday offerings of cash wheat were so liberal that there were no bids posted until late in the week. One of the first bids posted was from Armour & Co. for 5,000 bus. No. 1 red winter wheat, 10 days' shipment, at $2.22½. Under the regulations, members must fill out slips with duplicates of their bid, which they post on the blackboard, so that their bids can be filed with the secretary, otherwise there will be no record of the bid available.

A special meeting of the executive committee of the St. Louis Millers' Club was held Saturday for the purpose of selecting a member of the advisory committee to Mr. Barnes, at which L. A. Valier, of Valier & Spies Milling Co., was selected to succeed Samuel Plant, who resigned. Mr. Plant gave good reasons for not being able to serve on this committee, and a rising vote was taken, thanking him for the good services he had rendered. Mr. Valier's name will be sent for the approval of Mr. Barnes. It was suggested at this meeting that as many millers as possible should attend the meeting in Chicago, July 14, where the formation of the Millers' Export Association will be incorporated. The St. Louis millers generally are much interested in this association and there will be about 4 or 5 attending this meeting. In order to raise funds to meet unusual expenses of the Millers' National Federation, incurred in connection with the negotiations regarding the millers agreement, the federal committee on finance and membership has called an assessment from all members of the Federation, an amount equal to one year's dues. The treasurer of the St. Louis Millers' Club was instructed to collect this amount from the members of the St. Louis Millers' Club.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

The Slaughter-Burke Grain Co. has made application for membership to the Sioux City Board of Trade.

E. P. Dickenson, manager of the Atlas Elevator Co., is on his vacation and will be gone about two weeks.

H. E. Sprague, manager of E. W. Wagner & Co., is spending a three weeks' vacation on his ranch in South Dakota.

Chas. Glysteen, who has been traveling auditor for the McCaull-Webster Elevator Co. for the past ten years, has resigned his position to enter into business for himself.

L. C. Button, president of the L. C. Button Co., has been touring South Dakota for the past two weeks. He reports that he does not believe that the condition of the small grain is as bad as has been reported, and says that the wheat does not look as bad as it did three weeks ago.

W. H. Harter, who has been connected with the Quinn-Shepherdson Co. here for several years, has accepted a like position in their Minneapolis office. Mr. Harter has been very active in making Sioux City a grain market; he is also one of the board of directors of the Sioux City Board of Trade and has served in that capacity for a good many years.

PEORIA.

L. L. Eckard, Correspondent.

The Worth Gyles Grain Co. have opened an office on the 12th floor of the Lehmann building. They also will occupy office room No. 28 of the Chamber of Commerce building.

Indications are for light corn receipts for the next week or so, according to consignment notices, oats receipts showing up more freely and some bookings of new oats have been reported.

The strike situation at the present time appears about unchanged at the Corn Products Co. Their corn buyer has been out of the market for a few days, making the local demand for corn rather dull.

Threshing is on in full blast in this district. So far the wheat has not turned out as well as was expected. In some cases the straw looked heavy enough for 35 bushels per acre and is only threshing out 18 to 20 bushels.

Peoria cash corn market was strong at the close Saturday and receipts were light with a total inspection of 21 corn. Prices ranged from 1c to 1½c higher and the demand was limited owing to the Corn Products Co. being out of the market. Shippers took the best corn and poor grades were unsalable at anything near their value. Sales were as follows. 2 white, $1.99; 2 yellow, $1.94½; 4 yellow, $1.90@1.91. Oats, 11 cars with very good demand; prices quoted 2¼@2½c higher.

ST. JOSEPH, MO.

W. H. Moore, Correspondent.

Mr. Pendleton, president of the Keystone Elevator and Grain Co., and Marshall Hall, came up from St. Louis to look after their elevator interests in St. Joseph.

J. O. Winn, chief grain inspector, spent several days in Oklahoma last week looking after his farms and oil interests. He reports excellent crop conditions in that territory.

The St. Joseph Hay & Grain Co. had the first car of new wheat in this week. It graded No. 2 dark hard and was sold at auction for $2.40; purchased by the Kellogg-Huff Grain Company.

J. P. Stanfield of the Federal inspection department gave a wheat grading demonstration for the benefit of the farmers and dealers in this locality on Wednesday and Thursday of this week.

F. J. Watts of the T. P. Gordon Commission Co. has returned from his extensive vacation trip to the Pacific Coast and the Rocky Mountains, bringing with him some excellent bear and fish stories, moderate in their claims, considering the fact that this is Mr. Watts first vacation in seventeen years.

Another new grain firm opened offices in St. Joseph this week; the Endleman Grain Co., under the direction of J. F. Endleman, who has had many years experience in the grain business—having formerly been manager of the Holdridge Grain Co., at St. Joseph. He has purchased the membership of Mr. Oswald of Omaha, Nebraska, which was posted for transfer today.

The following visitors registered on the Exchange during the week: J. L. Walters, Hiawatha, Kans., W. T. Crews, Craig, Mo., M. S. Groy, Fairfax, Mo., G. O. Kelly, Amity, Mo., E. T. Denton, Denton, Kans., H. W. and G. S. Hodapp, St. Louis, Mo., Tom and John Price, Maysville, Mo., C. Elliott, Gower, Mo., J. C. Eaton, Barnard, Mo., F. E. Helzer, Barnard, Mo., Jas. Baker, Pawnee City, Nebr., J. R. Strader, Barnard, Mo., J. H. Campbell, Helena, Mo., Ed. Faust, Highland, Kans., C. A. Hursh, Bolckow, Mo., H. M. Miller, Sterling, Nebr., J. B. Smith, Osborn, Mo., C. F. Blauer, Oneida, Kans., R. M. Emery, Seneca, Kans., Guy C. Clary, Clearmont, Mo., R. A. Vanier, Fairbury, Mo., L. E. Thompson, St. Joseph, Mo., J. G. Thompson, Decatur, Ill., H. Burge, Gravity, Iowa.

Cash Wheat: There has been an excellent demand for the light receipts of new wheat for the past week, especially hard and dark hard, which sold at 10c to 23c premium; red wheat 2c to 5c premium. Local mills were not in the market to any great extent, most of the purchases being by dealers for outside mill accounts. Nominal quotations, new wheat: No. 1 dark hard, $2.36@2.37; No. 2 dark hard, $2.33@2.35; No. 3 dark hard, $2.29@2.30; No. 4 dark hard, $2.21@2.24; No. 1 hard, $2.32@2.33; No. 2 hard, $2.29@2.31; No. 3 hard, $2.25@2.26; No. 4 hard, $2.17@2.20; No. 1 yellow hard, $2.30@2.31; No. 2 yellow hard, $2.27@2.29; No. 3 yellow hard, $2.25@2.27; No. 4 yellow hard, $2.17@2.20; No. 1 red, $2.19@2.21; No. 2 red, $2.15@2.17; No. 3 red, $2.12@2.13; No. 4 red, $2.09@2.11.

Cash Corn: Corn receipt continue extremely light and the market finally advanced to $1.99 for white corn; yellow corn is in equally good demand, with supplies limited. The growing crop is about as near perfect as possible. Nominal quotations, corn: No. 2 yellow, $1.96@1.97; No. 3 yellow, $1.93@1.95; No. 4 yellow, $1.90@1.93; No. 5 yellow, $1.88@1.89; No. 2 white, $1.95½@1.97; No. 3 white, $1.94@1.95; No. 4 white, $1.91@1.92; No. 5 white, $1.87@1.90; No. 2 mixed, $1.93½@1.95; No. 3 mixed, $1.90@1.93; No. 4 mixed, $1.87@1.89; No. 5 mixed, $1.81@1.84.

Cash Oats: Oats continue to advance towards the 80c mark, with receipts light and the demand in excess of the supply. New oats are being offered from the country, but so far none have been for sale on the exchange floor. Nominal quotations, oats: No. 2 white, 76½@77c; No. 3 white, 75½@76½c; No. 2 mixed, 75½@76c; No. 3 mixed, 74½@75c; No. 2 red, 75@76c; No. 3 red, 74@75c.

St. Joseph Hay Market.

The hay market continues steady with a decline from $2.00 to $4.00 since last week; demand just about sufficient to absorb the present supplies. Top grades are still in good demand, while the lower grades are slow sale and rather draggy. Present indications point to a steady market this coming week and we are not looking for any material changes or declines, especially on the top grades. Nominal quotations: Prairie, choice, $26.00@27.00; prairie, No. 1, $24.00@25.00; prairie, No. 2, $18.00@22.00; prairie, No. 3, $10.00@16.00; midland, No. 1, $15.00@16.00; midland, No. 2, $10.00@15.00; alfalfa, choice, $28.00@30.00; alfalfa, No. 1, $26.50@27.50; alfalfa, standard, $22.00@26.00; alfalfa, No. 2, $16.00@20.00; alfalfa, No. 3, $12.00@15.00; timothy, No. 1, $29.00@30.00; timothy, standard, $26.50@28.00; timothy, No. 2, $23.00@25.00; clover, light mixed, No. 1, $28.00@30.00; clover, light mixed, No. 2, $22.00@24.50; clover, No. 1, $23.00@25.00; clover, No. 2, $16.00@22.00; straw, $9.00@9.50.

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

There is no demand for ear corn in the local market and quotations have been discontinued.

There is very little demand for straw of any grade and prices have been cut, with best grades selling around $10.50@11.

Summer dullness appears to have hit the local grain market with full force, offerings attracting very little attention from buyers, who take only supplies needed for immediate purposes only.

While receipts of shelled corn are not large they appear to be plenty for the small demand. Prices, however, are advancing and sentiment appears to be about evenly divided as to whether the top has been reached. Quotations follow: No. 2 yellow, $2.05@2.06; No. 3 yellow, $2.02@2.04 a bushel. Receipts, 5,200 bushels.

Oats took an upturn in price last week, although the demand is light. Receipts are barely enough to fill orders and in sympathy with rising prices elsewhere quotations have advanced 1c and 2c a bushel. No. 1 white is bringing 79½@89¾c, and No. 2 white 79@79½c a bushel. A total of 140,000 bushels came into the market during the last period, shipments amounting to 90,000 bushels.

NEW ORLEANS, LA.

Thos. C. Robinson, Correspondent.

J. A. Theis, representing the Armour Grain Co., Kansas City, Mo., was a visitor to this city for several days during the past week, looking over the port facilities.

The advance in corn has pulled the price of oats higher and recent sales have been made at 83c per bushel delivered. At the close of the week the market today is 84c. Sacked oats have been offered at 87¼c delivered.

The continued advance in the corn market has driven buyers to take offerings of corn at advanced money. During the past week No. 3 yellow corn has been sold, delivered New Orleans, at $2.01 per bushel.

The W. L. RICHESON CO., Inc.
FREIGHT
BROKERS AND FORWARDERS
613-614-615 Whitney Central Bldg.
NEW ORLEANS

New Orleans weights and grades to govern, and at the end of the week prices are $2.04. The demand for corn is of a light nature, and, at the same time, offerings are not free and heavy.

SPOKANE, WASH.

J. B. Jones, Correspondent.

The spring grain will fall considerably below an average crop unless rain comes within the near future.

Farmers consider that the crop of fall wheat is made; a yield above the average is predicted. The grain is heading out well, has a good color and shows no effects from the lack of rain.

With no sign of rain and the weather continuing dry and warm any hope of getting more than one-third to one-half a normal yield of spring wheat in the Moscow section has been abandoned.

A fire in the feed mill adjoining the store of the Winslow Lumber Co., at Orin, Wash., caused $1,000 damages. Prompt service by the fire protection system of the mill company prevented destruction of the store.

Spokane flour mills are "cleaned up" on government contracts and are not bidding for any future work for the Food Administration at the present time, according to statements made recently by their managers.

The Food Administration Grain Corporation, July 27, sent out a call to all flour mills asking for bids to be made on hard and spring wheat first clear flours. Managers of the various mills stated that they had submitted no bids for furnishing government flour.

Warden Drum of the state penitentiary has announced that the price on grain bags this year will be 12 cents in carload lots f. o. b. Walla Walla, freight prepaid to destination points within the state. On less than carload lots the price will be 2¾ cents, with the same terms.

The Palouse country is finishing the harvesting of one of the biggest crops of alfalfa ever grown there. Many pieces are going more than two ton to the acre. The farmers are moving away what they will need for feed and having the rest baled for market. It is certain now that the coming winter will not see a repetition of the scarcity of feed which existed the last two years.

It is believed that a normal yield of fall wheat will be harvested without more rain in Latah county, but spring wheat and oats are beginning to show the effects of the continued drouth and even if rain should fall soon the yield is not expected to make more than half what it would have been under favorable conditions.

The county commissioners of Walla Walla will be asked to appropriate funds, estimated at about $10,000, to provide six trailers and equipment for fighting grain field fires. They will be equipped with forks, shovels, rakes, sacks and milk cans containing water. They would be placed in different towns in the county, and volunteer organizations formed to fight grain field fires. Waitsburgh has had such equipment for two years and it has been a success.

A harvest of 20 bushels of wheat to the acre around Ritzville is predicted by Dan Scott, banker and farmer from that section, who is in Spokane. "The crop conditions are not as bad as has been reported," said Mr. Scott. Even if we do not have moisture cool days will assure a good harvest. We can tell better about the spring grain in the next 20 days, as it is still in the water." J. E. Carney, wheat grower from the Big Bend, who is also in Spokane, verifies Mr. Scott's statements as to the wheat in that section. He states that a much larger crop will be harvested this year than last.

LOUISVILLE, KY.

A. W. Williams, Correspondent.

I. C. Klepper, manager of the Louisville Milling Co., is father of a fine 8-pound son, who has been named Irving Comstock Klepper, Jr.

The plant of the Irvington Mill & Elevator Co., Irvington, Ky., was burned on July 7, at an estimated loss of $40,000, partly covered.

The New Albany Chamber of Commerce named its grain committee as follows: James W. Armstrong, John H. Shine, John McDonald and Ernest Zabel.

Oscar Farmer, Jr., who recently died, left an estate of $35,000 to his wife, consisting largely of his interest in the grain house of Oscar Farmer & Sons.

Capt. Richard O. Gathright, 79 years of age, retired corn and wheat miller, died last week, leaving an estate of $110,000. Mr. Gathright was a captain under Gen. Morgan in the Confederate army.

Mrs. A. B. Latta, of the house of Wakefield & Co., Louisville, has been elected to membership in the Louisville Stock Exchange, being the first woman to receive that honor. She is head of her company and for several years was with John L. Dunlap & Co.

New wheat is moving on the market fast, with some river and rail movement, barges being expected next week. Truck loads are coming in on all roads. Wheat is light in weight and rather moist, but later arrivals are showing improvement. Wheat is grading at No. 3, weighing around 58 lbs. Some little No. 2 is coming in. Frosts and damp weather didn't improve quality.

There is a fair demand for good milling corn, white corn being at a premium, and corn millers busy. Other grades are high and strong but feeding demand is weak. Oats are in fair demand, with receipts lighter. The market is quoted with No. 3 white corn at $2.12; No. 4, $2.09; No. 3 yellow, $2.04; No. 4 yellow, $2.01; No. 3 mixed, $2.02. Oats—No. 2 white, 79c; No. 3 white, 78½c; No. 2 mixed, 76½c; No. 2 2 rye, $165.

Commissioner of Agriculture Cohen on July 9 issued his June crop report, in which he predicted a 15,000,000-bu. wheat crop for Kentucky, figuring 14.9 bus. per acre average. He reported that corn planting was generally late and early corn needed cultivation. Some sprouting in shock was reported on wheat due to rains during cutting and threshing season. Corn condition was given at 80%, and oats at 88, with oats yield predicted at 24 bus. average. Rye yield is estimated at 14 bus., and barley 24 bus. Hay is estimated to average 1½ tons an acre. Clover condition is given at 93%; orchard grass, 93%; bluegrass, 95%. Cow peas acreage is given at 82% with condition 95; soy beans, 88 and 85; alfalfa acreage 99; prospects for 1½ tons per acre.

FT. WORTH.

G. E. Blewett, Correspondent.

The weather past two weeks has been ideal for the grain and threshing has been general over the entire grain belt of the state, with a very free movement of both red wheat and red oats, and some movement of the hard winter wheat from the western part of the state. The quality of the red winter wheat is rather disappointing, as a great deal of it is running rather light in test and high in moisture as well as being mixed with the opposite class of wheat.

Export bids came out on Monday, July 7, and our estimate of the amount sold so far would be 2,000,000 bus. for July shipment via Galveston. With good weather this will continue, and an even greater movement may prevail during the rest of this month. Farmers seem inclined to turn loose freely and no complaint is heard of grades so far. Mills have been free sellers of surplus accumulations, as they want to save their room for the better grades. This is being worked at 2c under Government price, with discount for mixed wheat of 3c bus.

Receipts at Ft. Worth tax the capacity of the inspection force and show about the same amount of No. 2 and No. 3 as of lower grades, with a very few cars of sample grades.

Panhandle hard winter wheat will commence to move this week and will increase with good weather. Some reports indicate a badly mixed grade, as some localities have fine samples, while another part of the same county will have very inferior grades. Movement will be heavy and free selling is anticipated. Dealers believe it will only be a short time until the transportation facilities will be unable to handle a small portion of the grain offered.

Red oats are being threshed freely and are moving very rapidly to all markets offered. The price remains about the same, disregarding the advance in the options. These oats were selling at the same price now as when the Chicago September option stood 10c per bu. lower, and many dealers who hedged at that time are now trying to figure some way out of their predicament. The quality shows some improvement, but all the crop will be badly stained. Receipts here run about 50% No. 3, 40% No. 4 and 10% sample grades. The test weight is very heavy, running as high as 35 lbs. per bus., with some as low as 27 lbs., but the high moisture or weather damage is the cause of grading No. 4. The movement will be very free if the weather continues favorable and the quality shows some improvement, which will continue with good weather. These are being worked on a basis of 72c bulk Galveston, 76c Memphis.

There is good inquiry from the Southeast for the clipped oats which are selling at 80c New Orleans, even weight bags, for July shipment. As this price is much lower than the Northern white oats, dealers anticipate a continued heavy movement to those points. Quite a few were sold for export via Galveston around 72c bulk for July shipment.

Corn continues its splendid growth, and although the past two weeks' weather has been very hot and dry no damage is reported so far.

South Texas is offering new crop white corn for July shipment and reports a good crop of splendid quality. This has caused Texas dealers to slacken their purchases of Northern corn and the amount of trading in this the past week has been very slow.

Mills report a good business, with prices some lower, in new wheat. Most mills are running full time and have considerable flour booked ahead with some export orders on file.

CINCINNATI.

George Mosbacker, Correspondent.

Redmond Fitzgerald, of Fitzgerald Bros. Co., returned to his grain trade duties after a fortnight's vacation in Illinois.

A. C. Gale, of the A. C. Gale Grain Co., was again on duty after a two week's business trip to Baltimore and New York.

Cincinnati railroad men say that considerable wheat was moved through the local terminals the past week for export to Europe.

Earl Kramer, of the W. H. Kramer estate, well known feed dealers, suffered a fracture of his right arm as a result of cranking a Ford.

Receipts of grain, excepting wheat were only fair the past week, totaling as follows: Wheat (new) 110 cars, corn 47, oats 50, rye 3, and hay 161 cars.

John C. Morrison, for many years prominently connected with the local pork packing industry as a member of the firm of Thomas H. Morrison & Co., died at his home in Clifton on Tuesday of last week.

Edward A. Smith, associated with the grain business of Max Blumenthal as manager of the hay department, was made happy on Tuesday by the arrival of a ten-pound baby girl. Mother and baby are doing well and "Ed" receives the hearty congratulations of his many friends.

Charles S. Custer, manager of the Cincinnati offices of the Cleveland Grain Co., had the proud distinction of receiving the first car of new wheat of the season. The grain graded No. 2 red, 59½ lbs., 10.6 per cent moisture and brought $2.27 per bushel, the best price realized during the week.

A plan is under consideration by the Board of Governors of the Hay Plugging Yards to increase the facilities of the yards by the addition of new trackage, so as to prevent the congested conditions likely to develop next winter with the anticipated heavy movement to this market.

T. J. Schuh, executive secretary of the Grain and Hay Exchange, has provided two auto trucks for the weighing and inspection department so as to bring samples of grain from the terminals to the Exchange more quickly than forwarded at present. The Board of Directors has also authorized him to engage two extra employes to assist in these departments.

The Van Leunen Co. is making unusual strides in the local hay business under the able management of Charles E. Van Leunen, and "Ed" Dennis, former hay inspector of the Chamber of Commerce. They had the first straight car of No. 1 timothy of the season the past week, which they disposed of on the plugging tracks at $38.00 per ton, the highest price for new hay ever attained in this market.

Joseph F. Costello, President of the J. F. Costello Grain and Hay Co. who has not enjoyed the best of health for some time, left this week for a two months' stay at Manitou Springs, Colorado. He is accompanied by his sister-in-law, Mrs. C. B. Thomas, and his niece, Miss Alice Hake of Amelia, O. Danny Kallaher and Charles Granger will attend to the grain and hay trading duties of the firm during his absence.

Owing to the petition for an injunction filed with the United States District Court of New York to restrain the bill of lading order of the Interstate Commerce Commission of April 14, 1919, and the uncertainty of the situation, the traffic department of the Grain and Hay Exchange has notified shippers of grain and hay not to proceed with the printing of the new bills of lading forms until after the injunction proceedings are disposed of.

The July report of the wheat harvest in Ohio is 54,445,000 bushels, according to the Federal and State crop report given out July 10. Lodging and smut took the report down four points from June 1. The spring crop is estimated at 620,000 bushels. The oats crop suffered through the hot, dry weather of June, and slumped three points. Corn acreage is as high as last year, and the prospect is 89, forecasting a crop of 148,000,000 bushels, an increase of 15,000,000 over last year. Clover hay was 85, timothy 90, alfalfa 94, and potatoes 85. The wheat crop is 106 of normal, oats 85 and rye 98.

Wheat.—The first car of new wheat of the season was received on Monday, graded No. 2 red, 59½ lbs., 10.6 moisture, and sold at $2.27. Following the initial car the movement became quite liberal and while the premium was lost, more than 100 cars sold on a basis of $2.24 and $2.25 for No. 2 red, and $2.26 for No. 1. Elevator interests bought freely, but were forced to compete with Southern millers, who owing to the poorer quality of the Southern crop sought No. 1 and No. 2 grades in this market. Prices are about in line with the Government basic, but encouraging of a premium for cars with favorable billing. Farmers are showing more disposition to consign their grain as returns are more prompt and satisfactory than shipments to Eastern terminals. A few complaints of inability to secure cars have been reported. The quality is excellent, grading mostly No. 2 red. The quoted range of prices represent new wheat: No. 1 red winter, track, $2.25@2.26; No. 2 red winter, track, $2.24½; No. 3 red winter, track, $2.18@2.22; low grades, as to quality, $2@2.20.

All arrangements were completed by the Grain and Hay Exchange for the 30 or more members who will leave here Monday in a special car over the Big Four Railroad to attend the National Hay Association convention at Detroit. The delegation will constitute themselves a Booster committee to secure for this city the 1920 convention, and many unique methods will be used to advertise Cincinnati as a convention city and hay and grain market. John E. Collins, Jr., is in charge of the arrangements. The following members of the trade will attend, many to be accompanied by their wives: J. S. Bateman, J. S. Boss, J. E. Collins, Jr., W. A. Daniel, Ed. F. Dennis, John Ferger, Alfred Gowling, Ralph Gray, Joe Heuerman, Charles Granger, R. J. Herzog, H. H. Hill, C. B. Hill, Geo. Keller, L. G. McMillen, Oliver Muchmore, Lew McGlaughlin, Harry Niemeyer, Earl Skidmore, W. A. Van Horn.

Corn.—The bulge in futures caused new high levels of the crop for local cash values, but the market was independently strong owing to the light movement and urgent demand, and white and yellow grades ruled above the $2 basis. Millers anxiously inquired for top grades of white, but freely absorbed the moderate offerings of yellow. Mixed and low grades also sold well at higher values. There is an extreme scarcity of ear corn here, and spot offerings of white would probably have realized as much as $2.10 per bushel. Yellow and mixed of sound quality is also in urgent request. No. 2 white, $2.08@2.10; No. 3 white, $2.06@2.08; No. 4 white, $2.03@2.05; No. 5 white, $2.01@2.03; No. 6 white, $1.99@2.01; No. 2 yellow, $2@2.02; No. 3 yellow, $1.98@2; No. 4 yellow, $1.95@1.97; No. 5 yellow, $1.93@1.95; No. 6 yellow, $1.91@193; No. 2 mixed, $1.97@1.99; No. 3 mixed, $1.95@1.97; No. 4 mixed, $1.93@1.95; No. 5 mixed, $1.91@1.93; No. 6 mixed, $1.89@1.91.

Oats.—The cheapness of oats as compared with $2 corn created a firmness to the local market and registered new record prices of the crop. The demand also was stimulated but trading was restricted by the small receipts. The absence of sufficient quantities of white grades increased the demand for mixed which also recorded new high prices. No. 2 white, 82c; No. 3

NEW WHEAT

We are prepared to handle heavy consignments of the new crop to the complete satisfaction of shippers, and in conformity with the desires of the United States Wheat Director.

We are in the market for good HAY, OATS and BARLEY at all times.

TOLEDO.

Carl Bryant, Correspondent.

O. W. Randolph, inventor of the Randolph Grain Drier, reports the completion and shipping of a 3,000-bushel capacity drier for the Haynes Milling Co., Portland, Ind.

Adrian McDougal has sold out his elevator at Milbury, O., to a farmers' organization. He will continue to manage the Milbury plant as well as the elevator at Genoa, making his headquarters at the latter point.

Stanley Walson, of J. F. Zahm & Co., is back on his old job after twelve months with the American Army in France and Germany. Like most of the boys returning from army service, Stanley gained considerable weight and is the picture of health.

Alsike of the new crop was received here this week. Saturday's receipts were 18 bags, all grading No. 2 account of dirt. The seed came from northwestern Ohio. "Alsike has headed nicely," says Joe Streicher, of J. F. Zahm & Co. "Hulling just now is being delayed by wheat threshing but will be general in this section next week."

The first car of new red winter wheat reached this market July 8. It graded No. 1, moisture 10.2 per cent and weighed 60½ lbs. The car originated at a point in central Ohio. Dealers say that Michigan markets are also receiving new wheat and that threshing there is a week early. Ohio dealers heretofore always received wheat a week before the Michigan dealers.

Many Toledo dealers will attend the sessions of the Michigan Hay & Grain Dealers' Association, and the National Hay Association, at Detroit this week. The list includes John Wiser, of the Raymond P. Lipe Co.; Bill Cummings, of J. F. Zahm & Co.; John Luscombe, of Southworth & Co.; George Forrester, of the Earle B. Slawson Co.; C. O. Schaaf, of H. W. De Vore & Co.

L. J. Schuster, of the Raymond P. Lipe Co., hasn't had his car stolen for three months; nor his home robbed, or suffered loss from fire. All of which is significant in the minds of some of his friends on 'Change who, knowing Lou's ability to anticipate his needs, especially in the case of the party who passed away on July 1st, are wondering if they should wait for an "at home" invitation, or enter by other means while Lou is away on one of his crop inspection trips.

A large delegation of Toledo dealers attended the regular monthly meting of the Northwestern Ohio Farmers' Co-operative Association, at McClure, O., Monday evening. L. G. Macomber, 'Change's traffic commissioner, explained the Railroad Administration's rule No. 57-A and discussed other traffic matters with the dealers. Those attending from here were: Geo. Woodman, Chas. Mollett, Chas. Keilholtz, Bill Cummings, C. O. Schaaf, Ed. Churchill, Joe Streicher, Geo. Forrestor and Earle Slawson.

Reviewing new crop conditions in this territory, Clarence Schaaf, of H. W. De Vore & Co., says: "The coming week will find wheat rolling to market in good shape. Few farmers are inclined to make use of their small storage room; they are in a hurry to finish threshing and to deliver their wheat. The low moisture in wheat this year was a surprise to many dealers as just a few sections showed tests over 13 per cent. It is recognized that heavier moisture exists in many localities further West. Light weight, however, is a troublesome factor, as much of the wheat is shrunken and the berries are small."

Toledo cash markets have been strong the past week and consignments to this market have paid handsome profits to shippers. With daily advances in values the present market is ideal for consigning of corn and oats. Highest prices of the week were reached Saturday when No. 2 white oats sold at 78¾; No. 3 white, 78¼c, and No. 4 white, 77¼c. A car of No. 1 yellow corn brought $1.96½ this week. These prices based on Toledo rate of 23c to New York. New wheat arriving here has been of good quality. Of 19 cars received the past week 8 graded No. 1, 10 No. 2 and 1 No. 3. Receipts for the week were: Wheat, 31 cars; corn, 14; oats, 80; rye, 1; barley, none.

Toledo grain dealers are receiving many complaints from country elevator shippers in the territory tributary to this market because of their inability to ship wheat here. Many millers here and in the interior have already discontinued bidding for wheat, having purchased sufficient for immediate needs. This means that Toledo commission dealers must now bid the country subject to seaboard weights and inspection, which is not as satisfactory a method for the country elevator operators. Many things can happen to a car of wheat traveling half way across the country, such as arriving out of condition, loss of grain in transit, not to mention the delay in final settlement. The country trade has had experience with this arrangement before and prefers the short haul and quick returns. Toledo is out of the market and the crop has only started to move. This undfortunate condition is the result of the action of Wheat Director Julius H. Barnes in discontinuing terminal markets, such as Toledo, Buffalo and Cleveland, as wheat purchasing points. It is not known whether this ruling of Mr. Barnes is permanent, and the Toledo dealers are patient in the belief that Mr. Barnes, who is so thoroughly qualified to handle the problem, will do so to the best advantages of all. They hope, however, that the arrangement in force is only temporary until the seaboard has received sufficient wheat to take care of its early contracts. Nevertheless, elevator operators at the terminal markets are disappointed in Mr. Barnes' ruling, having made vast preparations for the handling of this year's crop only to be told that their plants will not be used. They point to the prohibitory advancing premium allowed by Mr. Barnes of but 2 cents a month, while the actual carrying charge for the privilege of buying wheat in store amounts to 1¾c for the first month and 2⅜ cents for the second month. This makes it impossible for the average dealer to invest in wheat placed in the elevators because he is sure to do so at a loss.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Augustus Gruber, of the firm of E. E. Delp & Co., has his family quartered in their cottage in the Poco Mountains.

Exports for the week ending July 11 were 427,272 bus. wheat; 760,704 bus. oats; 311,056 bus. rye and 80,000 bus. barley.

C. L. Vilotti, of Philadelphia, has started an action against Vinzengo Rossi, also of this city, to recover $258.72 alleged to be due for flour sold.

L. J. Riley, assistant secretary of the Commercial Exchange, spent a week-end vacation with his family at Christiana, Lancaster county, Pa.

The following is a list of all cars unloaded at Girard Point Elevator during the month of June, 1919: Wheat, 410 cars; rye, 800; oats, 494; barley, 394, and corn, 59. Total, 2,112 cars.

Receipts of flour and grain for the week ending July 12 were 825 bbls. and 22,675,313 lbs. of flour in sacks; 46,146 bus. wheat; 10,415 bus. corn; 623,631 bus. oats; 50,988 bus. rye; 4,584 bus. barley and 266 tons of feed.

Samuel F. Scattergood, head of the firm of S. F. Scattergood, grain dealers, is located with his family in their cottage at Chelsea, near Atlantic City. William Scattergood, of the same firm, is spending the summer with his family at Ocean City.

At Port Richmond Elevator there were unloaded for the same time 1,085 cars wheat; 103 cars oats; 2 cars corn. Total, 1,190 cars. At Twentieth Street Elevator, 56 cars of oats; 3 cars mixed grains and 1 car of corn, or a total of 60 cars unloaded during June.

Through an agreement just made with the Department of Wharves, Docks and Ferries, whereby the U. S. Grain Corporation can ship over both decks of the north half of the new municipal pier, there is now stored upon this pier 16,000 tons of flour ready for shipment abroad.

Philadelphia's exports of grain for the past six months, from January 1st to July 1, 1919, show an increase of 14,111,514 bus. wheat over the same time last year, a decrease of 938,414 bus. in corn, 1,869,615 bus. decrease in oats, 7,276,071 bus. increase in rye and 829,353 bus. increase in barley.

The Settlement Committee on Wheat, which included Geo. M. Warner, chairman, Morris F. Miller, Wm. M. Richardson, Levi G. West, and Wm. B. Stites, and appointed by the board of directors July 10, names the following prices for wheat below No. 3 grade: No. 1 red winter, $2.28; No. 4 red garlicky, $2.26; No. 4 red smutty, $2.22; No. 5 red winter, $2.24; No. 5 red garlicky, $2.22 and No. 5 red smutty, $2.18.

The Hancock Grain Co., which was appointed representative at the port of Philadelphia, with the beginning of the war, for the Wheat Export Co., Inc., a concern which was established by the British Royal Commission on Wheat Supplies, to represent the allied governments in this country, has been released, effective July 1st and are now again actively engaged in the grain business as heretofore.

H. D. Irwin, second vice-president of the United States Grain Corporation, has notified the Commercial Exchange that, effective July 7 and until further ordered, all shipments of wheat flour to destinations in the Western Hemisphere may be exported under general license H. S. No. 250. It is expected that the customs authorities being advised of this order will be prepared to allow the exportation of wheat flour in the direction named without exporters having to make additional application and receive license for each shipment.

By obtaining from the city the privilege of shipment over Pier 78, the Grain Corporation will be enabled with its other facilities to ship an additional 60,000 tons of flour and package freight (all food products) per month to the countries abroad which America is assisting. This will make a total shipment through the port by the Grain Corporation of approximately 125,000 tons of this class of freight each

month. These shipments are in addition to the grain which will be exported through the city and which it is confidently believed will amount to from nine to ten million bushels each month.

Clem L. Backenbach, sales manager for the Kaw Milling Co., Kansas City, Mo.; Geo. E. Lake, of the Listman Flour Mills, Easton, Pa.; O. M. Meltin, of the firm of O. M. Meltin & Co., flour millers, Quincy, Ill.; L. A. Cunningham, of the Sneath-Cunningham Grain & Seed Co., Tiffin, Ohio; W. F. Pierce, Milford, Del.; Philip H. Harrington, Baltimore; J. C. Tait, Decatur, Ga.; S. A. Pederson, representing the Arady Farms Milling Co., Chicago; Frank Davis, Woodstown, N. J.; J. S. V. Adams, flour merchant, Lancaster, Pa., and Thos. Dickerson, Sudtersville, Del., were registered on 'Change during the week.

KANSAS CITY.

T. J. Tanner, Correspondent.

E. Bossemeyer, Jr., of Superior, Neb., president of the Kansas Grain Dealers' Association, spent Tuesday in Kansas City, reporting the wheat harvest completed in southern Nebraska.

Bert Hayward is the successor of James Russell as chief grain sampler for the Board of Trade. Mr. Hayward has been connected with the sampling department for several years. Mr. Russell was engaged recently as wheat buyer in Kansas City for the United States Grain Corporation during the coming year.

Grain handlers employed by Kansas City elevators have settled their wage difficulty through a compromise between the Grain Handlers' Union and the Kansas City Elevator Men's Association. An advance from 60c to 65c an hour was demanded, with time and a half for overtime and double time for Sunday work. The men were granted their wishes as to overtime and Sunday labor and given 60c an hour for regular service.

Commission rates for handling wheat on consignments and for shipment, established by the Kansas City Board of Trade, August 28, 1917, for the duration of the war, are likely to be made permanent when a vote shall have been taken July 19. The rates are 1 per cent of the selling price on consignments, with a minimum of 1c a bushel. To members the charge is ¾ of 1 per cent of the selling prices, with a minimum of ¾c a bushel, except that on buying and shipping orders the minimum is ½c a bushel.

Charged with defrauding the Government through inflation of his expense accounts, J. W. Stewart, formerly an investigator for the enforcement department of the United States Food Administration, was arrested in Newton, Kan., July 7. Several months ago Stewart come to Kansas City from Detroit, Mich., with authority to audit the books of southwestern millers. He was stationed at Hutchinson, Kan., from where he operated over the state. Early in the spring he resigned from the government service, after which his own accounts were checked up and some of his work was disapproved by superiors in the department. The specific charge on which he was taken into custody was an overdraft of $500 for expenses in March and April. Stewart's salary was $9,000 a year.

Cash Grain Markets.

Wheat—Receipts for the week, 719 cars, against 106 a week previous and 2,168 a year ago. Both Oklahoma and Kansas contributed new wheat of the red and hard varieties, with fair to good qualities and lighter moisture tests than during the preceding week. Red wheat of the upper grades declined 6@11c, retaining only about a premium over the Federal guarantee basis, and local millers and shippers became good buyers. Offerings of hard included a considerable amount of old wheat. The old wheat receded 14@15c and new, which was already at a discount, sold 6c lower than a week ago, still retaining 6@ premium over the Government basis. Millers and shippers became fair buyers of the choice hard wheat, old and new, but there was a limited demand for yellow hard and the lower grades. All buyers appeared confident that durng the coming week new hard would arrive more freely and sell nearer to the Federal level. Flour sales for July and August shipment were made by some mills in anticipation of this. The demand from the northwestern mills was expected, and purchases by the larger elevator concerns indicated that it had been in. Final wheat prices were: No. 1 hard, $2.27@2.40; No. 2, $2.25@2.36; No. 1 red, $2.19; No. 2, $2.16@2.17. Stocks here increased 53,000 bus., to 310,000 bus., against 48,000 a year ago. Reduced estimates on the Kansas and Nebraska crops, resulting from blight just before harvest and the damage inflicted by rains and insects some time ago altered the views of dealers as to the volume and quality of the new crop, but all continued to believe there is a big volume of wheat to be marketed. The United States Grain Corporation has not been compelled to take any grain thus far, but may begin buying in the near future.

Corn—Receipts, 234 cars, against 150 a week ago and 167 a year ago. In both futures and cash corn there was a bullish spirit, though the advance to new high levels with No. 2 yellow at $1.99 suggested the danger that feeding of the inferior grades of wheat in Texas might result. The week's net gains in cash corn were 11@13c on mixed, 7@9c on white, and 7@12c on yellow, with closing prices as follows: No. 2 mixed, $1.95 @1.97; No. 3, $1.92; No. 2 white, $1.96 @1.97; No. 3, $1.92@1.94; No. 2 yellow, $1.99 No. 3, $1.96@1.97. Crop reports were favorable until the latter half of the week, when abnormally high temperatures and hot winds in Nebraska, Kansas, Oklahoma and Texas caused some alarm. The coming week will be a critical one for corn in all southwestern states. It may prove disastrous to the crop unless rains fall and lower temperatures prevail. Stocks of corn in Kansas City Saturday were 4,000 bus. larger than a week previous, with a total of 334,000 bus., against 1,003,000 last year. Deliveries of corn on July contracts have aggregated 152,000 bus. thus far.

Oats—Receipts, 70 cars, against 100 a week ago and 36 a year ago. The market displayed unusual strength, due not only to sympathy with corn, but to reports indicating that the southwestern crop will be largely medium or poor quality. There was good local buying and a fair shifting request, though Texas has oats from its new crop and new oats are coming into use in Oklahoma and Arkansas. Prices scored advances of 6½@8c, closing as follows: No. 2 white, 79c; No. 3, 78c; No. 2 mixed, 76@77c; No. 3, 75@76c; No. 2 red, 78@79c; No. 3, 77@78c. Stocks in the elevators increased 2,000 bus., to 708,000 bus., against 456,000 bus. a year ago.

Kafir and Milo—Receipts, 47 cars, against 49 a week ago and 8 a year ago. Offerings were mainly milo from southern California, and the market was strong. Kafir advanced 15@20c per cwt., to $3.40@3.45 for No. 2 white and $3.32@3.35 for No. 3. The rise in milo was 15@23c, with No. 2 at $3.40 @3.45 and No. 3 at $3.32@3.35. Stocks here increased 11,000 bus., to 57,000 bus., against 349,000 a year ago. The Government crop report makes the acreage of sorghum grains in Kansas 1,433,000 acres, against 2,047,000 last year, and gives a general condition on July 1 of 85 per cent. It says milo has a thinner stand than either kafir or feterita. The acreage in Oklahoma is not as heavy as in 1918, except for forage.

OMAHA.

Leigh Leslie, Correspondent.

John A. Buchanan, president of the Omaha Grain Co., is with his family at Madison Lake, Minn.

The first car of new wheat to arrive in this market was sold on the floor of the Omaha Grain Exchange Thursday. It was consigned to the Butler-Welsh Grain Co. by the Farmers' Elevator Co., of Holmesville, Nebr., grade No. 2 hard winter, weighed 59.7 lbs., tested 12.80 per cent moisture, and sold for $2.28. This speaks for the enterprise of this comparatively new firm whose announcement it seems appeared only yesterday in The Price Current-Grain Reporter. We stated then, however, that the experience of its members and long acquaintance with country shippers would on the crop movement bring them their share of business, and we are glad to note that our forecast is coming true.

The Nebraska Wheat Crop.

Reports and opinions differ sharply as to the size and quality of Nebraska's winter wheat crop. That it is one of the largest crops ever produced in this state appears to be beyond question, but it is now generally conceded that it is not as large as its condition early in June indicated it would be. Farmers as a general thing are likely to be somewhat disappointed not only over the yield per acre but also over the quality of the grain. Millers, however, express the opinion that the crop as a whole will be of extraordinarily good milling quality.

Prof. Burr, head of the agronomy department of the University of Nebraska, after inspecting several fields near Lincoln, said that those fields where the wheat was down or badly rusted did not produce more than 15 to 20 bushels to the acre. Many people, he thinks, have overestimated the crop because of the rank growth of straw. There is no doubt, in his opinion, that the crop was considerably damaged by rust and lodging, but he looks for threshing returns to show larger than an average crop. The average production per acre in this state is between 17 and 18 bushels.

J. L. Welsh, an Omaha grain man, who has returned to his home here after a three hundred-mile trip by automobile through the South Platte country, says that it is his opinion and that of many grain dealers and farmers whom he met that the extremely hot weather which came just when the wheat crop was beginning to mature very materially cut down the yield. He thinks that the average yield was reduced at least 5 bushels to the acre, while not a few observers think it was reduced much more than that. This grain man exhibited on the floor of the Omaha Grain Exchange a sample of wheat from Lancaster county which tested 57 pounds and graded No. 3 hard winter. Its milling quality was good.

Russell W. Holloham, of Holbrook, writes the Bewsher Company: "I judge that the yield of wheat in this district will run about 15 bushels to the acre. Two weeks ago it looked good for 25 bushels or more. The reduction is due to the excessive heat we have been having. We had the finest prospect I ever have seen anywhere, but it went to the bad in a few days. Most of the wheat will be light—from 54 to 58 pounds. Some fields are pretty smutty."

William Craig, manager of the Farmers Elevator Co., of Blue Springs, in a letter to this company says: "There is a record straw crop, but I question whether there will be even a 15-bushel wheat crop in this section. A sheaf of wheat is generally heavier at the butt end than at the top. I do not doubt that we shall hear occasionally of some big yields, but, taking it on an average, we believe the crop will be very disappointing. What wheat we have shelled out shows a decidedly yellow berry. The 1918 crop was a rather dark berry and uniform in size. This year's crop is far from uniform. The oats crop is doing well, while corn, though to some extent weedy and a somewhat thin stand, has been making rapid progress in the last ten days."

Burlington Crop Report.

The Burlington crop report for the two weeks ending July 7th shows some damage to winter wheat, but still indicates a good crop.

In summarizing conditions in his territory, H. L. Lewis, division freight agent, with offices at Beatrice, Nebr., says:

"During the past two weeks the territory in the central and eastern part of Nebraska and Kansas has been favored with considerable moisture, resulting in

some wheat on the low ground being lodged and damaged to some extent. West of the central part of the state conditions during the past two weeks for winter wheat and all crops in fact, have been ideal. In central and eastern Nebraska some wheat fields ripened too rapidly on account of extreme hot weather, resulting in the berry shriveling to some extent and the heads not standing their normal length. At the same time it is conceded that this territory will produce better than an average crop.

"Growth of corn has been retarded on account of cold weather and excessive rainfall during early season. For the past two weeks, however, corn has made rapid growth and is in excellent condition. Generally speaking, crop conditions throughout the territory could not be in better shape than they are at the present time.

J. J. Cox, division freight agent, with offices at Lincoln, makes this summary:

"We have received in the last ten days more or less moisture throughout the territory.

"The corn is maturing rapidly, and has made excellent progress since last report. In some localities replanted corn is a little backward on account of being weedy and too much moisture.

"The second crop of alfalfa is making a rapid growth.

"Information has reached us within the last day or two that winter wheat is considerably damaged in some of the territo from the intense heat on June 25th a 28th, when it was in the critical stage, w the result it has ripened too rapidly, her is not well filled and the berry is sm and more or less shriveled, which will c down the yield from one-third to one-ha below expectations. I shall be in positi

with Eugene M. Hoyne & Co. Mr. Muser is one of the old timers of the provision trade, having been in the game the past 30 years or so

E. W. Larsen, returning from a Northwestern trip, reports the best crop of corn he has ever seen, offset, however, by a disappointingly small grain crop. They are cutting rye along the river with a low average of 15 to 20 bus. whereas twice as much was expected.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

The Federal Grain Co., St. Paul, has purchased the J. J. Hynes elevator at Lakeville, Minn.

The St. John Grain Co. elevator at Lakefield, Minn., has been sold to E. P. Allison, of Lakefield.

A farmers' elevator company is being organized by farmers in the vicinity of Lanesboro, Minn.

R. J. Henderson, of the Henderson Floating Elevator Co., Winnipeg, Canada, is in Minneapolis for several days.

The farmers' elevator at Glenburn, N. D., and another elevator at Norma, N. D., were struck by lightning and burned last week.

Wallace M. Neil, representing the Terminal Elevators, Kansas City, is selling new crop Southwestern wheat to local millers.

Farmers in the vicinity of Venlo, N. D., will organize an elevator company and plan on having a house built in time to take care of this year's crop.

Minor Gold, of the Benson-Stabeck Co., returned from France sometime ago, but only recently resumed his duties of grain salesman on the trading floor.

A. C. Loring, president of the Pillsbury Flour Mills Co., and James F. Bell, vice-president of the Washburn-Crosby Co., left last week to attend a meeting of the Millers' Export Association at Chicago.

C. E. Lewis, of C. E. Lewis & Co., built a $10,000 church edifice at Lewis, Wis., and turned it over to the Methodist Episcopal Church. It has a seating capacity of 250, has three art-glass memorial windows and a pastor's study furnished with mahogany chairs, desk and bookcase. In the matter of architectural design and beauty the property is considered unique among country churches. Todd W. Lewis turned the keys over to the congregation at their formal dedication services.

The Farmers' Elevator Commission Company has been incorporated for $250,000 in Murray County, Minnesota. This company will operate commission offices at big terminal markets for farmers' elevator companies and only stockholders in such elevators companies will be allowed to own stock in the commission company. Practically all of the stock of the new concern has been spoken for. Capital stock will be increased as occasion demands. W. S. McLaughlin & Co. have turned their local grain selling organization over to the company, and officers of the McLaughlin company will be officers in the new company. Hart Putman, of W. S. McLaughlin & Co., was the prime mover in the new enterprise. Outside of W. S. McLaughlin, who turns his business over to the new company and is allowed to purchase $50,000 worth of stock, no stockholder will be allowed to own more than $10,000 worth of stock. Each stockholder has but one vote, regardless of the amount of stock he may hold.

Cash Markets.

Wheat.—The tone of the cash wheat market is undeniably strong and there is a good demand for any wheat of good milling quality. Reports from the new crop help to stimulate the call for old crop offerings and the millers continue to lay this stuff away for future use as a mixing medium. Much of the new crop will be thin on account of rust and heavy old crop wheat will be needed for a blend.

The demand for durum wheat is also very strong and prices are gaining on the government valuation. Millers have been buying durum wheat freely during the past week.

New winter wheat is arriving more freely and fresh purchases are being made from day to day. Soft Oklahoma and Missouri wheat is offered cheap, but the millers do not want it. Dark and semi-dark wheat is in good demand and if the sellers will guarantee that kind they can find plenty of buyers if the price is right.

No. 1 dark Northern sells at $2.67@2.72. No. 1 northern at $2.60@2.68. No. 1 durum sells at $2.21½, No. 1 amber durum at $2.24½@2.25.

Corn.—At the higher prices prevailing at present the demand for corn is not as active, but most of the daily receipts are absorbed without much delay. At proper discounts there is a good demand for damp corn for drying. Receipts of choice corn are light. Market quoted at $1.40@1.88.

Oats.—Elevator companies are good buyers of heavy oats that are fairly free from black oats, but the demand for other offerings is rather sluggish. Choice No. 4 white oats are in fairly good demand.

Trade Mention

The Integrity Mutual Casualty Co. of Chicago has begun the publication of a monthly organ exploiting its own activities, entitled "Integrity."

R. C. Hudson, formerly space buyer and copyman for the Cramer-Krasselt Advertising Agency of Milwaukee, has taken charge of the advertising for the Denver Alfalfa Milling & Products Co., Lamar, Colo.

The Heywood Mfg. Co., 420 N. Third St., Minneapolis, Minn., specialize in paper boxes, envelopes and special containers for samples of grain, seeds, beans, meal and feedstuffs bought and sold on samples by our trade. They have large stocks of suitable supplies in hand but are equally interested in the manufacture of your special requirements and invite correspondence and samples of your needs for prompt attention.

It is interesting in considering the volume business of PRICE CURRENT-GRAIN REPORTER subscribers and their enormous purchases of operating equipment to quote Wm. Tattersall & Sons, Ltd., Blackburn, Lancaster, England. They have just advised us, in connection with information on the situation here, that they operate 10 motor trucks, all of English make. This suggests a field for manufacturers of equipment that is being taken advantage of by many.

A new edition of "Modern Grain Cleaning Machinery" is off the press and ready for distribution by the S. Howes Co., Inc., Silver Creek, N. Y., manufacturers of the "Eureka" Grain Cleaning Machinery, special machines for flour, corn and cereal mills, rice, coffee, seed and cement mills. This book is not a mere catalog of the output of this concern but is in fact a dependable reference book which no elevator manager or superintendent can afford to overlook. It is a book crammed full of the intricacies of the grain cleaning game, which may be had gratis upon application to the manufacturers.

The Edw. A. Pratt Audit Co., Peoria, Chicago, and other centrally located grain markets is doing a great work for the trade. It is, of course, not necessary to suggest the first importance in auditing, accounting and such work of carefulness, but strange to say, it is the feature of the every-day business of many concerns that is probably more careless than any other. In considering the country elevator situation, we find bookkeeping details passed over as unimportant, with the result that the conditions in many localities are pitiful. Some small elevators, requiring as in recent months, full and complete audits to make income returns have had to pay as much as $350 for the work. As opposed to such instances the Pratt Co. report the full auditing of a line of elevators recently in less than one week. The Peerless System had been properly installed in these houses and everything was ship-shape and easily audited.

The Hess Warming & Ventilating Co. has been swamped with business but is just catching up, desiring as always to keep their friends and trade supplied with driers, moisture testers and other grading equipment. Indicative of the better trade demand and extensive faster purchases over the entire grain belt, it is interesting to note that one of the Hess customers recently ordered their sixteenth outfit. It is generally gratifying to observe the care employed among country elevator operators not to be found wanting when they are called upon to substantiate their claims on under grading. There are still, however, those who may feel they can get away with something, and it is to these we add this further prod, urging the purchase and operation of moisture testers, sieves, weight per bushel measures, etc., now when they can be had and are needed for wheat and oats and before they will be needed for new corn.

New Red Book.

on credit ratings, advise that they have under way the most complete *Red Book* ever compiled. Those who understand the difficulties in securing perfect addresses, names and the equal important proper ratings of our trade from a credit standpoint, have appreciated or will learn to do so, if they investigate the merits of the *Red Book*. One of its interesting features is that the trade members themselves help in its compilation and the many years in which Geo. W. Bristol and Gaylord L. Bristol have exclusively devoted their busiest days to our trade has given them a great wealth of information that annually appears in the *Red Book*. Those who do not use it need not wait, of course, for the book now under preparation, but may secure the present *Red Book*, issued last spring, through inquiries at P. O. Box 996, St. Louis, Mo.

TOLEDO GRAIN DRIER.

The results of a lifetime of practical experience solving problems in heating and ventilation are brought to light by the grain drier put on the market by the Toledo Grain Drier Co. Patented by an engineer of ability on Oct. 29, 1918, the drier embraces seven years of actual work on grain driers and grain drying methods.

No screens or perforated sheets are used in the construction. This improvement alone does away with the necessity of renewal of screens from time to time. The drier is composed of units constructed of heavy galvanized iron which permits enlargement of the drier at any time. Simple construction, continuous flow and an even distribution of air through the drier does away with any streaks of undried grain.

The heating plant, which is included in the drier equipment, is featured by a furnace that will burn any kind of fuel with good results. The heater is cast of iron and steel, set in brick, with grates of the rocking and shaking type. An indirect system of air contact is used, thereby doing away with any element of combustion coming into contact with the grain.

The drier is built in sizes that will fill the needs of the country elevator man as well as the largest miller. On continuous flow, one time through, the company guarantees to extract 10 per cent moisture at a very noticeable figure of cost under any other make.

The company is putting out a booklet on the drier which should interest any elevator man and the office will be glad to offer any information on driers or wet grain troubles.

PUBLIC ELEVATOR AT RICHMOND.

The State Corporation Commission of Virginia has issued a charter to the Richmond Public Elevator and Storage Corporation to operate a grain elevator with 500,000 bushels capacity and a hay storage house. Capital, $500,000. The officers named in the charter are W. G. Bragg, president; Julian A. Hill, vice-president, and Benjamin L. Purcell, secretary and treasurer, all of Richmond, Va.

The purpose of the incorporators is to proceed at once to secure plans and erect an elevator and storage warehouse. The movement has the earnest co-operation of the grain trade of Richmond, and will be pushed to an early completion.

It is proposed to erect an elevator equipped with the most modern facilities for handling, storing, cleaning and drying grain, etc., and the company will be on the market for the necessary equipment.

NEBRASKA.

Marquette, Nebr.—The Hord Grain Co. has installed a new electric 15-horsepower motor in its elevator.

Lincoln, Nebr.—The Crete Mills has commenced work upon their new mill. It will have a capacity of 250,000 bushels.

Naponee, Nebr.—The Naponee Milling Co. will in the future operate on a co-operative basis. The capacity of the plant will be enlarged.

Colon, Nebr.—The Nye-Schneider-Fowler elevator was completed recently. Colon now has two elevators, the Farmers Union having erected a fine new elevator last year.

Lincoln, Nebr.—The Farmers Union Co-operative Association has been incorporated with a capital stock of $200,000. Ira E. Gates is president; Chas. B. Galley, vice-president; and Emil L. Mueller, secretary-treasurer.

Omaha, Nebr.—Chester P. Peterson, a well known grain man and for a number of years associated with the Omaha Elevator Co., died recently following an acute attack of appendicitis. He is survived by his wife and five children.

NORTH CAROLINA.

Danbury (Bill to Walnut Cove), N. C.—The Danbury Milling Co., organized with N. P. Pepper, president, will build mill.

NORTH DAKOTA.

Heil, N. D.—The Farmers Equity Elevator burned to the ground. Cause of fire unknown.

Ft. Yates (Bill to McLaughlin), N. D.—The Farmers Equity Exchange contemplate the erection of a new elevator.

Richardton, N. D.—Fire completely destroyed the Patham elevator and other business establishments. Loss is estimated between $300,000 and $400,000. Cause of fire unknown.

Selfridge (Bill to Selfridge Station), N. D.—The Selfridge Farmers Equity Exchange, having purchased the Winter-Truesdell-Ames Co. elevator at this place, has decided to close up the elevator until threshing season begins. E. D. Szarkowski is secretary.

Colfax, N. D.—John F. Whelan, manager of the Farmers Elevator Co., is making repairs and putting his house in excellent shape through the work of L. Buege, elevator contractor of Minneapolis. The new Owens cleaner is among the equipment just installed.

OHIO.

Kingston, O.—The Snyder Milling Co. will have a new mill. Herbert and Marcus Snyder are the owners.

Sugar Ridge (Bill to Hillsboro), O.—E. J. Reitzel is the new manager of elevator at Sugar Ridge, operated by the Sugar Ridge Grain Co.

Wapakoneta, O.—The Farmers Grain Co. has been incorporated with a capital of $60,000 by F. C. Dearbaugh, Geo. Shipline and others.

Richwood, O.—The Lenox elevators at Richwood, Woodland and Clairboren have been taken over by the Farmers Elevator Co. here. Henry Hozworth is president.

Cleveland, O.—The Theobald Flour Mills Co. has been incorporated with a capital of $150,000 by Jacob Theobald, Sr., Jacob Theobald, Jr., Walter Theobald and Walter C. Gould.

Upper Sandusky, O.—The U. S. Commission Co., a corporation, has purchased the Rowen & Son elevator and will operate same with the new elevator which they are at present building.

Wellington (Lorain County), O.—J. W. Greenfield, formerly with the Dewey Bros. Co. of Blanchester, Ohio, has purchased a warehouse at Wellington and will do a wholesale and retail business in hay, feed, grain, etc.

Fayette, O.—The Fayette Elevator Co. has been incorporated with a capital of $25,000. The company has purchased the Fayette flour mill. F. E. Connell was elected president; Geo. K. Russell, vice-

Field Seeds

One thousand bus. of Gladden wheat produced in Lucas Co., O., will be retained this year for seed under the direction of the Farm Bureau Agent.

The Wisconsin State Report says that the growing condition of clover seed has been ideal for the first cut of clover and the second for seed is getting a good start.

A correspondent of C. A. King & Co., Toledo, says they believe the clover seed prospects in the West, especially in Idaho, are somewhat more favorable than a year ago.

Application has been made for a charter for the Americus Seed & Supply Co. at Americus, Ga. Application was made by Willis Hawkins and wife. Perry Hawkins, a brother, and Willis A. are interested.

The Renville County Pure Seed Co. has been organized at Ollivia, Minn., by A. A. Chapman and J. C. Schriebel. A concrete building will be erected for a corn drier and storage house, to be 60x 46 ft. in size and 20 ft. high.

The Indiana July report on clover seed says that in the eastern part of the state the plant has been hurt by army worms. Samples of new alsike were received in Toledo last week showing good quality with some reports of large yields.

Detroit Seed Prices.

Quote grass seed prices July 12 as follows: Clover seed, cash $28, October $26. Timothy seed, $5.40.

Buffalo Seed Prices.

Grass seeds at Buffalo July 11 were quotable as follows: Timothy, choice, $5.70@6.40; clover, red, choice, $27@ 28.50; alfalfa, $15@16 per bu.; red top, $14.50@16; white clover, $45@50 per cwt.

Kentucky Onion Sets.

LOUISVILLE, KY., July 12.—Many reports of conflicting nature are coming in on onion sets, but from best available sources crop appears to be of nearly normal size and of excellent quality. Reports are being heard relative to both coarse sets and woody or stemmy sets of small size. Pulling and drying is starting, and very little reliable information is available. However, indications are for a normal crop of excellent sets.

Canadian Flaxseed Order Rescinded.

Vice-Consul Robertson, Ottawa, reports that the order of Oct. 23, 1918, commandeering all fiber flaxseed in Canada, exclusive of the quantity required by the Dominion for sowing purposes in 1919, has been rescinded by an order passed on May 26, 1919.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending July 12, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs.	.1,365	.....	57,860	3,500
Clover, lbs.	...5,616	.....	.....	79,500

Minneapolis Flax Seed Market.

There was a fair to good demand for flax all through the week, but the sharp advance in the futures was not followed closely by cash prices. Several of the crushers dropped out of the market owing to the big bulge in prices and are waiting for the market to come back again. Reports of rains in North Dakota caused a sharp reaction in the futures today. Linseed oil demand fair to good. New crop news mixed, but a fair outturn per acre is expected. No. 1 seed on spot in car loads quoted at 3@5c under Duluth July, bulk-head lots at 5@10c under. To arrive in car loads quoted at 5c under July.

Caution to Flaxseed Buyers.

The board of directors of the Duluth Board of Trade has issued the following warning with reference to the flax market: The Duluth board of directors of the Duluth Board of Trade urges upon all members the necessity for the exercise of the utmost caution in trading in flaxseed at the present time. The market is unusual in the extent of declines and advances, and presents great risk in trading. The directors desire to warn all members that any attempt at manipulation or the creation of artificial values is an offense of which it will be their duty to take instant notice, and any indication of their presence in trading will result in prompt action by the board.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chicago for the months and weeks named in 1919 and 1918, in pounds (000 omitted):

Report on Flax Condition.

The Van Dusen-Harrington Co., Minneapolis, report for the week ending July 9 says the flax crop appears to be unchanged. Reports come from eastern Montana of good showers which appear to have germinated some of the later sown flax and in northwestern North Dakota also the crop has been benefited by timely showers. In the balance of the territory the crop while weedy as a rule is not showing any wilt, although it has been subjected to hot weather.

Burlap Market.

There has been an advance in freights on burlaps from Calcutta and it is reported also that all available space until August has been taken up. The market both at Calcutta and Dundee is reported strong and firm and at Dundee prices on wide goods have advanced 10 to 15 per cent. Shipments from Calcutta are somewhat delayed owing to the difficulty of arranging exchange and in getting vessels. During the remain der of the month some arrivals in thi country from that country are antic pated. Prices continue very firm.

Timothy Seed Active.

Timothy was very active all last wee at Toledo, Ohio. Selling pressure o the cash, as well as the December, whea forced the former down to $5.25 and th December down to $5.60, but some goo

nvestment buying of the futures and hipping demand for the cash caused a ice reaction, say J. F. Zahm & Co. hipments amounted to 4,000 bags, and he stock of timothy is not nearly so ig as some time ago. Crop advices ontinue mixed; some sections in the est sending very unfavorable reports, hile others in that same location are ending the other kind.

SEED SITUATION.

SEED IMPORTS.

NEW YORK CITY.—There is a very ood demand for red clover, which is rriving in large quantities from broad; indeed, in much larger quanties than one might have expected in e old country. Prospects for new rop red clover in Europe are very romising.

Alfalfa is also arriving in good-sized arcels from abroad and is finding a eady sale in this country.

The demand for timothy for export increasing considerably and large arcels are being sold to foreign counies.—*Loewith, Larsen & Co., per P. arsen, New York City.*

VEGETABLE SEED CROP GOOD.

SEATTLE.—The stocks of seeds in the acific Northwest, both vegetable and hers, now on hand are negligible.

The vegetable seed crop is going to a large one and is now past all dan-er, either from weather or other inries. Washington will harvest two illion pounds of cabbage, turnip, beet nd spinach seed, by far the largest op ever grown. The quality and type stock will prove to be equal or better an what we were accustomed to get om the European houses.

The demand, speaking only of Lilly's oduction, has been good, and their enre crop of 1919 is disposed of to the merican seed trade.

The 1920 crop acreage is somewhat duced and from orders coming in we el confident that the crop will find a ady demand and that the seed houses ave confidence in American-grown eds.—*Lilly's, by Alf Christianson, ield Supt., Seattle, Wash.*

French Grass Seeds.

Price Current-Grain Reporter: We e giving you below a statement of the tual situation for fodder seeds, as ell as what concerns the stocks of the st crop, with prospects of the next op:

CRIMSON.—During the past two onths numerous sales have been conuded with United States and Great ritain. These have been made easy the rising value of the dollar and o by the fine qualities, with high gerination, of the seeds which were offred. Actually, the stocks of the last ar are quite negligible in merchants' nds. Some lots remain with the rmers, but the latter are waiting to tain prices much too high.

A great deal of crimson has been kept r seed and we think the product, as to quality, will be larger than that of the last year. The quality is favored by the weather, which is very dry, and if rain does not come the next week (first of July) the quality will be as regular as that of 1918. It is not yet question of quotations, but we think it will be impossible to purchase the first lots that the farmers will offer, because the latter will be willing to sell only at a price much too dear. The crop will be early and we believe shipments can begin in July and continue freely after the beginning of August, coming back consequently to the usage of the time before the war.

RED CLOVER.—The stocks have been much reduced since May. There has been good demand from different quarters and prices have been sensibly raised.

We have had a period of dryness since the beginning of May, which leads to the fear the second cutting will not start again readily. The farmers want rain quickly—within a fortnight. Up to this time the crop is not compromised; however, in the southern part of France there is fear the quantity will not be larger than that of the last year.

ALFALFA.—The stocks are nil. We have been obliged to purchase in Italy, where a great deal of seeds remained. There will be a large demand from the northern part of France and also from Germany. As soon as the crop is ready these countries will be open for purchases.

The weather has been more favorable than for red clover and we hope the quantity will be better than the last year.

ITALIAN RYEGRASS.—The stocks remaining are poor. The next crop will be nearly the same as in 1918.

RAPE.—This plant has suffered with the drought. It is feared the quantity will be more reduced than that of the last year.—*H. Fauchet et Cie., Paris, France.*

Grass Seed Outlook.

The outlook for the orchard grass seed crop about July 1 seemed to indicate that a production in the United States nearly equal to that of last year would be obtained this year.

CRIMSON CLOVER SEED.

The quantity of American-grown crimson clover seed of 1919 harvest that will enter commercial channels is estimated by shippers in producing sections to be about 2,250,000 pounds. This is about equal to the commercial production of 1918. A much larger acreage than normal has been harvested this season but the yield per acre was much lower, averaging about 4 bushels per acre compared with 7 bushels per acre last year. The quality of the seed is fair, being small and somewhat discolored and containing more immature seed than normally. This immature seed blows out in recleaning and the recleaned seed shows up fairly well, but the dockage is heavy. It is estimated that one-fourth to one-half of the crop has been hulled, the rest having been hauled to the barns to be hulled later—about July 15. Practically all of the seed that has been hulled is still in growers' hands. Some dealers report that they are willing to pay $16.00 to $17.50 per 100 pounds, country run, for enough seed to meet their trade requirements, but have not been able to buy at that price. Growers are asking $20.00 to $21.00 per 100 pounds f. o. b. shipping points for grade 1 seed. No sales are being made at this price. Reports would indicate, however, that farmers in some consuming sections are willing to pay this price and there is some indication that an effort is being made on the part of some growers to market their supply co-operatively. In view of the stand taken by the growers, most dealers appear to be willing to stay out of the market at present and risk buying at the last moment.

Some imported seed is being quoted to dealers at interior points at $14.00 to $15.00 per 100 pounds f. o. b. New York. The import situation appears to be the most uncertain factor in the crimson clover seed market and dealers and farmers probably will not agree on a price for the new-crop domestic seed until it is more definitely known how much imported seed will reach this country in time for early fall sowing.—*Seed Reporter.*

St. Louis Seed Market.

ST. LOUIS, July 12.—The seed market continues dull and unchanged, with practically no offerings and no demand. Some cowpeas were offered, but they were hard and undesirable and a small lot sold at a heavy discount under the value of good seed.

Nominal prices are as follows: Stock peas, whippoorwill or new era, $8@8.25 per 100 lbs.; mixed, $7.80@8; golden millet, $4.75@5.25; Siberian, $3.50@3.75; hog millet, $3@3.15; white rice popcorn, $6.50 per 100 lbs. for shelled; soy beans, $5.25; timothy, $11@11.50 for choice seed per 100 lbs.; clover, $25@30 for good seed; alfalfa, $15@24 for good seed; poor quality or trashy seed less, according to quality.

Chicago Seed Market.

The timothy market was quiet last week and without any special features of interest. The futures during the week were somewhat neglected. Country lots were quotable $9@12 according to quality. Clover market was slightly lower for the contract prime at the turn of the week; country lots were quotable $25@40 according to grade. The millets were quotable $2.75@3. Following is the daily range of prices for timothy and clover:

Timothy.	July.	September.	October.
July 7	.....	.....	.....
July 8	.....	$13.80A	$12.75A
July 9	.....	.....	.....
July 10	.....	14.00A	13.00A
July 11	.....	14.00A	12.75A
July 12	.....	.....	.....

Clover, contract prime.			
July 7	$47.00	July 10	$46.50
July 8	47.00	July 11	46.50
July 9	47.00	July 12	46.50

Meadow Fescue Seed Outlook.

The acreage of meadow fescue that will be cut for seed is expected to show a decrease of 20 to 50 per cent below that harvested last year. With a yield per acre estimated to be the same as, or only sightly better than, that of last year, it seems that the production of meadow fescue seed this season will be even less than the small production of last year. Harvesting of the crop has commenced but it is difficult to determine what the quality will be as a continuation of the recent rains may affect the color of the seed appreciably. Several offers of 15 cents per pound to growers for clean seed have been reported but it is thought by a few of the correspondents that the growers will not be willing to dispose of their crop at less than 20 cents a pound.—*Seed Reporter.*

Kansas City Seed Market.

KANSAS CITY, July 14.—The blue-grass situation has developed to a point where dealers are willing to quote seed in the rough. Prices bid this week were $7@10 per cwt., which is considered high in view of the big crop in Missouri. The harvest is still in progress, but offerings are light. Just how much is covered by contracts made in the country is known only to the seed houses. It is admitted that this is the year in which to replenish exhausted stocks. The seed should be of fine quality, as the growth was excellent and there has been little rain during the harvest.

Hot and dry weather has favored the harvesting of the second crop of alfalfa hay. Rain is needed to start the third growth, from which seed will mainly be taken. Some of the second crop fields may be left for seed. There is a strong undertone in the market, especially as to old seed, which is wanted for August sowing. Prices range from $11 to $18 per cwt., with good seed easily bringing the top price first hands. The Kansas state report makes the crop condition 89 per cent on July 1, despite the setback in many counties, due to army worms, and grasshoppers. In Nebraska insect damage is reported, yet a large second crop is expected. The crop condition in Iowa is 96 per cent and in Missouri it is 92.

An optimistic feeling continues as to the timothy crop, despite some adversities, chiefly in the way of insects and weeds. Dealers say they are not assured as to the percentage of the acreage to be reserved for seed. The labor problem is mentioned as a factor. Some old seed is on hand, which militates against fancy prices for new seed. State crop conditions are reported by the Department of Agriculture as follows: Missouri, 94 per cent; Kansas, 100; Iowa, 101; Nebraska, good.

While the old fields, from which clover seed most be taken, are few and unpromising, due to experience of recent years, the acreage planted last fall is fine for either hay or fertilizing purposes. The government report for July gives the following crop conditions: Iowa, 105 per cent; Missouri, 90; Kansas, 94; Nebraska, exceptionally good. It is too early, seedsmen say, to forecast the seed crop. No old seed remains and there are no prices to quote.

Only a scattered demand for forage seeds remains, and this is to sow in fields where wheat or oats have been cut. The only kind of coarse seed left is amber, the commonest and cheapest variety. Calls for millet are very few, but the seed is salable to poultry feed manufacturers at good prices. The

Kansas report says the sorghum acreage was reduced by the big sowing of wheat, and that the crop is late. It suffered from spring rains shortly after planting. This comment applies to Kafir, milo and feterita, and the general condition is placed at 85 per cent. The millet condition in Kansas is 89. In Oklahoma the acreage of forage is large, while that of grain sorghums shows a reduction.

Prices of seeds, as from first hands, are quoted in Kansas City as follows: Alfalfa—Per cwt., $11@18. Timothy—Per cwt., $9@10.50. Blue grass—Per cwt., rough, $7@10. Clover—Not quoted. Cane seed—Per cwt., $1.75@2.50. Millet seed—Per cwt., golden, $3.50@4.50, common, $2.50@3.

Toledo Seed Market.

The following table shows the range of prices for seed on the Toledo market for cash and the futures of clover, alsike and timothy seed for the week ending July 12:

Duluth Flaxseed.

DULUTH, July 12.—The bullish situation was even more accentuated in the flaxseed market during the last week. Under the excited bidding that developed at times, there appeared to be no top to the market. The story of limited offerings and the ticklish position of shorts was told in bulges extending all the way up to 35c being recorded during a session before any reactions came about. As a result of the week's operations, net advances up to 85c were set in the October future.

Longs had the better of the argument all along. It was realized in the first place that serious congestion existed in the July future, and attempted covering operations invariably led to sharp price advances. Supplies of free seed in the elevators were reported to be merely nominal, and it was figured out that stocks in farmers' hands over the Northwest have now been cut down to a minimum as a result of the efforts on their part during the last few weeks to take advantage of the prevailing high prices.

As it is now American crushers are reported to be unable to figure out where they are likely to stand for supplies for some months ahead. In indicating a yield of 13,000,000 bushels, the Government crop report was regarded as extremely bullish, especially in view of the knowledge of the crop over the Northwest has gone back since the report was made up as a result of dry weather conditions in Montana and parts of western North Dakota, and an overplus of moisture on the low-lying lands in Minnesota. Some experts now figure that a domestic flaxseed yield to exceed 11,000,000 bushels cannot now reasonably be hoped for. The coup of the British government some time ago in contracting for 20,000,000 bushels of seed in Argentina is asserted to have badly upset the calculations of the linseed oil interests in this country. Previous to that development, they had been counting upon Argentine imports to make up any deficiency here, but as it is now, the available exportable surplus down there is estimated to be small.

Receipts of flaxseed on the Duluth market during the week came to 82,239 bushels, and with shipments of 61,799 bushels, supplies in the elevators were brought down to 138,000 bushels.

Closing prices of flaxseed on the Duluth market on Saturday, as compared with the previous Saturday and year were:

	Saturday.	Wk. ago.	Yr
On track	$6 11	$5.56	$
To arrive	6.10	5.55	
July	6.10	5.55	
September	6.10	5.43	
October	6.03	5.18	
November	5.93	5.04	
December	5.80	....	

The protest of the Duluth Boa Trade against the proposed increa $5 in the one-day charge hither $2 on grain held in cars for inspe has been sustained by the Comi Commission.

CLIMAX SUPERFINE BRAND.

This is a one act play with just one scene. It does not ordinarily require more to prove up with **SMALL'S FIELD SEEDS.**

The two fields above show on one side the prosperous looking natural results obtained by the successful farmer.

The other field is weedy and badly run down, and as it is only across the road, we can hardly blame the soil, or difference in rainfall or sunlight. It must be something else.

The farmer and his son are talking things over and the latter has just returned from the poor field and in speaking to his father says: "Dad! Let us buy Small's seeds again. Look at the difference between our fields and John Smith's." Father knew all about this difference before it was called to his attention, but is frank enough in getting down to brass tacks to admit in replying to his son, "There is a **DIFFERENCE IN SEEDS,** and we'll quit monkeying around with any old seed and **BUY** all of ours from **SMALL'S.** Their quality and service can't be beat."

Beans and Potatoes

Beans and potatoes in Missouri both ow somewhat smaller acreage than t year; condition respectively 89 d 90.

The potato acreage of Ohio has been luced to 150,000 with condition only or two points less than the 10-year erage.

The forecasted production of potatoes Wisconsin is somewhat above nor- l in 1919 with an acreage of 289,000, 98 per cent of last year; condition,

The Michigan Weather and Crop Bul- in dated July 8 says that both beans d potatoes are doing fairly well in at state but would be benefited by re rain.

The estimated acreage to potatoes in chigan is 333,000, 2 per cent less than t year; condition 92, which if main- ned through the season would indi- e a crop of 3,125,000 bus.

Potatoes in Indiana show a slight rease of acreage compared with last ar. The indicated acreage is 7,852,000 s. The sweet potato acreage is prac- ially the same as last year.

The area of potatoes in Minnesota as orted by Field Agent Kirk is 1 per lt less than last year, or 309,000 es, condition July 1, 92. Bugs are orted, but little disease of the vines pears to be present.

The acreage of beans in Michigan, ld Agent Church reports, has been luced considerably from last year, efly in the counties on the southern l western edges of the district. In heavy producing counties where lds have been the best reduction has n less. Total estimated area is 353 es which with condition at 90 indi- es a crop of 3,654,000 bus.

BEAN SITUATION.

BEAN ACREAGE SHORT.

MICHIGAN (6).—The bean acreage e in Eaton County is about 50 per t of last year, and only 10 per cent that of two years ago.—*W. L. Ireland Co., Grand Ledge, Mich.*

Montreal—Receipts last week were 3,192 sacks, against 7,867 sacks the week previous, and 2,635 sacks for the same week last year. The market is thoroughly demoralized owing to the large quantities of old potatoes now glutting the market. New Brunswick shippers,

Louisville Seed Market.

LOUISVILLE, KY., July 12.—Movement of all field seeds is light, new seeds not taking the market, and old seeds not being in demand. Weather conditions have been fine for bluegrass and orchard grass curing and threshing.

A few sales of bluegrass seed at $1.75 a bushel are reported from central Kentucky, but appear to be deals as among farmers, and are probably not bona fide sales, but reported to force a higher market. Cleaners are not buying or having anything to do with such prices as there is not an immediate demand. Missouri seed is figured at 400,000 bushels, and Kentucky at about 600,000, making visible supply of about 1,000,000 bushels, or the heaviest crop of recent years, which should force a lower market.

One or two bona fide sales of orchard grass from the thresher are reported at $3 a bushel, or a dollar a bushel higher than the opening price last year. Crop is of fine quality and promising 200,000 bushel yield for state.

Important Amendment to Canada Grain Act.

Notice has been given by Hon. A. K. Maclean, Acting Minister of Trade and Commerce, of Canada, of amendments to the Canada Grain Act, which will create a board to be known as the Board of Grain Appeals, to consist of three members, who must be grain experts and who shall hold the office for a period of ten years. The offices of the Board will be located at Ft. William, where it can most conveniently hear appeals from decisions of the Chief Inspector, on samples of grain respecting which the grading is disputed. Provision is also made for the establishment of a Survey Board at Calgary for the district of Calgary.

The amendments provide that all track buyers and owners, and operators of warehouses and silos and all grain commission merchants shall take out annual licenses. In the future no person, firm, or corporation, licensed as grain commission merchant, shall directly or indirectly buy for his own account any grain consigned to him for sale on commission.

Redtop Seed Outlook.

The outlook for redtop seed in southern Illinois, where most of this kind of seed is produced, is good. Though it is estimated by those reporting that the acreage which will be cut for seed this year will be about 10 per cent less than that of last year, the yield per acre is expected to be somewhat better this year, says the *Seed Reporter*. It is expected that harvesting will begin in the most important redtop-seed producing counties about July 15, though in some counties it was reported that harvesting would start as early as July 10. In others it will be deferred until about August 1. Though it is too early to determine with any degree of certainty what the quality of the seed will be, it is believed that it will be good. No price for the new crop, which is not expected on the market until early fall after the threshing of wheat, rye and oats has been completed, has been established but some dealers are reported as making bids of 8 to 12 cents per pound for recleaned or "silver" seed.

Feedstuffs

The Renkes Feed Mill of Sterling, Ill., has been purchased by the Farmers Co-operative Co. The company is capitalized at $100,000, and R. A. Norrish is president; B. F. Hoover, secretary; Simon Whistler, treasurer.

M. M. Nowak of Buffalo has just returned from abroad, where he had an interesting trip with side lights on trade affairs that are illuminating. He confirms, as recently suggested herein, that the Scandinavian countries, particularly all nations abroad, will require an enormous tonnage of feed concentrates. Mr. Nowak has sold his Buffalo business to the Curtis Grain Corporation and is centralizing on the Hammond Mill, several items about which have appeared in this paper. He feels that Hammond is centrally located for the attractive purchase of feed materials and the development of markets much broader than possible in the east.

Cottonseed Feed Demand Lags.

KANSAS CITY, July 12.—Demand is lacking in the market for cottonseed cake and meal by trade in Kansas City this week. Buying was limited to small orders from grazers in surrounding states. Offerings for immediate shipment were extremely light. New crop cottonseed cake and meal is being offered in a small way, but market interests display little eagerness to take hold.

Ground Feed Stocks.

The Bureau of Markets, reporting under date July 12, has the following as regards ground feed stocks throughout the country:

EASTERN.—St. Albans—Dmd. gd., market higher, sup. ltd., c. s. meal 36% any line July and 1st half Aug. del. $78.25; wh. fd. dmd. gd. std. bran $43, Canadian spg. middlings prompt $50.50. E. P. MUELLER

5 N. LaSalle Street, Chicago, Ill.

FEED MARKETS.

MINNEAPOLIS.

Minneapolis, July 14.—The demand for millfeed is still strong and the price list is advancing on the heavier grades. Offerings are light and the demand coming from dry districts of the west and northwest holds good. The demand from other sections is moderate, but in total is good and takes care of all of the offerings the millers have to make. Bran is moving the slowest of all, but is well taken care of. Prices in car lots, f. o. b. Minneapolis in 100 lb. sacks. Standard Middlings, $45.50@46.50; Flour Middlings, $51.00@52.00; Rye Middlings, $41.00@42.00; Red Dog, 149 lbs jute, $57.50@58.00; Bran, $36.00@36.50.

PITTSBURGH.

Pittsburgh, July 12.—Receipts of feed were somewhat larger than the previous period, a total of 21 cars, 9 of which were not graded, being bulletined at the exchange. Prices still cover an irregular range with good grades at $55 a ton. White middlings are more plentiful than other grades. Four cars of bran were among last week's receipts.

LOUISVILLE, KY.

Louisville, Ky., July 12.—The demand for manufactured feeds is somewhat better due to high corn. Mill feeds are in good demand with supplies better due to full milling operations.

Quotations are: Bran, $48; mixed feed, $50; middlings, $54; hominy feed meal, $74, sacked and packed, f. o. b. Louisville.

BALTIMORE.

Baltimore, July 12.—There is a firm tone to the spot feed market, with middlings especially showing strength. First hand offerings of feedstuff are light and Western advices encouraging. Demand is fair in a jobbing way for sacked bran and middlings. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $42@43; western middlings, per ton, in 100-lb. sacks, $49@50; city mills' winter wheat bran, per ton, in 100-lb. sacks, $47; brown middlings, per ton, in 100-lb. sacks, $50; white middlings, per ton, in 80-lb. sacks, $60.

ST. LOUIS.

St. Louis, July 12.—The feed market is excited, strong and higher, with offerings light and not equal to the demand, but bran shows less strength than other wheat feeds. Prices are as follows: Bran, $38@38.50; middlings, brown, $50@51; gray, $54@55; mixed feed, $40@45; red dog, $64@65 per ton.

DULUTH.

Duluth, July 12.—As a result of the advances in all coarse grains during the week, quotations in feeds are strong, with ground feeds up $4, ground oats up $2, shorts up $2 and cracked corn up $4.75. Demand from the East for supplies of all kinds was reported better, but millers on this market have comparatively light stocks to offer in view of the reduced basis upon which they have been operating for some time. Quotations follow: Bran, per ton, $38; ground oats, per ton, $48.25; No. 1 ground feed, per ton, $62.50; No. 2 ground feed, per ton, $58.75; No. 3 ground feed, per ton, $55.25; shorts, per ton, $46; red dog, per ton, $58; Boston mixed, per ton, $44; cracked corn, per ton, $69.25; rye feed, $35.

International Sugar Feed Co.
Minneapolis, Minnesota

MEMPHIS.

Memphis, July 12.—Cottonseed meal, 7 per cent ammonia, has jumped again and the people who have any for sale are now asking $69 a ton in carlots. They say that there is demand for every pound, as other feeds are so high in proportion. Hulls have stiffened slightly and are now held at $6.50 a ton loose in carlots.

Bran and shorts are scarce, but there is only limited demand for the former. The latter is much wanted and gray shorts sold a day or so ago around $54@55 a ton. Balanced feed people are taking what little there is for sale. All sorts of mixed feeds are active and firm with prices up during the week. There is more activity in making the oats feeds because of the relative cheapness of the grain compared with corn.

MILWAUKEE.

Milwaukee, July 12.—The local mill feed market is strong due to a good demand with scarce supplies. Production at the local mills is at low ebb owing to light supplies and restricted milling operations will continue until the new crop arrives. Bran and middlings are again higher with increases of $1.50@2. Current quotations are: Bran, per ton, $39; standard middlings, $49; flour middlings, $52@53; red dog, $59; hominy feed, $68.50; rye feed, $43; old process oil meal, $75; cottonseed meal, $69.50@75; brewers' dried grains, $54, all in 100-lb. sacks. Quotations on gluten feed have been withdrawn due to the strike.

NEW ORLEANS, LA.

New Orleans, La., July 12.—Sales of bran have been made at $2 per hundred, tagged, delivered, for twenty-day shipment. Offerings of bran as yet are not free as mills are just about beginning to grind wheat.

NEW YORK.

New York, July 12.—Prices in the mill feed market displayed decided strength and values were higher during the past week. This was due more to a lack of selling pressure than to any material increase in the demand. Mills have little feed to sell and consumers have to look principally upon traders who have already bought and in transit. New feed is not expected to be offered for some time as mills are now running on very short supplies of old wheat and there appears to be little probability of much increase in offerings of feed until the new crop is available.

PHILADELPHIA.

Philadelphia, July 12.—There is a good demand for feedstuffs and with light offerings prices are firm and higher. Fine shipments are especially in good request.

Quotations are for carlots, in 100 sacks, to arrive: Winter bran, spot, $44@45 per ton and $43.50@44.50 per ton to arrive; spring bran, spot, $43.50@44.50 per ton and $42.50@43.50 to arrive; standard wheat middlings, to arrive, $52@53 per ton; flour middlings, $58.50@59.50 per ton; red dog, $64.50@65 per ton; low grade flour, $64.50@65 per ton; rye middlings, $46@47 per ton; fine yellow hominy, $72.50 per ton; fine white hominy, $73@ per ton; reground oats feed, $27@28 per ton; cottonseed meal, 36% protein, $77 per ton; cottonseed meal, 41% protein, $80.50@81 per ton; cottonseed feed, 36% protein, $58@60 per ton.

BOSTON.

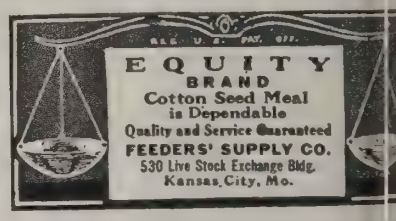
Boston, July 12.—Wheat feeds higher than last week with a better demand reported and offerings extremely light. Special feeds in fair demand with prices generally higher. The following quotations being made on the grades of feeds: Bran, spring, sacked, $43.50 per ton; bran, winter, sacked, $43.50; middlings, sacked, $51; mixed feed, sacked, $51@56; red dog, sacked, $67; stock feed, sacked, $64.50; hulls, reground, sacked, $28; hominy feed, sacked, $75.40; cottonseed meal, sacked, $76@78. Receipts for the week ending July 12th were 382 tons.

NASHVILLE.

Nashville, Tenn., July 14.—There is a demand for wheat bran and short feed for early delivery. Supplies for immediate delivery are light because mills have been closed down, waiting for new wheat. The ground feed is in fair demand with prices strong and tending upward. Quotations: Wheat bran, 100-lb. bags, per ton, $44; middlings or shorts, $51; horse and mule feed, $52@64; poultry feed, $72@80; stock feed, $52@63; hog feed, $61.

MONTREAL.

Montreal, July 11.—The market is dull and prices are irregular, sales being reported at $40@41 and $42, and shorts at $43@44.



CHICAGO.

Chicago, July 12.—The market has been strong, mill feeds having advanced 1 over the previous week. Supply of bran and middlings is ample for the demand. Hominy and gluten feeds are strong as the supply is moderate. Indications

firm prices for cottonseed meal until the new crop of cotton is harvested in August.

TAMPA.

Tampa, Fla., July 11.—Gray shorts are quoted here today at $55; brown shorts at $50@54. The demand is good and receipts have been heavier than usual. There have been very few calls for bran, which is quoted at from $43@44. No. 1 alfalfa meal is meeting with some purchases at from $40@42 according to quality. Mixed sweet feeds are offered at a wide range of prices governed by quality. The demand here is always brisk for sweet feeds and the balanced ration is coming into its own more and more each day in Florida.

THE FEED SITUATION.

FEED DEMAND GOOD.

RICHMOND, VA.—Beg to say that we are having a good demand for feedstuffs such as middlings, bran and red dog, and we look for a much better demand from now on. We are always in the market for pure wheat bran, middlings and red dog, and ours is a good market on these staple feeds.—*Robt. M. Smith & Co., R. M. Smith, Richmond, Va.*

FEED DEMAND GOOD.

BOSTON.—We find the demand for feeding stuffs to be especially good for this time of the year. We are told that the farmers are doing so well with the prices they are getting for milk that it encourages them to feed heavy, which is rather unusual for this time of the year. We, however, think the use of balanced rations by farmers is much greater than it ever has been before, and that fewer of them are mixing their own ration. This has been brought about through the high class dairy rations which have been put on the market and also by the fact that labor has been scarce and a mill-mixed ration has been much more economical to feed on account.

It looks now as though the poultry population had increased in great numbers and the outlook for the poultry feed business for the coming season is very bright. In fact, the general outlook for business in our line is good and we are very optimistic regarding the situation.—*The Park & Pollard Co., Boston, Mass.*

Kansas Second Cutting.

The second cutting of alfalfa in Kansas, which has practically been completed over the state, shows fair yields and good quality hay," reported H. W. Elliott of the Peters-Elliott Commission Company, Kansas City, who returned late in the week from an extended trip in the southern and eastern sections of the state. "There are large quantities of hay throughout the districts I visited. Most farmers as a rule still hold their first crop of alfalfa, aiming the hay to properly cure before marketing. In addition to the large alfalfa supplies, prairie is in abundance throughout the Sunflower state. The movement of alfalfa and wild hay is light at the present time owing to rush of harvesting and threshing wheat. However, this work is being completed and heavy shipments may be expected again in the next few weeks. Producers manifest bullishness regarding the hay market and declare they will not market their hay unless higher prices are obtainable. But the country is revising ideas of prices for hay, and will not long hold out for the recent record figures which prevailed on the Kansas hay market."

Idaho Alfalfa.

Reports from different sections of Idaho on the alfalfa crop may be summarized as follows: Cottonwood says old hay is scarce and demand strong. Payette new alfalfa is held firmly at $18 in the stack. Same at Wilder where first deliveries are now being made, with second crop ready to cut by Aug. 1. Some new alfalfa has been shipped from Burley to Butte and Salt Lake City but irrigation water is becoming scarce and higher prices are looked for. Gooding reports about the same shipping surplus of alfalfa as last year with new hay selling now at $18 f. o. b. shipping point. Caldwell reports old alfalfa offered at $18.

Alfalfa Department

Some damage to alfalfa in Shelby County, Iowa, is reported from army worm.

The alfalfa market at Seattle shows a decided improvement with prices about $1.25 higher.

The first cutting of alfalfa near Norfolk, Neb., was the best reported in eight years. The second crop looks fine with the plant standing now 14 to 15 inches high and very thick.

Baker, Ore., reports first cutting alfalfa considerably under that of last year in yield owing to shortage of water in the irrigation districts. Lewiston, Idaho, reports new alfalfa short and thin.

The Alfalfa Cereal & Mfg. Co. of Sioux City, Ia., announce letting the contract for the erection of a large cereal mill with capacity of 2,000 bbls., 1,000 tons of alfalfa meal; total investment about $750,000.

To take care of their rapidly growing business, the Denver Alfalfa Milling & Products Co. of Lamar, Colo., will open up a branch office at 749 Live Stock Exchange Building, Kansas City, Mo. The Denver company operates extensively throughout Kansas, Colorado and New Mexico, and has recently acquired two more mills. The Kansas City office will be in charge of Mr. W. B. Wood, formerly of Fayetteville, Ark.

Colorado Alfalfa.

TRINIDAD, COLO.—In this vicinity the first crop of alfalfa, or the most of it, is already stacked, and it was as good a yield as most average years. We had a very severe frost here on June 1 and 2, which cut the hay in some places very badly and in others it did not seem to affect it; but on an average it is good, and the most of it has been put up without any rain and it is in good condition.

We have a good prospect for oats, wheat, barley and other small grains, if it does not get hit by the hail or other storms in the next week or two, and the second crop of alfalfa is good where they have irrigation, but where it is dry land farming, if they do not get some more rain, it will not amount to very much.—*The Jamison-Conger Grain & Produce Co., per M. McDermott, Sec'y, Trinidad, Colo.*

St. Louis Alfalfa Market.

ST. LOUIS, July 12.—The alfalfa feed market is strong, in sympathy with the strength in other feeds, and there is a good demand, but offerings are light, and are not equal to the requirements.

Prices are as follows: Molasses grain-mixed horse feed—Choice, $63; No. 1, $53; No. 2, $48 per ton. Straight molasses alfalfa feed—Choice, $45; No. 1, $42; No. 2, $39. Alfalfa meal—Choice offered at $39; No. 1, $37@37.50; No. 2, $36 per ton.

Alfalfa hay—Market strong on the best grades, but low grades are dull and slow of sale at a heavy discount. Prices are as follows: Choice, $34@35; No. 1, $32@33; standard, $28@30; No. 2, $20@25; No. 3, $17@18 per ton on track.

Alfalfa Stocks.

The Bureau of Markets, reporting under date of July 12, has the following as regards alfalfa stocks and prices:

SOUTHERN.—Atlanta—No. 1 alf. offered prompt shpt. $36; std. alf. offered from Memphis $34.50, No. 2 $31.50 del. Atlanta. Augusta—Rcts. alf. fr., dmd. gd., New Mex. furnishing bulk of offerings, ch. alf. $37, No. 1 $35. Savannah—Stks. none with no inquiries. Miss.—Ariz. offering most attractive prices. Mobile—Rcts. alf. fr., dmd. better. Trinidad and other Colo. points supplying bulk of sup. No. 1 alf. $32. Montgomery—Stks. alf. lgt., dmd. fr. Locally grown alf. used to large extent. Ch. alf. $34.50@35, No. 1 alf. $34. Meridian—Few sales of alf. at $35. Vicksburg—Stks. alf. fr., rcts. fr., dmd. gd. Ch. alf. $29.50, No. 1 $26.50. Pensacola—Ch. alf. $34, No. 1 $33. Jacksonville—Stks. alf. lgt., rcts. lgt., bulk from Kans. and Okla. Ch. alf. $38.50. Asheville—Stks. alf. nil. Rcts. nil. with no dmd. reported. Greensboro—Stks. alf. lgt., rcts. lgt., dmd. lgt. Conditions of alf. not vy. good but improved, very little arriving as timothy is preferred. Wilmington—Stks. alf. nil, also dmd.

Alfalfa Meal Demand Light.

KANSAS CITY, July 12.—With bid and ask prices still at a wide difference, little business was witnessed in the alfalfa meal market in Kansas City this week. The few sales made represented more closely the views of buyers regarding prices than the quotations submitted to the trade by mills. The market is in a highly unsettled state, and no improvement is expected until the bid and ask prices become more on a parity. There was a broad inquiry for meal, reflecting the need for supplies among feed mixers of the Southeast, South and Central States.

The extreme range of prices on alfalfa meal, including both the millers' and buyers' views, follows: Choice, $32@37 per ton in carlots, new sacks, basis Kansas City; No. 1, $31@35; No. 2, $25@30; brown, $24@26.

A fair demand prevailed for alfalfa mixed feeds. The grain alfalfa mixed feed, manufactured to meet the requirements of hog producers, is finding a broad market as a substitute for corn; in fact, many holders of corn are reported to be marketing their grain and buying the mixed feed. Prices on the grain mixed feed advanced in sympathy with corn and oats, closing at $47@55 a ton. Other prices were unchanged, No. 1 molasses feed closing at $38.50@39.50; No. 2, $37@38; brown, $35@36.

Big Demand for Alfalfa.

"The alfalfa market is being called upon for the largest supply of hay in the history of the trade for this period of the year," said W. B. Poindexter of North Bros., Kansas City. "This, together with the fact that production of alfalfa is considerably below normal, makes for bullishness in the trade in this variety of hay. Our advices from Oklahoma indicate the state has practically cleaned up its entire second crop of alfalfa, the yields from the second cutting in Colorado are light, and only moderate supplies are available in Kansas. As to the outcome of the succeeding crops, all is dependent upon the weather. Rains would now benefit alfalfa.'

Hay Department

The first cutting of alfalfa in Boyd County, Neb., went 1½ tons to the acre

Hay crops and pastures are reported in excellent condition in Madison County, Nebr.

The I. C. C. has approved the charge of $2 for holding hay for inspection without limit of time.

It is reported that the hay crop is so scarce in some parts of Montana that horses are practically being given away.

Alfalfa yellows, which leaves a peculiar injury to that plant, can be cured only by cutting as soon as the yellows appear.

The native hay crop in Logan County, Neb., is said to be very heavy and good in quality. Most of it is stacked for winter feeding.

The height of the haying season was on last week in the neighborhood of Ashland, Wis. The crop was more plentiful than in years but labor was more scarce.

A stock feeder from Wheatland, Wyo., after traveling through to Omaha gave it as his opinion that Nebraska apparently has the biggest hay crop in its history.

The first crop of alfalfa near Woodbine, Ia., was saved and was heavy but the army worms took the second. Bluegrass pastures, however, were in a fair condition.

Prairie hay in the neighborhood of Kearney, Neb., is said to be unusually heavy. The early rains gave it a good growth and the hay is in very fine condition.

The hay harvest is on in Iowa and the Weather Crop Bulletin for the week July 8 says the condition of tame hay is 3 per cent higher than reported in the past ten years.

Prairie hay in the North Platte country of Nebraska is above the average. Alfalfa, however, is the poorest all round crop in condition that it has been for a number of years.

The hay yield in Michigan has been shortened by dry weather, but Field Agent Church estimates the crop this year at 2,217,000 tons. This is less than the average, but considerably more than last year's crop, which was only 2,718,000.

The field agent from Ohio says the July condition of clover for hay was 85 or four points higher than the 10-year average; condition of timothy 90, compared with a 10-year average of 79; alfalfa 94, or six points higher.

It is reported from Norfolk, Nebr., that timothy and clover in that neighborhood is the best they have been in the last ten years. The harvest is already made. Reports of yields running 2 to 2½ tons to the acre come in.

The hay crop in Minnesota has made a wonderful growth during the month of June, says Field Agent Kirk. While there was some damage done along the Minnesota River by hot weather it is more than offset by conditions in the rest of the state.

The hay crop in the neighborhood of Winona, Minn., promises very large this year. Clover in many fields is over knee high and so dense as to be almost impossible to walk through it. The hay, however, is still very sappy owing to excessive rains.

The Palouse country of Washington has finished one of the largest crops of alfalfa ever grown there, it is said. Many tracts are going more than two tons to the acre. Farmers are stacking what they need for their own feed and having the rest baled for market.

A sample of alfalfa over 6 ft. high cut from a ten acre patch near Long Lake, Minnetonka, Minn., was shown in a Minneapolis bank. This is twice the length of ordinary alfalfa as cut in California and the Southwest. A second cropping of this character is anticipated.

The field agent of New England reports a big hay crop in Vermont and New Hampshire, but rather light elsewhere throughout New England, the acreage being considerably below these and old hay stocks are low. Timothy, clover, millet and alfalfa, minor hay crops, have made a good growth. Pasture in the north is rather short and dry in the south.

STATE OF THE HAY MARKET.

By F. M. WILSON,
Lamar, Colo.

Pasturage, forage and hay conditions are exceptionally good throughout the entire United States with the exception of several states in the extreme Northwest. Grasshoppers are, however, causing a little trouble in some sections.

Under ordinary conditions, one would expect the market to break. Instead, the Kansas City baled hay market is holding $4.00 to $5.00 per ton higher than a year ago. An explanation of this is that the farmer still has war-time ideas regarding the value of his products and is holding off for a maximum price. Still another explanation might be that the farmer is too busy threshing wheat, or that the weather conditions in some states are such that they are unable to bale.

We do not look for much of a break in the alfalfa market. It is possible that an overproduction of alfalfa meal in August and September may break the market from $1.00 to $2.00 per ton, but this will only be temporary as the demand for alfalfa meal promises to be heavier than ever before, and, while the tonnage is greater, there will be no surplus tonnage to bear the market except during August and September.

The trade will do well to buy heavily within the next sixty days.

HAY SITUATION.

OLD HAY STOCKS GONE.

INDIANA (3).—Stocks of old hay in timothy and clovers have been exhausted for some time. There is an abundance of new timothy and the quality is good. Some has been damaged by the recent floods. No clover to speak of. Alfalfa is fine, but weather may not permit proper curing.—*Peter Baker & Sons, Troy, Ind.*

QUALITY OF HAY GOOD.

NEBRASKA (5).—The quality of hay through our country, both prairie and alfalfa, this year, promises to be very good. The yield will be about 80 per cent on alfalfa and about normal on prairie. The present indications are that the bulk of our demand will be in Colorado, Wyoming and Montana. I just finished a trip through these states and find things pretty well burned up. In almost every locality you find the cattlemen grazing their meadows.—*Leopoldt & Pennington, by H. L. Pennington, North Platte, Nebr.*

Florida Hay.

JACKSONVILLE.—Florida is not a hay growing state. In the southern portion of the peninsula, about Brooksville there is considerable Natal hay grown and it is not harvested until the fall. There is also considerable pea vine and crab grass hay grown in the western part of the State. This is not harvested until later on in the summer. Therefore as a state we are buyers of hay.—*Baker & Holmes Co., Jacksonville, Fla.* SEEDS

Southern Hay Condition.

From the July 7 crop report of the American Steel & Wire Co. some data with reference to the hay crop in the South may be compiled as follows: Alabama—Northern hay very poor; other sections the pasture is good, except the northwest, where as in the northern section hay is poor owing to too much rain. Arkansas—Hay and pastures generally reported good. Florida—Pastures fairly good to fine. Kentucky—In the southern and western sections hay and pastures (clover) are good; in the central bluegrass for seed especially is good. Louisiana—Pasture and hay good in the northeast. Mississippi—In the southwest pasture and hay good. North Carolina—Northern section pasture and hay good. South Carolina—Northwestern hay fair. Tennessee—Southeastern half hay crop over fair. Virginia—Southwestern pasture and hay clover good.

OMAHA HAY NOTES.

J. C. Pederson, Correspondent.

No life to trading; dealers awaiting more settled conditions.

Demand light, pastures and hay crops being good locally and to the east.

E. P. Palmer, manager of the Dyer Co., has left for the West on business.

Idaho reports quite a little alfalfa to move eastward but less than a normal crop.

Everything favorable for a large crop of prairie hay, which is being harvested now.

W. E. Hopkins of the Omaha Hay Co. is back from his vacation and ready for the new crop.

MIXED CARS A SPECIALTY

C. A. Olmsted of the Olmsted Hay . from Council Bluffs, Iowa, was a sitor on the hay market this week.

Frank P. Brown of the E. A. Knapp . arrived home from his trip and says had a good time up north and fish- was good.

Although present prices are attrac- e, farmers are too busy with their ier crops to market hay and no heavy vement is anticipated till September. Reports from Colorado, Wyoming and ntana indicate a rather serious ught and production will be cut rt. Some usual producing territory ll most likely be obliged to buy for ir feeding requirements.

Old hay almost cleaned up. Arrivals o 10 cars per day of new prairie sell- ; at $16 to $30, depending on quality. w cars of new alfalfa moving, most which is more or less damaged. It is imated that not over fifteen to twen- per cent of Nebraska first crop of alfa was put into the stack without n. Army worms, or other worms, working in some counties on the ond crop, although at this writing y slight damage has been done. Most the second cutting going into the k in good condition.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

M. Hail, for the past nine years a ler in hay and grain at Roswell, Mexico, has become connected the R. C. Bell Hay Company in sas City. Before engaging in the and grain business at Roswell, Mr. was active in the hay trade here.

A. Fowler of the Gateway Hay pany, a reorganization of the Dou- Hay & Grain Company, has been itted to membership in the Kansas Hay Dealers' Association. The sfer was made from J. H. Dougan. Dougan is arranging to re-enter the trade in Kansas City.

M. Cook, an extensive handler of millfeed, screenings and other sim- commodities, formerly operating at Bluff, Ark., is an applicant for bership in the Kansas City Hay ers' Association on transfer from k Wyrick, a retired forage handler Mr. Cook, after August 10, will cated at 223 Board of Trade Bldg., ansas City.

very active demand is being wit- ed in the market for tame hay," de- d C. F. Arnold of C. F. Arnold & one of the most extensive handlers is variety of hay in Kansas City. South, Southeast and Southwest alling for large quantities of tim- and other tame hay, and difficulty ing encountered in meeting the s of the trade. The acreage of hay in Kansas and Missouri was ably the lightest on record this and while the yields were large, otal tame hay available is light."

oming has begun to make pur- s of hay on account of drouth con- is. Dyer & Co., of which Dan Tilson ad, received the first order for hay the drouth-stricken areas of the west, reporting a sale of 10 cars alfa to a point in Wyoming. "We fill this order with alfalfa from ado and Nebraska," declared Mr. n in commenting on the first pur- in more than two years by the western grazers of dealers in as City. "So far, the demand for from Wyoming, Montana, Idaho, Dakotas, northern Colorado and suffering areas, is not broad, but s conditions soon improve the in Kansas City will be called upon rge supplies. And it is probable alfalfa from Kansas will find its nto the Northwest. This was done g the severe winter of 1917, but so s possible Colorado and Nebraska e called upon to meet the require- of the grazers in the Northwest. ddition to alfalfa, considerable e will be shipped into the drouth

nois pastures were in excellent on July 1 as a rule with condition . Acreage of timothy, however, nly 90 per cent of last year.

Hay Markets

NEW YORK.

July 10.—The New York Hay exchange reports the hay situation as follows:

	Hay tons	Straw tons
Reecipts for week.....	3,518	270
Receipts last week.....	3,436	340
Receipts Sept. 1 to date.....195,203		12,368

Prices have continued to decline and there is no certain value on the bulk of the hay arriving. Small baled Canadian hay has made up the great bulk of the supply coming. Large bales are not in any surplus, but most such are of lower grade and values are affected by the glutted market on small baled hay. Advices still indicate a free movement of Canadian hay this way both by rail and river and the immediate outlook does not hold out much hope of a prompt recovery. Railroads report some further increase in stocks in transit.

No. 1 hay has been scarce and it is possible that at certain favored harbor points a car or so of bang-up large bales may still be worked out over $40. But little large baled hay here is good enough to exced $38 and probably most sales range from $35 down indefinitely according to quality. Values on small baled hay are very uncertain. Most of the receipts this week have been in small bales and a large part of very poor quality. The quotation of $34@38 on No. 1 hay in small bales is largely nominal. An occasional car of the best No. 1 if here would probably find an outlet within that range, but at 33rd St. shed we see no small baled hay today good enough to exceed $33 and almost all the recent business has been at much lower prices—from $30 down to $20 with a good many cars of useful hay selling around $23@27 according to the anxiety of the buyer to move same. We see a number of cars of this small baled hay which cannot be sold much above a packing hay value around $15, some probably would be forced to sell even lower to move promptly.

Clover and clover mixed hay have declined with timothy and small bales are selling at very irregular prices.

Rye straw holds steady. We hear of sales of No. 1 all the way from $12@14, though business up to latter figure is confined to small lots and $13 is the prevailing figure: Quotations:

	Large bales per ton	Small bales per ton
No. 1 hay.....	$37.00@40.00	$34.00@38.00
No. 2 hay.....	35.00@37.00	28 00@33.00
No. 3 hay.....	29.00@34.00	24.00@26.00
Shipping hay	26.00@28.00	21 00@23.00
No grade	18.00@24.00	15.00@20.00
Fancy light clover mixed hay	36.00@37.00	30 00@33.00
No. 1 clover mixed	32.00@34.00	26.00@29.00
No. 2 clover mixed	27.00@29.00	23.00@25.00
No. 1 rye straw...	@13.00	@
No 1 oat straw...	10.00@11.00	@

Effective July 5th, the N Y. C. extended their embargo to cover 130th St., Melrose Junction, Clarmont Park and Port Morris.

BALTIMORE.

July 12.—The supply of all grades and kinds of hay is ample for present trade wants as there is no life whatever to the demand and the gradual filtering through of receipts of loose new hay from nearby country points by farmers' wagons is having a weakening influence upon old baled hay. This new hay, by sharply underselling the old, is making decided inroads where the latter formerly had the call.

Straw—There is not much movement in straw of any kind and the quantity on sale is therefore ample for trade wants.

FRED C. HAYNES CO.
RECEIVERS SHIPPERS
ALFALFA
HAY MEAL
212 Neville Block OMAHA, NEBR.

Market quiet with values in buyers' favor. Quotations follow: (Quotations are for old hay.)

Timothy—No. 1, $37; standard, $35.50@36; No. 2, $34.50@35; No. 3, $29@31.

Light clover mixed—No. 1, $33@33.50; No. 2, $30@32.

Clover mixed—No. 1, $31.50@32.50; No. 2, $27@29.

Clover, nominal—No. 1, $29; No. 2, $26; No. 3, $25.

Straw—No. 1 straight rye, $15@15.50; No. 1 tangled rye, $12.50@13.50; No. 1 wheat, $8@8.50; No. 1 oat, $11.50@12.

LOUISVILLE.

July 12.—Receipts of hay continue good with fair demand and market firm but showing signs of late season weakness, due to farmers shipping heavier on old hay. Prospects for new hay are very encouraging.

Quotations: Timothy, No. 1, $39; No. 2, $37.50; No. 1 mixed, $36.50; No. 2, $35; No. 1 local alfalfa, $30; clover, No. 1, $28; No. 2, $25; wheat and oat straw, $8; rye, $12.

OMAHA.

July 12.—Receipts light on both prairie hay and alfaifa, and the demand continues quiet. Market weak and lower. Quote:

No. 1 upland prairie hay, $27@28; No. 2, $20@22; No. 3, $10@14.

No. 1 midland prairie hay, $24@26; No. 2, $18@20.

No. 1 lowland prairie hay, $17@19; No. 2, $13@15; No. 3, $8@10.

No. 1 alfalfa, $22@25; standard, $20@22; No. 2, $15@18; No. 3, $10@14.

Straw—Oat, $9@10; wheat, $8@9.

ST. LOUIS.

July 12.—The receipts of hay during the past week have been exceptionally light, averaging about 15 cars.

Timothy—Timothy hay market is strong and higher with light receipts and excellent local demand for the better grades, the medium grades are also in better request as buyers being unable to supply themselves with the better grades have been compelled to accept the medium grades. The lower grades are also well cleaned up but show no improvement in value.

Light Clover Mixed—Light clover mixed hay is firm, with an active local demand for the No. 1 grades, medium grades also in better request and lower grades steady.

Heavy Clover Mixed—Heavy clover hay mixed hay firm. Offerings light and demand excellent. Good new heavy clover mixed arriving here in good condition would sell well.

Clover—Clover hay firm. Excellent demand here for good No. 1 pure clover hay, either old or new. Heated or damaged clover dull and not wanted.

Prairie—Prairie hay market quiet, offerings very light but demand limited.

QUALITY

Perfection, Peerless, Booster — Horse and Mule Feeds

Green Meadow, Alfalmo — Alfalfa and Molasses Feeds

Uniform feeds
Prompt service
Quality and Fair Prices

Omaha Alfalfa Milling Co.
Omaha, Neb.

Alfalfa—Alfalfa hay continues strong with an excellent demand for good No. 1 to choice alfalfa hay. Low grades are rather quiet and irregular in price. Do not ship any off grade alfalfa hay here unless you are prepared to accept relatively low prices.

Straw scarce.

Other track sales:

Timothy—No. 1, old, $37@38; standard, $36@37; No. 2, $32@34; No. 3, $28@29; No. 1 headed, $25@26; threshed, $18@20.

Light clover mixed—No. 1, $34@35; No. 2, $30@32.

Heavy clover mixed—No. 1, $29@30; No. 2, $26@27.

Clover mixed—Choice, $27@28; No. 1, $24@25; No. 2, $16@20.

Alfalfa hay—Choice, $35@36; No. 1, $33@34; standard, $30@31; No. 2, $20@25; No. 3, $17@18.

Prairie—Choice, $29@30; No. 1, $27@28; No. 2, $24@25.

Straw, $9.50.

PITTSBURGH.

July 12.—It must be very good hay to be sold here at this time. The lower grades, especially clover and heavy clover mixed hay, are not wanted at any price. Anything less than No. 1 timothy or No 2 timothy is being moved only at buyers' prices and on unsatisfactory terms. Conditions have changed little if any since the last report, but a few cars of strictly high grade hay, No. 1 timothy, can be placed to good advantage. Prices are holding steady with the best at $37@37.50 a ton

CHICAGO.

July 15.—The following is a statement of the receipts and shipments of hay in tons in the Chicago market for the week ending July 12, also the total receipts and shipments of hay from Jan. 1, 1919:

	July 12, 1919.	July 5, 1919.	July 13, 1918.
Total receipts	6,443	5,135	4,53[illegible]
Total shipments ...	1,506	938	6,[illegible]
Recpts. since Jan. 1.	140,212	133,769	151,814
Shpts. since Jan. 1.	32,926	31,420	57,779

In spite of increased receipts of hay, including an occasional car of new, the market absorbed everything and could have taken more. The shipping account continued brisk and has become a conspicuous feature of this market which has done much to sustain prices. Monday's offerings were small and timothy was again higher. We quote:

Timothy—No. 1, $33@35; No. 2, $30@31. No. 3, $23@26; sample, $20@22; threshed, $15@20. New, according to location, $23@ Standard, $32@33.

No. 1 Light Clover, $31@32. No. 1 Clover Mixed, $23@25; Clover, $15@22.

Prairie—Ia., Minn., Dak., $20@24.

Marsh hay feeding, $15@18; packing, $12@13.

Straw—Rye and oat, $10@11; wheat, $7@8.

CINCINNATI.

July 15.—Liberal offerings, largely consisting of the accumulation over the holidays, slightly depressed the local hay market early in the week, but prices were more a matter of quality, and choice timothy and good light mixed held fairly steady, while medium and common stuff were dull and neglected at a wider range of prices from top grades. Receipts toward the close showed a material falling off, which steadied the situation, and timothy and mixed advanced 50c per ton. One car of new containing No. 1 and No. 2 timothy sold at $31 on Tuesday, but a straight car of No. 1 timothy of exceptionally good quality later brought $38—the highest price for new hay ever attained in this market. Plugging tracks are bare of offerings and the market indicative of firmer conditions in the next week.

No. 1 timothy strictly, $38.50@39; standard, $37.50@38.50; No. 2, $36.50@37.50; No. 3, $30@34.

Light clover mixed, $33.50@34.50.

No. 1 clover mixed, $31@34; No. 2, $27@29.

No. 1 clover, $24@25; No. 2, $20@23.

Sample, grassy, $22@26.

No. 1 local alfalfa, new, $27@29

DULUTH.

July 12.—Hay receipts on this market last week were represented by just one car. There was an entire lack of interest on the part of buyers owing to the remarkably good pasturages prevailing and the fact that hay has been cut over wide areas of vacant patches in the cities and towns. That is apparently sufficient to supply local needs at present. In view of the heavy hay crop, operators are looking for a lower range of prices as soon as it begins to move. Prices are urged as follows: No. 1 timothy, $28@30; No. 2 timothy, $24@28; No. 1 mixed timothy, $24@28; No. 2 mixed timothy, $20@23; No. 1 prairie, $26@28; No. 2 prairie, $23@26; No. 3 prairie, $18@20; No. 1 midland, $18@22; No. 2 midland, $10@12; rye straw, $9@10; oat straw, $9@10.

DETROIT.

July 12.—Offerings of loose hay are increasing at the city markets and there is less activity in the carlot trade. The market is easy and quiet. Quote: No. 1 timothy, $34.50@35; standard timothy, $33.50@34; light mixed, $33.50@34; No. 2 timothy, $32.50@33; No. 3 timothy, $29@30; No. 1 clover, $28@30 per ton, in carlots.

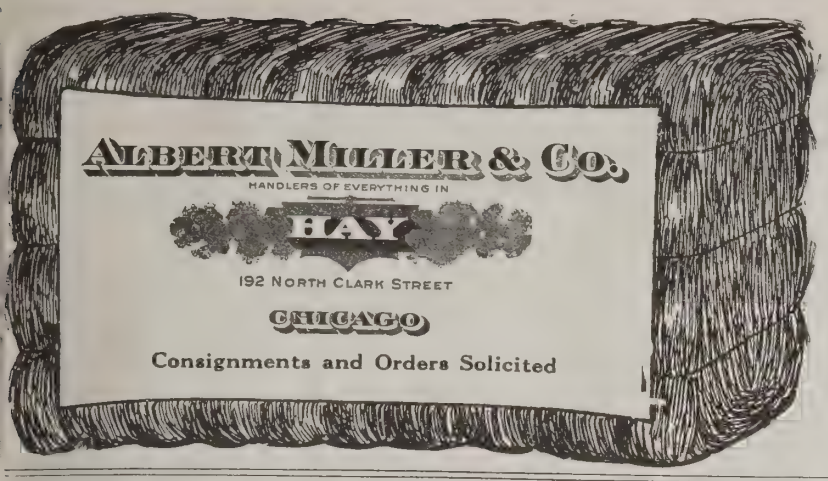
BUFFALO.

July 12.—The market here continues very unsettled and is getting lower daily. Farmers want to sell and dealers who bought on the high prices are trying to get out at some price. No. 1 timothy is quoted at $35@36; No. 2, $32@33; and lower grades from $28@30 per ton.

NEW ORLEANS.

July 12.—Recent sales of hay have been made at $33 for No. 1 and $32 for No. 2. Alfalfa hay offered from $28@29.

MEMPHIS.



July 12.—More good hay is being received and offerings are larger but it is chiefly alfalfa. Oklahoma and Texas are supplying most of the offers although other sections are beginning to get in the game. Prices are around $33 for choice, $31 for No. 1 and $25 for No. 2, Memphis basis. There is fairly good demand although not up to what it was a few days ago, as many consumers have filled up for the time being. New timothy is being offered and some No. 1 in transit sold today at $36, which is a dollar or so a ton better than sales made a day or so previously. There is little of other kinds being offered.

MILWAUKEE.

July 12.—With the new hay crop about ready for the market the local hay market is inactive with but a scant supply of the old crop still available. Choice and No. 1 timothy are quoted $2 lower and other items also declined. An exceptionally large crop is promised for this season and the first cutting is already under way. Grass is in splendid condition for outdoor feeding. Current quotations are: Choice timothy hay, $28@28.50; No. 1, $27@27.50; 2, $23@24; No. 1 clover, $15@17; light clo mixed, $22@24; red top and timothy mi $22@24; stained timothy, $12@15; ma feeding, $10@11; packing, $9@10; rye str $9.50@10; oat straw, $9@9.50.

PHILADELPHIA.

July 12.—Baled Hay and Straw—market for hay is weak and demoral and prices are lower and irregular u increased pressure to sell. The offer of choice and No. 1 hay are light there is an ample supply of the med and lower grades on which holders

ious to realize. Straw is quiet with ble supplies at former rates.

imothy hay (according to location)—No. 38@39; No. 2, $36@37; No. 3, $32@35. over mixed hay—Light mixed, $36@37; 1, 34@35; No. 2, $31@32.

raw—No. 1 straight rye, $13@13.50; No. 12@12.50; No. 1 tangled rye, $12.50@13; 2, $11.50@12; No. 1 wheat straw, $12@); No. 2, $11@11.50; No. 1 oat straw, 12.50; No. 2, $11@11.50.

KANSAS CITY.

ly 12.—Sagging prices for prairie hay inued on the Kansas City market this k. From a high point of $43 a ton, the ket has declined to a top of $25. De- s in the wild hay this week amounted 3.50 to $4.50 a ton. Alfalfa displayed a g tone, closing unchanged. Receipts ay amounted to 442 cars, compared 439 last week and 234 a year ago. e was a broad demand for alfalfa, supplies moving to the East and heast and Central States. Strength l in tame hay, and with the exception eclines of $1 to $2 a ton in clover, the et is at a comparatively higher level alfalfa. Tame hay is moving into the heast, South and Southwest. Straw changed. Larger supplies of hay are cted in the next few weeks.

airie—Choice, $24@25; No. 1, $21.50@ ; No. 2, $16.50@21; No. 3, $8@16; pack- hay, $5@7.50.

dland prairie—No. 1, $14@16; No. 2, 3.50.

alfa—Choice, $28@30; No. 1, $26.50@ standard, $20.50@26; No. 2, $15.50@ o. 3, $11@14.

nothy—No. 1, $29@30; standard, $26.50 50; No. 2, $22.50@26; No. 3, $15.50@22.

ver mixed—Light, $28@30; No. 1 27; No. 2, $18@24.50.

ver—No. 1, $22@24; No. 2, $13@21.50. aw, $8.50@9.50.

NASHVILLE.

14.—Hay prices rule steady, with demand for high grades. Quotations: timothy, $41@42; No. 2 timothy, $38 No. 1 clover, $40; No. 2 clover, $38; alfalfa, $38@40.

BOSTON.

y 12.—The local hay market is easier good receipts and slow demand. Most vers are offering at concessions from week's prices in order to move cars hereby save storage charges. Buyers, ver, are not purchasing old hay to extent as they anticipate that when hay comes on the market prices will rule considerably lower. There is a little city demand but the demand from the country points is practically nothing. Shipments of old hay from Maine and Canada are about cleaned up and haying in these sections is well under way. With favorable weather conditions it is expected that there will be considerable shipments of new hay towards the end of this month, although up to the present time there have been no prices quoted. No. 1 timothy hay is offered at $42@43 per ton, but there is not much of this grade offering. No. 2 timothy ranges at $37@38. No. 1 eastern is quoted at $36@37, and No. 2 eastern at $32@34. No. 3 hay is lower, at $30@31. Clover mixed is quoted at $31@35 per ton for all grades, with fine hay at $28@31 for poor to choice. Packing hay is quoted at $20@21. Receipts for the week ending July 12th were: Local, 181 cars.

The demand for rye straw is quiet with the supply in excess of the demand and the market lower at $16 per ton for the bulk of the offerings. Oat straw held steady at $13@14 with a fair demand. Receipts for the week ending July 12th were: Local, 6 cars.

SPOKANE.

July 5.—Timothy, $38 per ton delivered; $36 by carload; alfalfa, $32 per ton delivered; $3 by carload.

STATE NEWS.

[Concluded from p. 34.]

president; and G. K. Acker, secretary-treasurer.

Chillicothe, O.—As a comprise the United States, through Major J. J. McConnell, acquisition officer, purchased the entire property of the Weidinger Grain & Supply Co. on the Frankfort Pike at the edge of Camp Sherman. The purchase price was $40,000. It includes the elevator and about 7½ acres of land. About $20,000 damages was included in the purchase amount.

OKLAHOMA.

Tulsa, Okla.—The Middle States Milling Co. has been chartered with $500,000 capital by Frank Foresman, M. A. Snyder and J. T. Lynch.

Madill, Okla.—The Woody-McLelland Grain & Elevator Co., a newly formed corporation, became the proprietors of the plant of the Bobbitt Mill & Grain Co. The Bobbitt Mill & Grain Co., owned by B. F. Smith of Sherman, Texas, has been in business here for two years, purchasing the Marsh Milling & Grain Co. at that time. The Woody-McLelland Grain & Elevator Co. is incorporated for $50,000.

Ada, Okla.—The Ada Mill will undergo a complete overhauling, new machinery will be installed and the capacity of the mill will be increased. Following the improvements to be made in the mill a new and larger warehouse will be erected for handling and storing large quantities of wheat, corn and commercial feedstuffs. The improvements will cost several thousand dollars. G. H. Barnes is manager.

OREGON.

Albany, Ore.—C. J. Johns, manager of the Red Crown Flouring Mill at Albany, Ore., which belongs to the Portland Flouring Mills Co.'s system, announces that the capacity of the plant will be increased to 200 bbls. in time to begin grinding this season's crop.

Portland, Ore.—H. W. Collins, large independent wheat buyer at Pendleton, Ore., and head of the new Collins Flour Mill, with initial daily capacity of 750 bbls. at Pendleton, opened grain offices in the Lewis Bldg., Portland, July 1, in charge of Wm. Kearns.

Portland, Ore.—The Dock Commission of Portland, Ore., has approved the lease of ground at St. Johns for the erection of a new flour mill by the Eagle Flouring Mills Co. The mill will be from 500 to 1,000 bbls. daily capacity with storage facilities of from 75,000 to 125,000 bushels. W. R. Bagot is head of the Eagle company.

Pendleton, Ore.—The 100,000-bushel elevator and warehouse of the Pendleton Elevator Co., formerly owned by the Farmers Union Grain Agency, were leased by the Spokane Flouring Mills for a period of one year, effective July 1. The Spokane Flouring Mills is the parent organization of which the Pendleton Roller Mills is a part.

SOUTH DAKOTA.

Sturgis, S. D.—The Tri-State Milling Co. is the new owner of the Sturgis Milling Co.

Hitchcock, S. D.—The Hickok Construction Co. has commenced work on the Kindon Elevator.

Dell Rapids, S. D.—The McCaull-Webster Elevator at this place has been sold to Zeek & Magum.—Farmers Grain Co., Dell Rapids.

Gregory, S. D.—A dividend of 7 per cent was declared at the annual meeting of the stockholders of the Farmers Elevator Co. at this place.

TEXAS.

Brownsville, Tex.—The Champion Grain Co. has changed its name to the Champion Wholesale Grocery Co.

Honey Grove, Tex.—W. L. Dumas of the Dumas Mill & Grain Co. writes that he has gone out of business.

Glen Rose, Tex.—The A. J. Price Flouring Mill Co. is putting in a new concrete elevator at its mill here.

Waco, Tex.—The Waco Grain Exchange has been chartered by B. E. Clements, T. P. Duncan and C. C. Edwards.

Point, Tex.—The Point Milling & Elevator Co. has been incorporated with a capital of $10,000 by J. H. Foster and others.

Wills Point, Tex.—The Home Milling Co. has been organized here with a capital stock of $20,000 for the purpose of erecting and operating a flour mill. E. F. Barnes of Dallas is president; T. J. McKain, vice-president; Worth Thomas, secretary-treasurer.

Waco, Tex.—The Seley-Early Grain Co., which has been operating in Waco for 37 years, has changed its name to the Seley Grain & Seed Co. The Seley interest in the firm has been purchased by the Earlys. W. W. Early will continue to be manager of the firm.

Houston, Tex.—The Houston Grain & Hay Exchange has been organized by the Chamber of Commerce and the following officers have been elected: C. P. Shearn, president; J. E. Bishop, vice-president; and D. S. Cage, W. L. Edmundson and Sigmund Rothschild, members of the board of directors.

Whitewright, Tex.—B. B. Kimbell and son, Kay Kimbell, operating the Beatrice milling plant of this city and the Kimbell mills at Wolfe City, have taken over the stock in both corporations and have moved the principal offices to Whitewright. A new charter has been issued to the Kimbell Milling Co. with a capital stock of $600,000.

Waco, Tex.—With the merger of the Seley Grain interests and those of the Cornforth Grain Co. there has come into existence the Seley-Cornforth Grain Co., which is incorporated for $50,000. The huge warehouse owned by the Seley interests will be utilized and a big grain elevator is to be installed. This big warehouse gives 20,000 square feet of floor space. The principal stockholders in the new firm are C. M. Seley, I. W. Seley, Judge H. M. Richey, F. R. Cornforth and J. M. Henshaw. Mr. Cornforth will be manager.

WISCONSIN.

Bruce, Wis.—Edward Ludwig will erect a flouring mill this summer.

Amherst, Wis.—The Jackson Milling Co. is planning extensive improvements on its property here and also at Nelsonville.

De Forest, Wis.—The De Forest Grain & Feed Co. has filed articles of incorporation with the secretary of state. The capital stock is placed at $20,000.

Menasha, Wis.—T. D. Wheeler has disposed of his interests in the Menasha Wholesale Co., grain, flour and feed dealers, to John Hoheisel. The business has been placed in charge of E. V. Weber.

Poplar Grove, Wis.—The Poplar Grove Farmers Co-operative Co. has been organized by farmers of this place and vicinity. The new company has purchased the elevator and mill of Warren M. Webster and will engage in the grain and feed business. The capital is $20,000. E. B. Greenlee is president; Fred W. Marrett, vice-president; and John Foley, secretary and treasurer. D. A. McIntyre will be manager.

WASHINGTON.

Tacoma, Wash.—Wm. Irons of Portland is the new manager of the Puget Flouring Mills. He succeeds Ralph B. Smith.

Palouse, Wash.—The Pacific Grain Co. has closed a deal for the purchase of the warehouses and business of the Farmers Warehouse Co. at Fallon, on the Northern Pacific, four miles south of Palouse, Wash. The consideration is $3,750

WYOMING.

Sheridan, Wyo.—Fire of unknown origin destroyed the grain elevator and flour mills of the Denio Milling Co. here. Loss is estimated at $250,000.

CASH PRICES FOR GRAIN.

Provisions, Etc.

CHICAGO PROVISION REVIEW.

CHICAGO, July 14.—Conditions in the hog and provision trade favored higher prices based on the advances in hogs and grain, but otherwise they were not so much so as in recent weeks. The volume of business is spasmodic and somewhat larger than of late with interest mainly in lard. Prices advanced to new high levels for the present deliveries traded in and closed at practically the top for October with an advance of 47½c, while September gained 22½c, being 17½c under the high point, and July, after a range of $1 with the top $35.45, finished at 25c below that point with a loss of 5c for the week. Short ribs closed 15 to 30c below the high point with losses of 22½c on July and 2½c on September. Pork gained 10c for July, but trading in it was light, while September, after advancing $1.30, closed within 5c of the best prices and a gain of $1 for the week.

Hog prices and product are out of line and there is a good loss in manufacturing regular product, the loss the past week being somewhat widened by the regular movement of hog product and the steady advance in hogs, which put everything out of line.

Export business in refined lard was of liberal proportions with one order here on Friday for 1,000,000 lbs. that brought around 36½c at New York, while some sellers asked 37c. Loose lard sold at $1 under July. With the present cost of labor, a local packer figures that it cost $1.21½ to tierce the lard. A few years ago the cost was around 20c. That July lard should weaken and the September and October, which were practically even with July at one time advanced, created an uneasy feeling, as the July went to a discount of 32½c from the deferred futures, was taken by some as indicating a slower export demand. Removal of the German blockade had no material effect on the buying power that came into the market.

Business in short ribs was disappointing to those who were favorable to the buying side and selling by tired holders with a lack of new speculative buying carried prices off, while in lard there was enormous selling for profits, which, in some instances, were very large. Short sellers covered on the advances and sustained serious losses. Southern demand for meats is disappointing, as the South apparently has abundant supplies. A little export business was on, but at the same time an English house having product sold to that country was asked to defer shipping until current supplies had been decreased.

The interest in pork was limited, with the bulk of the business in September. Hog supplies were liberal and it is expected that the fall run will be 5 to 10 per cent better than last year.

Kansas City Provision Review.

KANSAS CITY, July 12.—Further advances were scored in provision prices on the market in Kansas City this week, with sales being made at the close around the high point. While demand lacked vigor, packers and other provision interests reported a moderate volume of sales. The East was a good buyer of fresh pork, absorbing the light shipments made to that territory. Local demand for fresh pork was fair to light, buying being restricted by high temperatures prevailing in this territory. Better grades of smoked meats continue to move into Kansas, Missouri and Nebraska for consumption by wheat harvest hands. Lard was quoted ½c higher for the week. Fancy hams and bacons sold well, closing ½c higher. Dry salt and heavy smoked meat were in good demand, following the general trend of prices.

Weekly Movement of Provisions.

Following were the receipts and shipments of provisions at Chicago for week ending July 12, 1919, and since Oct. 17, 1918, as compared with the corresponding time in 1918:

Received.	For week.	Since Oct. 27, 1918.	Same time 1917-18.

Live Stock Market

CHICAGO LIVE STOCK.

CHICAGO, July 14.—The $23 hogs producers have been talking abou a long time materialized Satu numerous sales being made at tha ure, and showed an advance of above the high point of the prec week. Average price on Saturday $22.30, compared with $17.75 last Average for the week was $21.95 highest known, or 65c above the ous week, compared with $17.20 year. It was also $11.75 higher tha eight-year average. Trading thr out the week was at the highest in the history of hog trading. Shi were heavy buyers, taking more th any time for this period in July, dians being active. While the big ers were only moderate buyers, alth their purchases were 151,500, com with 105,500 the previous week 140,300 last year. The Armour in took only 31,100, Swift 35,900, 11,900, and Wilson 11,000. Total re here were 152,442, against 148,16 year. Shipments were 26,421, a 10,892 last year. Average weigh 239 lbs., the heaviest since last Se ber, compared with 239 lbs. the pr week and 243 lbs. last year.

It was a better week for the men with steers up 75c to $1.25 an cies sold at $2 over the recent low Top prices for the week were $17.5 highest since May, and were Thursday, compared with $15.7 previous week and $18.10 last yea erage price of beef steers for the was $15.10, against $13.85 the pr week and $16 last year. Cows an ers advanced 50 to 75c for the with the close firm. Offerings we so heavy and demand better. steers sold up to $15.50, with many at $15, but comparatively few brought more than $13, except fa with sales at $13.50@14. A greate of the cows and heifers ranged be $9.50 and $12.10 with an avera $10.80, a gain of 35c for the week.

Bulls were in active demand all sorts of buyers with prices u for the bulk of sales, with fair t at $9.50@9.75 and common do $8.50, with the range $8.50@11. the average $10.25, or 90c higher the previous week. Bolognas av $9.40, against $8.70 the previous Canners and cutters averaged $ gain of 20c. Calves were in acti mand, shippers buying freely, ow Eastern markets being higher. prices were $19.25, the best sinc September, and the finish was 35 higher for the week. Average $18.75, a gain of 75c.

Stockers and feeders were in demand and prices were little ch Choice sold up to $12.90, with co tively few above $11.50, and the l sales at $10@11.40, with an aver $10.70, or 15c better than the pr week. Arrivals here were 56,195, a 63,466 last year.

Supplies of sheep and lambs larger at $1.12, being 112,369, a 73,075 last year. The top pri sheep were $10.50 and the bulk o at $8@10.25, with the average $9 25c higher than the previous we compared with $12.25 last year. were 25c lower with the top $17 10c under the previous week, an pared with $19 last year. Bulk o were at $16.75@17.50, an aver $17.10, or 30c higher than the pr week and $1.60 lower than last The twenty markets had 297,300 for the week, or 27,000 more th previous week.

Receipts of hogs at the twent kets were 724,500, against 543,0 previous week, and cattle 2 against 175,200 last year.

Estimated receipts at Chica this week: Cattle 63,000, hogs 1 sheep 110,000. Receipts last year tle 78,962, hogs 142,841, sheep 82.

Kansas City Live Stock Market.

Sanders Sosland, Correspondent.

Kansas City, July 12.—Further general provement in prices was witnessed in e Kansas City trade in live stock this ek, despite the fact that receipts of gs and cattle increased. The sheep vement was reduced. Only hogs showed gain in arrivals over the total of a year). Harvest work in wheat fields was factor in the light movement of cattle. d it is expected that the coming week l bring larger offerings.

dvances of 50 to 65 cents were scored hogs, the market reaching a top of .35, a new record, with light weights ing to best advantage. At the close average cost of droves was slightly in ess of $22. A year ago the top on hogs $17.70. Demand was general, with ppers good buyers, although the premi- on porkers here as compared with cago a part of the week restricted the side buying. Some light, fancy hogs e taken here to go to packers in the rior of Kansas. Demand for stock pigs exceptionally strong, with supplies not al to the demand. Besides the pigs, sows weighing 150 to 200 pounds are g back to the country for feeding. k pigs sold up to $21.50, a record price. itial receipts of cattle from the dry itory in Wyoming were a feature of market for cattle. Reduced supplies n Kansas, however, made the week one moderate arrivals, the total receipts g only 34,400 head. Wyoming cattle up to $11.50. Idaho and Oregon also supplies. Kansas wintered grassers up to $14.50. The top on steers was 0, against $18.35 a year ago. Calves as high as $17.25, closing $1.50 higher, ving the sharpest gain. The market eneral was 50 to 75 cents higher and uch as $2 over the low time in June. s sold up to $12, and heifers up to 5. Demand for stockers and feeders oved, with the light supply selling 25 cents higher. Pasture conditions in Southwest are good, which is en- aging holding of cattle from market urther gains.

eep and lambs gained 50 cents, and s sold up to $16.85. Shorn ewes closed o $7.50, and clipped lambs up to $12. lings closed at a range of $10 to $12. ding ewes were strong. Demand for ng stock improved.

St. Louis National Stock Yards.

H. L. Wyatt, Corresondent.

tional Stock Yards, Ill., July 12.—Our e run this week was very moderate. this condition following the light re- s of Fourth of July week has had the t of sending the market skyward on illing kinds. Beef steers are $1.50 to gher than a week ago, the advance most marked on the medium handy ht kinds. The top was made on a of long yearlings weighing a little r than 900 pounds, which brought $16. h was almost equal to the best price this year for this class of cattle.

ere is a sharp contrast between the er and feeder trade and the slaughter trade. On some of the better offer- in this class the market was higher mpathy with the butcher market, but e medium and common kinds the trade he week has been dull and barely y in tone. Some good south Texas are still coming and we expect the ment of Oklahoma cattle from the nation will begin perhaps within the week or ten days.

hog market continues very active igh prices still prevail, $22.75 being for 220-lb. hogs on Monday of this and while there has been some lit- ctuation, the general basic price has lose to steady for the entire period. uality of the offerings has been fair. veek's closing quotations are: Mixed utchers, $22.15@22.60; good heavies, @22.65; rough, $18@20.75; light, $22.20); pigs, $16.25@21.50; bulk, $22.15@

re has been a right fair supply of and lambs during the entire week he market averages pretty close to with a stronger tendency. The best we are receiving are coming from cky, and they topped the market this at $17. The feature of the market is sistent demand for good breeding They seem to be wanted in all por- of our territory.

Omaha Live Stock Market.

uce McCullough, Correspondent.

h Omaha, July 12.—Cattle receipts eek have been about 22,500 head, was not at all heavy for this time year. The market scored one of the st advances in the history of the and closing prices for beef steers ll of $1@1.50 higher than the week is and fully $2@3 higher than at the me a little over two weeks ago. corn-fed beeves, both heavy and re selling at $15.75@16.25, with fair l kinds largely at $14.75@15.50 and mmoner grades from $14 down. a few western grass cattle arrived the week and sold about $1 higher, the beeves bringing $13@14. Cows fers shared in the general improve- showing an advance of 50c@$1 as ed with a week ago. The range es is practically from $5.50@14.25, good butcher stock going largely @11. Veal calves were half a dol- her for the week, the best beeves 16@16.25. There was also consid- mprovement for the outlet for bulls, etc., and advance of 25@50c in the range being from $7.50@12 50. y for stock cattle and feeding was better than it has been any time recently and indications are that the outlet will be somewhat broader from now on. Prices ruled about 50c higher for the week, with best fleshy feeders bringing $12@13. Ordinary stock cows and heifers as well as stock steers were rather slow sale all week at unimproved figures.

Although hogs have been coming to market more freely than at this time last year, there were no indications of any let-up in the demand and values closed 50@75c higher for the week. All classes of buyers are favoring the lightweight loads and discriminating sharply against the rough and heavy hogs, so that the range of prices is wider than it has been for some time. There were over 10,000 hogs here today and the market averaged not far from steady, best lightweight loads bringing $22.25, the highest price ever paid on this market. Bulk of the trading today was at $21.60@22.

The run of sheep and lambs has been fairly liberal, but owing to healthy competition from the feeder buyers the market has been active and strong most of the time and values are around 25@50c higher for the week. Best fat lambs are selling around $16.50@17.25 and best feeder lambs around $13.50@14.25. Yearlings are going at $10.25@11.25, wethers at $9.25@10.25 and ewes at $6.50@8.50.

Ft. Worth Live Stock Market.

Roy C. Murphy, Correspondent.

Ft. Worth, July 12.—Another week of relatively good prices featured the trade in the cattle division. Receipts have been somewhat larger, but the demand has been ample to take care of exerything without forcing salesmen to peddle. In fact, the market has been decidedly the most active experienced within recent months when receipts have been as liberal as those of this week.

Best fed steers are now selling around $13.50@13.75. South Texas cattle of cake and grass feeding sold at $12@12.75, and good grass cattle cleared as high as $12.10. One car of choice cows brought $10.75, and a large number of consignments have gone at $9.50@9.75. Choice heifers reached $13.50. Four or five carloads of calves notched $16, as against an extreme high range of $15 for all previous years, and a top of $14.75 for all other months of the present year.

The hog market has also been a stem-winder and the week closes with an advance of 50@60c. Early in the week the $22 basis was reached. This was later boosted to $22.25 and on Friday several consignments sold at $22.35. Receipts have been very meager and large numbers of hogs are being brought in from other centers, Armour & Co. having received two trainloads direct this week from Sioux City. Pigs are selling around $1 higher than at last week's close, the best clearing at $19.50@19.60.

Oklahoma Live Stock Market.

Thusnelda Haehnke, Correspondent.

Oklahoma City, July 12.—Our market this week has been exceptionally good. prices being higher on almost everything. steels brought higher prices here this week than they have for five weeks. The top was $12.75, which was paid on some Texas steers on Monday. Although the runs were not as large as could have been handled, everything went satisfactorily, and prices remained steady throughout the week, being called 50c higher the fore part. Salesmen here were alive to the fact that the packers needed more killing cattle and they were right there on the spot early, natives forming the bulk of the run for the week. The market closed with a lighter run and the prices going on a steady basis.

The hog market has rapidly been climbing to the top. The $23 mark was not so very far off, $22.30 being paid Saturday and the market was called $1.50 to $2 higher than a week ago. The week closed steady on hogs, although they are very scarce here.

Canadian Livestock Market.

Winnipeg, July 10.—At Winnipeg select hogs were steady at $22.50 throughout the week. The cattle trade was only fair and but few steers made the top of $12, the prevailing prices being from $9@10.25. At Montreal prices were strong on all classes of butcher cattle and some loads of very good steers brought $13@13.75 per cwt. early in the week. Select hogs ruled $22.50 per cwt off cars although a few sales were made at $23.

Receipts and Shipments.

Receipts and shipments of live stock at Chicago the past week compare as follows:

	Hogs.	Cattle.	Sheep.
Receipts—			
Past week ...	192,525	61,140	131,712
Preceding wk.	115,787	44,567	61,640
Last year ...	157,809	60,110	63,604
Shipments—			
Past week ...	30,546	20,698	21,974
Preceding wk.	18,884	13,408	9,020
Last year ...	19,981	12,296	7,402

Corn-Fed Hogs.

The season for choice corn-fed offerings is quickly coming to an end and with anything like a fair demand prices should continue on a high basis but consumers are balking at the price they are being forced to pay and although trade does not appear exactly top heavy, nevertheless quotations look dangerously high and as some of the learned experts assert prices are riding for a fall. —*Clay, Robinson & Co.*

WANTED and FOR SALE
GRAIN DEALERS' MARKET PLACE

For Buyers and Sellers of Elevators, Equipment, Grain, Seeds, Hay, Feed, Flour, Millfeed, Beans, Produce, etc.

25c Per Printed Line

ELEVATORS FOR SALE.

25,000-BU. ELEVATOR, electric power, ood coal and feed business, located in est farming district in Iowa. Address OAL, Box 2, Price Current-Grain Reorter, Chicago, Ill.

ELEVATOR FOR SALE—Capacity 25,000 ushels. International farm machinery conract goes with the deal. Price $12,000. ash $7,000, balance terms. Big grain point nd good machine business. Max, N. D. ddress **E. BALSUKOT,** Plaza, N. Dak.

MACHINES FOR SALE.

FOR SALE—One No. 8 Bowsher feed ill in perfect running order. First perm sending check for $50 will get this achine. Price F. O. B. cars point shipent. **GOODRICH BROS. H. & G. CO.,** VINCHESTER, IND.

MACHINES FOR SALE.

ONE FOSSTON 70" Elevator Cleaner, n use three months. Machine in first ass condition. Reason for selling, larger leaner wanted. **J. M. RIEBS, JR.,** 407 litchell Bldg., Milwaukee, Wis.

FOR SALE—One 25 H. P., one 35 H. P. nd one 45 H. P. Miami Gas Engines, in xcellent condition. Address The **SHARTLE ROTHERS MACHINE CO.,** Middletown, hio.

FOR SALE—One No. 8 Bowsher Feed ill in good condition, new burrs. $50.00. One Number 18B Halstead Grinder. Good orking condition. $50.00.

One 25 H. P. Kerosene burning Ohio otor in splendid condition. Economical n fuel. Very powerful. Only reason we re trading is to put in electricity. Price n application.

One 20 H. P. Alamo Gasoline Engine. 100.

One five ton Fairbanks-Morse Wagon ale in good condition. $80.00.
ICHIGAN BEAN CO., 6 Grand River Ave. Port Huron, Mich.

FOR SALE—A 30 H. P. "Frost" steam ngine and boiler in good running order. ddress **EMDEN FARMERS GRAIN CO.,** mden, Ill.

SCALES FOR SALE.

ONE RICHARDSON automatic scale uipped with continuous and type registring counters. Scale in absolutely good ondition. **W. C. BAILEY,** 433 Railway xchange Bldg., Omaha, Nebr.

ONE RICHARDSON AUTOMATIC CALE, 1916 type, in first-class condition, elling because we are replacing with a n-bushel machine of the same make, as e need larger capacity. Address **FARMRS ELEVATOR COMPANY,** La Crosse, id.

FEED STORE FOR SALE.

Doing good business, mostly cash, no elivery. Established corn meal trade. so feed grinding, large warehouse, good cation. Address **CALVERLEY & CO.,** St. Louis, Ill.

OFFICE SUPPLIES.

BURROUGHS ADDING Machine $110.00; arly new Underwood typewriter $50.00; w $45.00 check writer $25.00. Liberty onds accepted. **MEIER SEED CO.,** Russll, Kans.

FOR SALE—Burroughs, Wales, Amerin, Dalton, Standard, etc., adding maines, half retail prices, fully guaranteed. ypewriter bargains, all makes. Get illusated catalog and bargain list. **MINNEOTA TYPEWRITER EXCHANGE,** Dept. C. 236, 4th Street South, Minneapolis, inn.

ENGINES WANTED.

WANTED — Second-hand gasoline enines. Fairbanks-Morse and Otto preferred. escribe and state price wanted. Address **NGINE, BOX 1,** Price Current-Grain Reorter, Chicago, Ill.

HAY FOR SALE.

FOR SALE—Elkhorn Valley Hay in carad lots. Write for prices. **HARRY T. TEIN,** Ewing, Nebr.

OPPORTUNITY.

Have several opportunities to place men managers of community flour mills at od salaries if they will invest $2,500 in e working capital, for which they will ceive quarter of the net profits, additnal to their salary. **CHARLES T. EAVEY,** Webster Bldg., Chicago, Ill.

EXCEPTIONAL OPPORTUNITY.

FOR SALE—It is only through the failing health of the principal stockholder of one of the best general grain, feed manufacturing, corn milling and flour jobbing business that the good will, corporate name and properties are offered for sale. Large dividends have always been paid and well established brands developed in one of the best locations in the central states, assuring under proper management the continuance of big business. Several buildings, the value of which is enhanced at present material and labor prices; a flour jobbing trade of importance and business in grain, stock feeds, hog feeds, etc., is offered. The large business already established and the future prospects for this line of business makes this an exceptional business opportunity. Address **OPPORTUNITY,** Box 4, Price Current-Grain Reporter, Chicago, Ill.

OPPORTUNITY.

WANTED BY a long established conservative grain commission firm, several experienced traveling men of good address and habits. One for Iowa, others for Kansas, Oklahoma and Nebraska. Must have experience and established trade and be able to show results. Address **B. C. CHRISTOPHER & CO.,** P. O. Box 590, Kansas City, Mo.

OPPORTUNITY.

½ INTEREST in 10,000 cap. elevator and 250 ton coal bins; 3,000 bu. corn crib detached from elvtr. Ground feed wareroom. Situated on Wabash R. R. ground. Retail trade now running better than $10,000 a month with prospects of doubling. Stock will invoice $6,000. Good, prosperous town. Price $5,000. Closest inspection invited. **C. W. GLYNN,** Sturgeon, Mo.

HELP WANTED.

WANTED — Superintendent for mixed feed plant in southern city, shipping fifty thousand tons annually. Must be capable of handling negro labor efficiently and must be an organizer with executive ability of high order. Only experienced, capable and energetic man with highest of references need apply. Adequate salary to right man. Address **STOCK, BOX 3,** Price Current-Grain Reporter, Chicago, Ill.

DEATH OF MAX PATTON.

Max M. Patton, president of the Taylor-Patton Co., Hubbell Bldg., Des Moines, Ia., one of the largest operators in the great corn state, died last week as the result of an operation for appendicitis. Mr. Patton was ill only from Friday until Wednesday, so that his death came as a great shock to his many friends in the trade and was the more regrettable as he was just in the prime of life. In addition to being prominently identified with the Western Grain Dealers' Ass'n, Mr. Patton was well known as a Mason and member of the Mystic Shrine. His widow, father, two sisters and three brothers survive him.

TRADE MENTION.

The Sawers Grain Co., Chicago, has published a grain map of Illinois, showing the acreage and production of wheat, corn and oats in each county, and the name and location of county seat. It is very interesting and valuable to those working in the state.

The Moore-Lawless Grain Co., Kansas City, has published a set of cards showing rates on all grains per bushel, with 3% war tax added, at all rates per cwt. from 5 to 22½c; also prices of all priced wheats and grade (1, 2 and 3) at Kansas City and Gulf Ports; and also the standard grade rules for wheat, corn and oats. They are fastened together and will be found very useful.

Raymond P. Lipe of Toledo, has sold his large hay warehouse at St. Albans, Vt. It is one of the best in the country, located near the Canadian line, and was of great service prior to the war in the operations of the company with Canadian trade and afterwards in both private and army hay contracts. In speaking on business generally, Mr. Lipe counsels caution in handling present high priced feedstuffs, unquestionably good advice to all, but particularly to those who have not seen as many normal and unusual years pass as has Mr. Lipe.

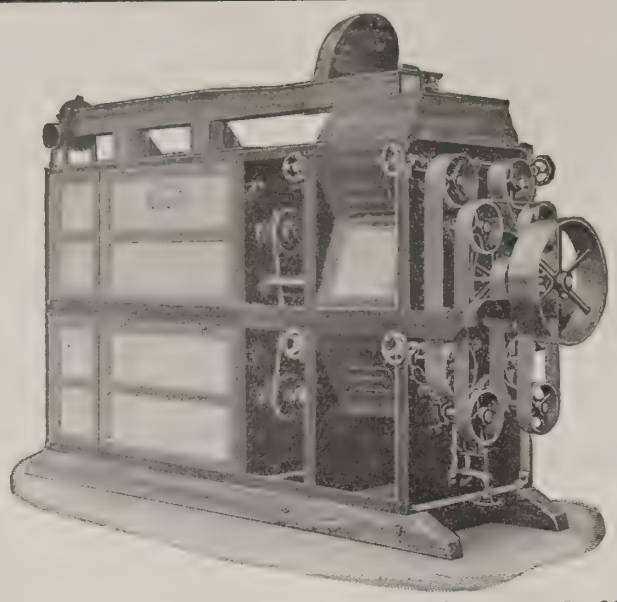
Operating in Hay at Chicago.

W. E. Haynes of the Nusbaum-Haynes Co., 90 Board of Trade, Chicago, Ill., when in attendance at the Detroit meeting of the National Hay Association, suggested that clover supplies would be large in Chicago territory this year. They are encouraged in this belief by such advice from their shipping and farming friends. This firm is a comparatively new operator in the Chicago field, although H. E. Nusbaum and Mr. Haynes have been conversant with hay and feeding grain business for a long time. It is, however, as reported by Mr. Haynes, gratifying to be told that the National Hay Association convention was of great benefit to those present. This bears out the contention always offered in THE PRICE CURRENT-GRAIN REPORTER, that to pass along good information to your neighbor and competitor is the best assurance of all 'round satisfactory business, and it is this class of trade the Nusbaum-Haynes Co. is endeavoring to build up.

RRP OATS CONTRACTS.

A rather unusual situation has arisen in Texas, particularly in the neighborhood of Waco, in connection with contracts for red rust proof oats. It appears (although it may be well enough known and understood in the South) that it is the practice of dealers in Texas, where the best red rust proof oats are grown, to contract with the farmers for the delivery of these oats of No. 3 grade or better, these contracts being entered into before the oats are sown, sometimes, and certainly before they are harvested and their quality can be known, the dealers then in turn contracting to deliver to buyers in the East, that is to say the Southeast, where these oats are largely used for seed as well as for general consumption purposes, to deliver No. 3 RRP oats or better. In ordinary years there is no difficulty in following out the sequence of contracts and deliveries, for the oats as a rule will grade No. 3 or better. But this year it happens that Texas has had an unusual amount of moisture, in the shape of rains, and now that the oats are harvested and are being delivered on contracts the oats are in many instances grading not above No. 4.

Many dealers have accepted the oats tentatively and forwarded them on their contracts to Eastern buyers, by whom they are being rejected as not up to contract grade, and in cases where a delivery of the contract grade cannot be made by the dealer, the Eastern buyer is entering suit for damages; and the dealer in his turn has in many cases begun suit against the farmer for default of his contract.



The first result of this state of things is that the licensed inspectors around in the RRP districts of Texas are finding life considerable of a burden at this time, because the farmers and dealers insist they are not getting square deals on the grading. Of course, the oats ought to be better, but the inspectors declare they are not, and inspection controversies are being put up to the district supervisors' offices and in some cases contested samples have been forwarded even to the Board of Review at Chicago for verification of the grading. In almost all instances the original licensed inspectors' grading has been sustained. The oats, undoubtedly because of the wet weather, have fallen down very materially in quality and the usual abundance of No. 3 or better grades is not to be found this year.

The situation is quite an interesting one and is peculiar in that the suits on contracts are running back to the farmers. It will be rather interesting to follow up some of these actions to know just how the farmer will come out in such a deal.

"See How Simply It's Built"

The elimination of complicated parts makes for ease of operation. Ball bearing construction throughout decreases power consumption. These two factors spell ECONOMY in big letters.

Furthermore, this simple mill is supreme in the ultimate test of efficiency.

It is built with a daily capacity of from 25 to 50 barrels, and we will allow any responsible party a reasonable time to try the mill, and if it is not perfectly satisfactory you may return it and all money paid us will be gladly refunded. Here is your opportunity, knocking at the door.

Why not get into business for yourself? Here's a chance for a struggling head or second miller to own a business of his own. Our terms are liberal to responsible parties. For further information write

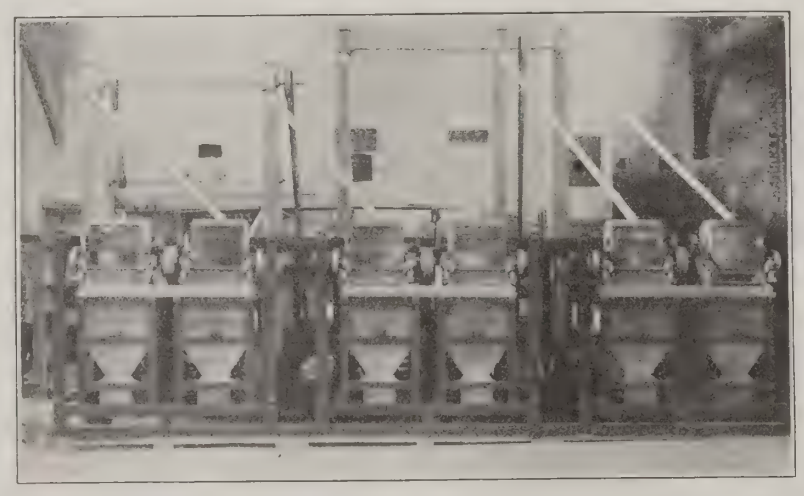
The XXth Century MILL MFG. CO.
DECATUR - ILLINOIS

Work! Work! Work!

That's the motto of "Handy Andy." Never gets tired. Never strikes. Never lets up until you say so.

"Handy Andy," the practical, portable, adjustable elevator, is the strong armed workman that lifts and conveys bags, boxes, bales and other packages without a complaint. Loads cars, loads wagons.

Light in weight. Sturdy in construction. Simple to operate. Saves money.

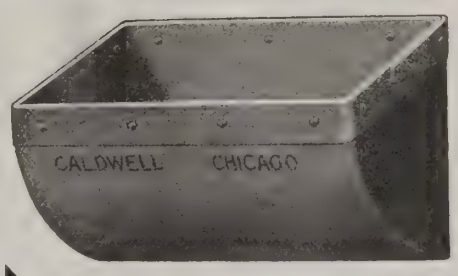


There is another model of "Handy Andy" for handling material in bulk.

Send for particulars.

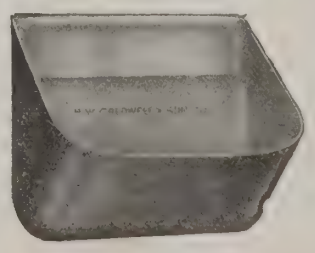
DOW WIRE AND IRON WORKS, INCORPORATED, LOUISVILLE, KY

Elevator Operators are fast realizing that profits are to be made through



MILLING WHEAT AT ITS SOURCE

A strict eye on the tailings and bran is the food program of the Nu-Way Mill. It occupies very small floor space; Uses minimum of power; Inexpensive to buy and to operate.



The Simplest, Most Practical, Most Economical Flour Mill on the Market

Cape Mill Manufacturing Company

BUSINESS AND TRADE CONDITIONS

BUSINESS is still laboring under the weight of labor's unrest and labor's unreason. In the New as in the Old World human progress is threatened with stoppage because of this pressure, an explanation for which can be found only in a misconception of the nature of the economic system which inevitably must order the material existence of men. This system, whether directed by "capitalism" or by socialism, by individualism or by collectivism, must in the very nature of things consist of "two complex operations, constantly interacting, known as production and consumption of wealth." The first must precede the second. Unless the raw materials which the earth contains or produces from year to year are first converted by labor into finished foods suitable for the use of men, as food, shelter, wearing apparel or instruments adapted to the varied necessities of daily life or for further productive processes, there can be no consumption.

But the war has completed the upset of all popular notions of this relationship. It disarranged industry in all parts of the world by diverting it from the making of goods to be consumed normally for the comfort and welfare of men to the making of goods to be immediately destroyed without rendering a permanent service, and disarranged consumption by artificially increasing it beyond the capacity of production as now controlled. The result has been a progressively intensifying scarcity of all kinds of goods for peaceful consumption. The reserves of these things have been used up; and now the world is facing a scarcity of all these things that men need to resume living in a state of peace. The fact that in our own country there is apparent plenty conceals the fact that from our own stores the whole world must be supplied until European industry is re-established. Unknown to most "men in the street," our great surplus, which should mean plenty and comfort for us, is going away from us as fast as ships released from war service can take it. And since in exchange for the goods we send abroad comparatively little but evidences of indebtedness is coming back which is ready for consumption, the scarcity of goods of all kinds in Europe is thus making itself felt here by the process of equalizing a diminished supply to an enhanced demand.

It ought to be clear enough to the thinking man that there is but one way to relief, and that is to produce more in order to relieve the scarcity and to conserve the available supply by economy in consumption until the reserves are replenished and Europe shall be producing her share. But there is no popular teaching of such a program. The daily newspapers temporize with the ubiquitous strike as cause to the high cost of living, but it is rare to find any of them an explanation for this high cost which appeals to common sense and does not encourage discontent due to misconception. The Administration itself is equally lacking in frankness of statement. The Department of Agriculture seeks a remedy for the cost of foodstuffs in its own control and direction of their distribution, while the Department of Justice and the Trade Commission play to the gallery, or the grand stand, by camouflage attacks on profiteering which amount to nothing for the very reason that the true kernel of the difficulty is carefully ignored, in the effort to gain political advantage by disingenuous concealment. No official document has yet appeared from Washington, at least so far as our own somewhat ponderous mail from official publicity sources has shown, which has contained one word of admonition to working men that their own cessation of work and their own system of limiting production below a normal and honest output without crowding while at work has any relation to the high prices they complain of and the difficulties of living on any wage, or that relief might proceed from greater industry and thrift in consumption. The working man is confusing, as he has always confused, the price with the thing itself—money wages with real wages in commodities; and therefore he thinks that the less there is produced and the higher the price the higher will be his wage and the sooner will he arrive at that "better life" which the politicians and the administrations of both England and the United States have told him will be the immediate result of the war. But he finds himself no nearer his desire in spite of higher wages, because in the meantime the scarcity of goods for which he is responsible is concealed under inordinate issues of credit and credit money, much of which, in Europe at least, is not far from valueless.

This has revived the theory that high prices of commodities are due to inflated credits and currencies rather than to actual scarcity and non-production of goods themselves. Mr. Eikenberry, in his address to the National Hay Convention, printed on other pages, has presented this theory quite plainly, as very recently restated by Prof. Irving Fisher; but even so clear a statement of the theory as that by Mr. Eickenberry is still so lacking in certitude that one cannot avoid the conclusion of Laurence Laughlin that the supposition that the acts of buyers and sellers, say of wheat, etc., are influenced in fixing the prices of their goods by calculations as to the total supply of money—and bank cheques—in the world and the rapidity of their circulation, is one which "goes on only in the minds of theoretical writers on money." The most natural assumption as to prices and one which the commercial world most readily accepts is that, when an article under free competition advances materially in price, the demand exceeds the supply. If this assumption is not correct, then the hitherto accepted influence of the law of supply and demand on prices has been and is entirely misunderstood and even the belief in that law, upon which nearly all business is predicated, may as well be abandoned. Prior to the war a great multiplication and cheapening of commodities was evident, wholly apart from the supply of money and the fact that the supply of gold was constantly enlarging, through new conditions of production and low costs of transportation by land and sea, such costs being due to progress in invention and discovery; while at this moment the known scarcity throughout the world of all consumable commodities and the high cost of transportation are a sufficient explanation for high prices. Why, then, reject "a universally accepted canon, alike in logic and common sense, that extraordinary and complex agencies should never be invoked in explanation of phenomena so long as ordinary and simple ones are equally available and satisfactory for the same purpose." It may, we think, safely be said that until workmen cease striking and everywhere resume production with a will to better their own position by making more plentiful the things they want and need, prices will remain high or go still higher and the difficulties of living will be made greater and still greater, life harder and still harder for the laboring classes. Any and all camouflage which conceals this fundamental fact can do no more than intensify the hardships which have come upon the world through and because of the war.

The political condition of Mexico has again become an acute nuisance, making it plain enough that the Carranza government, though it occupies the capital and controls the resources of the federal goverment, is but little nearer to supreme influence over Mexico than when Carranza entered the City of Mexico. Zapata still rules the southern states; the younger Diaz is not without influence in Vera Cruz, and no one quite rules the northern states, Lower California excepted, that state being quiet. Certainly the Mexico City government cannot, at least does not, protect persons and property from Villa bandits or other unattached bands operating on the water courses of Tamaulipas. How much all this disintegration of Mexico since Diaz is due to the maudlin diplomacy of Mr. Bryan and the indecision of the Administration later on need not concern any one not more interested in party politics than in national wellbeing. The internal politics of Mexico is in at least a nominal sense Mexico's own concern, not ours. Any people who wish to live under the kind of "democratic" government Mexico has had for about a century may be said to be privileged to do so without doing violence to the President's theory of the national "right of self determination." But the world has become so narrow and international comity so necessary to civilization that no government which itself interrupts or discourages that condition, or which permits its people or any considerable portion of them to become a nuisance to their neighbors, can expect non-interference by those neighbors. The United States went to war with Spain to end an intolerable situation at our side door, not worse than exists on the Rio Grande now. The arrangement the United States has made with Cuba free, which provides for neighborly good behavior on her part, stable self-government, payment of debts and respect for private property rights as well as regard for sanitary conditions, would be ideal, and we believe must eventually be repeated as to Mexico. It is an arrangement which the common people of Mexico who now have next to nothing to say about their own government would not object to and would be immeasurably benefited by. Some day American common sense will prevail over Washington politicians and sentimentality as well as over native bandits posing as political reformers; then Mexico will have a decent government, if such a thing be possible under any circumstances, but it will have to be guaranteed by the influence of the United States directly exerted.

Trade generally is in a peculiar condition—active in some lines, halting as to others. The natural impulse to go ahead and assume the Treaty ratified is held in check, obviously by the uncertainty that it will be ratified and also as to payments, in view of the state of foreign exchange, sterling exchange during the week having fallen to the lowest point on record; a condition which the chaotic condition of labor in England is to a considerable extent due, all industry being unsettled. New high price levels for cotton and other American raw materials have also had their influence in general. However, domestic trade has been good in spite of disappointing crop reports and the trying labor situation which translated into terms of consumption means that labor is consuming more and more of its share while its production is not enlarging at the same ratio. At Chicago all building has come to an end, although in other parts of the country it has been recovering rapidly in spite of high material costs. Food and commodity prices continue to climb for reasons given above and as they mount up the volume of money

climbs with prices, the July statement of circulation showing $54.28 per capita *vs.* $50.86 on July 1, 1918; $46.57 July 1, 1917; $34.53 July 1, 1914, and $16.92 July 1, 1879. The high volume of money may make the high prices, but it may also mean that high prices call for a proportionally large volume of the media of exchange.

THE HAY CONVENTION

THE Hay Convention at Detroit was up to all previous traditions of this capable organization. The attendance was very large in number, and among the men seen on the floor during the sessions and in the hotel lobby were most of the big men in the trade, including not a few men whose names have a national familiarity. The report of the convention elsewhere covers all the essential features which appeal to hay dealers as such, though some most interesting addresses not directly bearing on trade topics had to be omitted for want of space. Col. Jones's address is cut to a bare statement of physical and industrial conditions on the Continent, which is most valuable. Mr. Eikenberry's address, though long, should be read entire. We do not quite agree with his theory of the relation of money to prices, but the general tenor of his remarks will appeal to all those who put country above party and feel the need this country has of hard thinking by the common people and voters on economic conditions and their influence on our national life and future progress as a civilized state.

THE BEEF CRISIS

THE editor cheerfully gives space in "The Letter Box" to a communication from Ass't Sec'y Ousley which explains itself. The communication and the survey referred to therein do not, however, convince us either that there is a desperate shortage of meat to make the price so high to the consumer or so great a surplus as to endanger the producer; much less that it is necessary, either to increase the supply or to equalize its distribution, that the packing industry should be placed under the license control of the Department of Agriculture.

In the first place, as appears in an article in another place in these columns, a bureau of the Department, with which Mr. Ousley is not specially identified, has stated that "in the year 1914 the per capita production of meat *exceeded* the per capita consumption by only 7.25 pounds, while in 1918 it had increased to 30.5 pounds," an increase of excess home production in five years of 23.25 pounds per capita. This excess was absorbed by the European and army demand. An industry which can respond so quickly to an extraordinary demand upon it as has the live stock industry is in no particular danger, even when a sudden decrease of demand lowers the price of certain animals. The industry has simply followed or responded to natural law; and if the Agricultural Department would but use just common business sense and not rely so much on class room non-sense, it would recognize that fact and let the industry alone to follow the trend of the market just as all other producers and distributors do who hold their own in the struggle for existence.

Nothing can do agriculture much more damage than these purely factitious crises promoted by Government officials themselves, because they are rarely based on sound views of natural interacting relationships. The present crisis in the beef industry, such as it is, and it is by no means so serious as excitable departmental officials would have us imagine, is due to natural causes—a sudden cessation of a demand for export quickly met and profited by which was due to extraordinary causes current after June 30, 1914, when this country had practically ceased to export any beef, because as Mr. Armour has pointed out a cheaper source of beef supply had been found by European and English buyers in South America and Australia. Now that the war is over we have again practically ceased to export beef for obvious reasons, and its production must be permitted to return to normal again as it ought to do, if the business is to be conducted on safe and profitable lines. We cannot see how the situation can be a "menace to the farmer." If growing live stock be profitable he will produce them, otherwise he will not. Why should it be otherwise? It is all tommy rot to say "stockmen should not be penalized for their patriotism." Ninety-nine per cent of them went into cattle because it paid to do so. They took the usual business chance which all producers take; they made their profit; and now they must adjust themselves to peace conditions. There is nothing wrong or nationally harmful or unjust in that. And barring the few who always respond sympathetically to the vicarious stomachic distress of the various talking members of the Department of Agriculture, farmers are doing so. The cattle industry still is and will be to the end of time.

GUESS VS MEASURING

A TYPICAL feed manufacturer, located in one of the Central States, giving much thought and spending considerable money in the development of hog feeds, recently reported the results of an interesting test. It was conducted on the farm of a skeptic who had fed corn from his boyhood days and knew there was nothing like corn. He scoffed at the idea that the expense to grind, mix and sack a balanced hog feed would be justified by its greater productiveness of bone, meat and fat. However, after consenting to try out a ton, he put fifteen shoats in one field and a like number in an adjoining field, thereafter carefully weighing the corn and tankage for one lot, and checking it up against the ton of feed consumed by the other bunch of shoats. He was so completely convinced when the latter had been finished that he had been all wrong for many years that he volunteered the statement that the balanced ration hogs when finished would net $5.00 each more than the others. He went further, as have others who are frank enough to admit their errors, by stating that the trouble with most farmers who feed corn and tankage is not in the difference in the finished hog, but the fact that they did not know how much corn had been fed, but simply guessed at it.

TAMPERING WITH CERTIFICATES

THE Secretary of Agriculture, through the Bureau of Markets, has begun the publication of "findings" on complaints of violations of Sec. 5 of the Grain Standards Act. This section forbids the misrepresentation of the grade of any lot or parcel of inspected grain by in any way changing the certificate of inspection or by invoicing the grain to the buyer or consignee differently from the showing of the said certificate. The section provides that the respondent to a complaint of such offending may be accorded a hearing, and after such hearing the Secretary "may publish his findings." Such publication by the Secretary is the sole penalty provided for violation of the inhibitions of the act.

In *Service and Regulatory Announcements* No. 56, bearing date July 7, "findings" in three cases (dates prior to September 25, 1918) are published. In two cases there was deliberate misrepresenation in invoices to the buyers of the grades placed on the grain by the inspector; in the other case there was a deliberate forgery of the inspector's certificate which was changed from "No. 3" to read "No. 2," and the forger admitted, "I did it." In this case, as we happen to know, the offender lost his license and has since been unable to procure its renewal, and was told by a certain zone agent that instead of being in the grain business he ought to be in the penitentiary.

These we have reason to know are not the only cases on which hearings have been held and "findings" arrived at, nor are they the only ones, the findings in which will be published. The officials have been lenient so far because the law has made a radical change in some aspects of grain marketing and has been unfamiliar. Moreover most dealers complained against have made settlements. In some cases where settlements have not been made suits may yet be instituted in the name of the United States *ex rel.* John Doe *vs.* Roe.

In other words, it is the purpose of the Government to make Sec. 5 at least a moral influence in the grain trade and enforce it so far as it can be so enforced, by publishing offenders as tricksters if not as downright scoundrels, as in the case of a man who utters a forged certificate. And it may be confidently assumed that hereafter, now that the trade has had time to familiarize itself with the Act and the Rules and Regulations, it will be inviting as serious trouble to ignore Sec. 5 as it will be to violate Sec. 4 and Sec. 7 providing fine and imprisonment for tampering with the inspectors themselves.

WEEKLY STATISTICAL SUMMARY.

The following tabulation is a summary of figures from various statistical exhibits appearing weekly in detail in "The Price Current-Grain Reporter," these figures representing the past week, the preceding week and corresponding time last year, here assembled for ready reference:

	July 19.	July 12.	July 20, '18.
Wheat—			
Primary receipts.....	7,701,000	2,801,000	9,647,000
Primary shipments....	1,386,000	838,000	2,291,000
Receipts since July 1.	11,523,000	3,832,000	16,115,000
Visible	6,482,000	5,297,000	3,574,000
Available, July 12....	6,523,000	8,009,000	2,346,000
Canadian vis., July 12	11,423,000	12,806,000	6,137,000
Exports, U. S.....	7,977,000	8,278,000	3,613,000
Exports, world's.....	12,544,000	12,946,000	10,130,000
Corn—			
Primary receipts.....	3,100,000	3,436,000	5,857,000
Primary shipments....	1,856,000	2,554,000	2,280,000
Receipts since Nov. 1.	143,007,000	139,907,000	227,387,000
Visible	3,849,000	4,036,000	10,023,000
Exports, U. S.....	47,000	.....	771,000
Exports, world's.....	1,800,000	832,000	799,000
Oats—			
Primary receipts.....	5,000,000	5,178,000	5,970,000
Primary shipments....	4,104,000	3,926,000	4,026,000
Receipts since Aug. 1.	288,548,000	283,548,000	330,424,000
Visible	17,968,000	18,923,000	10,178,000
Exports, U. S.....	1,005,000	1,874,000	2,332,000
Exports, world's.....	1,032,000	1,874,000	3,071,000
Cattle—			
Receipts, 6 markets...	230,000	160,000	260,000
Shipments, 6 markets.	64,000	48,000	47,000
Hogs—			
Receipts, 9 markets...	515,000	611,000	515,000
Shipments, 9 markets.	147,000	181,000	125,000
Sheep—			
Receipts, 16 markets..	352,000	327,000	227,000
Shipments, 16 markets	148,000	108,000	76,000
Hog Slaughterings—			
For the week.....	547,000	615,000	581,000
Since Mar. 1, 1919....	12,741,000	12,194,000	12,164,000
Exports—			
Meat, lbs.....	44,716,000	39,639,000	32,043,000
Lard, lbs.....	11,119,000	15,271,000	9,934,000
Livestock prices, Chicago—			
Cattle	$16.00	$15.10	$16.20
Hogs	21.85	21.95	18.00
Sheep	9.80	9.05	13.40
Lambs	17.75	17.10	18.25
Hogs, av. wt., Chicago	242	239	244
Closing prices—			
Pork, July.....	$53.40	$54.00	$45.40
Lard, July	33.75	35.10	26.12½
S. R. Sides, July.....	28.00	28.50	24.45
Corn—			
July $1.90		$1.94¾	$1.49⅝-¾
September	1.90⅝-⅞	1.95½-¾	1.51⅞-52
December	1.61⅜-½	1.64⅝-65	.....
Oats—			
July $0.80¾		$0.79	$0.73⅝
September	.80¾-⅞	.78⅞-79	.68¾-⅞
December	.82⅝-¾	.80¾-81	.....

EDITORIALETTES

RYE mixtures with wheat are giving wheat buyers considerable trouble. It will require a nice inspection of offerings to find the percentage of rye in the mixtures but it must be done if the buyer expects to play safe.

THE fear expressed by Mr. Barnes that this country may not this year harvest enough wheat "to go round" is not one to cause worriment; still, unless the grades below No. 3 bring more on the sample table than now expected, there may be more wheat fed to stock in the Southwest than counted on six weeks ago. Feeders generally expect now to substitute low grade wheat for high priced corn.

THE agricultural appropriation bill just passed by the house, minus day-light saving repeal, contains an appropriation for the Bureau of Markets to "certify to shippers and other interested parties the quality and condition of hay." This will of course mean standard grades and rules and regulations, with possible junking of the admirable grades and inspector-supervision system developed by the National Hay Association in response to natural law of progress in the hay trade.

The character and ıber of advertisements in its columns tell ts worth. If you would be classed with leading firms catering to the grain trade, e your announcements in the trade's only kly, which is always first to get the live, o-date news to its readers.

DVERTISEMENTS of meritorious grain ator machinery and supply houses and of onsible grain firms who seek to serve n dealers are solicited.

CHICAGO, JULY 23, 1919.

GRAIN TRADE REVIEW

Grain prices are nearing a level ere some students of conditions fear period of price-fixing may be at d. The cause of this is found in the eral business situation. Capital and or are now engaged in a real con- versy over wages. On the one hand nufacturers are confronted by the stantly increasing labor cost and are inning to go slow in granting the ands of the wage earners, while the er look only to the persisent in- ase in the cost of living. Inasmuch the high prices for foodstuffs are one se of the unrest, sooner or later the iticians may be expected to act. e appreciation of prices has been ng on for some years now, and while re have been setbacks, corn and oat ures have moved upward until they now about the highest ever known, eating the historical fact that the hest figures are made immediately er a big war rather than during the iod of hostilities.

During the war the Government ac- mulated an immense stock of food- ffs and other commodities, partly as reserve and partly to take care of at appeared to be probable future uirements. While the Government ured immense supplies it was at the ense of the rest of the country ich has been unable to accumulate erves which under normal conditions as a balance wheel. Without the er prices can go almost anywhere. only are the reserves in this coun- exhausted, but those also through- the world, everything having been rificed during the war. Supplies ght at a comparatively low price e been consumed, and the country now being forced to pay for fresh ds produced at a much higher cost. re the Government to resell some ts immense surplus, as it is now ap- ently trying to do and should do, it uld act as a check to further ad- ces, although no great recession is bable until there is a surplus of com- lities of all kinds.

t one time it appeared as though re was far too much wheat in ex- ting countries for import require- nts of Europe, but developments of past few weeks have shown some change in conditions, and no doubt the excess is not going to be so heavy. Europe may have sufficient wheat to only require around 600,000,000 bus. from the surplus sections, but drought has materially reduced the crops of all feeding grains and fodder crops are also short. The United States has seen the prospect for a yield of around 1,300,000,000 bus. wheat gradually fade away until now it appears rather doubtful if 1,100,000,000 will be harvested. Threshing returns on winter wheat are a distinct disappointment as to yield, and especially so as to quality. There was straw enough for two crops in some sections, but only half a crop of wheat was secured. However, there is enough wheat in this country, even with a crop of 900,000,000 bus., to supply all needed requirements at home, and allow 300,000,000 bus. for Europe, the latter figure being around the outside possible clearances on account of the inability of the leading ports to load out more grain. How Europe expects to secure large amounts of feeding grains in addition is not now clear, especially in view of the exchange situation. Ships are still more or less under Government control, and could be furnished perhaps, but exchange has dropped to the lowest point known, and the purchasing power of the European countries has been curtailed in proportion.

Spring wheat is not doing as well as expected on either side of the international line. Blight has caused a considerable reduction in the prospect in the three Northwestern states. Black rust also prevails, but the damage from the latter will depend on weather conditions from now on. There is still time for damage to be done. The entire country is beginning to need rain. Drought that some weeks ago was confined to a small section of Montana and western North Dakota has been gradually spreading and now it is at the threshold of the main corn belt.

The corn crop now hangs in the balance. Soaking rains are needed in many sections and unless they are received shortly the corn crop may fade away as did the wheat and oats. Central Illinois has started to complain of the continued drought, and with the plant in tassel hot winds could do considerable damage. There is still a prospect of a near bumper crop providing moisture is received, but each day is reducing the prospect.

An average oat crop is expected this year, hardly more. Blight and hot weather at the wrong time materially cut down the yield, and threshing returns from the more southern sections of the belt show relatively small returns in bushelage and lightweight grain. It is seldom that Texas begins to ask for offer of oats at this season of the year, as the new crop has just come on the market, but this was witnessed the past week. In addition the South bought the cash grain, and foreigners bought cash and futures. The Argentine corn surplus does not promise to be available for shipment for some time, being very wet, and the commercial volume will be materially cut down unless there is a let-up in the continuous rains which have prevailed for weeks past.

Grain Market Summary.

Primary receipts of wheat, corn and oats for the week follow:

	July 19, 1919.	July 12, 1919.	July 20, 1918.
Wheat	7,701,000	2,801,000	9,647,000
Corn	3,100,000	3,436,000	5,857,000
Oats	5,000,000	5,178,000	5,970,000

Combined primary receipts of wheat, corn and oats for the past week and for the season to date, with comparisons, as shown by THE PRICE CURRENT-GRAIN REPORTER:

	1919.	1918.
Past week	15,801,000	21,474,000
Preceding week	11,415,000	13,321,000
Since July 1	33,684,000	44,854,000

December corn sold at a new high level on the crop the past week, but the old deliveries were inclined to drag and failed to get into new ground. Trade in the July and September is gradually going into the December, which offers a safer medium for operations, and reflects to a greater extent the laws of supply and demand. Crop reports on the whole were very favorable, but there is a wide territory that would now be benefited by rain. Economic conditions in this country and in Europe are attracting more attention, which was responsible for the erratic price movements. For the week fluctuations covered a range of 9¾@11c, with the close at net losses of 3½@4⅞c, the latter on September.

A big trade was on in oats with prices the highest known at this season for the September and December. Sentiment was bullish the greater part of the week, and while there was heavy selling for profits on the bulge and also some pressure from cash grain the close was at a net gain of 1¾@1⅞c. Some export business was put through, but the bulge carried values above a parity with the maximum import price of the United Kingdom. The decline in sterling exchange to a new low record figure had considerable influence. Threshing returns are distinctly disappointing.

Cash wheat averaged lower as the result of much larger receipts. Buyers less disposed to pay a premium over the basic figure at Chicago, although hard winter has been taken freely by mills at ½@1c premium. Buffalo buying here, and Minneapolis at Kansas City, dark hard in the latter market being in keen demand. Spring wheats much stronger on scarcity of supplies and less favorable crop prospects. Flour demand fair. Range of prices for the week follows:

			Close		
Corn—	High.	Low.	July19, 1919.	July12, 1919.	July20, 1918.
July	$1.98	$1.87½	$1.90	$1.94¾	$1.49¾
Sept.	1.97½	1.86½	1.90⅞	1.95¾	1.52
Dec.	1.67½	1.57¾	1.61½	1.65	.....
Oats—					
July	.81¾	.77⅜	.80¾	.79	.73⅝
Sept.	.82	.77⅛	.80⅞	.79	.68⅞
Dec.	.84½	.79	.82¾	.81	.....

Oat Stocks and Consumption.

Statement of the movement of oats and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Aug. 1	4,048,000	539,000	4,992,000
P. receipts to July 19	290,664,000	330,404,000	298,445,000
P. shipments to July 19	227,358,000	246,689,000	260,999,000
P. stocks on July 19	11,228,000	3,966,000	736,000
P consumpt'n to July 19	56,126,000	80,288,000	41,702,000

Corn Stocks and Consumption.

Statement of the movement of corn and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at Nov. 1	4,117,000	174,000	849,000
P. receipts to July 19	143,307,000	227,247,000	192,231,000
P. shipments to July 19	86,451,000	116,995,000	103,933,000
P. stocks on July 19	3,560,000	8,277,000	805,000
P. consumpt'n to July 19	57,413,000	102,149,000	88,342,000

Grain Corporation Statistics.

The Grain Corporation has begun publishing statistics of the movement of wheat and wheat products, which will appear weekly on Wednesdays for a subsequent date. Summarized for the week ending July 4, the data are as follows:

	1919.	1918.
Receipts from farms, bus.	4,988,000	9,862,000
Stocks in mills and elevators	37,053,000	17,731,000
Decrease for the week	842,000	3,462,000
Flour made, week, bbls.	1,143,000	1,525,000
	1918-19.	1917-18.
Barrels made, season.	121,130,000	115,373,000

Chicago Grain Stocks.

Wheat stocks in all positions in Chicago increased 196,000 bu. last week, oats 335,000 bu. and rye 294,000 bu. Corn decreased 27,000 bu. and barley 242,000 bu. Details follow: Last three ciphers omitted, except in the totals:

	Public.	Private.	Total.	Last yr.
Wheat	315		315,000	179,000
Corn	338	1,499	1,837,000	4,566,000
Oats	586	4,974	*5,610,000	2,509,000
Rye	654	620	1,274,000	399,000
Barley	633	588	1,224,000	221,000

Wheat in Primary Markets.

Receipts of wheat in eleven primary grain markets from July 1, 1919, to July 19, 1919, with comparisons with 1918:

	1918-19.	1917-18.
Chicago	1,541,000	887,000
Milwaukee	117,000	13,000
Minneapolis	2,240,000	1,742,000
Duluth	316,000	8,000
St. Louis	2,345,000	3,622,000
Toledo	309,000	258,000
Detroit	38,000	21,000
Kansas City	3,490,000	7,749,000
Peoria	55,000	38,000
Omaha	351,000	1,161,000
Indianapolis	722,000	616,000
Total	11,523,000	16,115,000

Receitps of wheat the past week at primary markets compared with the preceding week and corresponding week last year:

	July 19, 1919.	July 12, 1919.	July 20, 1918.
St. Louis	1,502,000	796,000	2,250,000
Kansas City	2,700,000	681,000	4,605,000
Omaha	269,000	52,000	920,000
Toledo	288,000	14,000	237,000
Detroit	24,000	4,000	15,000
Indianapolis	622,000	87,000	461,000
Peoria	42,000	12,000	37,000
Chicago	1,336,000	151,000	821,000
Milwaukee	40,000	45,000	6,000
Minneapolis	762,000	828,000	293,000
Duluth	116,000	131,000	2,000
Total	7,701,000	2,801,000	9,647,000
Shipments	1,386,000	838,000	2,291,000

World's Wheat Exports.

Exports of wheat last week, compared with previous week and year ago specially reported for this paper by George Broomhall's service:

	July 19, 1919.	July 12, 1919.	July 20, 1918.
American	7,977,000	8,278,000	3,613,000
Indian	.....	.....	270,000
Argentine	2,510,000	3,120,000	5,429,000
Australian	1,945,000	1,432,000	780,000
Others	112,000	116,000	38,000
Total	12,544,000	12,946,000	10,130,000

Exports of wheat since Aug. 1, commencement of European crop year, compared for three seasons:

	1918-19.	1917-18.	1916-17.
American	359,949,000	232,162,000	341,192,000
Indian	5,099,000	13,720,000	34,234,000
Argentine	78,103,000	76,807,000	58,960,000
Australian	71,998,000	37,723,000	49,778,000
Others	4,160,000	3,366,000	10,254,000
Total	519,309,000	363,778,000	494,418,000
Season	.....	376,524,000	501,414,000

World's Corn Exports.

Exports of corn last week, compared with previous week and a year ago:

	July 19, 1919.	July 12, 1919.	July 20, 1918.
American	47,000	.....	771,000
Argentine	1,649,000	735,000	.....
African	104,000	97,000	28,000
Total	1,800,000	832,000	799,000

Exports of corn since Nov. 1, 1918, compared with last year and year before:

	1918-19.	1917-18.	1916-17.
American	3,502,000	24,853,000	37,917,000
Argentine	45,418,000	13,156,000	54,045,000

Wheat Stocks and Consumption.

Statement of the movement of wheat and consumption in primary markets, compared for three years:

	1918-19.	1917-18.	1916-17.
P. stocks at July 1	2,942,000	226,000	4,289,000
P. receipts to July 19	11,524,000	16,115,000	5,778,000
P. shipments to July 19	2,712,000	3,110,000	4,220,000
P. stocks on July 19	3,834,000	2,709,000	1,794,000
P. consumpt'n to July 19	7,920,000	10,522,000	4,053,000

ENFORCING THE GRADES ACT

Publication of Findings in Complaints Under Sec. 5 of the Grain Grades Act —The Significance of These Publications—Some Suggestions

Those of the grain trade who happen to be on the mailing list of the Bureau of Market for the *Service and Regulatory* announcements (and dealers who desire such information may obtain this publication on request) may have been surprised during the past week to receive No. 56, the subject matter of which was "Findings regarding violations of Sec. 5 of the Grain Standards Act." This section provides a penalty for misrepresentations of inspection findings by invoicing grain of different grade than that put on it by the inspector, a changing of the inspection certificates, the said penalty being merely the publication in this way of the new moral (to put it mildly) acts of persons or corporations. The publication is a "blot in the escutcheon" of a dealer, but under the act comes no money or jail penalty—the doom of the law is loss of character.

The "findings" in No. 56 are the first published. The last offense named is a year old nearly, but there are many others. Some have resulted in settlements to avoid this act of publicity. These will no doubt be published later on. The meaning of No. 56 as we take it is that the Bureau proposes by virtue of the authority given by the act to publish to the world the names and misdeeds of those who willfully violate Section 5. This fact suggests some further considerations.

The duties and liabilities of grain dealers under the United States standards Act should now be generally known. Yet it is a fact that even after nearly three years of its operation, it seems there are many who are still ignorant of the requirements of the law and of the penalties that may be incurred for its infraction. The opinions of the Bureau of Markets as to the requirements of the law have been published and widely distributed in successive *Service and Regulatory Announcements* and in the trade press (some such appear elsewhere in this issue); and at least this paper has tried to do its duty to the readers by informing them. Though it is no excuse, still ignorance of the law is frequently the reason given by persons guilty of apparent violations and some deliberate ones. The following suggestions therefore are presented in a form which it is hoped will result in a complete understanding on the part of members of the grain trade as to their duties and liabilities under the law. The following rules should be observed:

Don't fail to have grain for which standards have been fixed and which you ship or deliver for shipment in interstate or foreign commerce pursuant to a sale, offer for sale, or consignment for sale by grade, inspected by a licensed inspector *at point of shipment*, unless you ship such grain *subject to inspection en route or at destination*, or unless you ship it from a *non-inspection point to a non-inspection* point, in which latter case no inspection is required. The law places upon the *shipper* of the grain the duty of securing the services of an inspector to make the required inspection.

Don't ship or deliver for shipment in interstate or foreign commerce any grain for which standards have been fixed, which has been sold, offered for sale, or consigned for sale, by any grade other than one of the grades of the official standards.

Don't describe, or in any way refer to, any grain for which standards have been fixed, as being of *any grade other than a grade fixed therefor in the official grain standards*, either in any certificate or in any oral or written contract or agreement to sell by grade, involving the shipment or delivery for shipment in interstate or foreign commerce of any such grain, nor in any invoice or bill of lading or other shipping document relating to such shipment or delivery for shipment of any such grain.

Don't certify or otherwise state or indicate in writing, if you are authorized or employed by any state, county, city, town, board of trade, chamber of commerce, corporation, society, partnership or association to inspect or grade grain, that any grain for shipment or delivery for shipment in interstate or foreign commerce which has been inspected or graded by you, or by any person acting under your authority, is of one of the grades of the official grain standards, unless you hold an unsuspended and unrevoked license issued by the Secretary of Agriculture.

Don't improperly influence or attempt to improperly influence any licensed inspector in the performance of his duty.

Don't forcibly assault, resist, impede, or interfere with any officer or employee of the United States Department of Agriculture while he is engaged in the execution of any duties authorized to be performed by the Act or the rules and regulations made thereunder.

Failure to observe any of the foregoing requirements constitutes a misdemeanor and subjects you, upon conviction thereof, to a fine of not more than $1,000, or imprisonment not more than one year, or both.

Don't represent that any grain, shipped or delivered for shipment in interstate or foreign commerce, is of a grade fixed in the official grain standards *other than as shown by a certificate therefor* issued in compliance with the Act. Failure to observe this requirement subjects you, after due opportunity for bearing has been afforded you, to the penalty of publication of findings of the facts by the Secretary of Agriculture.

This is the moral lapse which means loss of character and standing as a dealer, if you are "published."

EDUCATING DEALERS AND OTHERS.

The educational work conducted by agents of the Bureau of Markets in the various North-Central States has been imitated by district meetings in Texas, called by Sec'y Dorsey of the association of that state. At a meeting at Abilene, for instance, early in the month, at which about 90 dealers were present, an agent of the Bureau was on hand to explain to the dealers the correct method of making dockage determinations and also of reclaiming cracked wheat and small berries of wheat. The attention of those present watching the demonstration was called also to the instruction contained in the Bureau's Handbook of the Standard Grades. The method of taking the test weight was also explained and how to use the Cox funnel. This latter machine is not always used by grain dealers, although it is advisable that it should be; and one gentleman present, Mr. Fuller of the Fuller Grain Co. at Seymour, told the dealers present that after having seen the operation of the funnel in a licensed inspector's office at Wichita Falls he had had one made for his own use by a local tinner and that now when buying grain he uses this funnel as called for by the Handbook. He also stated that in shipping cars of wheat he always makes his test weight per bushel on what he considers a fair sample, and that by carefully applying the Federal grades when purchasing wheat from a farmer he knows very closely the grade that he will get in a terminal market, and as a rule he has never had any controversy over the grade of grain that he has consigned to such markets.

At the same meeting the new oats grades were demonstrated and explained with decided benefit to those present.

These meetings that Mr. Dorsey has been holding throughout Texas have been very beneficial. The agents of the Bureau have generally been present and the manner and method of grading has everywhere been gone into very thoroughly. On one or two occasions at the request of late comers supplementary demonstrations have been given.

DOINGS IN WASHINGTON

Quarantine Not Ordered Against "Take-All"—The West Reported to Have Plenty of Harvesters for Wheat—Advances on Cattle Exports

By JOHN GLEISSNER.

WASHINGTON, July 19.—[Special Correspondence].—The Federal Government will not place a quarantine against the states of Illinois and Indiana as a result of "flag" smut and "take-all" diseases in those states, providing the states themselves make adequate provisions against the shipment of infected grain. This decision was reached on July 15 by the Horticultural Board of the Department of Agriculture at the conclusion of a hearing which lasted all day.

Indiana in the opinion of the board has already taken measures which it is thought give adequate protection. Similar measures are to be taken at once by Illinois. The decision to withhold quarantine is based solely on the understandingk that effective control will be exercised by the state to prevent the interstate movement of infected products. The states must comply with these regulations:

All infected fields in each area will be threshed by the same machine on ground where grown, the machine not to be used again for threshing wheat this season.

All threshing machines and wagons used in threshing diseased fields shall be thoroughly disinfected with formaldehyde.

All grain from diseased fields shall be disinfected with formaldehyde as it goes through the thresher.

All straw and stubble from infected fields shall be burned.

No wheat, barley, rye or oats shall be grown on the infected fields for five years, except by approval of the Federal Horticultural Board.

No quarantine will be recommended with respect to the wheat nematode, or eel worm disease of wheat, the information brought out showing that it is so widely distributed as to make Federal quarantine out of the question. It can be controlled, the experts said at the hearing, by using only clean seed and rotating crops.

Kansas and Nebraska have plenty of harvest hands in the opinion of the Department of Labor. Word to this effect has come from A. L. Barkman, of the United States Employment Service at Kansas City, Kans. Federal directors of employment east of the Mississippi are therefore asked to stop shipment of men to the Western wheat fields, since there are no more jobs. Men who have worked in Kansas and Nebraska will be able to handle the wheat harvest of the Dakotas without further increase in their numbers. Barkman has charge of the special harvest labor recruiting activities of the Labor Department in the West. The harvesters will be moved from Texas to the Canadian border.

The War Finance Corporation has announced that it is prepared to receive applications from exporters or from American banks for advances against the export of cattle or cattle products. "This plan should result in the establishment of credits here for the purpose of stimulating exports, and thereby broaden the demands for these products," says the announcement.

This action is believed to be in response to insistence of cattle-raisers that they be protected from the downward trend of the cattle market, which has caused much dissatisfaction in the West. It came over the opposition of several persons high in the official family, who desired exports to be handled wholly through private funds. The order is attacked in some quarters as an attempt to keep up the price of meat, when consumers are demanding lower prices for staples.

An effort to prevent high wheat prices is seen in a resolution introduced into Congress by Representative John F. Fitzgerald of Massachusetts, which provides that the Secretary of Agriculture be authorized to make an investigation of the wheat situation throughout the world, with a view to determining the probable surplus in this country, and limiting the export of wheat to the surplus thus determined. If exports were limited, a world shortage, if such a thing exists, would not react on prices in America. Here supply and demand would be continually equal, no matter how great the opportunity for higher prices abroad. The resolution is now in committee.

The President has confirmed by executive order the Gulf differentials on wheat announced by the Grain Corporation—$2.28 at Galveston and New Orleans. He has also by a similar order prohibited importations or exportations of wheat except under limitations prescribed by Wheat Director Barnes.

Senator Gronna, N. D., on July 17 introduced a bill to appropriate $5,000,000 for purchase of seed grain and feed for farmers in the drouth stricken sections of the country.

A bill was introduced in the House this week proposing an import duty on corn, making a rate of 15c a bushel on corn imported into the United States and 40c per 100 lbs. on cornmeal.

CROPS ON THE COAST.

Harvesting of winter wheat is now on in the Pacific Northwest and the Portland *Commercial Review* says the grain stood the drought very well, although some of the wheat is rather shrunken. Early samples from the three states received during the past week show very good quality, but yields are only fair. Spring wheat, however, will be almost a total failure, owing to lack of rain. The barley crop in the Northwest is not over 50 per cent of normal. In California this crop, although better than farther north, is still disappointing.

Responsibility for Routing.

In the case of Wabash R. R. Co. vs. Lapham & Co., Judge Dingeman at Detroit, ruling on a question of routing decided for the complainant road. Lapham & Co., receivers at Detroit, some time ago received a shipment of several cars of corn from Elkhart, Ill. It was delivered to the C. & A. R. R. with no directions as to routing, and the Wabash got the shipment at Springfield, Ill., a junction point. It was shown that the shipment could have been routed *via* two different roads cheaper than it was delivered by the Wabash, whose rate was 14.7. The C. & A. could have turned the shipment over to either of the other two roads whose rate was 10.5. Lapham & Co. refused to pay the 14.7 rate in view of these facts, but Judge Dingeman held that the Wabash was not at fault in the matter. The initial carrier, the court held, had a duty to perform in that it should have arranged for the cheaper routing, but the Wabash had acted in good faith in making its delivery and was entitled to full recompense.

The Court also held that Lapham & Co.'s action should have been directed against the C. & A. and not the Wabash in order to obtain satisfaction.

Oats Market Last Week.

Oats harvest is well under way. The first car of new oats arrived in Chicago on Thursday, July 17. Reports confirm serious damage over a widespread area. It is too dry and hot in the Northwest, where the oats are filling. It now looks as if most of the crop would be lightweight, testing under 30 lbs., with yields materially under last year. This caused a marked increase in the trading in oats, the volume of which exceeded that in corn for several days; everybody seemed to be bullish.—*W. H. Perrine & Co., Chicago.*

Broomhall reports the crop outlook of the continent is not encouraging. The feed crops are particularly discouraging.

MR. BARNES EXPLAINS.

reference to the despatch from hington reporting some criticism, Washington, of the fact that the n Corporation, in 22 months' oper- n ending July 1, last, had recorded ofit of about $23,000,000, the Presi- of the Corporation, Mr. Julius nes, said today:

I have no direct advice from any ber of Congress of any criticism o the operating statement made by Grain Corporation, except a number avorable letters that this agency of Government, for one at least, was to conduct its business without Of the $23,000,000 carried forward arned surplus, substantially $4,500,- was excess profits made by the mills ng the crop year 1917-18 and re- ed to be refunded. The general ection to the public in flour prices ot represented at all by the excess its required to be refunded, but by deterrent that such refund of ex- profits would be forced, thus keep- flour prices continuously through- the year at a fair relation of the ilized wheat price.

The Grain Corporation used of the s of the National Treasury, as capi- substantially $50,000,000, for the year, and $150,000,000 in the last . This was money borrowed from people in the form of war bonds, on which the National Government paying interest. We conceived it er to earn interest on that money e set aside for our use, and $10,- 000 of the $23,000,000 reported was est on National capital employed is business.

During those two years Neutrals associated with us in war had no ples in requiring us to pay very ocean freights for the products h they had to sell, namely, their el-carriage. We had a sound con- on that, this being true, it was er to conduct our sales to Neutrals basis of moderate profits. The n Corporation bought and resold, ly overseas, nearly two billion rs' worth of goods and the net ct secured in this vast business was alf of one per cent, or $9,000,000, up the balance of the $23,000,000 rted earned. More than that, the n Corporation was peculiarly for- te in not having lost a dollar by or in exceptional freedom from ne sinkings. This fortunate out- is a factor in making the final result.

The comment quoted in Washington d seem to indicate there is some sion as to the activities of the n Corporation recorded up to July t, and the responsibility put upon Grain Corporation for the coming which is just commencing to . For two years it has not been estion of the Grain Corporation ng the price of wheat at the guar- level so much as preventing it soaring above that fair-price level, his was done quite successfully in protection of all our people, both ucer and consumer, until within ast three months, when, with in- fient power and with a crop evi- ny under the estimates, wheat s ruled somewhat above the Gov- ent buying basis, and even today bove the level at which the Gov- nnt will buy. The impression prevalent some few months ago, there were very large stocks of t which would press on the mar- without Government interference given way to a better understand- f the situation. Our new crop has aken very rapidly in its prospects better understanding of the large rements abroad has created a bet- eneral understanding of the fact robably the Government fair-price today is the fairest expression of eal value of wheat at present ob- ble.

large part of the wheat crop of country and of the world is not ecured, and the deterioration in prospects for the past thirty days nerica and abroad has been very marked. I certainly hope this deterioration will be checked shortly, for it seems quite apparent that we have no longer a burdensome wheat supply in the world."

THE B/L ENJOINED.

Judge Ward of the U. S. Circuit Court has concurred in the opinion by District Judge Mayer of New York, granting a preliminary injunction restraining the Interstate Commerce Commission from putting into effect its recent order, effective Sept. 8, prescribing a B/L to be used by carriers in interstate commerce. The petition for this injunction was brought some time ago by various railroads and steamship lines.

The opinion of the court is in substance that the Commission, while it may regulate rates and practices, has no power to prescribe a bill of lading which the carriers must use. The court holds also that the proposed form of bill of lading is contrary to law, in that it would in effect repeal the Harter Act and the Limited Liability statute of the United States. The court holds further that the fact that most of the carriers are under Federal control does not prevent that from contesting the Commission's order, in view of the probable early return of the carriers to their former owners.

Going a little further into detail, the Court says that Congress has unquestionably the power to declare what terms common carriers subject to the Commerce Act of 1887 and its amendments may or may not insert in their bills of lading. It has, in fact, done so from time to time, and for the purpose of this case the Court assumes that Congress can delegate this legislative power to the Commerce Commission; but the Court adds: "We shall expect to find such delegation in clear and unmistakable language. Examination of the statutes, however, does not convince us that Congress had any intention to confer upon the Commission the right to prescribe the terms of carriers' bills of lading."

"The Court then cites Sec. 1 as amended by Chapter 309, Laws of 1910, 36 Statutes at Large, 539. It also quotes Sec. 15, prescribing powers of the Commission in the premises, and says that "not one word about contracts or the substance of bills of lading is used, the reference in the section being only to rates, classifications, regulations or practices in connection with the receiving, handling, storing and delivery of property." The question, says the Court, is one of power to make the order and not one of its expediency; "therefore, we shall not inquire whether the alterations the Commission has prescribed in the bills of lading are reasonable or not because it has no power to make them. In any event, there was no power to prescribe the inland bill of lading in form or substance depriving the carriers of the benefits of the statutes limiting the liability of vessel owners and of the Harter Act. These statutes still survive and unless repealed by implication, and this result we are of the opinion was neither intended nor accomplished."

Spring Wheat Outlook.

In central South Dakota black rust has developed very rapidly and caused considerable damage to crops in a few counties. This has affected principally Marquis wheat and the other early grains. Other parts of the Northwest still report black rust prevalent, but only a small amount of damage. The weather has been favorable for checking the rust the past few days. The real damage to crops of the Northwest has been blight. This condition exists generally and has probably reduced the wheat, barley, oats and rye crops at least 25% from early prospects, says the Van Dusen Harrington report of July 16. No doubt, the wheat will be of light weight and of lower grade than last year.

INSPECTION RULINGS.

Service and Regulatory Announcements No. 49, dated May 10, contains opinions of general interest to grain dealers and others, being opinions on questions arising under the Grain Standards Act. Some of these may be briefly summarized as follows:

(1) The question arose whether it is compulsory or optional for the inspectors to grade samples of wheat brought in by farmers and others. The law provides in substance that all interstate shipments shall be inspected, with certain provisions. The opinion is in this case that where the sample is apparently offered out of curiosity or to test the quality of the parcel of grain owned by a farmer, the inspector may make an inspection thereof, but he must carefully inform the owner of the sample that the inspection refers simply to the sample in hand, which may or may not have any reference to the quality of grain from which the sample may have been taken but which is not within the purview of the inspector. The opinion says: "Generally, however, it will be noted that the licensed inspector who is requested to inspect grain for which samples have been fixed under the Act has no knowledge as to whether the particular lot or parcel of grain that has been submitted is involved in a shipment of interstate or foreign commerce, and therefore, in refusing to render the inspection service when rendered under such circumstances the inspector assumes considerable risk of non-compliance of the requirements placed upon him which in case of such non-compliance according to the circumstances involved might result in the suspension or revocation of his license as an inspector."

(2) A miller reported a good deal of grain going to a certain non-inspection point from other non-inspection points, some of which is offered as "choice milling wheat," such grading to be settled by mill laboratory tests. The question is as to whether such an arrangement conflicts with the United States Grain Standards Act. The answer is that the Act prohibits any one or any person using grade designations other than official grain standards in interstate transactions. The receiver of grain shipped between non-inspection points may upon information furnished him by his miller or chemist report its grade to the shipper according to the official standards, but said miller or chemist is not licensed as an inspector and therefore must not issue any certificate.

(3). In answer to an inquiry regarding the sale of oats by brands under the provisions of Section 4 of the Grain Standards Act, it is the opinion of the Department that a sale of oats by private brands which in fact constitute a system of grades is now unlawful and has been since June 16, 1919. The opinion says: "If the private brands are in fact grades, which they may be parties to found to be, the employment of the designations thereof in lieu of the official standards will be unlawful. This bureau is unable to advise definitely whether in its opinion any of these private brands are grades without considering all of the facts relating thereto. However, in general the bureau regards any system whether adopted by any single private firm or market or otherwise which involves the separation of grain into classes or sorts of quality or condition for commercial purposes is a system of grading."

What It Has Cost.

The trade generally, as well as President Barnes, readily concede, and understand that earlier estimates of production of wheat in this country may be further reduced, but the Wheat Director's statement, that the United States will not have enough wheat to meet the demands at home and for export, is taken here as "unadulterated bunk." The consumer is in the mood to demand consideration for his welfare, and President Barnes is in a position to insure an abundant supply for home consumption and at fair prices. Beyond that Mr. Barnes has a man's job to find an outlet for what we won't need. The large profit, over 23 million dollars, made on the last crop probably has cost the American public, in enhanced prices of other foodstuffs and commodities entering into daily consumption, easily five times the amount of profit made by the Grain Corporation and more likely over 200 million dollars. The collateral extra cost in other directions due to high prices for foodstuffs would reach enormous figures and is exceedingly difficult to estimate.—*Pope & Eckhardt Co., Chicago.*

AUGUST CROP REPORTS.

The report showing the condition of the cotton crop on July 25 will be issued by the Bureau of Crop Estimates, Department of Agriculture, on Friday, Aug. 1, at 11 a. m. (Eastern time).

On Friday, Aug. 8, at 2:15 p. m. (Eastern time), there will be issued a summary of the conditions of the principal crops on Aug. 1, which will give the following information: Preliminary estimate of yield and quality of winter wheat and rye; condition on Aug. 1 (or at time of harvest) and forecast of spring wheat, corn, oats, barley, potatoes, flax, rice, sugar beets, etc., acreage, condition and forecast of buckwheat and hay; stocks of oats and barley in farmers' hands on Aug. 1.

A supplemental report will be issued which will include a statement of the condition on Aug. 1 of fruits, vegetables, field beans, field peas, peanuts, broom corn, alfalfa, timothy, millet, pastures, sorghums for feed; yield and quality of clover, etc.

A remarkable feature of the month of June, says Field Agent Fessenden of Illinois, was the excessive rainfall in many sections of the state, ranging as high as 9 inches in Christian, Logan and Richland Counties and 10 inches in Washington County. The effect upon corn of course is obvious. Little trouble, however, is reported at this time from insects of army worm which a short time ago threatened a large territory, both having been practically destroyed by the rains.

Visible Supply of Wheat.

Official statement of visible supply of wheat in the United States, weekly, for four years:

ANNUAL CONVENTION OF HAY DEALERS AT DETROI

Large Gathering of Hay Dealers of the Nation—What the Association Has Done the Past Year—Some Notable Addresses—Resolutions Adopted and New Officers Elected for 1919-20

Reported by J. C. STRONG

Michigan's summer resort weather, with cool breezes, was on tap at Detroit to make the opening of the twenty-sixth annual convention of the National Hay Ass'n a most enjoyable occasion. Each year the convention is being attended by more and more of the ladies, and the occasion surely presents a most excellent opportunity to combine business and pleasure and make it vacation time for the family.

President Samuel Walton called the convention to order, and after the invocation by Dr. John Acheson and the singing of "America" by the assembled delegates, Corporation Counsel Wilcox extended in behalf of Mayor Couzens a most cordial welcome on behalf of Detroit. J. L. Dexter, an ex-president of the National Hay Association, responded in behalf of the Association. Theo. W. Smith welcomed the Association in behalf of the Detroit Board of Trade, and Fred M. Williams of W. D. Power & Co. responded in behalf of the Association to Mr. Swift's welcome.

IN MEMORIAM.

D. W. McMillen, chairman of the Memorial Committee, then made the report of his committee which showed that during the past year the Association had lost more members than during any other one year in its history, the number being twenty-five. The list included Wm. Hopp of Baltimore, E. W. Berthoff of Jersey City, W. W. Robinson of Seattle, Wm. Cooper of New York City, Erick Picker of St. Louis, R. J. Earnshaw of Washington, D. C., W. E. Leidy of Inman, Neb.: T. M. Kehoe of Terre Haute, Ind.; M. D. Griffin of Hartford, Conn.; J. L. Moser of Wren, O.; C. S. Mead of Moravia, N. Y.; Geo. M. Way of Ossian, Ind.; D. M. Clifton of St. Louis, Jerome Dyer of Kansas City, J. D. Peck of Providence, R. I.; Chas. Schaefer of Brooklyn, Chas. T. Pumphrey of New Bern, S. C.; Jos. V. Lovless of Washington, D. C.; J. J. Considine of Chicago, A. E. Clutter of Los Angeles, Geo. P. Hart of Cleveland, Oscar Farmer, Jr., of Louisville, and C. P. Peterson of Omaha, Neb.

The reading of the minutes of the 1918 convention was dispensed with, it having been printed in booklet form and distributed to the membership.

Report of Board of Directors.

Pres. Samuel Walton of Pittsburgh presented the report of the Board of Directors from which the following is taken:

We are bringing to a close the twenty-sixth year of the existence of this Association. It has been a year of unprecedented events in the history of the same. When we last met at the convention in Cleveland, Ohio, in July, 1918, our country was in the throes of a righteous war against the most arrogant, unscrupulous nation the world has ever known. . . .

Our Association has played its part in the winning of the war, and a very important part, by rendering to the Forage Branch of the Quartermaster's Department every service within its power for the purpose of assisting in securing and maintaining an adequate supply of hay and straw for our army. As you already know, the Government appointed one of our prominent members, Mr. George S. Bridge, as chief of the Forage Branch of the Quartermaster's Department, U. S. Army. Mr. Bridge was promptly and unreservedly granted the complete co-operation of our organization and the result was all that could be desired.

Your president and secretary attended the meeting of the Michigan Hay and Grain Shippers' Association, held in Detroit Aug. 11, 1918, and the meeting of the New York State Grain and Hay Shippers' Association, held at Syracuse, N. Y., Aug. 16. We also called a meeting of the shippers at Lima, Ohio, Aug. 22, which was very largely attended; likewise a meeting at Fort Wayne, Ind., Sept. 11, and after making known to the shippers at these meetings the Government's urgent need of their support, it is pleasing to say they responded nobly. We have known them to offer and sell the Government their hay at a price that was from $1 to $2 per ton less than the terminal markets were offering, and this from a purely patriotic standpoint. At the same time, we were being subjected to high rates of freight, excessive demurrage charges and other severe regulations, to all of which we submitted without a protest, believing such measures were essential to the winning of the war; and I do not hesitate to say, and without any spirit of egotism, that there is no other business men's organization that was more loyal or patriotic than the National Hay Association. In fact, you never heard of another organization whose members made greater mnetary sacrifices, if you please to term them such, than the members of this Association.

It is gratifying to report that under date of Dec. 31, 1918, Mr. Bridge, upon retiring from the Quartermaster's Department, addressed a letter to your president and the members of the National Hay Association, expressing his sincere thanks and appreciation for the service rendered in assisting him to maintain an adequate supply of forage for our army.

Owing to the previous experience many of our shippers had in selling the Government, it caused them to have a feeling of uneasiness as to the treatment that would be accorded them in the event their hay should be graded below the quality contracted for. Mr. Bridge being a practical hay man, appreciated their views; and in order to eliminate any fears or doubts that they might have in that respect, he asked your president to appoint a committee to meet with him in his office in Chicago, Oct 16, for the purpose of agreeing upon a just and equitable scale of discounts on hay that was not of a quality contracted for—taking No. 1 timothy hay as a basis. The following members were appointed on that committee: S. W. Kemp, Spencerville, Ohio; D. W. McMillen, Fort Wayne, Ind.; Frank Young, Lansing, Mich.; D. S. Wright, Weedsport, N. Y.; J. P. O'Hara, Moravia, N. Y., who, with your president and secretary met with Mr. Bridge in his office at the appointed time above stated, with the following results: Standard timothy to be accepted at a discount of $1 per ton below the price of No. 1 timothy; No. 2 timothy to be accepted at a discount of $2 per ton; No. 1 light clover mixed hay to be accepted at a discount of $1 per ton below the price of No. 1 timothy hay; No. 2 light clover mixed hay to be accepted at a discount of $3 per ton below No. 1 timothy hay; No. 1 clover mixed hay to be accepted at a discount of $3 per ton below No. 1 timothy and No. 1 heavy clover mixed hay to be accepted at a discount of $4 per ton below the price of No. 1 timothy hay.

Like conditions existed with the shippers of alfalfa and prairie hay. Therefore, a committee was appointed to meet in Mr. Bridge's office for the purpose of coming to an understanding on the discounts at which alfalfa and prairie hay would be accepted if the quality was below that contracted for, taking No. 1 grade as a basis. For this occasion the following committee was appointed: E. C. Held, El Paso, Tex.; O. B. Hastings, Cairo, Ill.; Chas. D. Carlisle and J. D. Cole, Kansas City, who with your president, met in Mr. Bridge's office on Nov. 15, 1918, and agreed upon the following scale of discounts: Standard alfalfa hay to be accepted at a discount of $1 per ton below the price of No. 1 grade! No. 2 alfalfa to be accepted at a discount of $2 to $3 per ton below No. 1, according to the quality and at the discretion of the Government inspector; No. 2 prairie hay to be accepted at a discount of $1 to $2 per ton below the price of No. 1, according to the quality and at the discretion of the Government inspector. These conclusions being agreeable to all members present, our secretary was instructed to promulgate a notice of the same to the members of our Association.

These arrangements continued to be satisfactory to shippers until the early part of the month of April, 1919, when we began to receive complaints from our members that they were not aware that many their shipments were below the grade c tracted for and the agreed upon deducti made until they received voucher in p ment for the same—which was in s instances as late as six to eight mor after shipment was made, therefore, t ting the burden of the loss of these ded tions on them. The complaints bec so general that we asked for a confere with the commanding officer of the Qu termaster's Department in Chicago, C onel Kniskern, and by agreement met w him at his office in Chicago, April 17, 1 with the following members who had m these complaints present: Coleman, N York; Randall, Chicago; Frank You Lansing, Mich.; Devlin, Chicago; Glea Michigan, and J. L. Wiser, Toledo. Bridge was also present at this meeti However, it developed at this confere that the complaints referred to were shipment made previous to Nov. 1, 1 which was before Col. Kniskern beca the commanding officer of the for branch, and all members present agr that they had no grievance whatever any shipments made after Nov. 1, 1 Since that date they were being advi promptly of the arrival of cars that w not of grade contracted for and the ded tions at which such shipments were be accepted.

We subsequently decided to ask C Kniskern to permit us to submit for consideration the losses sustained by members on shipments made prior to N 1, 1918, where such losses accrued on count of deductions having been made notification of the same not given wit a reasonable time, to the end that t should be reimbursed. With this object view your president called upon Col. Kr kern at Chicago, May 23, 1919, with following results: Shippers who sold Government a certain grade of hay bought the same on such grade and v did not have the hay inspected either o cially or by their own representative who were not notified within a reasona time that the hay was not of the gr contracted for by the Government; thereby, on account of the delay in ceiving such report, had no recourse the party from whom they purchased hay, should be requested to file a sta ment of such losses with the secretary the National Hay Association, suppor by proper evidence, in which event C Kniskern agreed to give such cla consideration. Subsequently, he agr that where shippers had inspected the h shipped on contract and the Camp insp tion was below the grade contracted and deduction made accordingly, and t were not notified within a reasonab le time, they should also be reimburs for deductions made, providing shipp having such claims, when receiving th final payment of 20 per cent, accepted same under protest.

And now, let us here record our than to Mr. Geo. S. Bridge, former chief of Forage Branch, also Col. Kniskern, pres commanding officer of the Forage Bran for their kind and courteous treatment corded to us in all our dealings with th department. We cannot be too empha in stating that on all questions submit to them for their consideration they alwa rendered fair, just and impartial decisi and displayed rare and commendable ju ment. . .

DEALERS AT THE NATIONAL HAY ASS'N CONVENTION, DETROIT.

The latter part of October, 1918, we received a request from shippers in Phoenix, Ariz., to assist them in organizing the Salt River Valley Hay Association. With that object in view our secretary went to Phoenix, Ariz., Oct. 24, 1918, and assisted in organizing their association and approved their inspectors. He also visited Los Angeles, San Francisco, Salt Lake City and Denver, Colo. On this trip 27 new members were enrolled.

In the early part of December a request was received from the dealers in Sioux City, Iowa, to assist them in organizing a hay exchange. On Dec. 8, 1918, our secretary went there for that purpose and approved their inspectors. On this occasion five new members were enrolled.

We were then receiving numerous requests from southeastern markets to pay them a visit as a stimulus to secure new members and to approve their inspectors. Having concluded that it was our duty to comply with these requests, on March 17, 1919, Mr. Taylor left Winchester, visiting Indianapolis, Louisville, Frankfort and Lexington, Ky., Knoxville, Chattanooga and Memphis, Tenn., Atlanta, Athens, Macon, Savannah and Waycross, Ga., Tampa and Jacksonville, Fla. On this trip 28 new members were enrolled, and the inspectors at Savannah and Jacksonville were approved.

We were also receiving requests from the dealers in New Orleans and Fort Worth to approve their inspectors. May 1, 1919, our secretary, Mr. Taylor, went to New Orleans, La., and approved two inspectors, and to Fort Worth, Tex., where he approved their inspectors. He also attended the Texas Grain Dealers' Convention at Galveston, Tex. On this occasion 8 new members were enrolled, thus making the total number of new members taken into our Association on these various occasions 74.

The following markets have adopted our grades: Denver, Seattle, Sioux City, San Antonio, Jacksonville, Fla., New Orleans and Fort Worth. Fourteen inspectors have been approved as follows: Levi Bowker, Sioux City; J. Hammond Brower, Washington; A. K. Callahan, San Antonio; T. J. Davis, Atlanta; T. H. Edmiston, Peoria, Ariz.; J. S. Grosser, New Orleans; C. H. Gilbert, Glendale, Ariz.; J. N. Jaggers, Phoenix, Ariz.; Emil J. Joeger, Denver; T. A. McDonald, Mesa, Ariz.; B. F. Mackin, New Orleans; J. E. Pitman, Fort Worth; W. P. Smith, Phoenix, Ariz.; J. K. Williams, Jacksonville, Fla. J. N. Jaggers' approval has been withdrawn.

About Sept. 1, 1918, we decided to start a campaign to increase our membership, and as an incentive to the members to interest themselves in securing applications, we offered five prizes. The first and second prizes being gold watches; the third, fourth and fifth, watch charms. [The contest closed July 1, 1919, with the awards stated above.]

The success of our organization during the past year in all its activities and from all points of view, has been beyond all expectation. It should be pleasing to you to know that since our last convention, a year ago, we have enrolled 480 new members, giving us a total membership of 1,592. The recognition accorded us during the past year is conclusive evidence that we have taken a stand among the foremost business organizations of this country, receiving as we now do the highest respect and consideration, not only from our Government officials, but also the Railroad Administration and other organizations. These achievements, we believe, are the result of our having adhered to the high ideals and principles upon which our organization was founded. There is a day coming when those who are engaged in the handling of hay in order to do so successfully, will find it absolutely essential to be affiliated with this organization.

The development of our worthy paper, "The Hay Press," has been highly satisfactory, and the reports of our secretary-treasurer will, no doubt, show commendable and favorable results. The revenue from the same is gradually increasing and the information which it contains being of such an interesting nature each issue is now looked for with eagerness and we have every reason to believe it will continue to grow and soon will be regarded as the most reliable authority on all matters pertaining to the hay interests.

The report of our secretary-treasurer will very likely show some increase in the cost of traveling expenses, but after the foregoing explanation of our activities during the past season, no member will take any exception to these expenditures when the results of the efforts on our behalf are considered.

The first meeting of the board of directors was held in Cleveland, Ohio, July 11, 1918, immediately after the close of the convention. Our report shows the various committees appointed and elected at the meeting; also that of Mr. J. Vining Taylor was re-elected as secretary-treasurer and Mr. Morton Longenecker as assistant. No action was taken at this meeting as to the time and place of our next convention.

The mid-winter meeting of the board of directors was dispensed with as there was no important business to transact, but an expression from the members as to the time and place of holding our next convention was arrived at by communicating with each of the same by mail, with the result that July 16, 17 and 18, 1919, were selected as the dates, and Detroit, Mich., the place; and on Jan. 15, 1919 your president and secretary visited Detroit to make arrangements with Hotel Statler for the holding of this convention.

Recommendations.

That rule No. 11 of the Arbitration and Investigation Rules should be amended by adding the following: "Except when the said committee holds a session during the time and place of our convention, members shall not be entitled to the compensation provided for in this rule."

That the members of this organization will go on record at these meetings as protesting against Postmaster Burleson's general order No. 2495, regulating telephone charges, effective Jan. 21, 1919.

That the Trade Rules Committee establish a rule governing the proper time necessary for acceptance of a proposition made by a seller who does not specify manner or time of acceptance of the same.

That hereafter the Arbitration Committee should be composed of six members divided into two committees of three each. Each committee to be assigned to separate locations, such as Middle and Eastern district and Western and Southern district.

Just a few words with reference to my own personal experience during the past year. It has been a year of continued revelation to me, inasmuch as it has revealed the high type of character of the men of this organization. In every instance where they have been called upon to render any service, not one has yet failed me and in all matters of discussion, often when the question at issue affected their personal interest, they displayed such a broad vision as to result in satisfactory conclusions, and my belief is that these men were imbued with the spirit which evidently prompted the following lines to be penned:

"When you're forming your opinion
Do it carefully—go slow.
Hasty judgments oft are followed
By regretting—that I know,
And in argument be careful
Not too quickly to deride—
Try to look upon the subject
From the other fellow's side.

Keep the path your mind would travel
Broad and open all the way,
Walk with wisdom's comrade—Caution.
Heeding all he has to say,
And no matter what arises,
'Ere against it you have cried,
Try to look upon the subject
From the other fellow's side.

A year ago when informed that I had been selected to serve as your executive officer for the year, you will recall these words: "I hope to give you no occasion to regret having done so." Whatever I have done has been what a clear conscience dictated to me was right, partiality was entirely foreign to any of my actions or rulings, and I sincerely trust that no offense has been given to anyone, and let us hope that in these meetings there will be such an intimacy of fellowship that will enable us to return to our homes with a feeling of satisfaction and that it was well for us to have been there.

Words cannot express my praise for the efficient service rendered by our secretary, Mr. J. Vining Taylor. From my observations I have concluded that the heighth of his ambition was the success of this Association, and in all my business career I have never come in contact with a man who was so methodical and in love with his work as Mr. Taylor. A visit for a few moments to our office at Winchester, Ind., will convince you that my conclusions are about right. Furthermore, I had no idea that the responsibilities of his position were so great and do not hesitate to say that the success we have had during the past season can be attributed in a large measure to his efforts.

My sincere thanks is here expressed to the members of the Association for having been so loyal in their support and co-operation in our effort to make the present year a success.

Let us hope there will be a full attendance at our meetings. We have an interesting programme and we are sure the topics for discussion will be handled in a very able manner.

The report was accepted and made a part of the minutes.

FROM "OVERSEAS."

Col. H. C. Jones of Baltimore addressed the convention on "Some Stray Bits from Overseas." He told of many personal incidents that occurred during his two years overseas, and his talk was one of the brightest and most interesting features of the convention. The following will be found of timely interest:

The French are very thrifty. Years of war, and high taxes have kept their noses to the grindstone, as we say, for a long while, and the liberality with which our soldiers dispensed "francs" was a constant worry and wonder to them. The sooner our men get out of France, the better it will be for everybody concerned, as the cost of living there now for the civilian population is even worse than here, and their industries, as a general thing, are at a standstill. Scarcely any effort has been made to resume operations. The battlefields in N. E. France, which I visited on my way back from Germany, the early part of June, are still as they were last summer. The cities that were destroyed by German shell fire have had nothing done toward restoring them, and one-tenth of the area of France is unproductive, and will remain so for many years to come. Her great manufacturing cities such as Lille, Roubaix and Tourcoing are idle, the population in most cases subsisting on Government rations and the mills waiting for Germany to send back the machinery they stole in 1914. France has adopted a very discouraging attitude. She is systematically excluding imports in an effort to prevent further declines in her exchange, but it would appear that when she extends this prohibition to mill and engineering machinery which is necessary to put her unemployed population on a self-supporting basis, she is pursuing a very unwise policy. The French people are very poor, very much upset about their country, and with nearly every family represented in the 1,400,000 dead that the war has cost her, her immediate future is one of grave concern.

Germany is, of course, physically untouched by war. The release of her man power from army service which has been her only brake on production for past forty years, will, I believe, make her an even more formidable rival industrially than she was before the war, and the Allies will learn, to their cost, that Germany in many ways has suffered less in the war that either France or England.

At present Germany is engaged in a struggle between the old imperialism and the present new ideals. There is little respect felt by the proletariat for the present political regime; there is no solidarity or national unity. The people are embittered, disillusioned, and in many ways show evidence of moral degeneracy. Her men are hanging around the cities, attending political meetings instead of going back to the farms and starting production. Her farms are impoverished by four years of insufficient fertilization; and in Germany, as in France, the selection of food is most often a choice between evils. Their rations lack the calories to keep up physical stamina and food is difficult to obtain and unsatisfying, notwithstanding its exorbitant price and the fact that it usually appears camouflaged until it looks fairly eatable. Both officers and men of our army have been living chiefly on "Government straight," as our rations are called, and still look on "corned Willie" and "goldfish" as piece de resistance, even after an elaborate dinner at an expensive French restaurant, where an ordinary meal now costs 40 to 50 francs, which means $6 to $8 at the present rate of exchange. There are no "swell fronts" in either France or Germany at present. The style is completely out of fashion, and it certainly saves material for the tailor at all events.

The future holds many elements of disquiet, and we can only hope that the League of Nations, so earnestly advocated by Mr. Wilson, will be as efficacious in the promotion and maintenance of peace as it is expected to be. If we would learn one valuable lesson from this war, however, it should be never to forget the old quotation, "Thrice is he armed who hath his quarrel just"; and the no less true conclusion, "And four times he who gets his blow in 'fust.'" America can thank Providence that we had the time to prepare while the British and French poured out the blood of their young men on the

DEALERS AT THE NATIONAL HAY ASSN. CONVENTION, DETROIT.

fields of Flanders. We can thank Providence that the fleets of Great Britain were able to protect both her and us, while we were preparing our own. We can thank almost anybody but ourselves, and a Congress that regularly and systematically rejected every American military device and invention that was afterward used against our armies by the Boche.

Alfred Gowling, Cincinnati, O., as chairman of the Legislative Committee, made a verbal report that there had been no work for the committee during the past year.

LEGUMES VS. TIMOTHY.

Dr. H. E. Horton, Agricultural Commissioner of the American Steel & Wire Co., of Chicago, made an interesting address on "Several Legume Hays." He told of the feeding values of the southern legumes as compared with other hays—how timothy hay robbed the soil while the legumes added to its fertility.

COMMITTEES APPOINTED.

President Walton appointed the following committees:

On nominations—W. A. Cutler, chairman, Adrian, Mich., R. M. White of Duluth, John P. O'Hara of Moravia, N. Y., Earl Leas of Waterloo, Ind., Alfred Gowling of Cincinnati, H. W. Smith of Fredonia, Kans., and R. B. Clark of Chippewa Falls, Wis.

On resolutions—G. S. Bridge, chairman, Chicago, G. W. Crampton of Boston, C. M. Rice of Omaha, D. H. Dixon of Goldsboro, N. C., and D. B. Wood of Hamilton, Ont., Can.

Board of Directors—M. C. Niezer, chairman, Ft. Wayne, Ind.; T. W. Martin, Atlanta, Ga.; Gustav Herzer, Jr., Baltimore; W. H. Toberman, St. Louis, and John Dickson, Pittsburgh,

Auditing—O. D. Kendrick, chairman, Indianapolis; G. W. Dafoe, Sandusky, Mich., and H. S. Lockwood, New York.

Credentials—C. F. Morriss, Richmond, Va.; F. E. Hall, Houlton, Me., and Vernon M. Green, Washington, D. C.

THURSDAY MORNING.

C. M. Rice of Omaha, chairman of the State Vice-Presidents, spoke of the large territory covered by the membership of the association and the large annual volume of hay handled each year, with the necessity of upbuilding the Association and its activities. In the New England states the crop last year was 90% of normal and this year would be 95%, but not enough to supply the demand.

As we all know, the New England States do not produce sufficient amount of forage to supply their local demand. It must be obtained from other localities, the movement of which is usually from Canada and the Central States. Shipments into this territory is annually decreasing, which is evidently due to the remarkable increase in the use of automobiles and trucks as substitutes for horses, and no material increase in the dairy and feeding industries. This fact is illustrated in the receipts at Boston, the largest hay market in this district. In the year of 1917, receipts were 10,980 carloads or a daily average of 30 cars. In 1918, receipts were 8,394 cars or a daily consumption of 23 cars. These figures show an annual decrease of 2,586 cars or a decrease in the daily consumption of 7 cars. From Jan. 1, 1919, until June 30, 1919, receipts in Boston were only 3,252 cars, which is a daily average of 17 cars, therefore, from Jan. 1, 1919, to the present date, there has been a decrease in the daily receipts at Boston of 13 cars, or approximately 45 per cent.

In New York, New Jersey and Pennsylvania the crop was about 10% less than the previous year. The local consumption was about 75% of production. In the Middle-Eastern states there was a little increase over last year but 10% less than normal, with prospects for good quality and yield.

Due to the variety of hay fed in this territory, the local demand varies to some extent, which results in hay being shipped into some parts of this district, while from other vicinities a large surplus tonnage is available. Reports indicate that local consumption in the more densely populated districts will be considerably reduced on account of the increase in the number of automobiles and trucks used as substitutes for horses and no material increase in the dairy and live stock industries.

The South is not hay making territory, and it will be several years before the production will equal the consumption.

In the Central states the 1918 crop was 80% of normal with quality better than during the 10-year period. The 1919 crop is larger than last year and of better quality. In the North Central states the 1918 crop was 80% of a normal yield and high prices brought out a large amount of hay.

The general average of the 1919 crop would be considered fair to excellent. The only cause for complaints is due to the damage caused to the alfalfa in the southern section by heavy rains during the harvest of the first cutting and the "army" or "cut-worm" damage to the second cutting. In the northwestern section there seems to be insufficient rains during the growing period. The enormous high prices paid for hay last season will cause some growers to withhold their shipments this season for like prices. However, the situation as a whole looks very favorable for a large movement within the territory as well as a good foreign demand.

In the Southwestern states the 1918 crop was much less than usual, quality fair, with abnormally high prices. Conditions are satisfactory this year.

In the Middle Western states the 1918 crop was only 60% of an average, with lower quality and high prices and a complete clean up. The 1919 crop will be 90% of normal. This section expects to have a very nice tonnage for the coming season.

An illustration of the crop situation in this district may be taken from the latest bulletin from Kansas, indicating the harvest of their first cutting of alfalfa amounted to 1,625,000 tons, or an average of 1.32 tons per acre. Their first cutting for last year was less than one-half of this amount. A large portion, possibly 60 per cent, of this first-cutting alfalfa was damaged by rain. However, this fall we will find this entire output placed in commercial and feeding channels. This same situation may also be applied to Nebraska, Iowa, Missouri and portions of Colorado. All vegetation in that district has grown very rank. As an instance: A sample of blue grass brought to my office recently, from a pasture about 30 miles from Omaha, measured 5 ft. 6½ in. in length and if it had not been cut while it was still growing, at this time, it may have been as tall as the historical "bean stalk" on which Jack built his bungalow.

In the farther Western states the 1918 crop was an improvement over 1917, especially in Idaho. All reports indicate that there will be a big shortage in 1919. In the Pacific Coast states the 1918 crop was a little above the average in yield and quality. The 1919 crop is very heavy and above the average. A very large tonnage will be moved.

It may cause some of you to wonder why I am more explicit in furnishing the data on alfalfa, a forage especially adapted to Western cultivation. Alfalfa is that which I might term, "The Hope of Our Nation." Ten years ago there were approximately less than 1,000 cars of alfalfa handled commercially. This season, if the present prospects are favorably completed, there will be approximately 100,000 cars of alfalfa commercially traded and furthermore, it would require many times that number to carry the entire production if it were all placed in commercial channels. Ambitious efforts along scientific and theoretical lines have brought us this unlimited reserve of energy.

In the eastern Canadian provinces the crop last year was fair in production but was less due to the cold weather. We look for a slow demand but it is hoped the hay will move as before prewar times.

Business Readjusting Itself.

E. E. Eikenberry, ex-president of the Grain Dealers National Ass'n, made an interesting address on "Is Business Adjusting Itself Properly to Post-War Conditions?" as follows:

Americans long have been denominated material and money-loving and have been charged with sacrificing the higher and finer things in human life to the pursuit of financial gain. The European critic sensed this outstanding trait and magnified it into a national vice. America in striking measure has demonstrated th for principle and for National honor s is ready to sacrifice her wealth, and s is even now significantly to impress up the world the fact that this vice is to transmuted into a virtue and that h sense of business opportunity, her abili to produce, her eagerness to exchange a her skill at finance, are to lend themselv to the reconstruction of the industry a civilization prostrate and devoid of t means for the resumption of useful e ployment and remunerative industry. W are not under any illusions; and it is ge erally recognized that it is impossible th business should be restored to stabili approximating that of the pre-war perio We are not wizards. There is no mag by which to efface the effect of the di aster of the war; but there are certa lines along which business must devel in order to promote recuperation and s in motion industrial processes. We a too well aware of the fact that we a but one of a family of nations and that the complexities of modern civilizati we cannot consider the smallest of d mestic problems except that we discov factors having their origin in the inte national situation. Seeking only to d cuss the development of business America, we are forced to give attenti to at least five conditions all dependi for their origin on the foreign politi situation, all abnormal and the result the exigencies of the past five years:—

(1) The expansion of the volume of t media of exchange, resulting from e tended issues of currency by the warri nations and the flotation of immen credits to produce means for the maint nance of the struggle.

(2) The disturbed condition of intern tional exchange.

(3) The demoralization of transport tion.

(4) The absence of stable and respo sible government over extended are hitherto dependable consumers or produ ers, or both.

(5) The paralysis of production throug out the nations of Europe; their financ inability to resume these operations, t gether with the destruction of the sourc of production and wealth in the war zo and the necessity of rehabilitating the areas.

However dull of perception or lacking intuition, every business man conscious realizes the influence of the conditio enumerated and is to a degree shaping t conduct of his business in conform with their influence. Human judgment not infallible, and in any business equ tion prudent men realize that effects not always take the shape that causes i dicate, and give due weight to uncertai ties. Business is stumbling over these u certainties and has a tendency to he tate until the safe path shall becor more apparent. This business hesitan is decreasing as time elapses and f war effects become more clearly perceiv The high level of commodity prices h engendered caution; consumption in so lines has been retarded and stocks most positions reduced. With lessen production of commodities not necessa to the conduct of the war, there natura followed a withdrawal of reserve stoc of these commodities. The replenishme of these stocks should serve to preser the activity of those agencies temporar devoted to war work, while the restor tion of normal commodity reserves in t country and abroad should employ o productive energies for an extended peri

DEALERS AT THE NATIONAL HAY ASS'N CONVENTION, DETROIT.

and should insure steady and profitable employment of our production facilities. America, almost untouched by loss, either of facilities or man power, is in an enviable position. Never were her resources relatively so commanding in importance or so potent for service and profit. American industry looks out upon a field rich beyond compare and already white with the harvest. The opportunity is here; and the energy and unit of action, the faculty of quick perception and the facility to organize which amazed the world in our preparation for war will turn with equal intensity to preparation for peace. We believe that business is adjusting itself correctly to post-war conditions; and let us not consider the conditions enumerated as deterrents; but rather let us consider them as guide posts indicating the safe path for business direction.

This convention represents a great industry. We are business men and are parties to the development of industry on a peace basis, participants in the prosperity that is certain to ensue and a factor in the "The Everlastin' Team Work of Every Bloomin' Soul" by which it is to be accomplished. There is no past with which to compare the present. We can only speak in terms of the future.

For some months in a manner we have been marking time. Business has hesitated and was timid. Conditions were too unsteady and should stabilize. Prices were too high and should decline or the political situation should clarify. It is interesting to note that developments are assuming certain definite lines and that to a certain extent our waiting has been not only watchful but wasteful. The prime factor in the mind of every business man is the factor of prices. As they immediately become sellers, buyers guard against declining prices, and high price levels promote caution in commitments and a minimum in reserves. Anticipation of lower prices has been general but is rapidly proving erroneous. This very anticipation may have appreciably lowered prices only to see them rebound when economic conditions reasserted themselves. The rise in commodity prices in August, 1914, was followed in October by a recession to the normal. There was no sound economic basis for the rise—merely sentimental reasons based on the general conclusion that war would enhance values; so that it is safe to assume that the decline in commodity prices in April and May, 1919, is not the beginning of a decline that will be gradual and long continued but was based on the general feeling that the coming of peace should bring lower prices; and again we may expect economic forces to assert themselves and values to rise rather than to decline as we approach the fall and winter.

Commodity prices depend upon the ratio of the volume of circulating medium to commodity supply. Prof. Fisher clearly states: "If the number of dollars circulated by cash and by check doubles, while the number of goods and services exchanged thereby remain constant, prices will about double." For over four years the civilized people of the earth designedly destroyed commodities and created currency. The result is a ratio expressing itself in the prevailing price level. The inflation is world wide, declining with the distance from the center of actual warfare. In like manner prices are highest in the countries most vitaly affected and lowest in the most remote. In the United States, by an effect unforeseen by the public, the extended issues of Government securities have to a marked degree promoted currency inflation. Government bonds as securities have a peculiar standing both with the public and with the banks. They are more nearly liquid than other securities because their use as collateral is a matter of common knowledge to borrowers and banks more readily lend on them. Under the Federal Reserve Banking System loans on these bonds are rediscounted with the Federal Reserve Banks and are thus turned directly into money. This situation is quite peculiar, as from domestic absorption of wealth into a National debt comes a decided increase in the amount of money in circulation. In other words, our National debt is being turned into money, how extensively may be perceived when so high authority as the editor of "The Wall Street Magazine" asserts that no less than five billions of loans have been made against Government bonds as security. At least, we do know that within the past year Federal Reserve Notes in circulation have increased to exceed one billion dollars. This is the major factor in the increase in the money in circulation in the United States from $34.74 per capita in 1915 to $54.56 in April, 1919.

If money circulates as rapidly as four years ago the full effect of this per capita "inflation" must be perceptible in commodity prices. We will concede that money circulates more rapidly and that the use of bank checks has not declined in volume, hence the effect by these collateral agencies must be enhanced rather than diminished. So long as this process continues prices cannot decline. Either business processes must slow down, retarding the turnover of the money in circulation, or deflation must begin in order to bring about a permanent price decline. Neither is in evidence at present. Low reserves of manufactured commodities and a record production of raw materials should stimulate business to the last degree, while with further issues by the Government of treasury certificates of indebtedness inflation will probably increase before the turning point is reached and loans on Government security collateral begin to be retired. The creation of new wealth in this country must provide the means for retiring these loans. Thus the stimulation of production will eventually correct a situation of economic instability. Deflation can only proceed by degrees and recession of prices will be equally as gradual.

The hazard in the ownership of commodities now is sentimental rather than actual. Business is awakening to this fact. Timidity is disappearing, and buying and selling are proceeding with a lessening regard to the high level of values. Prudence in business should always restrict ownership of a commodity that is above parity in prices as compared with other commodities, but the same caution is not justified when values are on the same level. Commodity prices, including that of labor, are on about the same relative basis as in 1914, and constructive enterprise realizing this fact will assert itself. Business should not be retarded by the fear of an immediate decline in prices. Such a contingency would violate all economic laws. The longer the foresight, the less regard will be given to values. Many authorities do not hesitate to declare that the present plane of prices will become permanent and that never again will money become so dear or commodities so cheap as before the war. This opens a field for speculative discussion; but that prices will not materially decline in the near future is becoming generally recognized and business is rapidly adjusting itself to the conviction.

A good reason why prices cannot decline is that industry cannot wait. The necessities of the situation are absolute in their urgency. Europe is prostrate; how absolute is this condition, we are told we do not realize. Frank A. Vanderlip on his recent return from Europe made a remarkable address before the New York Economic Club. Every American business man should read this speech. "If," he said, "I were to try to put in two words what I sum up as the most essential thing to grasp about the situation in Europe the two words would be 'paralyzed industry.' There is idleness; there is a lack of production throughout Europe, and indeed in England, that you can hardly comprehend. There is a difficulty about a resumption of work on ordinary peace affairs that, I think, nobody could be made to comprehend who did not see it on the ground." Now that England, France or Germany should reach out and grasp the present commercial advantage while American business falters, not only fails to frighten but is incredible. Of all nations the war has affected us least. Our industries are intact. We must produce. A recuperating Europe can only continue the processes of its existence supported and supplied by our industry. The business is ours,—ours without effort, in abundance, to the limit of our resources. In this connection Vanderlip states: "While the European situation presents features of the deepest gravity, and while there are possible consequences that may develop from present conditions that would mean a great catastrophe, I am, in the face of all that, filled with optimism in regard to our own future—an optimism indeed that runs beyond anything I have ever felt in my life, if we do our part in helping Europe to get on its feet again. If Europe once starts back toward normal life, the position that America will occupy will, I believe, transcend anything that any nation ever occupied before. But we must not forget our intimate relation to Europe." He further accentuated the necessity of financing Europe and that the establishment of credit on this side is essential in the maintenance of the balance of trade.

The American Government should now withdraw in so far as possible from the establishment of credit in America for European buyers and the task should be assumed by private interests. Already are our financial institutions organizing to supply the necessary credit facilities. It is well to recognize that these credits should not only cover the necessities of life but also the raw materials and partly manufactured articles essential to the resumption of the industries of England and continental Europe. This will aid in restoring productive employment, and idle labor maintained by a non-employment dole is one of the grave problems confronting Europe. America occupies a position unique in economic history—that of a nation controlling both the finances of the world and its supply of raw materials. This fact imposes a singular responsibility which she will assume and the immediate future will witness a development of international trade relations in which she will occupy a position of supremacy which will signalize the era beginning with the signing of the treaty at Paris.

Our National resources are equal to the task, while American financial skill, ingenuity and industry assure success which will require a supreme effort and the cooperation of large financial interests. Withholding the moral support of the Government, with unfriendly or ill-advised legislation, is the one agency that may hinder or retard the realization of the commercial supremacy of America. American business interests are too great, their relation to the National welfare is too vital, to permit of their being entrusted to the care of the legislators who lack either sympathy or breadth of vision. The business of the Nation has not at all times received a fair hearing and it has been subjected to unwarranted burden and inconvenience. The eagerness to promote the interests of local constituencies has betrayed National interests, while political expediency has received primary consideration. Natural limitations may be pardoned, but the sacrifice of the interests of the Nation to secure political advantage is an act akin to treason. Business must be given the widest latitude and must be enabled by friendly legislation to attain the ends that conduce to the firm establishment of a supremacy in the commerce of the world. We need congressmen and senators of judgment and courage, patriotic citizens first, mature men of affairs of the type to which business affairs could be safely entrusted. Industry demands business consideration and resents the suspicious step-brother attitude assumed toward it by the ordinary politician. It must seek by all honorable methods channels of influence for the initiation and promotion of friendly legislation. It has borne more than its share of the burden of war and should in justice find relief. Every scheme of taxation devised a new way of drawing revenue from the business of the Nation. It is time to unload and the first to go should be the excess profits tax. It is unfair in application and vicious in principle. The income tax may be just but a tax on excess profits destroys business initiative, breeads extravagance in overhead, and neutralizes the respect for economy of operation and limitation of waste which characterize every successful business. It is the steady enemy of the business morale of the Nation and wisdom demands its discontinuance. Then, too, the friendship with big business must not be made a political liability. We demand and must secure legislators who possess the courage to champion the rights and the promotion of the business of the Nation, of those who buy and sell in the exchanges and make the markets.

Along with this the financial affairs of our Federal Government should be placed on a business basis, and every business man should lend his influence. The establishment of a budget system to replace the present slip-shod, scandalous method of Congressional appropriation of public funds is imperative. Taxes have become a very real thing and the taxation problem should command the attention of every thinking citizen. The only means by which to reflect adequate consideration of the problem of taxation is by a National budget. Estimates should only be made by the heads of Government departments. This privilege should be denied the House of Representatives, and no appropriation should be allowed except to meet the items contained in these estimates which collectively should compose the Annual Budget.

A French writer says: "As a matter of fact, the budget is not a strong-box: rather, it is a watering-pot; as it is filled and the water distributed, the country prospers." Nominally both great political parties are pledged to the establishment of a budget system, but until public pressure becomes strong enough to overcome the professional political influence in both parties the old method of appropriations will prevail. It is probable that at an early date a bill will be introduced in the House of Representatives, creating a so-called budget system but which in reality

DEALERS AT THE NATIONAL HAY A SS'N CONVENTION, DETROIT.

does nothing of the kind and still leaves the power of making estimates for expenditures with the House itself. The American people will not be deceived. There cannot be a budgetary system worthy of their confidence which does not divest the House of Representatives of the power of creating estimates. Millions of bond-holders are now investors in this Government and they are entitled to a full report of the country's finances. Every need of the country should be itemized and the sources indicated whence taxes may be drawn to meet them. In anticipation of each fiscal year the Chancellor of the Exchequer submits to the British Parliament a budget containing an estimate of the entire needs of the Government for the coming year. The whole is plain and every subject of the Empire may know what money will be spent and where it will be spent. Guesswork is eliminated along with extravagance and the National "Pork Barrel." The United States has outgrown the period when it can with impunity tolerate wilful waste and unbusinesslike conduct of its affairs. The admonition to save has been driven deep into the National consciousness and we shall demand honest answers to our inquiries as to the disposition of the moneys we contribute in the form of taxes. Every business man should inform himself as to the present methods of the appropriation of public funds and put his influence behind the movement toward a systematic and scientific national budgetary system. Remember this fact: legislators who decline to place the business of the Government on a sound business basis are unsound and unsafe wards of the business interests of the individuals composing this Government.

Then, too, the Government should speedily release control of the business of the country. Authority and power once assumed are reluctantly relinquished. Many restrictions have been removed and it may be well not to be too impatient. Full credit should be given the Administration for the success in the conduct of our participation in the war. When all the rest of the world applauds, we by withholding applause may bring ridicule upon ourselves. But now that the war is over, policies should be directed toward a restoration of the autonomy of our industrial affairs, and the public temper will not incline toward excusing unreasonable delay in making preparation toward this end, while an effort to secure party advantage in the manipulation of the interests in control will meet with merited rebuke. What we want now is not political manœuvers but a display of hard-headed business sense in dealing with the questions pertaining to the industries of the Nation.

The transportation systems will pass from Government control and apparently there is no likelihood of Government ownership of either railways or telegraph lines. Business will not fail to recognize the growth of the doctrines of a moderate socialism which will manifest itself in a closer relation between Government and the public utilities as well in the position labor has assumed and will maintain. The nations of western Europe are permeated with this evolutionary socialism and we cannot escape its influence. Tendency toward anarchy, failure to recognize and respect authority, and animosity to organized government must be eliminated, and our institutions must be maintained unimpaired. But it is time to realize that we are living in a changed world. We all agree that the railroads will never revert to the former unscientific and wasteful methods of operation. Stockholders are demanding a measure of protection and in some manner by the agency of the Government these rights will be safeguarded. Organized labor has gained official recognition. On various commissions connected with the conduct of the war, labor as a whole and its various organized trades were accorded representation on the same basis as that accorded the industries. During the period of the control of public utilities union labor has negotiated through its officials and has won recognition of the right of collective bargaining. This pendulum will never swing back. Now that they have been granted, no future administration, whatever its nature, will deny these privileges. These are some of the manifestations of what may be termed evolutionary socialism—not a theory that shall in the least endanger the rights of property, but a fact that labor is no longer a chattel of capital, but a partner in industry demanding recognition as such in improved working conditions, better housing and a more liberal share of industrial profits.

The man in business must adjust his affairs to these new conditions which have come to stay. The ideal of yesterday has become the real. After all, the cost of labor is not in wages per day but in cost per unit of production; and after all the secret of prosperity is team work, mutual interest and co-operative effort. The wage plan of the Ford Motor Co., the profit sharing of the Procter & Gamble Co., and the dividend policy of the Kelly-Springfield Co., all successful and all recognizing the right of labor to a share in profits are only the pioneers in policies which will determine the wage return of the labor of the future. There is extant a fallacy that even with this recognition and under the stimulation of high wages labor has failed to increase its output of product. On the other hand, the same amount of labor produces more goods now than it did before the war. I quote from figures compiled and issued by the National Bank of Commerce in New York showing that the total quantity production of the United States in 1917 was 31% greater than in 1910. On account of the large number of men drawn into the army and navy 1918 showed some decrease but still was nearly 25% above 1910. In the meantime our population had grown slightly less than 13% so that the gain in per capita production was about 10%. To this result improved machinery and better methods have contributed. We are not failing to adjust ourselves to changed conditions and if labor costs and selling prices have increased proportionally over pre-war levels industry should show better profits now than it could show then.

Referring again to the five major factors which may operate to retard the full development of industry under post-war conditions, we yield to the following conclusions:

(1) The conviction is steadily deepening that the present level of prices is based on economic conditions and is to continue for an extended period, with the result that the hesitancy toward promoting production and investing in normal commodity reserves is being reduced, while building operations are showing a steady increase.

(2) The establishment of credit balances in America under plans in formation by international bankers and the flow of gold which is again setting in toward the United States will tend to reduce the disparity in foreign exchange. This tendency will be quickened later by an increased volume of imports from Europe following a supply to Europe of raw materials.

(3) Transportation facilities should improve rapidly. The tonnage of our merchant marine is speedily being augmented by new construction and by the release of boats in transport service. Next to the actual necessities for human existence, material for the restoration of the transportation systems of Europe will be supplied and facilities will rapidly assume proportions that will afford distribution of all staple and necessary products of the soil and factory.

(4) Government in Europe will become more stable. International guarantee of existence and the stabilizing influence of the arrangements under the terms of the treaty of peace should restore a degree of order and stability that will make safe trade over an area that will rapidly widen as hunger is reduced and productive employment is restored.

(5) The rehabilitation of the destroyed areas of the war zone will take time but will be accomplished without severe drain on the resources of the devastated nations. Indemnities from the Central Empires will counter-balance much of the cost and their expenditure will stimulate traffic in materials entering into building and in farm supplies and household necessities.

The liquidation of this war will require an extended period. The unnatural effects of the war are still in full force, while the natural laws of supply and demand are held in abeyance by a control of supply. As we approach the end of the period of control of staples and of transportation some hesitancy will manifest itself and some readjustment is to be expected. But individual initiative is unimpaired and calm business judgment still abounds. Industry must have the moral support of Government and the force of large aggregates of capital will be permitted to assert itself. The public must discard the past as a basis of comparison with the present and faith in the future of our institutions is necessary as well as a firm belief in the recuperative powers of the peoples of the earth. We shall not forget that the great duty of American industry is first to supply America, but in international trade America has bounded into a position of super-importance. Adequate provisions are being made to realize on the opportunity and to maintain the enviable position we have assumed among the peoples of the earth.

Business is adjusting itself properly to post-war conditions and this fact is in itself a tribute to the spirit of the American people, the prescience of American thought and the resourcefulness and the adaptability of American industry.

Transportation Report.

J. H. Devlin, Chicago, chairman of the Committee on Transportation, made his report as follows:

Mr. Chairman and Fellow Members of the National Hay Ass'n.

In conference with Traffic Managers of organized hay exchanges and associations the outstanding feature of transportation activities in the past year has been the desire of all to co-operate with our Government in moving hay and feed stuff of every description quickly, loading and unloading with the least waste of car hours and working closely with the many interests of the Railroad Administration and a special Committee of National Defense of the American Roalroad Ass'n. The work of your committee has therefore been largely passive rather than a series of accomplishments in securing much needed adjustments of inequalities in the situation.

While our country was at war our patriotic desire to hamper in no sense the movement of ammunition and the endless list of war materials, in which there is of course included grain, hay and other feed stuffs, have prompted us to accept with good grace the many restrictions placed upon the enterprise in which we are all engaged. Most of us had some very decided ideas that under normal times would have been prescribed to the fullest and now that we are officially again at peace with the world, we feel in stating that as private citizens and hay operators we are not in sympathy with government control of Railroads.

The frequent imposition of limited and broad embargoes probably had some good reason not always apparent on the surface of things. Frequently during the past few years all Western roads over an extended period would be cripped by lack of empty cars. During such times it has been the apparent belief of local agents, and sometimes of the fellows higher up, that even the worst bad order cars were suitable for the loading of hay, such equipment imposing heavy losses on shippers who under the spirit of co-operation above mentioned unwisely loaded the hay into bad order cars. Shippers should insist that they be furnished with cars suitable for the transportation of hay for by so doing they will avoid loss and damage claims, the collection of which, as we all know, is a very tedious and long drawn out affair. It is also the desire of your committee to point out the advisability of possessing accurate scale weights in the loading of hay, so that the same can be used when presenting claims for shortages.

The permit system, largely a Government control measure, has proven very injurious and the cause of a great curtailment of the business of dealers in markets so affected. Mr. Fred B. Williams of New York City properly submitted the matter when he said, "The permit system is unjust, unfair, discriminatory and unlawful. It is injurious and could be avoided if the carriers were practical hay men. It does not carry out the idea of regulations but rather is one of control without regard to consequence." It has been estimated that New York dealers alone suffered a reduction of 25% in their business.

Your committee, in co-operation with other associations, appeared before the Interstate Commerce Commission at a meeting held in Chicago to consider the reconsigning case. A decision has recently been rendered providing a flat charge of $2.00 a car without limitation of time on hay and straw held for inspection. Where cars are held in outer yards for the convenience of carriers no reconsigning charge will be made.

Your committee also appeared before the Interstate Commerce Commission with other associations, asking for a reduction in the excessive demurrage charges. A recent ruling by the Director General has reduced the charge to go into effect July 20th, to $2.00 per day for the first four days after the free time; $5.00 per day for all time thereafter.

The question of bonds in protecting the carriers on "order notify shipments" of litherage, the minimum weight proposition and other transportation details peculiar to certain parts of the country have been admirably handled in defense of our interests by Secretary Tayler thru the Association office at Winchester, Ind. In his office he maintains very complete and up-to-date tariffs and other transportation files which are always available to our membership.

Many local but decidedly important matters have come before your committee, such as the practice of the terminal carriers of St. Louis requiring shippers to transfer to other cars at their own expense, shipments that were received in defective equipment. This condition was imposed precedent to the rebilling of Interstate destination. Ruling 50, I.C.C. No. 474, redresses such transfer charges.

Your committee desires to express its appreciation for the valuable assistance given by the different trade papers that have kept us so well posted during the troublesome times thru which we have just passed, relative to all transportation matters and especially of the many changes incident to these problems: Our Own National Hay Press, Price Current-Grain Reporter, American Elevator & Grain Trade, Hay Trade Journal. All of these and others through their columns and editorials not only notified of all Administration orders issued for the transportation of hay, but advised as to the best methods to comply with the same.

In concluding, I wish to call to the attention of the members of the Association that we are again threatened with an increase in freight rates on hay. I can best place before you the seriousness of this proposal by quoting from an address given recently by our Secretary, Mr. Taylor, before the Texas hay and grain dealers. In speaking with reference to the proposed further increase in freight rates he gives a warning of which the National Hay Ass'n at its present meeting will do well to take note. Mr. Taylor said: "Not the least of your troubles in the past have been that of freight rates and I want to voice a solemn warning that you are now standing upon the brink of an abyss threatening your very existance. Freight rates on hay and grain cannot be further increased without the danger of reaching the breaking point—and that may be used in a dual sense—first, the point beyond which the cost of production cannot go and the consequent cessation of shipping, and secondly, the stagnation of local markets by reason of inability to absorb the supply and the breaking of the grower."

Your committee strongly advises that the Association before the close of this convention take such action as may be necessary to bring before the proper authorities the dire results that will come to the hay trade in general, if any further increase in freight rates is imposed.

Dr. John Acheson, president of the Pennsylvania College for Women, Pittsburgh, made a most interesting talk on "America in the New Age."

THURSDAY AFTERNOON.

Rudolph Raabe, Ft. Jennings, O. made his report as chairman of the Arbitration Committee as follows:

Full reports of awards made during the year, together with the detailed report of the secretary on all compromised cases will be published in the proceedings of the Convention. In all there were 248 cases handled, which is more than have been brought to the attention of the secretary in a number of years, if not the largest ever handled.

They were handled as follows: Cases handled by committee, awards rendered, 17; cases withdrawn, 2; cases compromised by the secretary, 13; cases handled by the secretary, paid in full, 11; cases filed, suspended for refusing to abide by decision of committee or to arbitrate, 9; cases now under preparation, 23; cases of minor importance unrecorded, 168; total, 243, less four cases appealed to board of directors, leaving net total of 239.

It is with a great deal of pleasure that I submit this report here today. My experience has been great in learning the ways of men. The work has been hard and strenuous for every member of this committee, but hard work has its pleasant features. Arbitration means rendering of judgment and our committee did this without any prejudice. I firmly believe we had more work and had more cases to dispose of than any previous committee for a number of years. This we attribute to the abnormal conditions of our country. However, it is again the same old story as in times past, namely, a lack of the knowledge of our trade rules. It is remarkable that men, when they differ in what they think considerable, are apt to differ in almost everything else. When once a case is brought to the attention of the Arbitration Committee, the parties concerned will no longer have confidence in each other. Their difference begets contradiction and contradiction begets heat and heat rises into rage and ill-will. Then all human judgment is laid aside and men no longer consider their business transactions as sacred, but have only this one contention in mind: they differ in affection as they differ in judgment, and the contention which began in pride ends in anger. Too often cases are brought to the attention of the secretary, where both parties cheerfully submit to and are willing to abide by the action of the committee, but when the award is made, the party against whom the decision is rendered works himself in a heated passion and concludes that he has been wronged and, in fact, makes himself believe that everything else in the Association is wrong and immediately withdraws his membership. By so doing he conclusively tells the members of the Association in general that his motives are selfish and his business principles are confined within the narrow boundary of himself. He deprives himself of the co-operation of the best corps of business men in this country. In fact, the Association is better off without such members; for they see but one side, and that is their own. Such a man is not worthy of the respect and credit of his fellow business men.

Too often the committee had incomplete cases presented for their consideration, and papers had to be returned for completion or for additional evidence before they could be acted upon intelligently. In my judgment it would be well for every member to thoroughly familiarize himself with our Trade Rules, and especially so where he is preparing a case for the Arbitration Committee. This would be a great help and it would be much easier taken care of and I firmly believe that many cases would never be presented. Either the plaintiff or defendant would see where he has violated some of the Trade Rules and he would rather submit to a fair settlement. Men's arguments prove nothing but their wishes. Therefore we should be calm in arguing with our fellow dealer or competitor. Fierceness makes error a fault and truth discourtesy. There is seldom a dispute without passion; and usually from the tone of the evidence submitted you can readily determine the temperament of the individual. Let us, therefore, prepare and present our cases in that good humor with which we would prepare an invoice or an account sales. Retain our old friends, who are as silver, and make new ones, who are as gold. We would then have before us the good old Golden Rule.

Many of our controversies the past year have been due to the erratic markets. We all know it is hard to fill a sale when the market has made a sharp advance; and vice versa it is hard to accept hay and straw on a contract when the market has made a sharp decline. But each of us should lay prices aside when it comes to filling our obligations. Morally the committee could see many things which were right and which were wrong, for contracts were apparently made in good faith but not carried out according to Trade Rules.

It is remarkable to note the very small claims which are brought to the attention of the secretary. We must marvel that some people are willing to sell themselves so cheaply. There is one way to avoid so many cases, and that is, education. I do not mean by this that our members lack knowledge; far be it from this. But I do say that too many of us lack the knowledge of what composes our Trade Rules. We too often feel that we can use our secretary and his helpers as a collection agency, whereas it would be far better to settle our little differences and meet each other half way. If we could have more

meetings like our conventions, where business can get together and exchange ideas, we would have a better understanding of each other and our mutual relations would be greater. Had the kaiser had a better understanding of what the young American manhood was composed of, he would have cheerfully submitted to arbitration rather than suffer such terrible defeat. I trust the time will come when all cases of all description are settled by boards of arbitration, rather than by bloodshed. Too often a controversy leads to passion and ill-will and even loss of business.

In all our differences let us consider that we are all mortal and that ere long our very memories will be extinguished. If we were a little more inclined to look at life in this way we would not hang to the last straw in order to squeeze the last dollar in any of our controversies. If men would consider not so much wherein they differ as wherein they agree, there would be far greater charity and better feeling in the world.

The committee wishes to congratulate the secretary and his office help for the courteous treatment and wishes to commend him for the splendid manner in which the Association's business is carried on.

Lee G. Metcalf, ex-President of the Grain Dealers National Ass'n, made a talk on "The National Organizations Essential." You hay and grain men have seen the results of national organizations, he said, and do not have to be told of the benefits and the value they have been to you during the period of the war. Your organization stands today for honesty and integrity. All members should read the preamble to your Constitution and By-laws and study it. You would then become better business men, for it stands for integrity in business. The usefulness of our association will be measured by the individual effort put forth by each member.

The report of the chairman of the committee on By-laws stated that for the present there was no need for any change in them. The By-laws provide that the rules for the conduct of arbitrations shall be prescribed by the Board of Directors because of changing customs and the necessity that arbitrations be conducted in conformity with existing business conditions.

SELLING HAY TO UNCLE SAM.

Capt. P. W. Kniskern of the War Department, Chicago, told of some of the problems that confronted the forage branch, and the help the officers of the National Hay Ass'n had been to them. He said: We will not accept No. 3 hay at a discount on purchases of No. 1 or Standard. Hay shipments must be made in required time so as to keep the supply moving regularly and will not be accepted after shipping time has expired.

BOOSTERS' PRIZES.

The presentation of prizes to the successful contestants in the membership campaign was made by D. S. Wright, Weedsport, N. Y., ex-president of the Association. They were as follows: C. M. Rice of Omaha, 58 new members, a gold watch; Rudolph Raabe, Ft. Jennings, O., 26 new members, a gold watch; J. E. Chicoine, Quebec, Can., 23 new members, a watch charm; W. A. Miller, San Francisco, 13 new members, gold watch charm; H. L. Pennington, North Platte, Neb., a hay bale watch charm.

G. I. Christie, Assistant Secretary of Agriculture, Washington, spoke in an interesting way on "Agricultural Problems." He pointed out that the American agricultural problems could not be considered alone. They are linked, since the war, with the problems of Europe and, because of conditions abroad, it will be a long time before the American farmer can be freed of the necessity of feeding a large part of the population of other countries. He continued in substance as follows:

It is expected that with the coming of an armistice and peace there would be an immediate return to the farms of the European men who had been withdrawn from them, and, as a consequence, a quick return to the conditions by which Europe was able to feed itself without much, if any, assistance from our farmers

But this has not been the case. Because of the chaotic condition of agriculture, the instability of governments, and so forth, the demobilized men, instead of returning to the land, have flocked to the big cities. Budapest, with a population before the war of 800,000, now numbers 2,000,000 people. More than 1,000,000 has been added to the population of the comparatively small city of Vienna since the signing of the armistice. Furthermore, much of the rich land of the European countries has not been planted and will not be cropped this year because of the unwillingness of the owners to take chances with the political unrest among the masses.

It is equally true that there is unrest among our farmers. Everywhere the man on the land is organizing into groups to make sure that he obtains his rights and a fair share of the proceeds from his labor and land. It will not be enough, hereafter, to tell the farmer that this is the price he is to receive and no more. He will not take that answer. Everywhere, he is beginning to ask why, and silver-tongued agitators find it easy to go among the farming class and work up dissatisfaction and discontent by accusing the grain dealer, the hay dealer, the banker and the grocer of fattening off of the work of the man of the soil.

On the other hand there has been too much talk throughout the country of the farmer getting rich, of the farmer getting an undue share of the advance in prices all along the line. There has been too much talk of the benefits of the Government guarantees on wheat and pork all going to the farmer.

You hay men who are close to the actual situation know that that kind of talk is untrue and unjust. I tell you that the farmer would have made much more money had the Government never guaranteed the prices of these things.

When we guaranteed a price of $2.20 for wheat it was selling at $3.50 in the open market. And when hogs were guaranteed at $16.50 labor delegates came to Washington, saw the President and the Department of Agriculture and everybody else who had anything to do with the matter, saying that the farmer was being enriched at the expense of the workman. They declared that if the guarantee were lifted the price of pork would immediately drop.

Well, these men were listened to and the guarantee was removed. What happened? Under the ordinary law of supply and demand the price of hogs began jumping immediately until now they are selling at $23!

Mr. Christie warned also against speculation in farm lands and said that

Repeat Orders Tell The Story

They're coming in with a rush from scores of Ankorite dealers. Dealers who began by ordering a few hundred posts are now ordering carload lots—by wire!

We've been obliged to double and re-double our output to take care of them—and we'll have to double it again within the next six months. Dealers who used to sell wood posts have switched to Ankorite and they're making dollars where they used to make dimes!

Thousands of posts will be needed in your territory during the next five or six months, and you can get more than your share of the business by securing exclusive sales rights for Ankorite Steel Posts. Other dealers have had remarkable success with them—why not you? Farmers *want* Ankorite Posts and you are the logical dealer to supply them. Small investment—quick turn-over—you buy them direct from the mill.

Ankorite STEEL FENCE POST

Territory is being closed fast—you can hold yours open and secure exclusive sales rights if you'll write NOW. Don't put it off.

CALUMET STEEL COMPANY, 208 South La Salle Street, Dept. 7, Chicago

The Mill Behind the Post

This big, modern steel mill has a capacity of forty thousand posts a day—enough to build 125 miles of fence. We can make immediate shipment in any quantity.

to such an extent had this practice been indulged in that he knew of one farm changing hands six times in one week.

NEW TRADE RULE.

S. L. Rice of Metamora, O., chairman of Trade Rules Committee, offered the following rule which was adopted, to be known as Rule 17: "Unless time is not specifically specified when an offer is made, the time for acceptance of such offer will not be binding at the expiration of twenty-four hours."

Secretary's Report.

J. Vining Taylor, Winchester, Ind., Secretary-Treasurer, made his annual report as follows:

The report of Sec'y J. Vining Taylor was an amplification of the report of the Board of Directors made by President Walton printed above, that is to say in all its major particulars.

A section, however, is given to consideration of the growing crop, which he says has been estimated by the Bureau of Crop Estimates at 116,000,000 tons compared with 90,000,000 on preliminary estimates for June 1, 1918, and 75,460,000 final estimate Dec. 1, 1918. "The present crop," says Mr. Taylor, "has been produced under excellent conditions and the quality, so far as I have been able to learn, is quite a bit above normal. However, I cannot agree with the Government's figures from the information received in our office. As we see it, there will probably be about 100,000,000 tons of hay. I believe most of you gentlemen will agree with me, especially those from the growing sections, that from 15 to 25 per cent of the meadows have been sacrificed in favor of wheat, corn and oats."

Mr. Taylor reports having examined and recommended for approval as National Hay Ass'n Inspectors 14 men, giving now 25 inspectors working under the approval of the Association in the following markets: Atlanta, Baltimore, Birmingham, Buffalo, Cairo, Central New York Hay Shippers Club, Chattanooga, Chicago, Cincinnati, Cleveland, Columbus, Denver, Ft. Worth, Indianapolis, Jacksonville, Fla.; Kansas City, Louisville, Michigan Hay & Grain Ass'n, Mobile, Nashville, New Orleans, Newport News, New York State Hay & Grain Dealers Ass'n, Norfolk, Omaha, Philadelphia, Pittsburgh, Richmond, Salt River Valley Hay Dealers Ass'n, San Antonio, Seattle, Savannah, Sioux City, State of Minnesota, St. Joseph, St. Louis, Tampa, Unadilla, N. Y.; Washington. This gives 39 markets using Association grades in full. In addition he reports that Louisville, Chattanooga, Nashville, Memphis, Knoxville, Tenn.; Tampa, Cairo, Chicago, Houston and E. Paso, Tex.; Newark, N. J.; Columbus, O.; Tacoma and Indianapolis are working for approved inspectors and plug track inspection.

The income of the Association including balance on hand July 1, 1918 of $7,522.81 and $2,000 of Liberty Bonds and income publications totals $29,009.87. Total expenses including bonds purchased $2,500, salary account $6,699, printing and stationery $2,541.73 were $16,321.65, leaving a balance on hand of $15,188.22.

NEW OFFICERS ELECTED.

R. B. Clark read the report of the Nominating Committee as follows:

President—Frank L. Young, Lansing, Mich.; First Vice-Pres., Chas. D. Carlisle, Kansas City, Mo.; Second Vice-Pres., Fred M. Williams, New York. Directors—Samuel Walton, Pittsburgh, Pa.; Geo. S. Bridge, Chicago; John E. Collins, Jr., Cincinnati; Harold Pratz, Waterloo, N. Y., and J. E. Chicoine, Vercheres, Que., Can.

FRIDAY MORNING.

F. L. Young, Chairman of the Grades Committee, made the following report:

Your Committee on Grades offers the following report:

First. The retention of those grades which were adopted at the suggestion of the Forage Department, and with the understanding that they remain in effect for one year.

Second. We recommend the continuance of the so-called Washington State Grades, which were adopted by you to be in force for one year.

Third. A grade to be known as No. 1 mixed timothy and wild hay, and a second grade to be known as No. 2 mixed timothy and wild hay—

"No. 1 mixed timothy and wild hay shall contain not less than 50 per cent timothy, the balance to be wild hay, all to be of good color, sound and well baled.

"No. 2 mixed timothy and wild hay shall consist of not less than 25 per cent timothy, the balance to be of wild hay, fair color, sound and well baled."

Fourth. Markets adopting the National Hay Association grades and desiring approval of their inspectors shall request the same of the secretary. No inspector, however, shall be examined and approved in his home market, he presenting himself at another appointed market for examination.

Fifth. No inspector shall be approved by the National Hay Association who is supported by the fee system.

Sixth. We further recommend that one of the duties of an approved National Association inspector shall be to attend each annual meeting of the association and that he be held responsible for a proper exhibit of samples of those grades of hay generally handled on his market, those samples to be used for comparison of application and interpretation of the grade rules by the different inspectors and the members of the association.

The following recommendations on grades were received from Paul R. Kalman, chairman of the Hay Committee of the New Orleans Board of Trade, and adopted as part of the report of the grades committee.

JOHNSON GRASS.

No. 1 Johnson Hay—Shall be Johnson hay with not more than 20% mixed with native grasses, fine texture, good color, sound and well baled.

"No. 2—Not more than one fourth mixed with other grasses, reasonably fine texture, fair color, sound, well baled.

GRADES FOR RICE STRAW.

"No. 1 Rice Straw—Shall be rice straw reasonably clean, sound, dry, and well baled.

"No. 2 shall be all other sound rice straw well baled and not fit to grade No. 1."

OTHER REPORTS.

The Auditing Committee reported that it had examined the books and records of Secretary-Treasurer Taylor and found them correct and commended the Secretary for the neatness with which they were kept.

The report of the Board of Directors as presented by President Walton was highly commended by the committee appointed to pass on same.

Resolutions.

Geo. S. Bridge, chairman of the commitee on resolutions, presented the following resolutions which were adopted:

This association today is completing its twenty-sixth assembly. The past year is passing into history of our organization as one of the most prosperous and successful of our existence. Like the year preceding, it has been one of exceptional achievement, and likewise very much important work has been accomplished by the association through the hearty co-operation of its members and especially the untiring efforts of its president; therefore, be it

Resolved. That our most sincere thanks and gratitude be extended to our president, Samuel Walton, for the excellent guidance and untiring effort for this association during the past year.

Resolved. That this association extend its thanks and appreciation to its secretary, J. Vining Taylor, and his able assistant, Morton Longenecker, for the excellent performance of the extremely arduous duties required of them during the past year of our existence.

That this association acknowledge the achievement of our success through the guidance of our board of directors and for their very efficient service and untiring efforts toward the upbuilding and strengthening of our association.

COUNTY AGENTS.

Whereas, It has been brought to the attention of the members of the National Hay Association that there seems to be a disposition on the part of the Department of Agriculture to assume an attitude which is apparently being carried down through its various departments in several of our states, whereby these state and county agents are perform-

(Concluded on page 35.)

Michigan Hay and Grain Meeting

Work Done in the Past Year—What the Secretary Has Accomplished in Transportation Matters—Menace of the Nonpartisan League and the Meddling of the County Agents

Reported by J. C. STRONG

In calling the eighteenth annual convention of the Michigan Hay & Grain Assn. to order President Ryon of Lansing stated that the president's address would be the report of the Board of Directors. He said in part:

Annual Report.

There has been some criticism of the results of the Association's activities during the past year, but we have felt that we should refrain from undue publicity because the problems confronting us were the warehouse bill and the activities of the Non-partisan League. Your secretary has been very busy on traffic matters. In regard to the public warehouse bill he presented our case before the senate committee at Lansing, which had this bill in charge. As you know it however passed the senate but was finally lost in the house. There is, however, still much activity around the state in regard to the bill.

The public welfare committee of the state consists of ten members made up of different organizations, including the potato, bean and hay and grain trade associations. The committee intended to start a campaign of education in the state. The work was not done, but the committee still exists and is ready for work when called upon.

Our publicity during the year to our members was through a bulletin, and we also sent to each member a paper called "The Farmer and Townleyism," which showed the movements of the Nonpartisan League in North Dakota. We wanted our elevator men to read it so as to be in a position to talk and explain the proposition to their farmer patrons and how they had introduced a bill in the North Dakota legislature to bond land to 40% of its taxable value, etc. I am not opposed to farmers organizing farmers' coöperative companies. There is no reason why a farmer should not go into the grain business like any other misguided mortal.

In regard to the margin for handling wheat we sent out a circular asking for statements of the cost of handling wheat, corn, oats and beans as well as side lines. The replies were few. I went to St. Louis on March 21 to attend a meeting called by the Grain Dealers' National Ass'n to discuss the margin for handling wheat. Some reports from large handlers in Kansas showed 6c as the cost, while the average figures were 8.8 cents per bushel. On May 7 another meeting was held at St. Louis. Mr. Noyes, of Jackson, attended and the reports were an average of 8.72 cents per bushel. The idea of the meetings was to show Mr. Barnes exactly what it is costing the elevator men to handle the wheat.

We need more members and money in the association if we are to do constructive work. If we can't increase our association we might get strength by consolidating with some organization in sympathy with our problems.

Sec'y J. C. Graham then read the minutes of the last annual convention which were approved.

Secretary's Report.

Sec'y GRAHAM: The most interesting development in transportation problems is that your secretary is a member of the Detroit District Freight Traffic Ass'n. The Federal Government, when it took over the roads, abolished all old committees and appointed new and smaller committees, who put into effect, or tried to, all things which the Interstate Commerce Commission would not permit under the old order of things. These things were brought to light by the National Industrial Traffic League. It was decided that the public should have equal representation on committees with the railroads, and now no freight rate is authorized and published without our say so. Our committee is one of the best district committees appointed by the Administration, and we are fair to the shippers.

The change in demurrage rules was brought about by the National Industrial Traffic League, of which your association is a member. In the new bill of lading your contract is very materially changed. You should read it over carefully and understand it. Any old bills of lading you may have printed and on hand will, after Sept. 8, be of no value and will not be accepted by the railroads.

It was rumored that the Railroad Administration was considering a 10% flat advance in freight rates, but it was denied. The Administration has stated that the current deficit is not caused so much by the rates as by the lack of business, and Mr. Hines has said that the deficit would be wiped out with the movement of grain and coal.

Our association takes an interest and has a voice in the settling of these big problems which affect you. Last year we took in twenty-five new members and have about 150 members in good standing.

TREASURER'S REPORT.

The report of Albert Todd, treasurer, showed as follows:

Received from dues		$1,008.50
Received special assessment		310.00
		$1,318.50
Bank balance, last meeting		105.61
		$1,424.11
Disbursements		1,314.14
		$ 109.97
Check returned from Detroit Committee		55.00
Balance on hand		$ 164.97

Pres. Ryon appointed the following committees: On Nominations—F. E. Nowlin, T. E. Swift and W. J. Connor. On Resolutions—Frank L. Young, Jas. Kerr and T. J. Hubbard.

Samuel Walton, of Pittsburgh, president of the National Hay Ass'n, made a short talk in which he said:

The great war revealed the importance of your association as well as the National Hay Ass'n to the Government. In the handling of your business, when you found out exactly what the Government wanted, you responded nobly.

Export Business.

Chas. England, of Baltimore, was called upon to say something on the export business. He said in part:

The method of handling and exporting this year's crop has not been fully decided upon. It is important that you all know how the business is to be handled; and I suggest you write your zone agent, Mr. Irwin. I am sure he will tell you all you want to know.

Your job is to handle the crops in your community, and Mr. Barnes's job is to handle the crops of the U. S., and he will not promulgate rules that will be hard on you. The Grain Corporation will permit exporters to export, but they must sell first to the Corporation and then buy back from them.

Ocean freights to the United Kingdom are $1.00 per hundred, $1.28 to the Continent and $1.75 to the Mediterranean. These are very high rates and may be cut in half. So that individual dealers are now a little shy in buying. European buyers must establish credit, so that when the B/L is surrendered it will be paid. No permits now are being issued only on wheat.

H. S. Earl, better known as "Good Roads" Earl, made a stirring address on good roads and what they would mean to the state of Michigan.

W. I. Biles, chairman of the Auditing Committee, reported that the treasurer's vouchers had been checked and the report found correct.

New Officers.

F. E. Nowlin, chairman of the Nominating Committee, presented the following names for officers for the ensuing year. The report was adopted and the gentlemen declared duly elected:

President—A. J. Carpenter, Battle Creek.

First Vice-Pres.—John McAllister, Caro.

Second Vice-Pres.—Wm. Francis, Mt. Pleasant.

Treasurer—Albert Todd, Owosso.

Directors—Harry Northway, Owosso, and J. Baldwin, New Haven. The following comprises the full list of directors: S. O. Downer, H. D. Jeffords, D. Mansfield, Robt. Ryon, J. Baldwin, Harry Northway.

GRAIN GRADING.

H. B. English, of the Bureau of Markets, told of the methods used in inspecting and grading grain as described in the hand book of Official Grain Standards for wheat, oats and shelled corn. These booklets were given to the dealers.

COUNTY AGENTS.

W. A. CUTLER: I think the warehouse bill and the Non-partisan League should have our attention, for they are not dead. The county agent is the same to the farmer as the labor agitator is to the laboring man, and yet we help pay his salary as taxpayers. He is using every effort to put us middle men out of business. He has no license to do this or to go into business through the Farm Bureaus. We should be on the alert and keep posted on what is going on throughout the state. Our most important farmers in our county tell me they do not get any value from the county agent.

At the suggestion of Mr. Cutler to appoint a committee of three to investigate and find out the exact work for which the county agents are appointed and his real duties, and who is the agency back of him, Pres. Ryon appointed the following as the committee: W. A. Cutler, W. I. Biles, Joe Frutchey and Geo. Diamond.

THE HORSE VS. TRUCK.

Frank Young of Lansing offered the following resolution which was adopted:

Believing that it is more economical to use horses than trucks in most instances, be it

Resolved, That the Michigan Hay and Grain Association goes on record to this effect, and urges its membership to give on all possible occasions where practical, data to this effect.

COST OF HANDLING WHEAT.

Mr. Biles led a very interesting discussion on the cost of handling wheat. From 10 to 14 cents seemed to be the figures which in most instances represented the cost per bushel for handling wheat through Michigan elevators.

It was stated that a mutual insurance company was getting out a balance sheet to distribute to its policy holders, the purpose being to determine from figures submitted the actual cost of operating the plant and doing business. This would enable the mutual insurance company to determine who were making money and who were not. Insurance companies feel that persons who make money and know it are safer risks than those who don't.

Owing to the lateness of the hour, Mr. Young, chairman of the Resolutions Committee, suggested that the resolutions which were being drawn up be forwarded to the Board of Directors and be adopted on a majority vote of the Board and be made a part of the proceedings of the meeting. Carried.

B. A. Dean, of Auburn, N. Y., an ex-president of the National Hay Ass'n, made a short address. He spoke on the cost of doing business and said that the Government would be very liberal in allowing dealers to include every item of expense that enters into the doing of business and then allow a liberal margin of profit.

The meeting then adjourned.

PRODUCTION AND CONSUMPTION OF MEAT.

WASHINGTON, D. C., July 19.—The following tables taken from statistics of the United States Food Administration, show the total production and consumption, also the per capita production and consumption, of each class of meat and the total production and consumption of all classes of meat in the United States for the year 1918, as compared with the pre-war year, 1914.

PRODUCTION, POUNDS.

Year.	Beef.	Pork.	Lamb, etc.	Veal.
1918	9,033	11,547	571	1,186
1914	6,997	9,463	799	447

CONSUMPTION, POUNDS.

1918	8,298	9,080	565	1,186
1914	7,067	8,668	815	448

[1]000,000 omitted.

	1918.	1914.
Total production[2]	22,337,030	17,706,249
Total consumption[2]	19,129,819	16,997,943
Per capita production, lbs.	212.32	179.25
Per capita consumption lbs.	181.82	172.00

[2]Pounds, 000 omitted.

YEARLY PER CAPITA CONSUMPTION BY CLASSES FOR THE PERIOD FROM 1911-1918.

Year.	Beef.	Pork.	Lamb, etc.	Veal.	Total.
1911	90.98	93.27	8.46	6.67	189.38
1912	75.32	88.06	8.84	6.53	178.75
1913	73.88	90.81	8.36	5.20	178.25
1914	71.55	87.75	8.25	4.53	172.08
1915	73.29	92.28	6.94	4.72	177.23
1916	76.29	95.52	6.77	7.83	186.41
1917	75.49	71.96	5.03	10.71	163.19
1918	78.87	86.31	5.38	11.27	181.83
Average consumpt'n	75.71	88.25	7.25	7.18	178.39

In the year 1914, per capita production exceeded the per capita consumption by only 7.25 pounds, while in 1918 it had increased to 30.50 pounds, or an increase in five years of 23.25 pounds per person. The greatest increase during this period is shown on veal which increased approximately 148%. Lamb consumption has followed closer the trend of production. The greatest production was in 1912 with a yearly per capita production of 8.89 pounds and a per capita consumption of 8.84 pounds. By 1917, production had declined to 5.06 pounds per capita with a corresponding decline in consumption to 5.03 pounds per capita.

Cotton Statistics for Week.

The following shows the statistical position of cotton figured up to Saturday morning by the *Financial Chronicle:*

	July 18, 1919. Bales.	July 11, 1919. Bales.	July 19, 1918. Bales.
Port receipts	109,144	116,267	33,395
Since Aug. 1	5,853,736	5,744,592	5,749,561
Port stocks	1,180,985	1,206,867	1,032,326
Inter. receipts	66,315	68,392	20,427
Since Aug. 1	6,586,054	6,505,739	7,791,455
Inter. shipments	113,469	108,088	53,980
Interior stocks.	933,604	980,757	747,488
Amount brought into sight	133,841	154,599	95,349
Since Aug. 1	11,334,098	11,185,857	12,010,928
Northern spinners' takings.	49,575	10,657	41,718
Since Aug. 1	2,106,019	2,056,444	2,780,934
Southern consumption	57,000	56,000	81,000
Since Aug. 1	3,366,000	3,309,000	4,167,000
Exports to Great Britain	77,597	131,812	11,290
Since Aug. 1	2,561,353	2,474,184	2,231,269
Exp. to France.	4,658	33,114	5,011
Since Aug. 1	755,443	748,611	639,922
Exports to Continent	43,619	13,038	25,707
Since Aug. 1	2,011,728	1,967,393	1,306,682
Total week's exports	125,874	177,964	42,008
Tot. expts. since Aug. 1	5,328,524	5,190,188	4,177,873
World's visible supply	4,927,937	5,034,743	3,296,644
Of which Amer.	3,336,937	3,380,743	2,157,644
Liverpool stks.	617,000	590,000	269,000
Continental stk.	204,000	232,000	121,000
N. Y. stocks	90,267	91,213	123,977
N. O. stocks	357,247	377,100	343,979
On shipb'd waiting clearance.	171,586	171,315	59,964

The Missouri State Report says that corn in early fields was beginning to tassel on July 1, but the flat lands of the northeast and southeast portions of the state are very foul and some fields have been abandoned.

The Letter Box

Disappointing Yields.

The Price Current-Grain Reporter: Threshing is in "full blast," but yields are disappointing.

Jansen & Son Milling and Elevator Co. at Nelson, Neb., are rebuilding their elevator.—*Ernst Meyer, Oak, Nebr.*

Crop 50%.

Price Current-Grain Reporter: Crop about 50% as good as last year account of rust and blight. The Farmers Elevator Co. is now handling farm implements and machinery. Recently installed a Howe dump scale.—*Farmers Elevator Co., Doland, S. Dak.*

Wheat Loader a Success.

Price Current-Grain Reporter: We have installed a wheat loader which is a great success.

Wheat is coming in in fine shape, testing mostly 60 lbs. But we have had heavy rains recently and expect trouble now.—*Dewey Bros. Co., per Frank Littler, Manager, East Monroe, Ohio.*

In Faulk Co., S. D.

Price Current-Grain Reporter: Rye is being harvested now. It is of good quality, but thin on the ground. Wheat has been hurt by blight and rust. We can't tell as yet, but estimated at about 20 to 25 per cent. Oats are good. Corn is doing well, but thin on account of cut worms this spring.—*Eagle Roller Mill Co., per D. A. Langford, Agt., Cresbard, S. D.*

Crop Poor.

Price Current-Grain Reporter:—The elevator here will not make any repairs this season, the crops being very poor. Rye will run from only 3 to 5 bus. per acre, but the wheat will do better, running from 4 to 10 bus. There is no flax in this part of the country.—*Farmers Elevator Co., per Thos. Lillethun, Mgr., McCabe, Mont.*

Have Sold Elevator.

Price Current-Grain Reporter: We sold our elevator to I. H. Brook & Co. about two years ago. Last fall they sold it to the Farmers' Equity. Paul Crawford is the manager of the elevator at the present time. They have put in a new automatic scale and seem to be doing a good business. Some wheat and rye coming to market.—*Griffith Bros., per Wm. Griffith, Brownstown, Ill.*

What Good Bookkeeping Means.

Price Current-Grain Reporter: Once in a while one of our clients is thoughtful enough and kind enough to express appreciation of the services of our boys. This pleases us, because we know then there are a few people in this world who appreciate good service and are thoughtful enough to tell a person about it.

Following is a paragraph from a letter from the Moline Oil Company, dated July 12, 1919, at which time they sent a check for the account rendered against them: "Regarding the service, I think, as I have stated to people here, a satisfied customer is the very best advertisement possible, and you can rest assured that we are a satisfied customer and anything in our place of business or anything that we might hear of locally, we will endeavor to persuade The Edward A. Pratt Audit Co. way."

When I was in Chicago I talked with you about the wonderful success the elevator company in Newman, Ill., and Ridge Farm are having with our system. Mr. Gordon, who was just over there to audit the books, came back telling us they certainly have a model office and model bookkeeping system for a grain business—the finest he had ever seen. They pay a man a good salary to do the work thoroughly and have everything in fine shape. From the way the books were kept it was not necessary to make any adjustments whatever in the statements, and he was able to audit the books of seven elevators in less than a week's time. They are using the Peerless Elevator System and keeping the accounts correctly.—*The Edward A. Pratt Audit Co., Edward A. Pratt, President, Chicago.*

Confusion of Names.

Price Current-Grain Reporter: Referring to your recent issue of your publication (under the St. Louis notes), we cannot understand how your correspondent obtained the knowledge as written.

The Atchison Co. is known as "The Mangelsdorf Seed Co." and not as E. F. Mangelsdorf & Bro. This is an injury to the Mangelsdorf Seed Co. of Atchison and we must ask you to write them apologizing for this error. The writer was formerly associated with them and has organized the business here as per our announcement enclosed. We are on most friendly terms with the Mangelsdorf Seed Co. at Atchison and as they have long operated under that name, it is an injustice that your correspondent should so confuse these two names. There is no excuse for it.—*Ed. F. Mangelsdorf & Bro., St. Louis, Mo.*

Threshing Reduces Estimates.

Price Current-Grain Reporter: The weather certainly is 100 per cent for threshing and wheat is mostly coming right from the machine to country elevator and from there to mills and terminal markets. There is no reason nor inclination for storing it anywhere a longer time than is necessary to get cars. One farmer put it about right when he said we have a crop of 30 bus. straw and 20 bus. of wheat this year. We beg leave to reduce our estimate of the winter wheat yield in central Illinois from 25 to 20 bus. per acre. Favorable weather has cured out this berry nicely in the shock. Most samples we have seen will grade No. 2 but not No. 1.

Our growing corn now needs rain, more particularly because much of it was not cultivated as often as usual on account of heavy rains in June, and the dust mulch around the roots, so good for the plant in dry times, is conspicuous by its absence in many fields. Many fields now show tassels and one finds ears shooting occasionally—color, that most desirable dark green variety.

Very few fields of oats have been threshed yet, wheat being given preference, and reports received by us indicate a light yield throughout most of this state, say 30 bus. an acre average. The present outlook is for a bright berry of lighter test weight than last year.—*H. I. Baldwin & Co., Decatur, Ill.*

A Correction.

The Price Current-Grain Reporter: My attention has been called to the leading article entitled "Business and Trade Conditions" in your issue of July 9, in which you comment upon a statement issued by the Department of Agriculture on July 4, concerning the beef cattle and meat situation.

It is evident that you did not read the statement and that you have gathered your impression of its content from some other source than the document itself, because you quote the statement as saying, "An increased consumption of beef would reduce prices to the consumer." The statement contains no such language, nor is such a notion to be inferred from an intelligent reading.

If you will take the pains to read the statement, which I am enclosing for your information, you will find that it endeavors to exhibit for the information of the public the important fact that prices for live cattle and prices for meat at retail are out of proportion and that as a consequence live stock producers are threatened with heavy losses, while consumers are denying themselves the normal ration of red meat.

It seems to me that such a condition deserves the careful consideration of every intelligent citizen who wishes to see the live stock industry maintained on the one hand and American consumers properly and economically fed, on the other hand.

There well may be a difference of opinion concerning legislation to provide supervision of the meat industry, but there can hardly be any difference of opinion on the point that intelligent discussion must be based upon a knowledge of the facts which the Department endeavored to set forth. And I may add that there can hardly be any difference of sound opinion on the point that comment upon the Department's statement should be based upon a correct representation of its content and not upon invention of language which the Department did not use.—*Clarence Ousley, Acting Secretary of Agriculture, Washington, D. C.*

Missouri Association Matters.

Price Current-Grain Reporter: Our local meetings held at different points throughout the state of Missouri during the latter half of June were successful from every standpoint. The grain dealers and millers showed their interest by attending in larger numbers than ever before. Sedalia, as usual, brought out the largest number, when 150 men attended the meeting there on June 20. The St. Joseph meeting, as well as several others, was well attended. Through the efficient help and loyal support given by our officers and board of directors, as well as by our more active members, our Association is now in considerably the best shape it has ever been, both as to numbers and finances. However, we are by no means satisfied. There are too many good, reliable grain dealers and millers in this state not yet members, who have not taken the time to realize fully the absolute need and value of an organization such as ours. It is up to all of our members to help acquaint every worthy non-member with what the Association has done, is doing, and with its increased membership expects to do in furthering and protecting the interests of the Missouri Grain Dealer and Miller.—*M. U. Norton, Sec'y, Mexico, Mo.*

The Grain Control Committee for Duluth to act for the Railroad Administration and the Grain Corporation consists of W. A. Strachan, chairman, and George A. Sherwood for the Railroad Administration with C. S. Williams for the Grain Corporation.

Corn in Primary Markets.

Receipts of corn in eleven primary grain markets from Nov. 1, 1918, to July 19, with comparisons with 1917:

	1918-19.	1917-18.
Chicago	49,284,000	70,600,000
Milwaukee	4,171,000	10,100,000
Minneapolis	5,803,000	13,954,000
Duluth	25,000	163,000
St. Louis	17,071,000	20,827,000
Toledo	1,009,000	1,962,000
Detroit	1,388,000	3,155,000
Kansas City	15,125,000	26,857,000
Peoria	16,425,000	27,503,000
Omaha	18,963,000	37,096,000
Indianapolis	13,743,000	15,170,000
Total	143,007,000	227,387,000

Receipts of corn the past week at primary markets, compared with the preceding week and corresponding week last year:

	July 19, 1919.	July 12, 1919.	July 20, 1918.

BARLEY MARKETS.

MILWAUKEE.—There was a let-up in the activities of the local barley market during the past week. Shippers and industries absorbed offerings to some extent, but low grades are dull. Early in the week buyers held off, but receipts were light and the market improved by the malting and export demand. The closing session ruled slow and weak, closing lower and offerings showing some increase with the demand limited. For the week prices declined 3@5c for outside off grades. Receipts were 202 cars, against 233 cars a week ago and 25 cars last year. The new crop is estimated under that of the previous year and the quality is predicted inferior to that of last year. Current quotations are: Good to choice, 48 to 50-lb. test, $1.28@1.30; bright, $1.30@1.32; fair to good, 45 to 47-lb. test, $1.23@1.28; low, 41 to 44-lb. test, $1.17@1.22; feed, $1.17@1.23. Iowa quoted $1.20@1.30 for light to fancy; Wisconsin, $1.22@1.32; Minnesota, $1.17@1.29; Dakota, $1.17@1.29; feed and rejected, $1.17@1.23.

DEMAND CHECKED BY PRICES.

MARYLAND (7).—The feed situation in this community is getting in bad shape for the farmers, as all the feed dealers have been advancing their prices. We have laid in very little feed this year on account of high prices—have been waiting for lower prices, but instead every week we are being notified of still further advances. Where it is going to stop we do not know. The farmers are complaining heavily now about feeds advancing so rapidly. On account of so much rain so far during the season it is going to interfere with the sale of wheat in this community. As the farmers are having good pasture, not many of them are laying in any stock of feed, hoping later on to buy for less money; but in our opinion there will not be much decline.—*Sterrett & Ward, Rising Sun, Md.*

BUFFALO.—Barley dealers got rid of nearly all they had to offer and at better prices than was asked last week. Maltsters took quite a few lots and feed men paid a long price for good barley. The asking prices were from $1.27@1.45 for feed to fancy malting in store or on track here. Those on the inside, or who claim to be, are confident we will have beer of some kind before many days.

DULUTH.—Specialists in the barley market found themselves rushed with business during the last week. Receipts continued heavy, amounting to 320 cars, as against only 11 cars last year. Under the liberal offerings and with less eagerness displayed on the part of Eastern buyers, quotations receded 3c to $1.12@1.22. Substantial shipments were made from the elevators during the week and stocks on hand were consequently held down to a minimum.

CHICAGO.—The market last week was a very slow and uninteresting affair. The week opened with a weak undertone and all grades down from 1@2c. Inquiry was very limited; in fact, it was not until Thursday that the market showed any popularity at all, and only for that day. The week's close was with a somewhat better undertone and there was some inquiry from maltsters and industries for the better grades. The fact is that there is only a limited domestic demand at this time and the foreign exchange situation is so desperately bad that new exports sales are rather difficult, although during the week it was reported that some 50,000 bushels had been sold. Until the exchange market improves materially the export situation is going to be very uncertain. oMnday's market was not particularly better. There was some competition for the choice grades and some cars of this quality advanced 1c, but on the whole the market was very draggy and slow. Offerings were fair, but during the previous week the low grades were very difficult to dispose of and the black oats mixtures were almost impossible. Sales of 22 cars were reported at a range of $1.24@1.30 with the feed grades at $1.19@1.24. Futures closed somewhat firmer, July at $1.18, after selling up as high as $1.18¼; September, which sold up to $1.20¾, closed at $1.20¼; new September closed at $1.27 after an opening of $1.28 and selling up to $1.29.

KANSAS CITY.—With only three cars in the week's receipts, the barley trade was insignificant except as to its strength. Prices advanced 4@6c. No. 3 sold at $1.22@1.23 and No. 4 at $1.20@1.21 a bushel. Manufacturers and dealers in barley feeds reported an improved demand from feeding interests, but orders were filled mainly with product from the Northwest. Ground barley was quoted at $2.85@2.95 per cwt., or 5@15c higher than a week ago. Crop advices from western Kansas continued favorable, the harvest having turned out well. New grain is not expected before August.

PORTLAND. — Trade conditions are rather quiet although prices have advanced considerably. The prospect for the crop however is still somewhat disappointing and the *Commercial Review*, the best authority on the Coast, says "it is doubtful whether the three states will harvest 50 per cent of a crop." Although receipts are small there is plenty of stock in warehouses for all the business that is being done. Exporters are reported to be in the country buying barley for shipment but it is doubtful whether the Pacific Northwest will have enough barley to allow of any exportation, the grain having come into general use as feed as a substitute for the spent brewers' grains. Standard A is quoted at $62.50 and the feed grade at $60.50 per ton.

SAN FRANCISCO.—The barley harvest is growing to a close in California, with the yields disappointing both as to quality and quantity. Values in consequence are appreciating steadily. The trade expect a rather urgent demand for export through the entire season, and indeed indefinitely for the future. As the crop in the Northwest will be quite light, it is expected that section also will draw liberally from California. Values cover a wide range being quoted by the *Review* from $2.95@3.10 per cental.

MINNEAPOLIS.—The tone of the market has been strong during the past few days on reports of export business at the seaboard. It has been several days since local houses made any export sales, but they report steady interest. Receipts are growing lighter and the new crop outlook is not very favorable in South Dakota or Southern Minnesota.

The new regulations for future trading in barley adopted by the Chicago Board of Trade make No. 2 the contract grade, with No. 3 deliverable at 5c discount. This will make new and old style trading in future.

About 90 per cent of the barley of California is reported harvested, with about one-third of it already sold for export.

Minneapolis reports inquiries for Western barley for feeding, being cheaper in that market than corn.

Corn Market on Monday.

The market ruled strong all day, opening sharply higher and closing with gains of fully 2c as compared with Saturday night, though 1½ to 2c below the high point of the session. The cash property was quoted 1 to 4 higher, Chicago; Peoria 1 to 2c higher; 3 to 4c higher at Omaha; unchanged to 3c at Kansas City. The September delivery ruled relatively the strongest all day, cash interests absorbing the light offerings.—*Bartlett, Frazier Co.*

News of the Terminal Markets

PITTSBURGH, PA.

H. B. Laufman, Correspondent.

The demand for straw of all grades was slightly better this week, with prices steady and firm. There was some change in receipts. Quotations follow: No. 1 oats, $10.50@11; No. 2 oats, $10@10.50; No. 1 wheat, $10@10.50; No. 2 wheat, $9.50@10; No. 1 rye, $10.50@11; No. 2 rye, $10@10.50.

The hay market is unusually quiet for this time of the year and the receipts are light but the demand is still limited, with present prices very hard to maintain, except on No. 1 timothy, this grade being scarce. Quotations follow: No. 1 timothy, $27@37.50; No. 2 timothy, $33@34; light mixed, $33@34; clover mixed, $28@29; No. 1 clover, $25@26; prairie, $16@17.

Receipts of shelled corn were light, but the demand was also limited. Western strength was reflected in slightly higher quotations but the market lacked breadth and trading was within narrow limits. Quotations follow: No. 2 yellow, $2.07@2.09; No. 3 yellow, $2.04@2.06; No. 4 yellow, $2@2.02; No. 5 yellow, $1.94@1.99. Ear corn receipts were light. No prices were quoted, as the demand was practically nil.

CAIRO, ILL.

J. E. Clancy, Correspondent.

A. E. Rust of the Halliday Elevator Co. has gone to Sayne, Wis., on a two weeks' vacation.

W. L. Duncan of the Samuel Hastings Co. has returned from Detroit where he attended the National Hay Association Convention.

The condition of corn shows a big improvement in the past ten days. The average will be smaller than for years, but the condition is fine. The alfalfa hay crop in this county is practically a failure. A big part of the land will have to be reseeded. There is a big crop of timothy hay and the quality is fine.

The receipts for the first fifteen days of the month have been good. Shipments have been good and prospects are that business of the present month will exceed all preceding years for the month of July. The high prices for corn have caused the demands to fall off. Farmers are feeding wheat to hogs. Corn is selling at $2.10 to $2.15 and has to be hauled to the farm, whereas they have to haul wheat to the elevator for $2.12. They figure they are saving the land and getting their feed cheaper.

DETROIT.

John Barr, Correspondent.

Flour is dull, but there is an active trade in all lines of millfeed.

Wheat is not coming to this market freely and trading is quiet. No. 2 red is quoted at $2.26½, No. 2 mixed at $2.24½ and No. 2 white at $2.24½.

Demand for beans shows a little increase and the market is firm at $7.50 for immediate and prompt shipment per cwt. Trade is not large and there are not many old beans left to move in the state.

Shipping demand for rye was active early in the week, but died out without resulting in much business. The market was quiet at the close and nominal at $1.60 for cash No. 2. Receipts here during the week did not amount to much.

Receipts of corn were next to nothing last week and the market was dull. It held firm until the Chicago market broke on Friday. Then there was a decline, but there was no pressure of offerings and no bearishness in local conditions. Quote: No. 3, $1.97; No. 3 yellow, $1.99; No. 4 yellow, $1.91; No. 5 yellow, $1.94; No. 6 yellow, $1.91; No. 3 white, $2.02.

Oats are in active demand and have been so all week, with rather light offerings. Buying has been all for local consumption. The market was strong until the general weakness of Friday that resulted in a drop of 1c. This was recovered the following day and the market is quoted steady at 84c for cash No. 2 white, 83½c for No. 3 white and 82½c for No. 4 white.

The entertainment feature of the hay convention this week had a narrow escape from putting up a sad finish. President C. R. Huston, of the Detroit Board of Trade, was treasurer of the fund for the entertainment of visitors and had checks to the total of $1,300 in his office safe. They were in sums from $25 upward. On returning to his office just before the convention he found the safe opened and all the money gone. By some quick work he had payment stopped, the givers of the checks at once duplicated their subscriptions and all went well, excepting for a young chap of about eighteen who was caught trying to cash one of the checks. He is now under arrest.

A few years ago the S. M. Isbell Co. sold out their bean jobbing business, the Isbell Bean Co., and agreed that neither the company nor any of the stockholders would engage in bean jobbing for a period of twenty years. On the other hand, the Isbell Bean Co. agreed not to go into the elevator business in competition with the S. M. Isbell Co. They also agreed to dispose of the beans taken in by the S. M. Isbell Co. It is alleged that the Isbell Bean Co. broke this agreement. Recently K. P. Kimball, a former stockholder in the S. M. Isbell Co., went into the bean jobbing business and the agreement was broken on both sides. Now the Isbell Bean Co. has taken out an injunction against K. P. Kimball and he is temporarily enjoined from doing business. The case will come up for hearing in about ten days.

Foreign Grain Freights

Grain Forwarding

NEW ORLEANS, LA

RICHMOND, VA.

Aubrey Hawkins, Correspondent.

Been raining hard here all the week, and cut hay in the field, also unthreshed wheat has suffered considerable damage. At this writing there are no prospects of clear weather.

The wheat yield in Virginia is very disappointing; in most sections about half a crop, and poor quality. The hay fields are full of weeds and briars.

Prices quoted here today for shipment as follows:

No. 2 white corn, $2.16@2.18; No. 2 rye, $1.60@1.65; No. 2 white oats, 85@86; No. 1 red wheat, $2.36@2.37; No. 1 timothy hay, $40.00@41.00.

Buyers are taking only limited quantities grain at present prices. Feeds are scarce and hard to get with middlings offered around $55.00; red dog, $65.00; bran, $45.00.

TAMPA, FLORIDA.

Leonard Selz, Correspondent.

No. 2 yellow corn is worth $2.26. There is but little demand and present quotations are received with but little interest shown by local dealers. Receipts were seven cars for the entire past week.

No. 3 white oats are quoted this afternoon at 95⅞c. No. 2 white, 97c; Texas No. 3 clipped R. R. P., 92⅞c. The demand has been and continues excellent. Receipts are about normal; if anything, slightly heavier than last week. Total receipts, 28,000 bu.

The brokerage firm of Quinby-Henderson Reagin Co. has been dissolved by mutual agreement, Messrs. Henderson and Reagin withdrawing from the firm and E. B. Quinby assuming all obligations and continuing business under the firm name of Edmund B. Quinby.

The shipping situation remains unchanged here. The Mallory Line steamer due to have left New York yesterday is understood to be en route here and Mallory authorities claim that there will be no interruption of service on their line. The Shipping Board service between New Orleans and Tampa is tied up by the strike; consequently, but little grain and other feedstuffs are being bought for shipment via New Orleans, as the date of resumption of traffic through that port is too uncertain.

MEMPHIS.

George Williamson, Correspondent.

R. M. Craig and Harris Scruggs, both brokers for hay, grain and cotton seed products, with offices in the Falls building, have been elected to membership in the Merchants Exchange.

Crop accounts from this territory have been fairly good during the week, with cotton improving considerably and early corn in good shape. Rains are beginning to be needed for late corn.

W. R. Grace & Co., exporters and importers, New Orleans, have made application for membership in the Merchants Exchange here through their cotton seed products department manager, C. H. Manire.

Only a few cars of red oats have been received, and most of them have been under No. 3. Most dealers say they have not received what they bought of this grade, but expect checks in settlement of cancelled sales, the main trouble having been inability to make grade. July shipment No. 3 red sold here Saturday at 77c. Several cars of August No. 3 white oats were bought on call Saturday at 81c and 81½c, but sellers were few. July No. 3 sold at 80½c. September No. 3 white was quoted at 82¼c bid, 84 asked.

Receipts of oats for the past week were the heaviest in a long time, and some of the trade think a record was established. On Monday 115 cars came in, the total for the week being 360. There was quite an accumulation of back orders for the grain, but this has all been filled and for several days prices ruled a little easier because of storgae room being unavailable. Prices, however, are firmer again and they were selling at 81 for spot stuff Saturday, with in transit offers going at the same figure. Demand has been good, and there is a healthy situation here, the feed makers having bought freely.

Corn receipts for the week were 50 cars, and there was demand for every car at rising prices. Millers have taken all the white grades, with cash No. 2 white selling at $2.05 to $2.08 and asked prices higher than that at the close of the week. Yellow grades were some lower, but only a few cents. Saturday $1.98 was bid for cash No. 2 yellow, but nobody would sell anything at the figure.

SIOUX CITY, IOWA.

Paul Larson, Correspondent.

D. Webster, of the McCaull-Webster Elev. Co., left for an inspection trip covering their line of elevators through Nebraska and South Dakota.

A book covering Articles of Incorporation, and By-Laws, Rules and Regulations of the Sioux City Board of Trade has just been issued, and is neatly got up.

The Flanley Terminal Elevator is progressing very nicely, it now being up to the bin floors. With favorable weather the elevator will be completed by September fifteenth.

E. East, representing the Purity Oats Co. of Davenport, Ia., arrived last week for the purpose of investigating conditions with a view to establishing a buying station and office here.

E. Strom, who has been assistant manager of the Taylor & Bournique Co. here, has accepted a position as manager of their Des Moines office which has just recently opened there.

The contract for a $45,000 Morris grain drier to be constructed at the Terminal Elevator has been closed with the Strong-Scott Manufacturing Co. of Minneapolis. To house the drier a building 40 ft. in height and 18 ft. by 32 ft. in ground dimensions and with a boiler capacity of 200 horsepower will be constructed.

Ed. Kayser, president of the South Dakota Grain Co., has been touring South Dakota for the last ten days looking over crop prospects. Mr. Kayser says throughout the entire 200 miles from here to Wolsey, excessive moisture followed by intense heat has developed black rust, or where the moisture was absent blight resulted. Corn, oats and barley showed wonderful growth and development for this time of the year, and all farmers are looking for a bumper crop except in wheat.

NASHVILLE.

John Leiper, Correspondent.

Quotations: Wheat—Local, No. 2 red, $2.15. Corn—No. 2 white, $2.05@2.07; No. 3 white, $2@2.05; No. 3 mixed, $1.98@2. Oats—No. 2 white, 86½ cents; No. 3 white, 86 cents; No. 3 mixed, 85½ cents.

Receipts of grain at Nashville last week were 192 cars, movement being increased by offerings of new wheat. Stocks at the end of the week were as follows: Wheat, 25,500 bu.; increase, 15,500; corn, 52,000 bus.; decrease, 21,000; oats, 127,000 bus., decrease 19,000.

Southeastern corn mills with capacity of 141,000 bus., reported output last week of 25,536 bus., or 18.1 per cent of capacity. This compared with 21,410 bus., and 16.5 per cent the preceding week. Prices continue to move up. Mills quote corn meal, sacked, per 100 lbs., f.o.b. Ohio river points, as follows: Bolted, $4.55; plain, $4.35.

Grain trade was of routine volume in the local market last week. The movement of new wheat increased, but continues slow, and mills have been going to St. Louis and the west to get adequate supplies, local offerings not being sufficient for demands. Corn continued to sell at a high level, with the market unsettled at the end of the week. Corn is in light supply, and demand is quiet. Oats are in moderate demand. Tennessee Burt oats will soon be moving. Some new Oklahoma red oats have been bought for later shipment.

Southeastern flour mills are opening the new crop season with a rush. Flour buyers are coming into the market and are anticipating their requirements with old-time liberality. The sales the past two weeks have been large, and will take care of capacity output for several weeks. Standard brands of soft winter wheat flour, 98 lbs. cotton, basis, f.o.b. Ohio river points are quoted, $10.35@10.65; high patents, 50@75c more. Southeastern mills with capacity of 195,990 bbls., reported output last week of 69,100 bbls., or 35.2 per cent of capacity, which compared with 16,955 bbls. and 8.8 per cent of capacity the preceding week.

OMAHA.

Leigh Leslie, Correspondent.

The Flanley Grain Co. announces that Carl A. Houlton, formerly in charge of its consignment department at Omaha, has been made second vice-president of the company and manager of its Milwaukee office.

In this letter last week it was said that the Butler-Welsh Grain Co. received the first car of new wheat to come to this market. This was an error. The first car was consigned to the Vanderslice-Lynds Co. by the Farmers' Elevator Co., of Holmesville, Neb., and was sold on the floor by "Bill" Young, manager of its Omaha office. The Vanderslice-Lynds Co. also received the first car of new wheat last year, it being consigned by the Farmers' Elevator Co., of Holmesville.

UNION TRUST COMPANY CHICAGO

A BANK OF STRENGTH AND CHARACTER

THE B/L BANK OF CHICAGO

With the prospects of bumper crops, the strain of financing on the banks of the country is greater than ever before.

We solicit inquiries regarding facilities for IMMEDIATE CREDIT and DIRECT COLLECTION at MINIMUM COST of Bill of Lading items on all receiving points in the United States and Canada.

Such an arrangement provides the simplest and most convenient, as well as economical, method of crop financing.

Charles T. Neal, second vice-president the United States Grain Corporation, turned to Omaha Friday after a months' absence in Europe, where he assisting Herbert C. Hoover in the distri tion of foodstuffs. During the most of absence abroad Mr. Neal was stationed Hamburg, Germany. On his return Omaha he resumed charge of the zonal fice of the United States Grain Corpo tion, which, in his absence, was in cha of Lloyd E. Conklin. The movement new wheat to this market has assum considerable proportions, 132 cars bei reported in Saturday. The demand h been easily sufficient to take care of t receipts.

Opinions differ quite sharply as to t size and quality of Nebraska's win wheat crop. The Government's report dicated a yield of 67,725,000 bushels, there are only a few observers now w believe that the total production of spri and winter wheat will reach that figu The spring wheat crop, which the Gove ment's report indicated would be 12,141, bushels, is admitted now to be in bad c dition and the consensus of opinion a pears to be that the yield will not exc 5 or 6,000,000 bushels. As for the win wheat crop, many of the best observ believe that it will not run above 60,000, bushels, while some of them believe it c siderably lower than that. On the oth hand, a few grain men who have b over the state in the last week take view that the total production will not much short of the Government's July fo cast. Most of the wheat that has arri in this market this week has gone into one and two grades, testing all the w from 57 to 61 pounds. This wheat, ho ever, is not to be taken as a fair sam of the crop. The first run of new wh always is a better quality than the la arrivals. From the best information av able it appears that the average yield not be far from 15 bushels to the acre that a comparatively small percentage the crop will grade under three.

BUFFALO.

E. Bangasser, Correspondent.

Lack of receipts of nearly all kinds grain makes a dull market and Buffalo feeling it at present.

Rye was wanted, but all the track ceipts went with store and holders of 2 c. i. f. now here were asking 4c o Chicago August.

Oats were in light supply and up 2c fr last week's close by the middle of week, after which there was a decline to the break in the option to some exte The feed mills wanted oats at the close the week and sellers refused to follow decline in the West. There was noth left unsold and prices closed firm. No white, 87c; No. 2 white, 86½c; No. 3 wh 85½c; No. 4 white, 84½c, on track, throu billed.

The annual convention of the M tual Miners and Feed Dealers' As ciation of Western New York Pennsylvania was held in Jamesto July 17-18. About 200 delegates w present. The opening sesion was voted to routine business and pleas and the closing to the annual electi Professor E. S. Savage, of Cornell Univ sity, spoke on "The Service a Farmer pects from a Feed Dealer."

Not enough corn arrived here this w to supply anything like the demand prices advanced steadily regardless of western markets. Starting in at $2.06 No. 2 yellow, the price reached $2.10 in the week and at the close the mar was almost bare, with some of the m just hungry for supplies. They took a

ing below the best grades. Closing: No. yellow, $2.10½; No. 2 yellow, $2.10; No. 3 llow, $2.09; No. 4 yellow, $2.07; No. 2 ixed, $2.08, on track, through billed.

nspection track receipts for the week: heat—No. 1 red, 3 cars; No. 2 red, 4 rs; No. 3 red, 3 cars; No. 1 hard winter, cars; No. 2 yellow hard, 1 car; No. 3 ixed, 1 car; sample spring, 5 cars. rn—No. 1 yellow, 6 cars; No. 2 yellow, 14 rs; No. 4 yellow, 1 car; No. 6 yellow, 13 rs; sample yellow, 7 cars; No. 2 mixed, ar; No. 3 mixed, 1 car; No. 6 mixed, 4 rs; No. 2 white, 1 car; No. 1 milo, 1 car; . 2 milo, 1 car. Oats—No. 1 white, 7 rs; No. 2 white, 34 cars; No. 3 white, 29 rs; No. 4 white, 2 cars; sample white, cars. Barley, 48 cars. Rye—No. 2, 7 rs.

BOSTON.

R. S. Wallace, Corespondent.

Exports of grain for the week ending ly 19th were as follows: Wheat, 32,974 s.; barley, 41,636 bus.

Stocks of grain in regular elevators July h were: Wheat, 26,754 bus.; corn, 1,027 s.; oats, 9,920 bus.; rye, 32,756 bus.; bar- y, 691,885 bus.

The following were visitors on 'Change ring the past week: R. C. Gailey, Pitts- g, N. Y.; E. A. Burkhardt, New York y, and Clark Fagg, Milwaukee, Wis.

Corn prices are somewhat lower than s week, with only fair demand. Prices re generally quoted as follows: No. 2 llow corn, $2.12 to $2.14 per bushel; No. 3 ellow corn, $2.10 to $2.12 per bus. Re- pts for the week ending July 19th were 0 bushels.

The market on oats is practically un- nged from last week with a fair de- nd reported and prices ranging as fol- s: Fancy 40/42 lbs. clipped white oats, ½c to 92c per bushel; fancy 38/40 lbs. lped white oats, 91c to 91½c per bushel; gular 38/40 lbs. clipped white oats, 90c to ½c per bushel; regular 36/38 lbs. clipped ite oats, 89c to 89½c per bushel. Re- pts for the week ending July 19th were 800 bushels.

KANSAS CITY.

T. J. Tanner, Correspondent.

The newly-organized Millers' Export Co. h elected officers in Chicago this week, obably will have a zone headquarters in sas City.

Edgar H. Sullivan, manager of the cash rn department of the Hodgson-Davis n Co., was elected to membership in Board of Trade Tuesday.

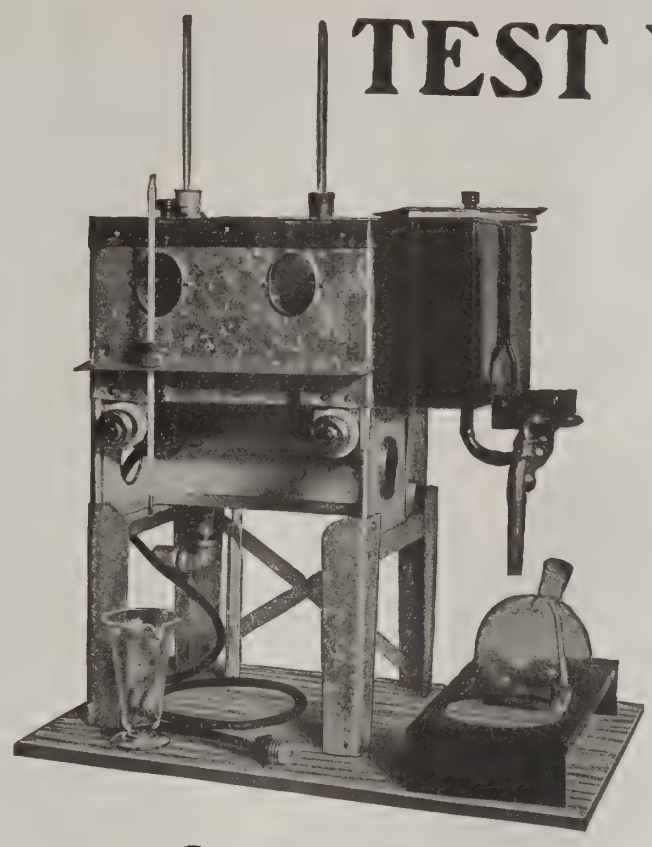
Because of alleged profiteering the en- rcement division of the Food Administra- n has revoked the license of the Wil- son Milling Co., at Clay Center, Kan.

The H. D. Lee Flour Mills Co., of Sa- a, Kan., is planning the erection of a 5-bbl. flour bill in Kansas City, but the ject may be deferred until prices of ma- ials and labor decline.

J. D. Larabee, of the Larabee Flour il Co., Kansas City and St. Joseph, Mo., Hutchinson, Kan., has posted his sas City Board of Trade membership r transfer to George Vogt, who will repre- t the company on the trading floor.

Employes of the Kansas City office of the ited States Grain Corporation—40 in all— e taken by D. F. Piazzek, zone agent, n outing Thursday night. The party to Winwood Beach, where a chicken er was served and the evening was t in dancing and bathing.

Charles T. Neal, former Kansas City tor man and present zone agent of the ited States Grain Corporation in Omaha, a day in Kansas City this week on eturn from a trip to Europe, where he d under direction of H. C. Hoover in buting foodstuffs to Germany and countries.



A revised estimate of the Kansas wheat p necessitated by pre-harvest losses, be issued next Thursday or Friday by Mohler, secretary of the State Board riculture. Mr. Mohler's June estimate 229,665,000 bus. Later the United s Department of Agriculture indicated timum of 200,000,000 bus.

E. R. McDonald, a former resident of son, Kan., but now director of the g section of the Canadian Food Coun- ent a few days in Kansas City this Mr. McDonald estimated the Ca- n wheat crop at less than 200,000,000 nd predicted that high prices would il during the coming year throughout orld.

Frank G. Crowell, who served two years st vice president of the Food Admin- ion Grain Corporation, returned to s City this week after a trip to Eu- which was followed by his resigna- from the Government service. Mr. ll will spend a few more weeks in York. He plans to re-enter the grain ss in Kansas City next October, bly with the Hall-Baker Grain Co., which he was connected prior to the ization of the Food Administration.

While strikes of elevator employes are ed in St. Louis and elsewhere, Kan- ity elevator men are still hopeful of ng labor trouble. The association and ion have agreed on a general advance

of 10c an hour in wages, making 60c for most of the workers, with liberal allowances for overtime and Sunday labor. A few minor details remain to be settled before the yearly contract shall be signed. One of these pertains to a demand by the union that its officers be privileged to enter the houses at any time to confer with the men.

W. M. Randell, of Enid, Okla., president of the Oklahoma Grain Dealers' Association, visited the Board of Trade Friday and said the new acreage of wheat in Oklahoma probably would be reduced 25 per cent. The main reason for the reduction, Mr. Randall declared, was the scarcity and high cost of labor. He said that a farmer with only 10 bus. an acre was a loser, even at the wheat prices guaranteed this year.

George L. Davis, for 12 years connected with the E. D. Fisher Grain Co. and the Root Grain Co., has bought the Kansas City Board of Trade membership of N. J. Simonds, of Los Angeles, Cal., for $13,500, including the transfer fee. Mr. Davis will help to organize the Hunt-Davis Grain Co., in which B. B. Hunt, of the Hunt Bros. Milling Co., Pleasant Hill, Mo., is interested.

Row Over Wheat Prices.

Agitation which had a political tone was started this week by Governor Henry Allen of Kansas to force the United States Department of Agriculture and the United States Grain Corporation to raise the grades and prices of inferior wheat in Kansas. Secretary Jewell Mayes, of the Missouri State Board of Agriculture, was drawn into the affair and joined Governor Allen in sending protests to Washington and New York against the schedule of discounts applying on low-grade wheat in the Southwest. The net results of the agitation were a promise by Secretary Houston of the Department of Agriculture to investigate the alleged dissatisfaction with the federal grading standards and a reply from Julius H. Barnes, wheat director, in which he said:

"All wheat of better quality for each grade will undoubtedly sell at a premium over the buying basis of the Grain Corporation, which is solely a stabilized foundation and does not by any means represent the limit of possibilities of price for each grade to the producer and dealer. It is confidently expected that mills and other dealers will pay for the choicer samples of each grade a premium above the Government price. Our price on each grade, therefore, is framed on the expectation that we will only get the lowest range of quality included in those grades. Therefore, instead of looking on our discounts as the limit of price, they should be considered in their proper relation as the basis on which other dealers and millers will construct premiums reflecting superior qualities."

Cash Grain Markets.

Wheat—Receipts for the week, 2,342 cars, against 719 a week ago and 3,270 a year ago. With very little rain to interrupt threshing, the movement increased more than had been expected. In view of the reports of stacking and binning in both Oklahoma and Kansas, it is not believed that the season will witness as great a rush this summer as usually follows harvest. The farmers have become bullish since the winter wheat crop failed to materialize its "bumper" promise, and there is a belief that spring wheat production will also be moderate. At present the cost of threshing is enormous, some farmers in Oklahoma having paid as high as 50c a bushel and others $11 an hour for the use of an engine and separator. The offerings of wheat in the local market showed improvement in quality and condition, the bulk of both hard and red being No. 2. A good share of the arrivals came in on sales to arrive, the larger elevator concerns being active bidders in the country. As red wheat is practically on the Government guarantee basis, the elevator men are creating and mixing stocks for delivery to the United States Grain Corporation, with only the storage fees in prospect as remuneration. The elevator interests are also supposed to be doing some business in hard wheat with the Northwestern and Eastern mills. Local millers were eager takers of the limited amount of dark hard offered, desiring it to tone up the yellow wheat, which is predominant. Some authorities say there is only 5 per cent of dark hard this year. Mills that grind hard wheat, after having advised their customers to withhold flour orders and await prices near the federal wheat basis, are less confident of a full decline and are beginning to grab for business. Red wheat millers possess a big advantage in the fact that their wheat is down, and they are booking flour orders freely. Hard wheat advanced 9@10c on the better qualities of the different grades during the week, while other kinds were 2c to 9c lower at the close. No. 1 was quoted on a range of $2.25@2.50, quality considered; No. 2, from $2.15 to $2.45; No. 3, from $2.12 to $2.41. Prices of red wheat, in comparison with the previous Saturday, were unchanged to 1½c lower, as follows: No. 1, $2.17½@2.19; No. 2, $2.15@2.17½; No. 3, $2.12@2.15; No. 4, $2.10@2.12. Stocks of wheat in the public elevators increased 504,000 bus., to 814,000 bus., against 1,201,000 bus. last year.

Corn—Receipts, 135 cars, against 234 a week ago and 252 a year ago. New business was light, but the reduced offerings necessitated a reduction of 43,000 bus. in stocks, to 291,000 bus. Early in the week the market was very strong, with futures. No. 2 white sold as high as $2.02 and No.

2 yellow at $2. Later the market ruled easier, with trade slow, and some recession developed. At the close white corn was 1@3c higher than a week ago, mixed 1@5½c down and yellow 4@5c off. Prices were: No. 2 white, $1.98@2; No. 3, $1.95; No. 2 mixed, $1.91½; No. 3, $1.90@1.91; No. 2 yellow, $1.95; No. 3, $1.92. The week, on the whole, was favorable for the growing crop, with mild temperatures after the first day or two. Scattered showers fell in Kansas, Nebraska, Missouri and Oklahoma, and there were some very heavy rains in Texas. Central Kansas was the only region reporting serious need of moisture at the end of the week

Oats—Receipts, 108 cars, against 70 a week ago and 73 a year ago. Increased offerings were partly the result of new oats arrivals from Southeastern Kansas and Northern Oklahoma The new oats were of the red and mixed varieties, showing light weight and rather poor quality. The market, after an exhibition of strength a the week's outset, turned down and new oats led the decline. There was a poor demand for shipment, but elevator men were buyers when prices suited. White oats closed unchanged to ½c higher, with No. 2 at 79@79½c; No. 3, 78½c. Mixed showed 3@5c recession, at 72@74c for No. 2 and 70@72c for No. 3. Closing prices of red were 3@5c lower, at 74@76c for No. 2 and 72@74c for No. 3. Stocks increased 8,000 bus., to 716,000 bus., against 372,000 a year ago.

Kafir, milo, etc.—Receipts, 16 cars, against 47 a week previous and 6 a year ago. Though the business done was principally in California milo, on transcontinental billing, there were good shipping sales to points eastward. The market was strong. It closed 20@25c per cwt. higher on kafir, at $3 60@3.65 for No. 2 white and $3 55@3.60 for No. 3. Milo showed an advance of 15@18c, at $3 55@3.60 for No. 2 and $3 50@3 52 for No 3. Stocks lost 18,000 bus., falling to 39,000, against 317,000 a year ago. Crop advices were generally good

BALTIMORE.

Robert C. Neu, Correspondent.

The continued decline in hay that has been witnessed here in the previous few weeks has been checked, and receivers now look for steadier conditions. Demand has improved.

The receipts of new water-borne whea in the Baltimore market so far this season amount to 250,000 bus., compared with 268,000 bus. arrived up to the corresponding time last year.

The name of Donald K. Belt, president of the Belt Seed Co., exporters and importers of field and garden seeds, is posted as an applicant for membership in the Baltimore Chamber of Commerce.

Regular fifteen-minute-apart quotations are now being posted on the blackboards of the Baltimore Chamber of Commerce from the Minneapolis market, showing the fluctuations in the "futures" there on corn, oats, rye and barley.

The marine strike prevailing along the Atlantic coast has resulted in a large number of ships under the control of the U. S. Shipping Board being tied up in the Baltimore harbor. Full union crews are demanded, increased wages, and eight hours' work.

The Belt Seed Co., a recently organized Baltimore firm, to engage in the wholesale business of importing, exporting, and recleaning seeds of all kinds, has secured a warehouse at Pratt and Calvert street and Cheapside, this city, in the heart of the shipping district.

The name of Warren A. Blake, steamship agent, is posted on the official bulletin board of the Baltimore Chamber of Commerce as an applicant for membership in this organization. At the regular monthly meeting of the board of directors of the Chamber, held July 14, seven new members were elected.

A notice was posted on the official bulletin of the Chamber of Commerce this week to the effect that cable messages will now be accepted by the telegraph companies for all parts of Germany, provided they are in plain English or French. Personal matters in business messages, however, will not be permitted, nor the use of code addresses.

Bolle-Watson Co., grain exporters and importers of New York, and members also of the Baltimore Chamber of Commerce, brought a cargo of about 18,000 bushels of Argentine corn to Baltimore recently which arrived in splendid condition, considering its long voyage, the schooner "William A. Naugler," which brought the corn in, having been 56 days en route. The corn was bought by the Baltimore Pearl Hominy Company.

John W. Snyder, president of Hammond, Snyder &Co., Inc., grain receivers and exporters of this market, exhibited on 'Change last week an Austrian sniper's steel helmet taken at the battle of Bois de Concenvoya (Concenvoya Woods) from one of a number of prisoners captured by Captain Philip C. McIntyre, of Company F. 115th Infantry, U. S. A., during that engagement. Captain McIntyre has returned to the grain business with Hammond, Snyder & Co., Inc.

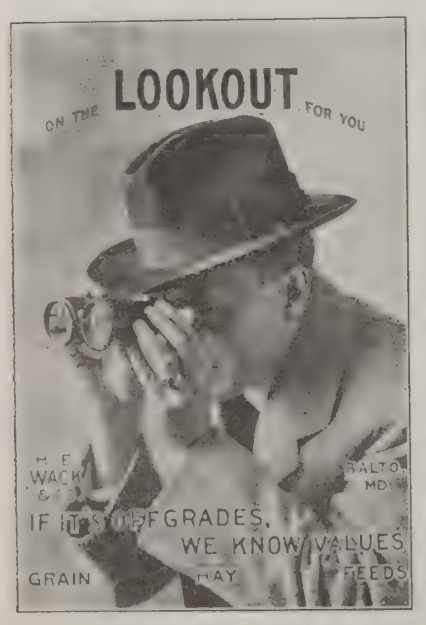
WM. H. HAYWARD.

President, Baltimore Chamber of Commerce, Who Is Spoken of in Connection with the Democratic Nomination for the Governorship of His Native State..

The name of President Wm. H. Hayward, of the Baltimore Chamber of Commerce, is mentioned in connection with the Gubernatorial nomination on the Democratic ticket in Maryland. The election will take place in the fall. Having been born on the Eastern Shore of Maryland, and spent the greater part of his business life in Baltimore, the nomination of Mr. Hayward ought to satisfy alike those who think that only good governors can come from the Eastern Sho', and those who feel that Baltimore City is entitled to more of the "good things" than have recently fallen her share at the hands of the state politicians. "Governor" Hayward has a pretty good ring to it—so here's hoping!

NEW YORK.

J. M. Nugent, Correspondent.



The following gentlemen were among the visitors upon the floor of the Produce Exchange last week: Alfred Brandeis, of Washington, D. C.; G. J. Swift, H. Rang, Harold E. Cotter and Blackstone Smith, all of Chicago; also Geo. King, of Boston, and W. L. Richardson, of New Orleans.

Conditions in the local market for cash corn show no marked change and the situation still remains firm. Trading continues on a small scale, owing to limited offerings. Quotations as follows: No. 2 yellow, $2.09¾; No. 3 yellow, $2.08¾; No. 2 white, $2.14¾; No. 3 white, $2.13¾; No. 2 mixed, $2.07¾; No. 3 mixed, $2.06¾.

There was moderate trading in spot oats during the week. Domestic demand showed some improvement, and the inquiry from foreign consumers was also slightly better toward the close of the session. It is reported a fair quantity of oats was worked for the United Kingdom. No. 1 whites were quoted at 90c; No. 2 white, 89½c; No. 3 white, 88c, and No. 4 white, 88½c.

Trading in corn goods was practically at a standstill, aside from the small jobbing trade. Mill prices were very firm, based on the cost of cash corn and prices were too near wheat flour to induce the trade to take hold. There was a considerable quantity of corn flour and corn grits available through second hands at concessions under mill quotations.

The question of values for new crop flour is being based largely on quality. Qutations for Kansas 95 per cent straights ranged from $10.65 to $11.25 and the lowest mills were not getting all of the business by any means. There have been so many complaints received here regarding the quality of the new wheat crop in the southwest, that buyers are using extreme caution about making purchases, and in many cases insist upon having samples or expect expert analysis. Mills with unquestionable prestige are slow about making offers as they declare that they are not yet sure of getting their selections of wheat without paying high premiums. The volume of business last week was somewhat smaller than that of the previous week, but this was due to the fact that good purchases had been made and buyers were not inclined to follow the advances made by a great many of the mills.

PRODUCE EXCHANGE NEW YORK

ST. LOUIS.

E. E. Reeves, Correspondent.

The grain shovelers at all of the large elevators in St. Louis went out on strike Saturday. They are asking for 72 cents an hour.

President E. C. Andrews, of the Merchants Exchange, is taking a short vacation, which he is spending at his old home, and other places in the South.

Edward M. Taylor departed Saturday for his usual summer vacation trip to northern Michigan. His good friend, Ed. Hezel, of the Hezel Milling Co., took him to the station in his car.

The Grain Corporation bought its first wheat on the new crop on Wednesday, but took only off-grade wheat which was not desired by millers, as it was either damp, oniony or smutty.

Robert W. Pommer, the genial vice-president of D. I. Bushnell & Co., who has been in California for the past month, returned Friday, looking much improved as a result of his trip.

President Chapman, of the Chapman Milling Co., of Chapman, Kans., was in St. Louis this week, on a short business trip but he did not come on the floor of the Merchants Exchange.

J. C. O. Sieck, a prominent miller from Amsterdam, Holland, was a visitor on the floor of the Merchants Exchange last week. Mr. Sieck is in this country to rebuild his business, which was seriously affected by the world war.

Statistician Edward Loesch is taking a well earned vacation, which he is spending in Southern Missouri. In the meantime Secretary Eugene Smith, of the Merchants Exchange, is compelled to work much harder in order to keep up with the work.

Several five-ton auto trucks belonging to the progressive Transfer Co., of St. Louis, are engaged in hauling wheat from the farm of Judge L. O. Eagleton and B. P. Eagleton, of the Edwardsville Drainage and Levee District. The wheat is being hauled to the Farmers Elevator, and about 100 bushels are being hauled to the load.

The Des Peres Milling Co. has let a contract for the erection of a 100,000-bushel concrete grain elevator of the latest modern design, to the Jas. Stewart & Co. The elevator is being built at the foot of Stein st., on the site of the old elevator of the old Carondolet Milling Co. Its construction will be rushed to completion as soon as possible.

The United States Employment Service, 705 Market street, refused to furnish laborers to take the places of strikers on the construction work being done on the new concrete grain elevator for the Kehlor Flour Mills Co., by the R. C. Stone Engineering Co., on the grounds that the department's policy prevented the use of men who registered for work, to serve to break a strike, or wnere a strike exists.

This policy is being strictly adhered to by Frank Wey, examiner in charge of the office here. Fifty laborers employed on the construction work walked off the job last Monday, on account of the refusal of the construction company to increase the wages from 40 cents an hour to 50 cents. An offer to increase the wages of the concrete mixers to 50 cents an hour and let the wages of the laborers doing excavation wheelbarrow work and carrying cement remain at 40 cents, was refused.

R. C. Jackman, of the Bowersox Mill & Power Co., of Lawrence, Kans., who is an applicant for membership in the Merchants Exchange, is preparing to let a contract for the erection of a modern 1,000,000-bus. grain elevator, on the Missouri Pacific Railroad, near Ivory Station. The elevator will be of concrete construction, and will be rushed to completion as soon as possible, in order to earn the bonus of one cent per bushel of its capacity, which is offered by the Merchants Exchange for the first grain elevator to be built in St. Louis this year. The Valier & Spies Milling Co., and the Kehlor Flour Mills Co., each voluntarily disqualified themselves from competing for this bonus, although each has an elevator under course of erection, on which the bonus would amount to a tidy sum.

Bert H. Lang, second vice-president of the Grain Corporation, at St. Louis, last Tuesday held a conference with the millers, grain men and elevator operators at the Merchants Exchange, at which the new license regulations were discussed. Mr. Lang advised the millers to come on the floor of the Merchants Exchange early each day, in order to secure the best selections of wheat. He stated that when there was a surplus of offerings, the Grain Corporation would come into the market and clean up this surplus. He also announced that the bonus to be paid to farmers for holding their wheat would not begin before the middle of August, and perhaps not then, as at the rate the wheat is coming into this market at present, the trade and the Grain Corporation will be perfectly able to handle it. On Friday Mr. Lang held another conference with elevator operators to further enlighten them in regard to the policy of the Grain Corporation.

Frank F. Collins, of Collins & Co., re-rned from Grand Lakes, Mich., where he d his family spent an enjoyable vacation.

New oats are expected here this week. he first car a year ago was received July th, graded No. 3 white, and sold at 76c r bushel.

C. S. Custer, of the Cleveland Grain Co., materially increasing the prestige of the cal offices of the firm, as evidenced by e big receipts handled by him the past eek.

It is expected that the 2c advance in the sic price established by the Wheat Di-ector for wheat at Galveston and New Or-ans will greatly benefit the Cincinnati arket.

A. L. Hess, secretary and treasurer of e Gale-McMillen Hay Co., will travel for e company's hay business for several eeks. His itinerary will cover parts of io, Indiana and Illinois.

W. A. Daniel, of the Mutual Commission ., one of the younger and successful embers of the local trade, made many w acquaintances and renewed old friend-ips at the national hay meetings at De-oit.

The Cincinnati Grain and Hay Exchange s been requested by the United States ain Corporation to notify dealers in eat and flour in this and adjacent terri-y of its determination regarding license uirements.

Cincinnati is destined to handle the gest receipts of wheat ever known in history during this week if cars can be d at all shipping points from which ad-es have been received. Complaints of bility to secure cars were quite numer-s at the close of the week.

The wheat movement dominated the al grain market the past week, as wn by the following receipts: Wheat, cars, of which only one car graded No. ed, 223 cars No. 2, 168 cars No. 3, 21 cars 4 and 3 of sample. Sheller corn aled 35 cars, and ear corn 2 cars. Oats rye none and hay 132 cars, about tally divided between old and new.

Requests have been made of the Cham- of Commerce and Grain and Hay Ex-nge by the United States Grain Cor-ation to list all public grain elevators warehouses in the Cincinnati territory rder that shipments of grain and sto-e may be arranged for as the exigen-s may demand. All elevators and ware-ses here, however, are privately owned.

igorous protest against the alleged itrary action of the Federal Railroad ministration in ignoring the Ohio long-short-haul law in the latest publica-of freight tariffs was made by the te Public Utilities Commission. The mission points out that the law allow-lower rates for long hauls was passed the General Asembly two years ago in formity with regulations of the Inter-e Commerce Commission. Under Fed-control, it is declared, this state law been ignored, with the result that nu-ous Ohio shippers have complained to commission. In the case of interstate merce the long-and-short-haul differ-s are observed under the new rates, not so with intrastate business, it is .

ncinnati delegates who attended the tional Hay Association meetings at De-t the past week pronounced the con-tion as one of the most successful ever , both as to the promotion of the work the improvement of the hay trade and its unusually large attendance. A ure of the meetings, which afforded icular gratification to the Cincinnati trade, was the selection of one of its bers as a director of the National As-iation in the person of John E. Collins, whom Alfred Gowling placed in nomi-on, and who will no doubt render ef-ve and enthusiastic service of prac-value to the trade. The large attend-from Cincinnati is evidence of the asing interest of the Grain and Hay nange in the work of the association, through its new representative on the d of directors, who will at their next ing select the convention city, tenders arty welcome to hold the 1920 meet-s in Cincinnati.

Cash Markets.

Wheat—New wheat constituted the bulk e grain receipts here this week, and a of over 400 cars met an active de-l at a range of $2.23 to $2.24½ for No. , and $2.21½ to $2.22 for No. 3. Mil-elevator and shipping interests freely bed all offerings, and persistently in-d for heavier supplies. A firm un-ne pervaded the market and in sev-instances $2.25 was realized for No. 2 f heavy weight and low moisture con-The quality of the arrivals was fair od, and was about equally divided be-n No. 2 and No. 3 grades. Only one rading No. 1, however, was received. grades and smutty grain sold as read-s the better quality and ranged from to $2.18. The heavy movement and ry advices evidenced the fact that shippers are not disposed to sell to arrive and are consigning their grain. No. 2 red winter, track, $2.23@2.24½; No. 3 red winter, track, $2.19@2.22; low grades, as to quality, $2@2.20.

Corn—The local corn situation was decidedly strong during the week, and new high levels of the crop were recorded for all kinds and grades. White, grading No. 2 and No. 3, was especially firm, and $2.13 was realized for one car. Yellow and mixed, however, were equally in good demand, but the light receipts restricted the volume of trading. An acute scarcity of ear corn exists here and immediate shipments of a few cars will readily bring record prices of the crop. No. 2 white, $2.13@2.14; No. 3 white, $2.12@2.13; No. 4 white, $2.08@2.10; No. 5 white, $2.06@2.08; No. 6 white, $2.04@2.06; No. 2 yellow, $2.01@2.02; No. 3 yellow, $1.99@2.02; No. 4 yellow, $1.96@1.98; No. 5 yellow, $1.94@1.96; No. 6 yellow, $1.91@1.94; No. 2 mixed, $2@2.01; No. 3 mixed, $1.98@2; No. 4 mixed, $1.95@1.97; No. 5 mixed, $1.93@1.95; No. 6 mixed, $1.90@1.93.

Oats—Trading in oats was of small volume owing to the smallness of receipts. Prices were governed largely by option influences but the market was independently strong with prices the highest of the season and three cents above the close of a week ago. No. 2 white, 84@84½c; No. 3 white, 83½@84c; No. 4 white, 82½@83¼c; No. 2 mixed, 81½@82c; No. 3 mixed, 80½@81½c.

INDIANAPOLIS.

Myron R. Green, Correspondent.

The Eastern Grain Mill & Elevator Co., of Evansville, filed preliminary certificate of dissolution.

Fire on the farm of Louis Hartig destroyed a threshing machine, a barn and several hundred bushels of wheat, the loss being estimated at about $5,000.

The Roach-Rothenberger Milling Co., of Delphi, Ind., have incorporated with a capital stock of $20,000. Directors are William Roach, Levi Rothenberger and Harry E. Roach.

Oliver Fiant has been employed by the Fayette Grain Co. as manager of the company's elevator at Louisville. This elevator was formerly owned and operated by Thomas Stanley.

The following out-of-town grain dealers were in the city last week: A. B. Cohe, Frankfort, Ind.; Elmer Hutchinson, Arlington; T. K. Mull, Manilla, Ind., and W. B. Foresman, Lafayette, Ind.

Repairs on the elevator recently taken by the Farmers' Grain & Supply Co., of Centerville, Ind., are nearing completion. The large bins are built to hold 25,000 bushels of wheat and are arranged in a most convenient manner. The completed elevator will be one of the best in the state.

Announcement has it that the Fayette Grain Co. has taken over the business of the C. O Wise feed store. The feed business was organized by Mr. Wise about a year ago. The business in the future will be conducted very much as it has been in the past, as Mr. Wise is president of the Fayette Grain Co.

The Atlas mills and elevator, of Vincennes, Ind., were sold to O. T. Stout, of Indianapolis, and John Stout, of Memphis. The sale was made in order to distribute the estate of the late owner, James Emison. The plant is one of the largest in southern Indiana, and the consideration is said to have been $400,000. The plant has a capacity of 1,000 barrels a day.

Excavation work has been started for the twenty-five-car capacity transfer grain elevator to be built by the Springer McComas Grain Company, of Indianapolis. J. A. McComas said the elevator and equipment will cost $60.000 and the entire investment in the project will be between $80.000 and $100,000. The elevator is being constructed for both public and private use. It will be of concrete construction. 107 feet high. There will be four stands of elevators of 60,000 bushels an hour each. The building is being erected with a plan for increasing its capacity in the future.

PHILADELPHIA.

Geo. A. Rudderow, Correspondent.

Exports for the week ending July 18 were 28,397 bus. wheat, 465,804 bus. oats and 80,000 bus. barley.

Charles R. Rini, representing the Armour Grain Co., Chicago, and Frank M. Turnbull, of Taylor & Bournique Company, Milwaukee, have applied for membership in the Commercial Exchange.

Under the trade contracts, proposed restitution rule is not retroactive but protection is secured producers by contract agreement, to follow Grain Corporation decision at once on complaint of producer at the time wheat is offered for sale.

Receipts of flour and grain at Philadelphia for the week ending July 19 were 602 bbls. and 10,794,785 lbs. of flour in sacks; 174,714 bus. wheat; 10,487 bus. corn; 146,889 bus. oats; 13,061 bus. rye; 65,637 bus. barley; 42,500 bus. malt and 184 tons feed.

John B. Matthaei, traffic manager of the Commercial Exchange, announces that, effective July 20, 1919, demurrage rates will be reduced to the following basis after free period of 48 hours: $2.00 per day for the first four days; $5.00 per day thereafter until unloaded, Sunday and holidays excepted.

John McGuigan, Jr., who has held a very responsible position for several years with L. F. Miller & Sons, grain merchants of this city, has severed his connection with that firm to accept a more lucrative position with good chances of advancement with the Philadelphia agency of the Taylor & Bournique Company, a very prominent grain house of Milwaukee, Wis.

The United State Grain Corporation has notified all licensees in New Jersey, Pennsylvania, Ohio and Indiana and Michigan that the Grain Corporation, having made only small purchases of wheat and the movement from the farms not warranting it, there will be no advancing premium over the guaranteed price, put on by the Wheat Director before August 15th. About that date another review of the situation will be made and announcement will follow accordingly.

The United States Grain Corporation issues notice in Bulletin No. 4 to all wheat millers, wheat handlers, flour jobbers and bakers in New Jersey, Pennsylvania, Ohio, Indiana and Michigan, that proposed trade contracts will not be executed by this corporation after July 31st except in special cases. License regulations governing dealers not under contract control, later to be promulgated, will probably include a rate which will require restitution to producer in event of purchases being made on an unfair buying margin, and decisions under this rule will likely be retroactive.

A. L. Stanchfield, representing the Baldwin Flour Mills at Minneapolis; Bernard J. Rothwell, president of the Bay State Flour Milling Company, Boston; C. V. Adams, grain merchant, Lancaster, Pa.; J. C. Stroyer, grain dealer, York, Pa.; F. L. Lewis, Doyleston, Pa.; J. A. Lassiter, wholesale grocer, Miami, Fla.; J. C. Tait, grain dealer, Decatur, Ga.; Charles Ralph, of Charles Ralph & Bro., Venice, Md.; C. B. Riley, secretary National Grain Dealers' Association, Indianapolis; W. B. Morris, Jr., Bishopville, Md., and Karl Syler, Dubois, Pa., were visitors on 'Change during the week.

Priority rights for farm products over all other commodities in railway transportation of the country, as provided for in the Owens bill in Congress, are vigorously condemned in a statement issued Friday by the legislative committee of the Philadelphia Board of Trade, which was addressed to the members of Congress. The bill would create a $100,000,000 corporation to be styled the National Marketing Board, the duty of the board being to purchase foodstuffs for sale with a view to stabilizing prices. American trade under private initiative will eliminate the profiteer much more effectually than can be accomplished by an act of Congress, in the opinion of the committee, which further questions the constitutional rights of such an organization.

FORTH WORTH, TEXAS.

G. E. Blewett, Correspondent.

Hay crops are coming very heavy and prairie hay is rather draggy with the exception of choice quality, which is very hard to obtain.

Quality of oats shows about an equal amount of No. 3 and 4 grades received at Fort Worth, with an unusually heavy run of business the past two weeks.

Mills report active demand for flour with some export sales, and as a rule the mills are running full time. Prices remain unchanged around $11, basis delivered, common grades.

Rains this week will insure the heaviest corn crop ever made in Texas, estimates running from a hundred and seventy-five to two hundred million bushels, with dealers asking for bids for July and first half August shipment from South Texas.

The past week has seen material change in the condition of grain arriving at Fort Worth and marked improvement was noted in the grades of both wheat and oats, but this will doubtless be offset by the rains and much trouble is anticipated, especially on oats.

Announcement cards are mailed out announcing Seley Cornforth Grain Co., of Waco, capital stock $50,000,000, C. S. Seley, president; F. R. Cornforth, vice-president and general manager. The company will maintain offices in Waco and do a general grain business.

Receipts have been very heavy the past two weeks and the country has ben very free sellers both for domestic and export, conservative figures placing amount of export wheat sold around three million bushels, with about one hundred thousand bushels oats worked for export.

Ideal weather for grain threshing for the past two weeks was followed by heavy rains over a great portion of the grain belt Thursday, Friday and Saturday, this week, the rains at Fort Worth amounting to four and a half inches. This will delay threshing from three to ten days and will doubtless cause further deterioration in the quality of the wheat and oats, and will also curtail delivery at country stations owing to condition of the roads.

Millers are inclined to accumulate stocks on a basis of export bids, especially where they can secure a good quality of wheat and a god many of them are offering their low grade wheat for export in order to make room available for storing milling wheat, with prices remaining about 2c under government price, and country sellers indicate farmers are willing to sell on this basis, but the dealers are cautious about going short any large amount.

Owing to heavy increase in arrivals at Fort Worth, the Grain Inspection Committee of the Fort Worth Grain & Cotton Exchange have secured additional help, Chief Inspector V. L. Nigh, of Chicago, assuming charge of the inspection department on July 16th, with former Chief Inspector J. E. Robinson acting as assistant. The inspection department is very much behind with their work, but hope to be able with additional help to care for the increased business without any further delay.

Owing to the demand from the southeast for oats, the Texas price has seen a very material advance the past week, with sales made on a basis of 75c, bulk New Orleans, or 73c Galveston, clipped oats about 4c a bushel higher. Reports of heavy sales being made to the southeast is substantiated by heavy demand from Texas dealers to cover their sale and everything offering is being taken. Receipts would indicate that farmers are not threshing oats, giving preference to wheat, consequently heavy movement of oats is looked for in August. Elevators and grain interests are not inclined to stock up around these prices unless the options afford a good hedging opportunity.

NEW ORLEANS, LA.

Thos. C. Robinson, Corespondent.

First car of new wheat of the crop of 1919 shipped by Bindings, Stevens Grain Co., from Tulsa, Okla., and consigned to R. J. Barr, arrived here July 18th and unloaded into Stuyvesant Dock Elevator. Car graded No. 2 red winter wheat, test weight 58.0, moisture 13.2 per cent. From all indications there will be a heavy movement of wheat through New Orleans from now on.

There has not been much activity in the corn market during the past week. Offerings have been rather limited and the demand very slow. No. 3 yellow corn has been quoted as high as $2.09 per bushel delivered and sales have been made from

NEW WHEAT

We are prepared to handle heavy consignments of the new crop to the complete satisfaction of shippers, and in conformity with the desires of the United States Wheat Director.

We are in the market for good HAY, OATS and BARLEY at all times.

$2.06 to $2.07 delivered. The local demand for corn is exceedingly poor and the only demand we have is coming from Cuba. Europe, at this time, is taking no corn whatever

Bulk No. 3 white oats have been sold during the high mark in Chicago at 86½c delivered. Toward the end of the week, when the market declined, bulk No. 3 white oats were offered at 84c per bushel delivered. Sacked oats have been quoted at 90¼c delivered. Offerings of old western oats are becoming scarce and the indications point to a scarcity of old crop offerings. New western crop should begin to move the first half of August. Recently some export business has started from our port on oats and some good sales have been made.

DULUTH.

S. J. Schulte, Correspondent.

George Barnum, Jr., has returned from a vacation spent at Isle Royale. George G. Barnum, Sr., is now holidaying at that resort.

Elevator operators at this point are getting their plants into splendid shape to take care of the new season's expected record grain rush when it comes along.

W. B. Joyce, manager of the Van Dusen-Harrington Co.'s Duluth office, has been elected to fill the vacancy on the Duluth Board of Trade directorate created through the removal of Parker M. Paine to Chicago.

Dealers here are wondering how the financing of the crop is going to be carried through in Canada in view of the absence of a fixed price there, while quotations are on a fixed basis in this country and in England.

Operators on this market are awaiting with interest the outcome of the Winnipeg Grain Exchange's experiment in resuming open trading in wheat, scheduled to take place on July 21. It is assumed that steps will be taken to prevent the importation of any Canadian wheat into this country that may be sold at below the fixed price here.

B. E. Baker, one of the pioneer operators on the Duluth market, who has been for over a year engaged in the Kansas oil fields supervising the development of some holdings in which he and a syndicate of Duluth men are interested, was a visitor on the market here this week. He expressed confidence over the outlook for success in his venture.

Spring wheat stocks in Duluth elevators are now down to only 53,000 bushels, which is claimed to belong to a local milling company. That mill is asserted to have been absorbing the bulk of the higher grade wheat offering on this market during the last six weeks and its management contends that it is consequently placed in good position to take care of its trade in patent flours while other milling concerns in this territory have been finding themselves short of grain supplies, and have been consequently obliged to curtail their flour outputs to a greater extent.

Charles F. Macdonald, secretary, and Fred. Kaiser, traffic commissioner of the Duluth Board of Trade, were in Chicago during the last week attending the hearing before Edward Chambers of the United States Railroad Administration in reference to suggested changes in grain carrying rates. They supported a demand for a 15 cents per 100 pounds rate from Sioux City and Omaha to Duluth, and opposed any changes in the structure of rates that would make any difference in the present differentials between the Duluth and the Chicago and Minneapolis markets, as fixed by the interstate commerce commission as the result of exhaustive hearings some years ago. They claimed that changes that had been proposed would have resulted in the diversion of traffic to Chicago and Minneapolis that rightly belonged to Duluth.

CHICAGO.

The first car of spring wheat was received in this market July 18 as compared to July 25 last year. The wheat was from Illinois and graded No. 1 Northern.

Harry J. Muser, formerly with W. L. Gregson & Co., and prominently identified with the provision trade for the past 30 years, is now associated with Eugene M. Hoyne & Co.

A vote regarding trading in barley futures was taken on Friday which now sanctions new and old style trading in the futures of that cereal. No. 2 is the contract grade and No. 3 is deliverable at 5c discount.

The Donahue-Stratton Co., one of the largest grain operators in Milwaukee, has arranged broader connections through the Keystone and Wabash elevators in Chicago in a combination arrangement with E. R. Bacon.

Harry A. Zweig, well known on the street, has gone into the cash grain business for himself, establishing offices at 305 South La Salle st. For many years Mr. Zweig has been associated with the J. Rosenbaum Grain Co.

Harry Welty, well known Board of Trade man, is spending his honeymoon in Yellowstone Park. The wedding of Mr. Welty and Miss Clara M. Verkler of Chicago took place Saturday afternoon at the home of the bride. Congratulations and best wishes are extended.

There has been a modification of the embargo against shipments to Baltimore effect and wheat may be shipped from the West in limited amounts on permits. The railroad administration is tightening up the permits issued on coarse grain shipments to the Atlantic seaboard.

The first car of new oats reached Chicago July 15. The shipment, which came from Hancock county, inspected No. 2 white, contained 11.60 per cent moisture and was sold by Hitch & Carder at 79½c. Last year the first shipment was received on the same date but the oats took sample grade.

Chas. D. Jones of Nashville stopped off in Chicago for a visit with his many friends on returning from a month's vacation. He operates the River & Rail Elevator and handles surplus grain through the Hermitage Elevator, and it goes without saying will undoubtedly handle his full share of the Nashville movement.

Chicago is represented in the newly organized Millers Export Ass'n, an association capitalized at $1,000,000 to handle export flour for the millers, by B. A. Eckhart on the executive commitee. Others of the committee are A. C. Loring and J. F. Bell, Minneapolis; Frank Kell, Wichita Falls, Tex.; Chas. Roose, Wellington, Kans.; E. W. Marr, Columbus, Ohio, and Geo. Milnor, Alton, Ill.

Walters & Bowman is a new cash and speculative grain firm located at 745 Postal Telegraph Bldg., Chicago. W. A. Walters was until recently operating in country grain at LeRoy, Ill., and L. A. Bowman has been mentioned in this column through his association with his brother, Geo. Bowman of Peoria. They have reason to believe that with the big crop movement before us their new firm will secure its share and they hope to hear from old friends and new customers.

PEORIA, ILL.

L. L. Eckard, Correspondent.

Wheat receipts 10 cars, demand limited. No. 2 yellow hard winter 2.20½ f. o. b.; one car at 2.19. No. 1 hard winter 2.19 destination weights.

Rumsey Moore & Co. have removed their future office from room 19 on the second floor of the Board of Trade building to room 44 on the fourth floor.

Oats receipts were ten cars with good demand and closing prices showed an advance of 1 to 2 cents over Friday's prices, 2 white selling at 78½@79, 3 white 78½.

Saturday's receipts of corn at Peoria were 21 cars with only fair demand and few cars held over sales as follows: 2 white 2.00, 2 yellow 1.94, 6 yellow 1.86½ damaged, 2 mixed 1.92, 6 mixed 1.85, sample grade 1.76 hot.

Captain W. H. Dewey, brother of H. H. Dewey, former president of the Peoria Board of Trade and a member of the W. W. Dewey & Sons grain firm, returned to Peoria last Tuesday after more than two years' service as an officer in the United States Army. Captain Dewey landed in New York July 5th and was discharged from the army July 9th at Camp Dix, N. Y. During the most of the eighteen months in France Captain Dewey was in the rail head service dispatching supplies to the troops at the front.

MINNEAPOLIS.

W. A. Riebeth, Correspondent.

H. J. Butler, of the H. Poehler Co., expects to leave shortly for an eastern pleasure trip with his family.

James Wyman, of McDonald & Wym returned this morning from a South D kota trip and reported bad crop conditi

Dan McKinnon, local manager for Th son & McKinnon, competed in the st golf championship tournament at the M nikahda course last week.

Secretary John G. McHugh and sev members of the Minneapolis Chamber Commerce are in Washington attend the hearing on grain rates.

Rufe Godfrey, of the Godfrey-Blanch Co., returned this morning from overs and visited on the Chamber of Comme trading floor on his way home.

T. G. Winter, of Winter, Truesdell Ames Co., returned last week from an spection trip through North Dakota reported considerable grasshopper dama

Parker Harding, of E. S. Woodworth & Co., returned today from an automobile trip through South Dakota. He found the crops very spotted with corn making the best showing. Light crops of wheat, oats and barley are expected.

The Gee-Lewis Co. received the first car of grain from the new Northwestern crops today when a car of winter wheat arrived from LeSeuer Center, Minn. This wheat graded No. 3 hard and sold at $2.42. It tested 59½ lbs. to the bushel.

Instead of sending ticker quotations on grain futures from the pit "pulpit" the Western Union Telegraph company will relay the figures to the main office and put them on the ticker there. Trading in the new pits started this morning.

H. O. Mott, for 24 years manager of the Fargo office of C. E. Lewis & Co., is in the grain commission business for himself now. He was a pit trader for Lewis & Co. just before the ban was put in force against trading in wheat futures.

Lt. Marshall B. Williams, of the Fifth Marines, son of Grover Williams of the Van Dusen-Harrington Co., returned from France last week. He took part in some of the heaviest fighting of the war and was in the battle line when the German offensive was broken.

The Brown Grain Co. filed suit in the Hennepin County District Court last week against the Great Northern Railroad Co. for leakage of grain in transit. It is alleged that leakages from 56 cars totaled $1,577. This suit is the forerunner of many others that were held in abeyance during the war.

Cash Wheat.—The tone of the cash wheat market is again very strong and today there was an advance of 3 to 7c per bushel reported. The demand is strong and general and the millers are not only buying for immediate use but for future operations. Samples of new wheat indicate a very light weight variety and heavy wheat will be needed freely in mixing.

There is a fair demand for winter wheat at current prices and a good demand at lower levels. Most of the desirable wheat of the Southwest is held at prices the millers do not care to pay. A car of new Minnesota winter wheat was received on the market today. It graded No. 3 hard and sold at $2.42.

There is a strong general demand for durum wheat and prices are gaining sharply compared with the government quotations. Millers and elevator companies are buying the old crop offerings freely on account of the weight it shows.

Corn.—Owing to the strike at various industries the demand for low grade corn has been slow of late and prices dropped lower. There was a good demand for the limited quantity of choice corn offered and prices advanced for that kind after the break of last week.

Oats.—A very poor seaboard interest resulted in local prices dropping lower compared with the futures and the demand for other than choice cats turned slow, but in the past day or so the tone improved and discounts grew lighter again. Only the poor oats are neglected. No. 3 white sell at September price to 1c under, No. 4 white at 1½@4c less.

Rye.—There is a fair to good demand for rye with millers and elevator companies buying. Millers pay ½c premium for the choice offerings. Elevator companies buy ordinary No. 2 rye at 1c under September. Purchases of new crop rye to arrive continue and receipts are expected some time this week. No. 3 rye sells at 1c less than No. 2. Offerings quite liberal every day. New crop advices quite bad on the average.

MILWAUKEE.

E. E. Meyer, Correspondent.

Milwaukee flour production for the past week consisted of 10,500 barrels of wheat and 3,320 barrels of rye flour, compared with 11,600 last week and 2,220 a year ago

The first car of new wheat arrived in Milwaukee on Wednesday, July 16, grading No. 2 hard winter and was sold at $2.40 a bushel. The car was received by the Mohr-Holstein Commission Co., and sold to the J. B. A. Kern & Sons, millers.

The Froedert Malt Products Co. has been organized with $10,000 capital by Curtis R. Froedert, Walter Teipel and Herbert L. Schultz. A plant will be erected and the firm will deal in malt products and by-products, mixtures and compounds of barley, corn, sugar, feeds, rye, wheat and other cereals.

Miss A. E. Reese is now located in the main office here of Taylor & Bournique Co. in charge of their wheat business, a branch of the trade in which she has had broad experience on the Chicago market and as buyer for one of the largest Indiana mills. In recent months Miss Reese has managed the Marshalltown office of Taylor & Bournique Co.

The total Wisconsin wheat crop for 1919 is estimated at 11,210,000 bus. as compared with 9,837,000 for the previous year. This estimate is based on conditions existing July 1. The oats crop is estimated at 90,312,000 bus. against 110,162,000 last year; rye, 9,335,000 against 7,674,000; barley, 17,275,000 against 25,383,000; corn, 75,676,000 against 69,538,000.

Grain shipments from Milwaukee for the week ending July 19 were 588,248 bu. oats, 71,320 bu. corn, 281,688 bu. barley, 12,594 bu. wheat, 27,000 bu. rye; total, 980,850 bu., against 984,490 bu. the preceding week and 682,927 bu. a year ago. Receipts of grain at Milwaukee for the past week were 202 cars barley, 107 cars corn, 241 cars oats, 28 cars wheat, 44 cars rye; 3 cars flax; total, 625 cars, against 630 cars the week before, 528 cars a year ago and 368 cars in 1917.

In cash grain drooping markets prevailed during the past week, due to the sharp drop in foreign exchange and the unsettled industrial situation, resulting in a halting demand. High temperatures, drought and insects have done much damage, particularly in the Northwest, to small grains, while corn crop news generally is favorable. Barley ruled easier for this period, showing losses of 2@5c, corn is down 3@5c for yellow and mixed, while white is steady and scarce, oats are 2c higher, while rye is 3c lower, and wheat advanced 10@13c, the movement of new not yet being free.

At the monthly meeting of directors of the Milwaukee Chamber of Commerce the following were elected to membership: J. H. McKoane, C. E. McDonald, Jos. L. Leopold, Earl L. Patterson, Harry H. Flow; David S. Baird and A. S. Martell. The board further voted to cast the ballot of the local Chamber regarding Referendum No. 28 of the national Chamber as favoring the ten recommendations contained in the referendum. A resolution was adopted asking the Wisconsin congressional delegation to assist in passing H. R. Bill 5516, permanently transferring the coat guard to the navy.

Visitors registering at the Milwaukee Chamber of Commerce during the week included the following: John Bean, Calvary, Wis:; S. E. Bryson, Chicago, Ill.; O. A. Anderson, Palmyra, Wis.; Fred Stade, Welcome, Minn.; O. F. Hoge, Jackson; H. A. Zeunert, Cedarburg; Henry Kurth, Columbus, Wis.; R. J. Godfrey, C. W. Sprague, L. W. Walter, Minneapolis; H. A. Hanson, Duluth, Minn.; G. B. Marble, Chicago, Ill.; W. G. Stoddart, Markesan, Wis.; A. Torgerson, Independence; J. Fraser, Racine, Wis.; F. S. Funbe, Minneapolis, Minn.; T. Carstens, Buffalo, N. Y.; C. B. Bosh, Peoria, Ill.

TOLEDO.

Carl Bryant, Correspondent.

Ozis & Harlin, operating the elevator at Paulding, O., have sold out to Brady Brothers of Payne, O.

G. A. Hax, of the large Baltimore grain firm bearing his name, visited with his many old friends on 'Change Saturday.

F. E. Blair, Edison, O., has sold out his elevator at that point to the Cardington Edison Elevator Co., a farmers' cooperative concern.

C. Craft, Jr., of the Baltimore Grain Co., Baltimore, Md., and F. A. Coles, Middletown, Conn., were Toledo visitors Saturday. Both, members of arbitration committee No. 3 of the Grain Dealers' National Assn., were visitors on 'Change Saturday.

"Oats in Paulding county and vicinity will yield 80 per cent or a normal crop," declared John Wickenhiser, who operates a chain of elevators along the Nickel Plate railroad with headquarters at Toledo. "Corn looks good and never grew so fast, altho it needs rain right now. We are enjoying a big wheat business."

"Advertising in The Price Current-Grain Reporter surely brings results," exclaimed L. J. Schuster of the Raymond P. Lipe Co. He added that our item in last week's issue, stating his car had not been stolen for three months, had hardly arrived in Toledo when his car disappeared from in front of 'Change building. This is the third car he has had stolen in a year.

Sam L. Rice of the Rice Grain Co., and Metamora Elevator Co., presided at a meeting in Toledo Saturday of Arbitration Committee No. 3 of the National Grain Dealers' Assn. The committee, consisting of Mr. Rice, chairman, Thos. C. Croft, Jr., Baltimore, and F. A. Coles of Middletown, Conn., disposed of nine important cases placed in their hands for arbitration.

Of 274 cars of new wheat received this week 17 graded No. 1; 106 No. 2, and 79 No. 3. There were 64 cars grading smutty. Corn and oats on the tables reached new high levels during the fore part but eased off the latter half of the week. Prices on No. 2 white oats were 77⅞@81⅛c; No. 3 white, 77⅞@80⅝c. No. 2 yellow corn brought $1.97@1.98. Spot oats are finding good sales here. Rye and barley demand is practically negligible. Week's receipts: Wheat, 274 cars; corn, 16; oats, 49; rye, 5; barley, none.

With the arrival of the first big run of new wheat this week Toledo dealers heaved a sigh of relief and buckled down for the grind. Vacations are all right but, like many other things, too much rest breeds discontent and anyhow trade has been anything but good for several months. Everybody's on the jump now and glad of it. The big rush started this week and receipts are growing daily. Some complaint is heard of inability to secure empty cars in the country and while it has held wheat back where elevators were loaded up, this condition is not thought to be general. Dealers declare, however, that the railroad administration is to blame for any shortage because of its practice of sending all available empties to the West.

Although George Forrester's friends were exceedingly grateful for the ride to the Michigan Hay Association convention at Detroit Wednesday, they showed some disappointment and registered discontent

repeatedly during the journey home. George had a brand new Buick and plenty of "gas" but he persisted to lag along at forty miles an hour all the way, greatly to the displeasure of John Luscombe, who complained that his head was becoming fireburnt from the hot winds; while George Woodman thought the hose from the gasoline station at Rockwood might still be dragging behind. He suggested this to Forrester, who, after stopping to investigate, cleaned the headlights, and from then on better time was made. Joe Streicher, in the front seat, apparently was familiar with the roads and was a great help at railroad crossings, although he admitted later that he was looking out for a soft spot along the road should the occasion arise. George has been recommended as a possible entrant at the Indianapolis sweepstakes races next year. Other Toledoans attending the convention were: "Big Ed" Churchill of the Churchill Grain & Seed Co; Kent Keilholtz of Southworth & Co.; and Bill Cummings of J. F. Zahm & Co.

The Grain Corporation has notified its Zone Agents that there will be no advancing premium over the guaranteed price of wheat imposed by Julius Barnes before Aug. 15, since the movement from the farms does not warrant the increase and the Grain Corporation has been able to make only small purchases. About that date the Wheat Director will make another review of the situation and make an announcement concerning the placing of a premium.

All shipments of wheat flour to destinations in the Western Hemisphere may be permitted to be exported from the United States under General License H. S. 250.

Kansas Wheat Fires.

TOPEKA, KANS., July 21.—Not all of the wheat fires recently reported in Kansas were due to I. W. W. sabotage, according to L. T. Hussey, state fire marshal. Mr. Hussey's investigators say that many fires were the result f plain arson, the wheat being insured nearly all cases. Fires generally ha occurred where the yield was poor a the wheat hardly worth threshing. rests may follow.—*T. J. Tanner.*

Strong's Double Indexed Car Index
Is a record book designed to afford ready reference to the entry or record of any car number. Facing pages 11x14½ inches of heavy ledger paper are each ruled into five columns, those on the left-hand page being numbered 0, 1, 2, 3 and 4; while columns on the right-hand page are numbered 5, 6, 7, 8 and 9. Each column is ruled into three distinct divisions with the following sub-headings: "Initial," "Car No." and "Index."
The marginal index figure represents the right hand or unit figure of the number entered; and the column heading the second or tens figure. So that the required number can always be instantly found if properly entered.
ORDER FORM 20 contains 36 pages, bound in heavy canvas covers, with spaces for registering 9,000 cars. Price, $1.50.
ORDER FORM 22 contains 68 pages, bound in art canvas covers, with spaces for registering 17,000 cars. Price, $2.50.

Cincinnati in Earnest.

The hay trade had been forewarned at the Cincinnati boys would make ery effort to secure the 1920 Hay Conntion, but the delegates to the Deit meeting were hardly prepared for onslaught of Cincinnati banners, loons and souvenirs of all kinds exvagantly distributed by members of Cincinnati hay trade. Their delegion was typical of the way Cincini does things and two dozen of the lows, of which we hope the follow; is a complete list, were on the job. ose fortunate enough to have wives re thus supported in their bid for next annual meeting. Messrs. Van rn, Skidmore, Chas. Hill, Harry Hill, wling, Niemeyer, Collins, McMillen, s, Muchmore, Dennis, McGlaughlin, niel, Ferger, Keller, Brown, Heuerrn, Granger, Herzog, Thompson. In ning through the list the trade will ognize the names of many who are ll able to tell the advantages of their lage as a convention city. Those o felt that additional support was essary, carried circulars printed by convention and publicity committ of the Cincinnati Chamber of Comrce especially for the Hay Conven, in order to bring the association this great Ohio city for their 1920 eting.

---

petition has been forwarded from ntana to Senator Curtis at Washton to secure the adoption of a resotion asking for the investigation of Bureau of Markets, with a view to manent elimination of unnecessary ense in its conduct and the superus red tape which in many instances ults in the defeat of the object for ich the Bureau was established and ults in misleading and detrimental semination of so-called "market inmation" which results in greater ible and loss than is compensated for the meager benefits. The petition s not contemplate the elimination the Bureau itself, but only its aning practices. As to the inspection vice, the petition says, "We are far n having uniform inspection, as un the Bureau of Markets rulings the pector is not permitted to use his d, but to keep his eyes constantly n the rules laid down."

W. Stewart, chief auditor for the d Administration Grain Corporah, with office at Kansas City, was ested on July 8 at Newton on a deral warrant on a charge of padg expense accounts and was taken Wichita for a hearing.

FROM CENTRAL NEW YORK

Great Scarcity of Farm Hands and High Wages Paid — Hay Crop Everywhere Heavy—Great Damage Done by Rains—Crop and Building News.

By A. D. THEOBALD.

SYRACUSE, July 19.—(Special Correspondence.)—For the first time in the history of farming that part of the state, farmers near Watertown are offering from $5 to $7 per day, sometimes with board and washing besides, to capable harvest hands. The shortage of competent labor has never been so acute; and with a good hay crop ready farmers are almost frantic in their efforts to secure help. At the Farm Bureau it is figured that competent men can earn between $120 and $170 a month. Even with these big earnings help is scarce. Many college students have come forward recently and are being paid at the rate of $5 per day. Figures received at the Jefferson County Farm Bureau indicate a yield of from three to four tons per acre. This is about double the usual yield.

Farmers in northern New York are much pleased with the hay cutting so far this year and a larger crop than for several years passed seems assured. Even the meadows which have "run out" are yielding more heavily this year, due probably to the excessive rain and heat. Hay has been selling at $30 a ton at Gouveneur; and feeding hay at this price, as the milk producers did during April and May, made the dairymen apprehensive, should the crop be poor this year.

Continued rains in this part of the state have done great damage to the crops, hardly anything escaping some damage. In some places entire fields have been washed out. In many places the entire first cutting of hay was completely destroyed by the downpours which in one instance lasted three days. The spring weather, unusually damp, held back the farmers in their planting and some of the crops were consequently late. The heavy rains have seemed to help the alfalfa crop, the hay cut being large in most places. The potato crop so far indicated is poor, while the corn and cabbage crops are nothing out of the ordinary. In many places the first planting of corn, cabbage and potatoes was wiped out by rain.

One of the finest hay crops in years is now being harvested in St. Lawrence County. The yield is exceptionally large, despite the backwardness of the spring season. Corn gives no sign of being anything unusual this year, but a good yield is expected. The hot weather of the past few weeks materially aided in bringing the backward crop to something like normal.

The promised bumper wheat crop in Livingston County, which it was expected would be ready for harvest three weeks earlier than usual, is now threatened with destruction. The wheat midge has begun to attack the fields. The infection is beginning to spread throughout the entire district.

The Galbraith Milling Company at Mt. Morris, one of the largest in this part of the state, is enlarging its establishment to handle the wheat raised in the district. A new tile grain tank adjoining the main building is being erected. This tank will have a capacity of 20,000 bushels. It will be ready to use when the new crop comes in.

A standing grain competition and seed fair will be held in Cayuga County this year for the purpose of stimulating interest in the best strains of oats, barley, spring wheat, winter wheat, potatoes, corn and buckwheat. It is planned to hold an exhibit in connection with the annual meeting of the County Farm Bureau. At this time prizes will be offered for two classes of exhibits of farm crops: (1) A closed class for those who have not entered the standing crop competition, and (2) an open class for those who have not entered the standing crop competition but who merely enter material for exhibit. By closed class is meant that in order to compete in the winter fair, the contestant must have received a favorable score of his crop while it was growing, the inspection to be made during summer. He will then take a two-bushel sample of his seed to the fair and the final awards will be made upon the final score and the score made of the sample. The open class will be samples of grain that have received no field inspection. Publicity on these samples will not be given by the bureau.

Farm Bureau Manager J. R. Teall of Onondaga county has been named general manager of the proposed modern milk distributing plant to be owned by the Onondaga County Milk Producers' Co-operative Ass'n which has raised $120,000 for the project. The producers will receive a proportionate return of the profits based on the quality and quantity of the milk they send to the plant. The plant has been financed entirely on credit, each of the 400 farmer members already enrolled, pledging $300 of their credit for a period of five years, to be paid back with interest from the profits of the co-operative enterprise. The project is further advanced than any of its kind in the state.

SOUTHEASTERN DEALERS, TAKE NOTICE.

The Bureau of Markets calls attention to the fact that all wheat, shelled corn and oats sold and shipped by grade in interstate commerce from or to a place where a licensed grain inspector is located, must be officially inspected by an inspector. To sell by grade in such cases, without having official inspection, is in violation of the Federal laws. Many grain shippers in the Southeastern states are apparently unaware that the grain standards act requires such inspection.

Every point at which there is a licensed grain inspector becomes an inspection point under the grain standards act. The law requires the shipper of interstate grain sold by grade to have the car inspected in these cases. If the inspector is located at point of shipment, the shipper should arrange for inspection. If the inspector is located at point of destination, the shipper should arrange with either the buyer or with the inspector at destination for the inspection. A list of inspection points in the Southeastern states, together with the names and addresses of the inspectors, follows: *Atlanta, Ga., W. R. Davis, Room 10, Trust Company of Georgia Bldg.; *Birmingham, Ala., M. J. Kendrick, 214 Chamber of Commerce Bldg.; *Jacksonville, Fla., J. K. Williams, Chamber of Commerce Bldg.; Memphis, Tenn., A. B. Garner, 1822 Florida street; Meridian, Miss., Mahum E. Katz, 310 Cochran Bldg.; *Savannah, Ga., Thomas J. Davis, 221 East 45th street; Nashville, Tenn., J. T. Robert 401 Commercial Club Bldg.; New O leans, La., George S. Colby, Board Trade Bldg. *Licensed to inspe shelled corn and oats only.

Weight of Southwestern Wheat.

As reported herein last week, sever cars of new crop hard and soft wint wheat have been received from Oklah ma and Kansas by the various mil in Minneapolis. The test weight seen to be the main factor of the offici grading, and practically none of t wheat contains a sufficient amount foreign material to allow assessi dockage. Several appeals have be brought to the Minneapolis Supervisi Office, and in most instances the gra has been raised on the basis of t factor of test weight.

The Food Controller of Great Brita will take over the potatoes remaini on the farms on June 30, which mu be loaded to the order of the Minist during July or until the crop has be exhausted. No potatoes will be accept from growers who refuse to load.

The Weather Crop Bulletin of Io says the winter wheat harvest is p gressing and disclosing a serious d terioration of the quality of the gra not more than half the kernels in t hay being plump and well fill Spring wheat is similarly affected a oats are blighting badly during t week ending July 8. Spring wheat h declined 16 per cent during the mon

Trade Mention

he Golden Grain Milling Co., manu-urers of horse, dairy, cattle, hog and ltry feeds at East St. Louis, Ill., ntly had all their sales representa-s assembled at the plant and ten-ed them a banquet. At this banquet te a surprise was in store for Geo. Keith, the general sales manager of company, when he was presented h a beautiful gold watch and Ma-ic fob, also a Shriner's pin set with monds.

uintal & Lynch, 21 Beardmore Bldg., ntreal, Que., Canada, contemplate ting 100,000-bushel storage this sum-. Our readers will recall items of ilar nature regarding other con-is in Quebec and the City of Mon-l. There is frequently a heavy n movement through the eastern vinces, and with a large surplus in the states this year it may be ected that a considerable tonnage be shipped over the border and ufactured, consigned and otherwise ributed in the provinces.

he Marshalltown, Ia., office of Tay-& Bournique Co. has been removed he Hubbell Bldg., Des Moines, Ia. ent issues of THE PRICE CURRENT-IN REPORTER have commented on organization of a Des Moines Grain hange, the appointment of an offi-inspector, the installation of all ing and grading equipment, etc. It efore seems very logical for this ling Milwaukee house with several tern branches and Eastern offices e located at Des Moines as well. uel Strom is in charge of the busi-there.

he Flanley Grain Co. of Omaha, ., a company long noted for its con-ment business, and which of late has engaged in a rather heavy mer-dising trade with the East, South Southeast, has always maintained rps of men who may be classed as est workers—men who attend strict-o business but who are, neverthe-popular with their friends and omers. It is hard to keep such men n; and announcement is now made Carl A. Houlton, who but a few s ago started out as traveling rep-ntative for the Flanley Grain Co. of late has been in charge of the signment Department at the Oma-office, has been made second vice-ident of the Flanley Grain Co. and ager of the Milwaukee office. Rex lton, his brother, is now following is footsteps, and will start out call-on country trade; and his friends him the same measure of success ted by his brother. Rex Houlton s from the Crowell Elevator Co. in the Flanley forces.

The Pratt Tab-Cut Ledger.

Speed is the watchword of the day is especially necessary in the offices he grain trade. This speed begins he trading floor of exchanges, where sactions involving huge sums of ey are effected by a few simple ments of the hands. This system in use has been found speedier any verbal or written order and is nized by the trade as equally bind-The office employes of these grain likewise work at top-notch speed are encouraged to use all time and saving devices. The tab-cut self-indexing ledger put out by the Pratt Audit Co. of Chicago, Peoria, Moline and Quincy, Ill., is especially valuable to the grain trade, in that it promotes speed and materially reduces the expense of ledger work. Postings may be made quickly and accounts kept balanced correctly all the time. In place of the usual index of the old style ledger, the account names are written on the tab-cut ledger leaves, and it is possible to turn to any account that may be wanted immediately. Only two finger movements are needed to open the ledger account to the exact page, in comparison to six to ten movements usually taken in finding the account desired. The ledger pages are 11¼x11⅞ inches and contain 25 accounts under each division. The brown lines, E-Z on the eyes, are a distinctive feature which appeals to workers whose eyes are taxed to the utmost. The pages show debit, credit and balance columns, making it possible to see the condition of the ledger account after every posting if the bookkeeper will draw the balance or the balance may be shown once a month as desired.

Mr. Pratt, president of the Company, is perfecting a Cash Journal System also for terminal commission houses, which it is anticipated will soon be on the market. Inquiries addressed to the company at their Chicago office will bring much information of value to grain men endeavoring to simplify their accounting work.

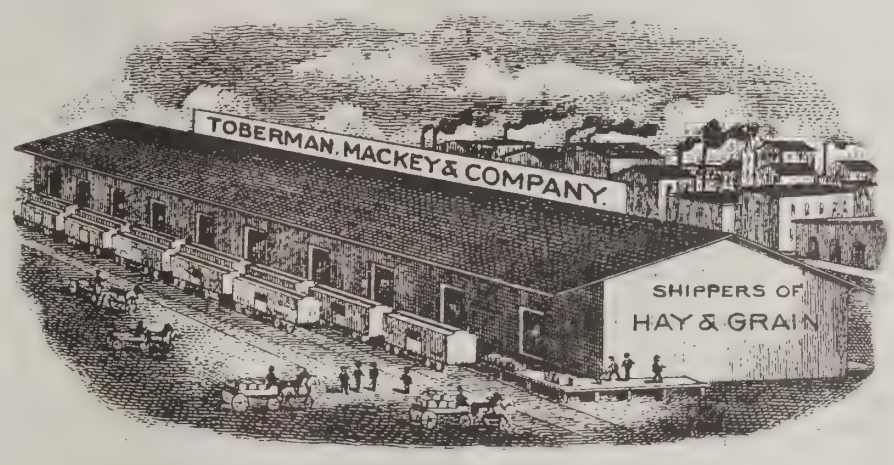
Inspection Equipment.

The Seed Trade Reporting Bureau, Postal Telegraph Bldg., Chicago, are exclusive manufacturers of grain grading equipment.

The equipment manufactured by them is carefully made of the highest grade materials under the personal supervision of L. M. Smith formerly with the Grain Standardization Division of the United States Department of Agriculture.

H. A. Brown has given his personal time and attention to conditions confronting grain dealers, millers and elevator men and has assisted hundreds to a more satisfactory and profitable handling of their grain.

The Seed Trade Reporting Bureau manufactures the Standard Official Brown Duval moisture tester everywhere used in Government supervising offices, inspection departments, country points and terminal markets. They will be glad to send you their catalogue number 621 giving complete description of their Seedburo (Trade-mark) grain grading devices. This catalogue also contains the official standards rules for wheat, oats and corn.



ST. LOUIS IN SHAPE FOR HAY.

Several recent St. Louis items referring to the rate adjustments of that big city favoring shippers and buyers of hay and grain will be recalled. Toberman, Mackey & Co. has been recognized for many years as one of the trade leaders in St. Louis and advises that all market facilities are in ship-shape to satisfactorily handle receipts, storage and prompt shipments for their hay friends.

M. E. Toberman, as recently stated in THE PRICE CURRENT-GRAIN REPORTER, has returned from service with the 349th Infantry, and with the full force of the company on the hay tracks and handling office details it is only natural that Walter Toberman as head of the concern should be very optimistic regarding business prospects this fall and winter.

Toberman, Mackey & Co. distributed during the National Hay convention a picture entitled "The Path of Dreams," particularly noticeable for its beautiful coloring.

New barley came in during the week, one sample from Iowa for which $1.24 was offered; another sample came from northern Illinois not distinctly labeled new but called new by the trade. It was of very fine quality, large berry and good color and the very top of the grade, for which $1.28 was offered.

STATE NEWS.

[Concluded from page 37.]

Tuttle, Okla.—The Farmers Exchange Elevator has been incorporated with a capital of $15,000. Incorporators: J. H. Davis, J. T. Roland, Floyd Kimble.

Skedee, Okla.—The Skedee Co-operative Grain Co. has been incorporated with a capital of $10,000. Incorporators: F. M. Funkhouser, John Oakleaf, K. L. Walls.

Medford, Okla.—Morrison Brothers have placed their new mill in operation and expect to make the formal opening of the plant the first of September. The mill has a daily capacity of 800 barrels and a storage capacity of 25,000 bushels.

SOUTH DAKOTA.

White Lake, S. D.—H. W. DeLong is the new manager of the Farmers Elevator.

Hayti, S. D.—R. A. Frothinger is the new manager of the Hayti Farmers Elevator.

Parkston, S. D.—Chas. Zehnfenning sold his interest in the grain elevator to John E. Wudel.

Frankfort, S. D.—W. E. Wheeler of Kampeska has accepted the position as manager of the Frankfort Mill & Elevator.

Elkton, S. D.—Geo. P. Sexauer & Son have purchased the E. A. Brown elevator. Geo. Ahsenmacher will be retained as manager.

TENNESSEE.

Johnson City, Tenn.—The Model Mill Co. is just completing a new elevator in addition to those already established when the mill was recently built, that will give them a storage capacity of a little over a quarter of a million bushels.

TEXAS.

Glen Rose (Somervell Co.), Tex.—The A. J. Price Flouring Mill Co. is putting in a new concrete elevator at its mill here.

Hillsboro, Tex.—It is reported that negotiations are under way for the establishment of a $100,000 flour mill at this point.

Ochiltree, Tex.—G. W. Willyingham is making arrangements to move the Ochiltree elevator to Peryton for C. W. Hutchinson.

Ochiltree, Tex.—The Hardemann-King Grain & Elevator Co. is making arrangements for the erection of a brick warehouse 75x120 feet and one story high with large basement.

WEST VIRGINIA.

Patterson Creek, W. Va.—The Patterson Creek Milling Co. has been incorporated with a capital stock of $10,000 by J. E. Long, C. H. Hershberger, P. P. Lodsdon and others to conduct a flouring mill.

WASHINGTON.

Colfax, Wash.— J. M. Robie, for many years manager of the Union Elevator & Warehouse Co. at Lind, has resigned and removed to Colfax, where he becomes general district agent of the Pacific Grain Co., connected with the Houser interests, with 25 warehouses in his district.

WISCONSIN.

Cambria, Wis.—Dodge & Slinger sold the Cambria Mill to J. H. Frederick.

Burlington, Wis.—The Farmers Terminal Elevator will build a $50,000 addition. This will double the present capacity.

Platteville, Wis.—Roy Taylor has accepted the position of state manager for Iowa for the Century Milling Co., of Minneapolis. He will begin August 1 and maintain headquarters here for the present.

Durand, Wis. The Chippewa Valley Equity Exchange recently purchased a site and have closed the contract for the construction of a concrete elevator of 25,000 bushels capacity. Building will cost about $17,000.

Marshville, Wis.—The Theresa Farmers' Union of Marshville, Dodge County, has been incorporated for $5,000 to deal in feeds, lumber, etc. Joseph Kohl, Andrew Greiner and Edwin Erdman are the incorporators.

Fond du Lac, Wis.—The Bechaud Brewing Co. is erecting a plant with a capacity of 20,000 bottles of soft drinks daily. Since July 1 the firm has put out a non-intoxicating drink, and the demand for it has required increased facilities.

Oconto, Wis.—A concrete foundation has been constructed under the old cereal mill on Huron street and chutes are being installed, preparatory for machinery that will be used in the operation of the new grist mill to be opened shortly.

Fond du Lac, Wis.—The Baker Nursery and Seed Co. has been organized by H. J. Baker and his son, Leonard J. Baker, and R. H. McEvoy. The firm has done a business for many years and has the seed line to meet the demand.

West Salem, Wis.—The Farmers operative Supply and Shipping Asso has been organized with a capital 600. Officers are: President, A. R vice-president, Homer Roberts; se J. H. Meyer; treasurer, Charles Bro

nerica, Minn.—At a meeting of
olders of the Norwood Farmers
e Elevator Co. arrangements
were made to open up a branch elevator here.

Guckeen, Minn.—The officers and directors of the newly organized Farmers Elevator Co. are as follows: P. J. Jensen, president; A. N. Anderson, vice-president; Wm. Ginn, secretary; J. W. McGoff, treasurer.

Menahga, Minn.—F. J. Johnson of the Independent Elevator has sold the elevator to a stock company composed of farmers residing near here. Wm. Doran, president; J. B. Benson, vice-president; and A. O. Richardson, secretary-treasurer.

MISSOURI.

Hunnewell, Mo.—The Farmers Elevator & Exchange Co. has started here with J. M. Freshwater as manager.

Richland, Mo.—Two new elevators, which are being built by H. E. Warren and R. E. Bohannon, are nearing completion and will be ready to receive the immense wheat crop.

Moberly, Mo.—The Glasgow Milling Co. has sold the elevator in this city to Lon McCorkle of Clifton Hill, and Mr. McCorkle in turn sold half interest to L. F. Fife and J. Walkup.

MONTANA.

Ronan, Mont.—A new flour mill is to be constructed here. Mr. Huot of Plains will manage it.

NEBRASKA.

Fairbury, Nebr.—John Botts is the new manager of the Farmers Union Elevator.

Tilden, Nebr.—A farmers' elevator will be erected here at an estimated cost of $22,000.

Krider (Mail to Odell), Nebr.—Articles of incorporation of the Farmers Union Co-operative Association of Krider were filed with a capital of $25,000. The association has purchased the Central Granaries Co.'s elevator and coal sheds at this place.

NEW JERSEY.

Edgewater, N. J.—A barge and a pier 280 feet long were destroyed and the main plant of the Corn Products Co. was endangered by fire of undetermined origin here recently. A large quantity of gluten and corn stored on the pier, on which the fire started, was destroyed. The plant is one of the several of the Corn Products Co. at which employes are on strike.

NEW YORK.

Mt. Morris, N. Y.—Geo. A. and Ray Bryce purchased the grain warehouse of Francis G. Ferrin.

NORTH DAKOTA.

Hazelton, N. D.—The Farmers Union Elevator Co. increased its capital stock from $10,000 to $25,000.

Norma, N. D.—The elevator here was struck by lightning and burned. Mr. McLean is manager of the elevator.

Enderlin, N. D.—Earl Thorpe of LaMoure has accepted the management of the Osborne-McMillan elevator, taking the place of W. C. Engle, who resigned.

New Leipzig, N. D.—The elevator belonging to the Slope Grain Co., operating under the management of F. M. Dattloff, has been sold to the Monarch Elevator Co. of Minneapolis.

OHIO.

Troy, O.—The Troy Grain & Supply Co. has increased its capital from $30,000 to $40,000.

Vermilion, O.—The Vermilion Mills have changed hands, having been purchased by A. W. Berk of Wakeman.

Bryan, O.—The Farmers Co-operative Grain & Supply Co. is constructing an elevator. Mr. Knepper is manager.

Oakland, (Mail to Middletown), O.—H. H. Wright has purchased the Palmer & Peck elevator at this place and will manage it.

Sterling, O.—The Sterling Grain & Milling Co. has been incorporated by S. S. Fouch, E. T. Boone and others; capital, $50,000.

Bryan, O.—Post & Dawson, hay, grain and stock dealers of Bryan, suffered a loss of approximately $10,000 when their barns, offices and contents burned.

Mendon, O.—The Mendon Grain & Implement Co. has been incorporated with a capital of $25,000. Incorporators: B. R. Connor, W. E. Touvelle, Frank Folk and others.

Cherry Fork, O.—The new flour mill firm of Hahn & Atzel has repaired the old Hunter mill at this place and has installed a complete new outfit of flour grinding machinery, known as the Little Giant System, manufactured at Alton, Ill.

Bellevue, O.—At a recent meeting of the stockholders of the Gardner Grain & Mill Co., the directors were authorized to change the name of the corporation. It is probable that the new name will be the Bellevue Milling Co. or the Bellevue Flour Milling Co.

OKLAHOMA.

Enid, Okla.—The White Grain Co., owned by Ben Fenquay, has purchased the Stephens Elevator near the Rock Island station.

Cordell, Okla.—The grain elevator here owned by Drennan of Oklahoma City has bes been sold to the Nelson elevator people of Clinton.

Field Seeds

The Baker Nursery and Seed Co. of Fond du Lac, Wis., has been incorporated by H. J. Baker, R. H. McEvoy and Leonard J. Baker with a capital stock of $60,000.

The seed inspectors working under the direction of Prof. Bolley of the North Dakota Agricultural College are making an inspection tour of that state inquiring into the character of the seed grain being held by farmers.

A southern Michigan seed dealer writes C. A. King & Co. that clover seed acreage is short and the crop will probably be small. A central Ohio correspondent writes that the clover acreage is very small. An Ontario dealer writes that alsike is filling fine.

Blackened or brown alfalfa seed is generally poor in quality. It is frequently seed that has sweated and in which the embryo has died and it is always wise to reject any sample of this seed containing many brown, black or shriveled seeds. Good sample seeds should be plump, yellow and free from weed seeds, dirt and debris. The standard weight is 60 lbs. to the bu., and approximately a pound contains about 220,000 seeds. If sown at the rate of 15 lbs. to the acre, if 90 per cent of the seed germinated, there would be 75 seeds per square foot of ground. A pound to the acre, *Field and Farm* says, would give five plants to the square foot, which would be ample for a good stand, except that no allowance would be made for failure of seeds to germinate, for the death of seedlings, and the competition of weeds.

St. Louis Seed Market.

ST. LOUIS, Mo., July 19.—The seed market continues quiet, but while there are few spot offerings, there are some seeds offered to arrive, and the feeling on nearly all kinds of seeds is firm. The demand for millet is disappointing, but timothy is firm, and the clover seed market is strong. Several lots of redtop have sold of late, but the movement of stock peas appears to be over. In the absence of spot sales, quotations are as follows: Timothy, $12 per 100 lbs. for good seed; clover, from $35 to $41, according to quality; redtop, $11@12; millet, golden, $4.50@5; Siberian, $2.50 @2.60; white, $2.60; sorghum cane seed, $2.60 per 100 lbs.

Detroit Seed Prices.

Grass seeds at Detroit July 19 were quotable as follows: Clover seed—Cash, $28; October, $29. Timothy seed, $5.50.

Milwaukee Seed Movement.

Movement of seeds at Milwaukee during week ending July 19, 1919, reported to PRICE CURRENT-GRAIN REPORTER by H. A. Plumb, secretary Chamber of Commerce:

	Receipts.		Shipments.	
	1919.	1918.	1919.	1918.
Timothy, lbs	30,000	.....	.....	41,460
Clover, lbs	.....	.....	.....	.....

Louisville Seed Market.

LOUISVILLE, KY., July 19.—Movement of new crops of orchard grass and bluegrass seed continues small, due to high prices asked by growers and refusal of cleaners to pay such prices except on immediate needs. Growers are asking $1.75@2 for stripped bluegrass and $3 for orchard grass. Cleaners figure that the price to the grower on bluegrass should not be more than $1.50@1.60, and not more than $2.50 on orchard grass. There will not be much demand for bluegrass for some time to come, and time will probably settle the argument. Some orchard grass for summer planting is now in demand, and is forcing a high market. Redtop prospects are reported excellent. The onion set crop in Jefferson County is showing better prospects.

CHICAGO SEEDS MOVEMENT.

Following is a report of the receipts and shipments of grass seeds at Chic for the months and weeks named in 1919 and 1918, in pounds (000 omitted

Oct.	5.95	5.80	5.80	5.82½
Dec.	6.00	5.85	5.85	5 85
March	6.22½	6.10	6.10	6.05

Kansas City Seed Market.

KANSAS CITY, July 19.—Seed dealers are devoting exclusive attention to bluegrass, with the purpose of accumulating stocks from the large crops of Missouri and Iowa. A report from Brookfield, Mo., says 3,000 bus. of seed in the rough were sold there this week. Kansas City houses deny that much seed is being offered, but admit that their traveling men are scouring the country for supplies. It is difficult to definite quotations on rough seed, some dealers say a range of $7 to per cwt. would cover the market.

Reports pertaining to the alfalfa uation continue favorable, though grasshopper infested region of s western Kansas is in bad shape. second cutting of hay was accompli with fair results in most parts of sas, Oklahoma and Nebraska.

thern Kansas and Oklahoma there e been some instances of the third ting. There is little information as how much acreage will be left for d.

lover and timothy seed saving is in the future. It is believed there l be fair amounts saved in Mis- ri and Iowa, considering the small age of both crops.

owing of forage seeds has practically sed, the last stage being in har- ed wheat fields. There is a big ge acreage. The acreage planted seed-saving purposes is said to be air conditoin, though needing rain entral Kansas.

he seed market in Kansas City is rted as follows, with prices based carlots from first hands: Alfalfa, cwt., $11@18; timothy, per cwt., 10.50; bluegrass, per cwt., rough, $7 ; clover, not quoted; cane seed, not ed; millet seed, not quoted.

Chicago Seed Market.

he timothy market opened the week anged from previous week, but as week wore on a firmer tone devel- in the futures. Fair to choice lots ountry seed were quotable at $9@ according to quality. The clover ket also gained strength as the k progressed. Country lots were able $25@40 for seed grading poor hoice with fair to good averaging 38. Some new alsike clover was ived on Saturday but was carried into the next week. Some of the e report a reduced acreage, but that the general tonnage on the age standing is extra high. Quota- s on timothy and clover follow:

n.—July.	September.	October.
.....	$13.25B-13.90A	$12 75B-13 00A
..$12.90A	13.90A	12.75B-13.25A

ver, contract prime

14	$46.50	July 17	$47.00
15	47.00	July 18	47.50
16	47.00	July 19	47.50

Duluth Flaxseed Market.

LUTH, July 19.—Traders in flax- were afforded a superabundance of ement during the last week. Quo- ns covered a wide range in the six operations and as evidencing the stion existing in the spot article he nearby future, it was noted that market was susceptible to sharp s on the putting through of a volume of business. That crush- re in need of seed to cover their d oil contracts was evidenced in anxiety not to permit any chances k it up go by them. Competition ie part of operators representing eapolis crushers added zest to the et at all times. Lightening of con- was in evidence all week and that selling final prices showed ies extending up to 30c. eipts from the country continued ound the basis they have been run- at recently, and the cars coming mmanded substantial premiums. e opinion of operators, growers over the territory are endeavoring to avail themselves of the high prices in rushing in all their available holdings, as demonstrated in the proportion of bulkheaded cars being received.

With the new crops prospects as dubious as they are, and taking into account the small amount of seed in store, specialists in the trade are disposed to regard the flaxseed and linseed oil trade situation as almost calamitous. Taking all that into consideration, they assert that anything might happen in the flaxseed market. Where prices will finally settle is thought to be purely a matter of conjecture, largely depending on the availability and the extent of Argentine imports during the coming season.

In the meantime linseed oil prices have gone soaring in step with the linseed market, and it is assumed in some quarters that the situation will in a measure correct itself in a falling off in the building trade demand and the use of substitutes to the greatest extent possible.

Flaxseed receipts on this market during the week aggregated 89,778 bus., and with shipments of 90,386 bus. stocks in the elevators at the head of the lakes were 150,000 bus.

Closing prices of flaxseed on the Duluth market on Saturday as compared with the previous Saturday and last year were:

	Saturday.	Wk. ago.	Yr. ago.
On track	$5.96	$6.11	$4.51
To arrive.....	5.86	6 10	4.50
July	5 95	6.10	4.51
September	5.88	6.10	4.57
October	5 72	6.03	4.52
November	5.63	5.93	4.48
December	5 50	5.80	....

Minneapolis Flax Seed Market.

MINNEAPOLIS, July 21.—The demand for flax is not as keen as it has been as the crushers have laid by a supply during the recent heavy run and cannot crush as fast as the linseed oil demand requires. Buyers are trying to shift the buying basis over to the September future owing to the light trade in July. Today No. 1 seed was quoted at 3@7c under July for spot delivery and 5c under for arrive. Offerings to arrive are very light. Spot offerings are mostly in bulkhead car lots and straight carlots bring a good premium over the bulkhead lots. New crop news varies. Considerable damage was done in North Dakota by grasshoppers and rain is needed to keep the plants progressing.

Clover Seed Again Higher.

Clover seed passed $30 for the October at Toledo last week. There wasn't such a big amount of trade at that price, however, and there was some reaction later. Most of the buying last week seems to have been for shorts. There was some fresh short selling, and some longs also accepted handsome profits. Crop news from some of the Western states is favorable, but from the Central states mostly bad and on a short acreage, although recent rains have started the plant along in nice shape, and there may yet be some seed where it was supposed there wouldn't be any. —*J. F. Zahm & Co.*

Dec.	.....	4.21	3.37	2.31	2.86	2.18	2.10

SEED SITUATION.

SAPLING CLOVER CROP.

VIRGINIA (2).—Our section grows quite a lot of sapling clover and very little of any other seed. At present the prospect is good, but we fear there is almost too much rain for it to fill well, but there is a very heavy growth and we hope for a good crop.—*S. F. McClure, Spottswood, Va.*

BLUEGRASS, TIMOTHY AND ALFALFA SEED.

KANSAS CITY.—The harvest of our blue grass crop has been finished, and the quality is very fine, although the crop has been largely over-estimated. A month ago we thought we would have 400,000 bushels. It looks as though 300,000 bushels were all that were harvested. Had there been sufficient machines to have harvested all of the crop, we would have had 500,000 bushels.

The acreage of timothy has been somewhat reduced, but prospects for seed are excellent, both as to quality and yield. Owing to the scarcity of labor and the amount of farm work that is pressing, we are inclined to think a lot of the fields will be left standing for seed, although the price of hay is very tempting, and there has been such a wonderful undergrowth that many of the fields that have been cut will yield a ton and a half per acre.

It is too early to say anything definite about red clover or alfalfa. All of the first crop and most of the second crop of alfalfa was cut for hay, and the seed crop (if we have any) will come from the third crop, and this will depend on the weather in the next thirty days.—*Missouri Seed Company, Kansas City, Mo.*

SEED SITUATION IN N. D.

FARGO, N. D.—The seed situation in our immediate locality is quite favorable this season. The coarse grains in the eastern part of North Dakota and the western part of Minnesota are in very good condition and will doubtless bring a good yield, with proper weather from now until harvest, although a record such as last year is not to be expected. The western half of North Dakota, with exception of a few small areas, is in bad condition and the crop will be very light.

Timothy and clover fields in the territory tributary to Fargo are in fair condition and we anticipate that many farmers who have not done so, heretofore, will save seed this year. Alfalfa likewise is getting along nicely, although the amount of alfalfa raised in our immediate vicinity is not appreciable.

Continued warm weather with occasional showers have put the corn in this section in splendid condition. As a matter of fact our corn crop this season is unusually good considering the time of the year, and unless there are some extremely early frosts we think that practically all farmers will have ripe seed in the fall, which has been by no means the case the last three years. —*Magill & Company, by W. H. Magill, Fargo, N. D.*

Kentucky Grass Seed Crops.

LOUISVILLE, KY.—There is not much to say in regard to seed conditions at the present time. There is practically no business being done as this is between seasons. As to crop:

ORCHARD GRASS.—New crop orchard grass is being harvested, but owing to the fact that farmers are asking excessive prices for their seed very little is being moved. We seem to have produced probably more seed than we did last year, although there was a short acreage. This short acreage was counteracted by the big yield. We do not believe there will be any chance to do any business on orchard grass unless the price declines considerably.

KENTUCKY BLUE GRASS.—There will be a rather fair crop of blue grass, although the acreage is short. Like orchard grass the yield is counteracted in the short acreage. We have probably produced 450,000 to 600,000 bushels in this state. The present prices are ruling around $1.75 to $2.00 per bushel for rough seed. There is no business being done on blue grass of any consequence.—*Louisville Seed Company, by O. T. W., Louisville, Ky.*

Report on Flax Condition.

The flax crop in Minnesota appears to be in good condition, but sections of South Dakota and western North Dakota need rains quite badly. No doubt some of the late shown flax in western North Dakota will need favorable weather from now on to bring it to

maturity. Reports from eastern North Dakota are favorable, but some of the territory in the central part of the state has lost a considerable quantity of the flax crop by damage from grasshoppers.—*The Van Dusen Harrington Co.*

Seed Crop Outlook.

Weather is king. It will be important for several weeks. Crop reports are mixed. Some sections need rain. Some have had plenty of moisture to give second crop a start. Dry with occasional showers and not too hot are needed after crop secures a start. Clover is very sensitive to weather conditions. Acreage is short. Light stocks make market sensitive. Realize on bulges. Present prices certainly discount considerable. They are attracting seed from Italy and France. Foreigners need money badly. Large exporter writes that Europe has carried over considerable red clover, of which some has been purchased by our seaboard dealers, enough probably to cover summer trade. Europe may also ship us some new seed later.—*C. A. King & Co., Toledo.*

Toledo Timothy Seed.

Most timothy stocks are in a few strong hands. This, with general high price levels, suggests it may be marketed later at higher prices. While Toledo shipments were substantial last few weeks, it has simply been a shifting of stocks. There is a good deal of timothy around and it comes out easily on advances. Some are placing considerable reliance on export demand, but it hasn't developed yet and still is a question. New York reported 1,200 bags exported last week and Baltimore 696 bags.—*Southworth & Co., Toledo.*

Broom Corn Crop.

The following is an estimate of condition of broom corn on July 1, 1919, by Bureau of Crop Estimates:

	Production. 1919 forecast July 1. Tons (2,000 lbs.)	Dec. est. 1918. Tons (2,000 lbs.)	Acreage, 1919. Pct. of 1918.	Total acres.
Illinois	7,800	9,000	87	27,000
Kansas	5,600	8,500	50	29,000
Texas	15,000	19,200	78	58,000
Oklahoma	24,700	16,100	98	137,000
Colorado	3,400	5,200	57	17,000
Total	56,500	58,000	80.5	268,000

RECEIPTS AND PRICES OF RYE.

Receipts of rye at the principal primary markets of the Central West for the week ended July 18, and for the corresponding week last year, as reported by the Minneapolis *Market Record*, were:

	1919. Cars.	1918 Cars.
Minneapolis	197	22
Duluth	168	...
Chicago	54	25
Omaha	15	7
Milwaukee	34	5
Total	468	59

Closing outside prices of rye of standard quality and spot cash for each day of the week beginning July 11, were:

	Mpls.	Dul.	Chi.	Oma.	Mil.
July 11	1.54¾	1.55	1.56½	.....	1.57
July 12	1.61⅜	1.61	1.65	1.56	1.64
July 14	1.58¾	1.59½	1.69	1.55	1.67
July 15	1.57¾	1.57¼	1.60	.....	1.61
July 16	1.59¾	1.59¼	1.62	1.52	1.60
July 17	1.57⅛	1.54¼	1.59	1.48	1.59⅛
July 18	1.54⅜	1.54¼	1.59	1.48	1.59¼

New Rye Is Slow to Move.

While the greater part of the recent advance in rye has been maintained, yet relative values of the different cereals are still far out of line; either rye is too cheap or corn and wheat are too high.

Rye receipts continue light, for as yet no free movement of the new crop has developed, leaving the market in a position where prices can easily be manipulated; and they are particularly susceptible to even a small demand. There is considerable inquiry for quotations, not only from the Scandinavian countries but also from Germany; although actual sales to date, we believe, have been light. We anticipate heavy sales for export within thirty days.—*Blodgett-Holmes Co., Janesville, Wis.*

CLIMAX SUPERFINE BRAND.

You know there are lots of wise birds in this world, ranging from the owl down. We have made quite a study of birds because the scarecrows in the fields and the particular preference for certain seeds and crops evidenced by certain birds help us in our seed business.

Our friends above, an eagle and a crow, sitting on a fence overlooking a broad field of fine timothy, are sizing up the situation.

The crow says to the eagle, "You may be the king of birds, but look at the crop that Small's Woodpecker Brand produced."

Now, as a buyer of seeds, we ask you frankly whether you are willing to parallel your good judgment and seed selection ability with the crow? If you agree with him, ask your dealer for Small's Woodpecker Brand of timothy seed.

BROOM CORN.

Growing conditions have shown some improvement during the past week, says *The Broom Corn Review*, because temperatures have not been as high as the week or ten days previous. There was also in the early part of the week local rains in western Kansas and northwestern Oklahoma and in some sections of southern Oklahoma. Acreage reports except in the Lindsey district indicate a normal planting. There is report of grasshopper damage in western Kansas and northwestern Oklahoma but the extent is somewhat debatable.

Field buying shows but little activity and prices no material change, ranging as usual from $60@100, but the better grades are usually in the hands of strong holders and are firmly held. Trading at Wichita has been limited and receipts have been confined to odd cars from the West with some new corn from the Rio Grande Valley. Offerings are usually held around $75 for Western up to $250 as a maximum; new Texas corn running from $150@250 with old Lindsey $200@250. In cen nois districts the prospects a promising, growing condition t most perfect. Estimates as to run from 30@60 per cent of la plant. Some growers are still old corn asking from $100@20 ing to grade and condition.

A considerable larger acr brom corn than usual was pu Indiana this year. The conditi indicates a fair crop. Sorghu acreage in Indiana is slightly a year ago but the usual amou lasses is indicated.

Beans and Potatoes

owa potatoes are said to have been efited by recent rains.

ackson, Miss., reports that more care l be taken this year than heretofore the sweet potato crop; curing houses l be very numerous in the southern t of the state. The crop at present estimated if saved as worth from ,000,000 to $15,000,000.

Beans and potatoes in Michigan w a marked improvement, due to ler and rainy weather. Early potas, however, are not setting well.

Bean Crop Condition.

'ollowing is an estimate of the bean p growing conditions on July 1, 9:

	Production. 1919 forecast July 1. Bushels.	Dec. est. 1918. Bushels.	Acreage, 1919. Pct. of 1918.	Total acres.
York..	1,130,000	1,660,000	54	108,000
higan ..	3,654,000	4,887,000	65	353,000
rado ..	866,000	1,638,000	36	90,000
Mexico..	913,000	596,000	83	124,000
ona	137,000	72,000	89	16,000
fornia .	5,602,000	8,584,000	70	415,000
tal	12,302,000	17,437,000	63.1	1,106,000

The Bean Crop Outlook.

he growing crop in California, Colo, New Mexico and Michigan will a short one. Beans are selling at low a price compared with canned etable, canned and dried fruits and . There is no reason for beans sell- at the prices quoted when peace, tics and religion are so high. We eve beans will be two cents per nd higher Sept. 1 than they are to- They are the one cheap food.—*L. Johnson Brokerage Co., Joplin,*

BEAN SITUATION.

BEAN CROP CONDITIONS.

ICHIGAN (6).—Acreage to beans in section is about 60 per cent of nor- but the growing conditions are l. There is about 5 per cent of the crop still in growers' hands but the ity is poor and cannot be made to le choice, hand picked. The poor of last year and the unsatisfactory es have discouraged many of our bean growers and they are not in is year.—*Leslie Elevator Co., Les- Mich.*

BEAN MARKET IS IMPROVING.

AND RAPIDS, MICH.—The bean mar- has shown considerable improve- t during the past week due to an eased demand and inquiries for ex-

ere is a big reduction in acreage year, and the dry weather has in- l the plant.

e believe all the beans remaining ichigan will be needed and at good es, before the new crop is ready. lesale grocers and retailers are car- g lighter stocks than usual at this of the year, but the entire trade reluctant to purchase more than immediate requirements, as beans not been a profitable commodity handle since the armistice was ed.—*Lewellyn Bean Co., per F. E. ellyn, Grand Rapids, Mich.*

WISCONSIN PEA CROP UNFAVORABLE.

WISCONSIN (8).—The Wisconsin pea is not turning out as favorably as ad hoped and as it looked several s ago. The hot weather we had atter part of June, just as the pea maturing, caused serious damage, instead of having the bumper crop nticipated, 70% is as much as will arvested in the most favorable lo- es. In the district where peas are n to a greater extent than any- e else in the state, namely in Door Kewaunee Counties, the crop will ght and we do not expect any more 65% of a normal crop, compared e acreage which also has been cut materially this year.

e demand for the canning varieties, such as Alaskas and also for green peas, is opening up stronger than for some time past. Those who are in need of the canning varieties such as Alaskas and Market Gardens, will do well to cover their requirements soon for the supply is very limited.—*Knauf & Tesch Co., per Wm. N. Knauf, Chilton, Wis.*

BEAN AND POTATO PRICES.

Quotations follow for lots of good quality and condition beans and potatoes, sacked, per cwt., unless otherwise stated, as of July 19:

Beans—

Boston—Limas, $9.50@10.

Buffalo—Marrows, $10@10.50; mediums, $7.50@8; pea beans, $7.50@8; wh. kidney, $11@11.50; red kidney, $11@11.50.

Chicago—Prices firmer and dmd. improving. Pea beans, hand-picked, ch. to fancy, $7.50@8; fair to good, $6.50@7; brown Swedish, $5@6; red kidneys, $11@11.50.

Cincinnati—Navies, $8.60; marrowfats, $12.50@12.75; red kidneys, $13.50; limas, $10@10.50; pintos, $7.50.

Denver—Pintos, paid to jobbers, $4.25@4.50; navies, $6.50@8.50; limas, $9@10.

Detroit—H.-p. pea beans, $7.50 cash.

Minneapolis—Navies, $8; soy beans, $5; brown beans, fcy., $6; limas, $11.

Montreal—The market remains steady for Ontario handpicked beans which are scarce and quoted at $4.75 in round lots. Three-pound pickers are steady at $4.50. Quebec beans are quiet and steady at $3.50 to $4 in jobbing lots—Trade Bulletin.

New York—Calif. limas, $9.25@9.50; pinks, $7.25; red kidneys, ch., $12.75@13; pea beans, ch., $7.50; ordinary, $6.75@7.25; marrows, $10.50@11.75; Kintoki Manchurian, $5@5.50.

Rochester, N. Y.—Peas and mediums, $7.50; yellow eyes, $7.25, h.-p. f. o. b. loading station.

San Francisco—Limas, $9; lge. wh., $5.75; sma. wh., $6.50; black eyes, $4.50; pinks, $5.60; red Mexican, $4.75; cranberries, $5.75; red kidneys, $11.50; teparies, $2.50.

St. Louis—Quote c. lts.—ch. h.-p. Mich., $8; prime ma.-p., $7.75; orders and small lots higher; pinto beans, $6 per cwt. From store—Scotch peas, 7½c per lb.; split peas, green, at 15c, and yellow at 7½c per lb. Per cwt.: Calif. black eyes, $5.50; ch. limas, $10; Calif. pinks, $7.75; white, $8.—Market Reporter.

Potatoes—

Boston—Norfolk, $6@6.50; East'n Shore, $7@7.25.

Buffalo—East'n Shore No. 1, $6.50@6.75; No. 2, $5.50@6; old, ch., per bu., 80c@$1.

Chicago—New — Market steady. Kaw Valley, Ohios, $3.50@3.75; Ky. Cobb, $3.75@3.90; St. Louis, Ohios, $3.70@3.90; Calif. wh. rose, $3.90.

Cincinnati—Ky. Cobb. No. 1, bbl., $7; early Ohio, h.-g., bbl., $7.50.

Denver—Wholesale prices to jobbers. Old—75c@$1.75. New—$3@4.50.

Indianapolis—Va.-Bell, bbls., $7.50.

Kansas City—Kaw Valley, $3.90@4.

New York—New—East'n Shore, bbl., $5.50@7; Va., bbl., $5@6; N. C., $4.50@5.50 per bbl.

Montreal—The market is pretty well cleared of old stock, and the demand is now running on new stock Americans, which sell at $6.50 to $7 per barrel for No. 1 and $3.75 to $4 for No. 2. New Canadian stock expected next week.—Trade Bulletin.

San Francisco—Garnets, $3@3.25 per cwt.; Stockton, ex. fcy., $2.85; ch., $2.50.

St. Louis—New—Fcy. stk. steady, balance discounted. Farmers del. bulk, $2.35@2.80; boxes, $1.25@1.40.—Market Reporter.

Condition of Kafirs.

The following is an estimate of condition of the kafirs on July 1, 1919, by Bureau of Crop Estimates:

	Production. 1919 forecast July 1. Bushels.	Dec. est. 1918. Bushels.	Acreage, 1919. Pct. of 1918.	Total acres.
Kansas	28,015,000	20,107,000	67	1,433,000
Texas	52,951,000	24,075,000	112	1,798,000
Oklahoma .	27,757,000	15,260,000	89	1,356,000
Colorado ..	6,138,000	1,748,000	326	300,000
N. Mexico..	6,626,000	3,582,000	120	238,000
Arizona	2,017,000	1,624,000	100	58,000
Total ..	123,504,000	66,396,000	92.2	5,183,000

Feedstuffs

Sayler & Co. have just opened up their new feed business at Houston, Mo.

The Marvel Flour & Feed Co. has been incorporated at Syracuse, N. Y., with a capital stock of $10,000.

Frank McAfee and Wilbur Patrick, owners of the City Feed Store at Paris, Mo., will build a 25,000-bushel elevator this fall.

The Brown & Oglesby Cash Feed Co. of Little Rock, Ark., has filed articles of incorporation with a capital stock of $75,000. The officers are Walter Brown, president; Wm. Perry, vice-president; W. T. Ogelsby, secretary-treasurer.

B. D. Stanley, who has been the manager of the Lewistown Milling Co. at Yakima, Wash., has decided to go into business for himself. He will make a specialty of soya bean, copra and other Eastern feeds.

The Davenport Flour, Feed, Hay Commission Co. of Davenport, Ia., closed its business July 15, discontinuing operation. A. F. Schoening, the manager, will enter the grain brokerage business about Sept. 1. The business of the old firm was turned over to the Tri-State Flour & Feed Co.

Scattered Cottonseed Feed Sales.

KANSAS CITY, July 19.—With offerings for current shipment extremely light, sales of cottonseed cake and meal were of a scattered character, jobbers holding 41 per cent protein cake at $70 a ton, basis Kansas City. Supplies are difficult to obtain, and many graziers are forced to do without the feed. Southern crushers are seeking bids on new crop cake and meal for fall delivery, but the trade here is not sufficiently interested to submit prices.

FEED SITUATION.

DEMAND REDUCED BUT OUTLOOK FINE.

MOBILE, ALA.—For the past ten days the demand for feed has fallen off very much on account of unsettled prices and conditions which are uncontrollable; but the merchants seem to feel that within the next fifteen days conditions will change for the better and a nice, profitable business will be done. The heavy advance in grain and other feed products, as above stated, have cut the demand, but conditions are strong and point to a very heavy and profitable business within the next short while. There seems to be a heavy demand for substitutes in the manufacture of mixed feeds in a way to make things cheaper, but don't think they have been found as yet.—*J. L. Suttle, Mobile, Ala.*

FEED MARKETS.

NEW YORK.

New York, July 19.—The market for millfeed was firm and prices were advanced to a higher level during the past week. The demand was not active and the action of mills was based on the smaller production and expectations that feed was going to be scarce until the new crop was available. Consumers bought only as their needs dictated, and were holding off for new offers, as they expect that new feed from the winter wheat belt will soon be on the market. Western spring bran was quoted at $44.50; standard middlings, $54; and Red Dog $66.

MEMPHIS.

Memphis, July 19.—There are few new features to the feed situation, and manufacturers of mixed varieties are having all the business they can take care of. Prices have stiffened up some and there continues to be larger use of oats for feeds than corn, due to relative cheapness and to the scarcity of the latter. Wheat bran and shorts are scarce and firmer, the former selling at $40 and the latter at $57 within the past day or so. Cotton seed meal is very scarce and the quoted price for 7 per cent meal is now $70 and $71 a ton. A few cars of wheat have been received and it is expected offerings of mill feeds will soon increase a little.

DULUTH.

Duluth, July 19.—A strong market prevailed in feeds during the last week and in step with higher quotations in coarse grains further markings up were recorded. Shorts were advanced $2, red dog $2, and rye feeds $3 a ton. A steady inquiry in millfeeds was recorded but with light supplies available the volume of business put through was small. Consumers are limiting their buying in feeds in expectations of lower costs when the new season's crops begin to move.

Quotations follow: Bran, per ton, $38; ground oats, per ton, $48.25; No. 1 ground feed, per ton, $62.50; No. 2 ground feed, per ton, $58.75; No. 3 ground feed, per ton, $55.25; shorts, per ton, $48; red dog, per ton, $60; Boston mixed, per ton, $44; cracked corn, per ton, $69.25; rye feed, $38.

PHILADELPHIA.

Philadelphia, July 19.—The market for feedstuffs is strong and higher under a good demand and light offerings. The following are the quotations for car lots to arrive in 100 lb. sacks: Standard wheat middlings, $54.50@55.50 per ton; flour middlings, $61.50@62.50; red dog, $66.50@68; shorts, $54.50@55.50; low grade flour, $66.50@68; rye middlings, $49@50; fine yellow hominy, $74@76; fine white hominy, $75@77; reground oats feed, $28@29; cotton seed meal, 41% protein, $82@84; cotton seed meal, 36% protein, $78@79; cotton seed meal, 20% protein, $59@60; winter bran, spot, $46@46.50 per ton, to arrive, $46@46.50; spring bran, spot, $44.50@45.50, to arrive, $44.50@45.50.

LOUISVILLE, KY.

Louisville, Ky.—July 19.—There is a heavy demand for millfeed, with stocks in hands of jobbers scarce and mills oversold, resulting in light deliveries as a whole. Locally mills are overso'd to a point where they won't quote a price on feed. Some little bran is quoted at $45 per ton, with middlings at $60, principally where sold with flour to make up full cars. Nominal price on hominy feed meal is $69 per ton, but with practically no feed to be had.

BOSTON.

Boston, July 19.—Practically all feeds are higher than last week with light offerings and quiet demand. Prices quoted as follows. Bran, spring, sacked, $45 per ton; bran, winter, sacker, $45.50; middlings, sacked, $55@60; mixed feed, sacked, $52.50@57; gluten feed, sacked, $72; red dog, sacked, $68; second clear, sacked, $71; stock feed, sacked, $65.50; oat hulls, reground, sacked, $29; hominy feed, sacked, $76; cottonseed meal, sacked, $78@82. Receipts for the week ending July 19th were 62 tons.

NEW ORLEANS.

New Orleans, La., July 19.—The low mark on bran has been $2 per hundred, delivered. Recent sales have been made at $2.15 per hundred, de'ivered. Brown shorts offered at $2.70 and gray shorts offered at $2.60. Brown has been sold for July and August shipment, while gray shorts are only offered for August. There is a good demand for both bran and shorts and offerings are not free of either.

NASHVILLE.

Nashville, Tenn., July 21.—Stocks of wheat bran and shorts continued light last week and not sufficient for demand. Sales were made freely for early shipment. Other ground feed was strong, with moderate supplies, and good demand. Quotations: wheat bran, 100 lb. bags, per ton, $42.70; shorts or middlings, $54.70; horse and mule feed, $50@65; dairy feed, $50@62; hog feed, $62; poultry feed, $74@80.

ST. LOUIS.

St. Louis, Mo., July 19.—The feed market is strong and higher, with spot feeds in active demand, and prompt shipment offerings readily taken, but manufacturers are making strenuous efforts to sell futures on the basis of spot and prompt prices, while buyers want only spot, or prompt shipments at these figures. The stiffness in the market is caused principally by the strength in corn and oats, and the trade is looking for heavy breaks in these grains soon.

Quotations are as follows: Bran, $39.50@40; middlings, brown, prompt, $52@53; Aug.-Sept., $50@51; gray, prompt, $56@57; Aug.-Sept., $53@56; mixed feed, $45@47; hominy feed, none offered, nominally, $69; oat feed, $22@23; barley feed, $58 per ton.

BALTIMORE.

Baltimore, July 19.—The spot feed market is firm as quoted, with a fair demand for sacked bran and middlings and first hand offerings of feed not burdensome. Interior advices on feedstuffs are encouraging. Quotations follow: Western spring bran, per ton, in 100-lb. sacks, $43@44; Western middlings, per ton, in 100-lb. sacks, $50; city mills' winter bran, per ton, in 100-lb. sacks, $48; brown middlings, per ton, in 100-lb. sacks, $50; white middlings, per ton, in 80-lb. sacks, $62@63.

MONTREAL.

Montreal, July 18.—The market is quiet, sales in car being reported at $41 and $42, and shorts at $43@44. Mixed grain moullie has sold at $64@65, and mixed moullie at $48@50 per ton.—Trade Bulletin.

MILWAUKEE.

Milwaukee, July 19.—The brisk demand for mill feeds continues in the local market which rules very strong and higher. Offerings are small because the mills are restricting operations until the new crop is put on the market. In addition to a good demand for immediate shipment there is also a noticeable improvement in inquiries. Bran is up 50c to $1, middlings improved $1@3; red dog, $5; hominy feed, $7; rye feed, $2; old process oilmeal, $2.50; and brewers' dried grains, $1@2. Current quotations are: Bran, per ton, $39.50@40; standard middlings, $50@51; flour m dlings, $55; red dog, $64; hominy fe $75.50; rye feed, $45; old process oil m $77.50; cottonseed meal, $69.50@75; br ers' dried grains, $55@56, all in 100 sacks.

CHICAGO.

Chicago, July 19.—Middlings declined per ton last week but otherwise millf prices remain unchanged with supplies ported adequate for the demand. Cott seed meal is firm and supplies of it light.

TAMPA, FLA.

Tampa, Fla., July 18.—Brown shorts quoted at $58.10. The trade here is pr well stocked on shorts and little inte is being accorded present prices. It is belief of many of the local dealers t lower prices will be seen as soon as n begin to run freely on the new crop flour orders begin to come in stea Stocks here are heavier than usual, receipts for the past week have been li amounting to less than 5,000 bags. E is meeting with a little more demand now than is customary in the Tampa n ket and some few sales have been summated at the present price of $4 delivered, Tampa. Receipts of bran, t cars.

No. 1 green alfalfa meal is being qu at $42.50, all-rail. Considerable inte has been manifested in alfalfa meal there is wide variance in the quotat from different sections of the cou For instance, Colorado shippers are ing $44.50, basis all-rail shipments, w Kansas and Oklahoma are offering a per ton under Colorado.

Seven per cent Amm. cotton seed is offered at $73, the highest price quoted on the local market. There is p tically no demand for cotton seed mea such prices, though undoubtedly the port demand continues good. High p on such concentrated feeds as peanut cotton seed meal must be expected the opening of trade with European bu

MINNEAPOLIS.

Minneapolis, Minn., July 21.—The mand for millfeed is strong and prices vanced during the week. Offerings re light and the demand comes from a territory. The demand for heavy exceeds the supply by considerable margin and brokers and millers ca almost any price for what they hav offer. There has been some season ment contracts made recently. Very offerings expected during the next 30 days and the trade is looking for fu advances. Shipping directions are Quotations in car lots, f. o. b. Minnea in 100-lb. sacks, $37@38; standard dlings, $47.50@48; flour middlings, $5 54.50; red dog, $60@61; rye midd $42.50@43; ground barley, $50@52.

BUYING FEED FOR WINTER.

he letter in this department from orrespondent at Rising Sun, Md., ests the thought that while it seems y to talk of winter feed, the pros- s for millfeeds, corn, alfalfa and forage in general are such that e does not seem to be much hope prices will decline enough to make ofitable to wait before placing con- s or putting feed away for winter, h can be bought and delivered now. mer is the best time in which to Prices are then at their lowest, as a rule, because the supply is then at the top. At this time the wheat feeds at least are as cheap as they are likely fo be in the immediate future. The crop is disappointing, although at the worst it will be ample, but it is clearly the purpose of the Wheat Director not to sacrifice a bushel of it. He will hold the price up, if possible, at the $2.26, and while no discounts are named for grades below No. 3, the volume of the lower grade will prove so large that a discount may yet be fixed for No. 4. The prices paid for cotton and flaxseed preclude any thought of low cake from either of those products, and the brewers' and distillers' grains are no longer available.

The dairy cow is usually not fed much if any dairy feed exception for nine months in the year, once said R. W. Chapin, so that there must be saved up enough dairy feed in the summer time to feed the cow in the winter. Without these products there would be a dearth of dairy feeds and many animals would suffer and very likely lose their production to the great loss of the owner. Since earliest times man, following the practice of the lower animals, has stored up summer production for winter use. This is not hoarding, hoarding is only unfair when there is a scarcity of feed. There is no scarcity of any kind of food in the United States.

This season continues the abnormal conditions of a year ago with corn at the abnormally high prices and one of the largest products of gluten feed out of the market, and pork sky-high and a lot of pigs to be fattened, and pork fixes the price of corn and corn fixes the price of feeds.

The Balanced Ration.

The proper balancing of animal rations is the key to profitable feeding. Judging from its infrequent use on average farms the balanced ration is not an easy matter, since it requires a thorough knowledge of feeds and their digestible contents, and of the varying proportions of nitrogen and carbon required by different kinds and classes of animals. Appreciating the economic value of feeding balanced rations and admitting the difficulty of combining home-grown materials with precision and profit, farmers are turning to the expert feed man who combines factory efficiency and magnitude of output to compete successfully with corn and hay and oats in their primitive state and such feeders are as a rule the ones who are making profits and do it right along in spite of apparently high prices.

Tankage and Ground Corn.

In a series of digestion experiments with pigs at the station at Urbana, Ill., to ascertain the influence of one feed upon another, the author of Bulletin No. 200 (Gidley-Carmichael and Newlin), as tankage and ground corn (1 to 7.5), say:

"The coefficients of digestibility of the nutrients of the ration of tankage and ground corn fed together in the ratio of 1 to 7.5, varied significantly for the different pigs during the same period. The average coefficients of all the nutrients of this ration, except the crude fiber, agreed closely for two experimental periods.

"The average coefficients of digestibility of the nutrients of the ration of tankage and ground corn fed together in the ratio of 1 to 7.5 to each of the four pigs for the two ten-day periods (eight digestion trials) were as follows: dry substance, 86.7; nitrogen-free extract, 92.5; crude fiber, 50.8; crude protein, 75.3; and ether extract, 85.8. The average coefficients of the nutrients of tankage and ground corn when fed together in ratios varying from 1:4 to 1:6 in six digestion trials previously reported from this station were as follows: dry substance, 83.2; nitrogen-free extract, 92.4; crude fiber, 19.0; crude protein, 68.7; and ether extract, 76.4.

"On comparing the coefficients of the nutrients of this ration with those of wheat flour middlings when fed alone, it will be noted that the dry substance, the nitrogen-free extract, and the crude fiber of the tankage and corn were digested much more thoroly than those of the wheat flour middlings alone, while the crude protein was digested decidedly less thoroly. The coefficients of digestibility of the ether extract were practically the same in the two rations.

"A comparison of the coefficients of the nutrients of this ration with those of the ration of ground corn fed alone shows that the dry substance, the crude protein, and the nitrogen-free extract of the tankage and corn were digested practically to the same extent as those of the ground corn alone, while the ether extract and the crude fiber of the tankage and corn were digested much more thoroly than those of the ground corn alone.'"

Velvet Bean in Feeding Trial.

The South Carolina Experiment Station recently compared velvet bean meal, wheat bran, molasses feed, and cocoanut meal as supplementary feeds for cottonseed meal for dairy cows. Twenty cows were used in the experiment, these being divided into four groups of five each. The grain ration was mixed in the proportion of one part cottonseed meal to two parts by weight of the other feeds. The idea was not to dispense with the use of cottonseed meal, but to determine which one of the three feeds mentioned would best supplement cottonseed meal as a part of the grain ration. The cows were fed on these for exactly one month, and the amount of milk produced was the method of determining which was the best supplement to cottonseed meal.

This grain ration was fed at the rate of one pound for each three pounds of milk produced. The roughage given was five pounds of hay and all the silage the animals would clean up well. The velvet bean meal was very unpalatable to the animals at the beginning of the experiment, and they apparently cared for the molasses feed considerably more than they did for the velvet bean meal. The cocoanut meal seemed to be distasteful to the animals, as some of them would consume just as little of it as possible when mixed along with cottonseed meal.

Of these grains, the velvet bean proved to be the most economical, and even though it was not relished as much as the molasses feed, it proved to be the best when measured in terms of economy of milk production. This is about what might be expected of velvet bean meal, as it has shown up to decided advantage in a great many experiments when used along with cottonseed meal in the proportion of two to one by weight. It is not advisable to try to feed velvet beans alone, as they are not sufficiently palatable to cause the cows to clean them up well. And, too, it is not sufficiently rich in protein to be depended on for the larger part of this substance. But used along with cottonseed meal these two objections are largely overcome.

Experiments show that it makes little difference whether or not the velvet beans and the pods are ground up into meal, or whether the whole bean in the pod is fed. One form seems to give just about as satisfactory results as the other. Of course when the beans are fed in the pod they should be soaked in water for at least 10 or 12 hours before feeding, so as to soften both the pod and the bean. In the lower part of the South a very large percentage of the dairymen are now feeding a grain ration composed partially of the velvet bean in some form, and the results obtained by tests at experiment stations and by dairymen themselves pretty generally agree that it requires from two to two and a half pounds of velvet beans in the pod to produce as much milk as one pound of cottonseed meal, and that the most satisfactory way to feed it, either in the pod or ground, is to mix it with cottonseed meal and let the grain ration be composed of not less than one-third of cottonseed meal. —*L. A. Niven*, in *Hoard's Dairyman.*

Canada Will Fix a Price.

Contrary to expectations the Canadian government has decided to fix a minimum price on 1919 wheat. The public announcement says: "In order to give stability to the financing of Canadian wheat crop of the present year and safeguard prices from the violent fluctuations due to the opening of grain exchanges in the present uncertain and unsettled conditions, it is probable that the Dominion government will fix a minimum price which it will guarantee dealers, bankers and others interested in the crop movement. It is not the intention that this minimum price shall not be the price at which wheat must be sold in Canada. Trading may take place freely on the exchanges at any higher price or prices which may be offered. The purpose will be to fix a minimum price at which the government will be prepared to take the wheat should the price fall to this minimum figure. The fixing of a minimum appears necessary to insure stability and bring about the movement of crop."

Alfalfa Department

is reported from Seattle, Wash., there is still uncertainty and hesiy in the alfalfa situation. Some were made recently at $24.50, h shows a slight decline from pres quotations. New alfalfa is selling he neighborhood of Walla Walla, h., at $16 in the stack or $22 baled. ie H-Q Hay & Grain Co., Wichita, s., is busy completing their ware- e and in the operation of increased fa milling facilities. This South- ern trade has been particularly im- ant this year, as the columns of PRICE CURRENT-GRAIN REPORTER reflected from week to week. e C. Whiteley, referring to the H-Q ities, suggests even larger opera- in the very near future, the details hich will appear herein at such

ome, Ida., reports that irrigation r is running very low with the e River rapidly drying up. This ition will of course seriously affect ater cuttings of alfalfa. The sec- crop was considerably stunted as as burned and there is the general that the local crop will be far that of last year. Dealers are d $20 for No. 1 f. o. b., but say cannot afford to load at less than Some small lots are already bringing 17 in the stack, while some grow- re holding for $20@25 in the stack.

LaGrande, Ore., alfalfa has been g at $25 f. o. b. At Payette prices not yet been set, as growers are ng to determine the shortage in sections where the irrigation wa- s low. At Hansen growers are ng alfalfa in the stack at $12@14. ian is shipping some new alfalfa e Coast, but the shortage of water using an upward tendency to ; alfalfa in the stack is held at St. Anthony reports that the pres- rop of hay is far below normal, Kellogg is already buying alfalfa, oats and barley.

local hay crop of Ephrata, Wash., e about normal, but as the oats arley crop is rather deficient, the a growers are expecting higher . In Newport, Wash., a good de- for alfalfa is expected during the season; some mill feed is now shipped in. At Grandview, Wash., erage crop of alfalfa is expected ew hay is now being shipped to oast. This hay is of very fair y and is comparatively free from which affects most of the alfalfa state. This hay is bringing $22 ., but growers are selling slowly, ig for a stronger market. At elah the first crop of alfalfa was ood and all has been put up but aled as yet. Prospects, however, second cutting are poor unless omes very soon. The timothy ill be far below the average.

lace Wood, formerly secretary of ipps Lumber Co., has resigned to harge of the branch sales office of nver Alfalfa Milling & Products me offices Lamar, Colo., in Room ve Stock Exchange Bldg., Kansas Mo. Mr. Wood has purchased an t in the company whose opera- are large and everywhere recog- in the alfalfa milling trade. Well mills in the great alfalfa produc- lt provide meal carefully and ly made and attractively sacked uccessfully sold over the entire v. Floyd Wilson, president of the ny, one of the most pleasing per- ies and always on the job during nventions, has good reason, we , to anticipate a continuance this feed trade based on the wonder- pularity of alfalfa feeds among and their consuming trade.

ern Colorado Buying Alfalfa.

ts of northern Colorado which ecently were extensive sources lfa supplies for the Kansas City market, now are among the eager buyers," declared E. B. Bruce, of E. B. Bruce & Co. "Drouth has reduced the crop in this section of the state, there being a lack of water in the irrigated districts. It is probable, too, that the buyers of alfalfa in northern Colorado are disposing of this hay in the more drouthy areas of Montana, the Dakotas, Idaho and other points in the Northwest. Kansas City is witnessing a broad demand for its alfalfa, and unless conditions in northern Colorado and the Northwest as a whole improve much hay will move in that direction."

St. Louis Alfalfa Market.

ST. LOUIS, Mo., July 19, 1919.—With the exception of the meal, alfalfa feeds are firm, at stiff advances over the prices of a week ago. On account of the sharp upturn in coarse grain prices, grain mixed feeds are particularly strong. Quotations are as follows: Molasses grain mixed horse feed, choice, $61; No. 1, $52; No. 2, $48 per ton; straight alfalfa molasses feed, choice, $45; No. 1, $42; No. 2, $39; alfalfa meal, choice, $38; No. 1, $36@37; No. 2, $30 @31. Deferred shipments can be bought for much less.

Alfalfa hay is strong, in sympathy with other feeds, but there is little demand for the lower grades. Quotations are as follows: Choice, $36; No. 1, $33 @34; standard, $31@32; No. 2, $25@ 26; No. 3, $17@18 per ton on track.

Light Alfalfa Meal Demand.

KANSAS CITY, July 19.—No improvement was noticeable in the market for alfalfa meal in Kansas City this week. The views of buyers and sellers regarding the correct level of prices still differed sharply, which served to restrict the volume of business. Only scattered sales were made, mixers and other consumers taking only sufficient for their immediate requirements. No tendency is apparent in the trade to accumulate stocks of meal, buyers awaiting for a more stable market. Offerings continued extremely light.

The extreme range of prices on alfalfa meal, including both the buyers' and millers' views, follow: Choice, $32 @37 per ton in carlots, new sacks, basis Kansas City; No. 1, $31@35; No. 2, $25 @30; brown, $24@26.

Demand for alfalfa mixed feeds was described as active for this period of the year, with the hog and poultry feeds in best demand. Excellent pastures in the Southwest restricted the sale of mule and dairy mixed feeds. The grain mixed feed rose to $46 to $58 a ton. Other prices were unchanged. No. 1 molasses feed closing at $38.50@ 39.50; No. 2, $37@38; brown, $35@36.

Alfalfa Prices.

The Bureau of Markets, reporting under date July 19, has the following as regards alfalfa prices:

SOUTHWESTERN.—San Antonio—Ch. alf. quoted $30, No. 1 $29, with fair dmd. Oklahoma City—Lgt. dmd. for all grades hay, offers No. 1 alf. $21, bids $15. El Paso—New No. 1 alf. $21@23. Ft. Worth—W. Tex. supplying considerable alf., varying reports as to quality and dealers placing most of it in storage, dmd. erratic. Noticeable increase in movement of No. 2, with considerable low-grade on track. Quote ch. W. Tex. alf. del. Group 3 at $27@29, No. 1 $26, No. 2 $23@24.

SOUTHERN.—Atlanta—No. 1 alf. $35. Jacksonville—Rcts. alf. lgt., dmd. lgt. Bulk alf. from Kans.-Okla. quoted ch. alf. $35, No. 1 $33@34. Pensacola—Ch. alf. $34, No. 1 $33. Asheville—Stks. alf. practically exhausted and no rcts. nor inquiry. Greensboro—Alf. not in great dmd., although prices have declined, condition arrivals not satisfactory, ch. alf. $38, No. 1 $35. Wilmington—Stks. alf. nil with no inquiry. Birmingham—Stks.-rcts. alf. gd., dmd. gd., with bulk coming from New Mex. Ch. alf. $35.50, No. 1 $34.50. Mobile—Stks. alf. sma., rcts. fr., dmd. gd., bulk offerings from Colo. with only No. 1 or better alf. desired, quoted ch. alf. $34, No. 1 $32. Montgomery—Stks. alf. lgt., rcts. lgt., dmd. fr. with offerings mostly from Kans. City and West'n states, quote ch. alf. $35, No. 1 $34.

Hay Stocks.

The Bureau of Markets, reporting under date of July 19, has the following in regard to hay stocks throughout the country:

SOUTHERN.—Atlanta—Dmd. for old hay vy. pr., No. 1 tim. $39@40, offered from Kas. City July shpt. $37.50, No. 1 clov. mxd. July from Ill. $35.50 del. Jacksonville—Stks.-rcts. tim. fr., dmd. gd. Market weak and $2 decline on all grades; old hay offered $36@40, No. 1 tim. $37, No. 2 $35. Pensacola—Stks. norm., rcts.-dmd. lgt., No. 1 tim. $32.50. Asheville—Stks. tim. lgt., rcts. sma., dmd. lgt. Old crop inquiry gd., but new crop dull. Gd. dmd. for lgt. mxd. hay at $41, No. 1 tim. $43.50, No. 1 lgt. mxd. $41.50. Greensboro—Dmd. tim. lgt., No. 1 tim. $38, No. 2 $36, No. 1 lgt. mxd. $36, No. 1 clov. $32. Wilmington—Stks.-rcts.-dmd. tim. lgt., bulk secured from west'n N. Y., Pa. and Mich. Local new oat crop depressing values. No. 1 tim. $42, No. 2 $40. Birmingham—Stks.-rcts. tim. lgt., dmd. fr. Bulk received from N. Mex. and feeders preferring tim. to alf., although price is $2 higher, No. 1 tim. $37, No. 1 lgt. mxd. $36, No. 1 John. gr. $26. Mobile—Rcts. tim. lgt., stks.-dmd. fr. Stks. Mostly from Ill. and Mo. and only No. 1 or better grades desired. No. 1 tim. $30, No. 1 John. gr. $25. Montgomery—Stks. tim. rcts.-dmd. nil, No. 1 tim. $35, No. 1 lgt. mxd. $34, No. 1 John. gr. $22.

SOUTHWESTERN.—Ft. Worth—No. 1 Okla. prairie $24@25, No. 1 S. Tex. prairie del. Tex. common points $21. Okla. City—Offers No. 1 pr. $21; bids $15 prairie. New Orleans—Offers No. 1 tim, $38@40, No. 2 $35@37, No. 3 $30@34.

EASTERN.—Clarksburg—Dmd. lgt., offerings fr., rcts. ample. Norfolk—Stks. gd., rcts.-dmd. fr., No. 1 tim. $39.50. Lynchburg—Mov. normal for this season of yr., No. 1 tim. $39.59, No. 2 $38, No. 1 lgt. clov. mxd. $37. Washington, D. C.—Rcts. lgt., but ample, for dmd. is slow, No. 1 tim. $36.50@37, No. 2 $35 @36.

CENTRAL.—Terre Haute—Rcts. vy. lgt., market dull and inactive. No. 1 tim. $34, No. 2 $33, No. 1 clover mxd. $32.50.

Oats Market Last Week.

Oats enjoyed a broad market at Chicago last week with a very large volume of business and new high records on the crop. Continued unfavorable crop reports have been the dominating feature which has inspired much investment buying of an influential character. Recessions, due to profit-taking and technical conditions of the market, have found a strong undercurrent. The belief that crop deterioration has been of a serious nature and that yields will fall below expectations is borne out by returns from central Illinois, where harvesting is under way. While the domestic inquiry for the cash article has been less active, exporters were in the market for considerable quantities up to midweek. However, the demoralized condition of foreign exchange rates greatly handicap an extensive export business and it would seem natural that under such conditions only urgent requirements would be filled.—*Simons, Day & Co., Chicago.*

Live Stock Exchange Bldg., Louisville, Ky.

Hay Department

Spokane, Wash., reports an improved inquiry for hay and that timothy is being steadily offered at $32@33.

Haying is about completed in all parts of Michigan. The crop has been generally well cured and well housed.

The hay crop of Washington Co., Pa., has been harvested and an exceptionally fine crop is generally reported.

Clarence L. Dickinson has begun business at 24 East Weber avenue, Stockton, Cal., in hay, grain, beans, etc.

Great Falls, Mont., reports that continued drought has practically destroyed the pastures and hay is in strong demand.

Creswell, Ore., reports a larger crop of hay than last year and with fewer cattle to use it and considerable shipping surplus is expected.

Lewistown, Ida., reports that alfalfa hay grain is being cut and is coming on the market and apparently very little hay will be shipped in.

While there has been no real serious drought in Scotts Bluff Co., Neb., still the hay crop is reported not very good, the pastures having been overstocked.

Bozeman, Mont., reports that new hay is now coming on the market, No. 1 timothy being offered at $32, producers, however, are not urging sales, as the demand is about on a level.

The National Hay Co. with a capital stock of $2,000 has been incorporated to conduct a wholesale and retail business at Memphis. The incorporators are B. L. Pyle, H. A. Dyer and others.

Grass in Johnson Co., Wyo., is very short and feeders report that hay is going to be a serious proposition during the coming winter, with all indications that last year's high prices will be exceeded.

Corvallis, Ore., reports hay harvest showing a slight shortage of both clover and vetch, but if the silage corn turns out well the local needs for forage and feed will be satisfied from local production.

Dellinger & Sons, Bloomville, O., have attached funds in a Bloomville bank belonging to Levering Brothers of Fredericktown, O., in a suit to recover $480.95 due on a hay deal. The complaint in the case alleges that the Bloomville dealers purchased a shipment of mixed hay at $33 per ton which was forwarded to Suffolk, Va., and there proved to be not of the grade and quality represented.

It is reported that the hay crop in Bayfield Co., Wis., will be a record. Harvesting began about a fortnight ago. The quality of hay is also said to be very fine. The yield is running to 1½ tons to the acre; some places even 2½ tons. There has been, however, some difficulty in curing the hay on account of excess moisture.

Dodson, Mont., reports that hay and grain feed are being shipped in, there being practically no feed in that county. Dealers are anxious to get into touch with hay sellers, as about 25 cars of hay and 50 of corn and oats will be needed, as the growing crops are almost a complete failure and old feed supplies about exhausted.

It is said that more than 25 outfits have been at work in Wagoner Co., Okla., cutting what is said to be the best prairie hay crop raised in that county in several years. This hay is one of the staple crops of the county and is harvested by large buyers, so that the land owners have nothing to do with the handling of it. The cost of harvesting this year ranges about $6 per ton, including the baling. When delivered to cars an additional charge of $1.50 to $2.50 per ton is paid for haulage. The crop this year is running more than a ton to the acre and will leave a nice profit for handlers.

Hay in New England States.

The weekly crop report of the American Steel & Wire Co. as to hay in the New England states as to hay is substantially as follows: In eastern Maine the forage crops are about an average. In the eastern part of New Hampshire pastures and hay are good; clover fair; in the southeastern section hay is excellent with more clover than usual, while in the western and southwestern parts of this state the hay crop is particularly heavy and all forage crops are excellent. In Vermont in the northern section hay was ready to cut by July 10; in southwestern and western sections pastures are fair to extra good; hay and clover good, hay being of fine quality. The central part has the largest hay crop for years. This is true also of clover. Pastures are in better than average condition. In the northwestern part of the state hay is better than an average and clover is extra good. In northern Rhode Island hay is from good to extra heavy with clover excellent, while in the southeast clover is not very good, although the forage crops generally are good. In Massachusetts hay and pastures are good and clover fair in the western section; in the northeastern, while the pastures are excellent the hay and clover are only a medium crop; in the southeast pastures and hay are good; in the southwestern also the hay and clover are good.

HAY INSPECTOR SPELLMAN.

The Kansas City Hay Dealers' Association is particularly fortunate in having secured the services of Virgil K. Spellman to be chief inspector and secretary of the organization. Mr. Spellman, who assumed the duties of the office on May 1, 1919, following the resignation of Ganthus Peters to enter into the hay receiving and shipping business, has a keen knowledge of the forage industry, both from marketing and grading viewpoints. Not only has he devoted thirty-five years of his life to the study of hay on the Kansas City market, but he was trained in the intricacies of the business from his early 'teens by his father, the late J. B. Spellman. The late Mr. Spellman, early in his career in the hay trade, conceived the value of an association of dealers, and was active in the organization of the Kansas City Hay Dealers' Association, of which he was the first president.

VIRGIL SPELLMAN,
Hay Inspector, Kansas City.

"Virg" Spellman, the present inspector and secretary, started upon life's journey fifty-one years ago at Adamsville, Ohio.

KANSAS CITY HAY NOTES.

Sanders Sosland, Correspondent.

The Denver Alfalfa Milling & Products Co., Lamar, Colorado, opened branch office in Kansas City Monday July 21, at 749 Live Stock Exchange Building. The office was formerly occupied by the Carlisle Commission Co which still retains a suite of offices 736, 739, 746 and 749 Live Stock Exchange Building. The branch of the Denver Alfalfa Milling & Products Co is in charge of W. B. Woods.

G. S. Brubaker, of J. A. Brubaker Co., is applicant for membership in the Kansas Ctiy Hay Dealers' Association on transfer from Alfred Weston, of Alfred Weston & Co. The Weston company will continue active in the hay trade, with its principal activity devoted to the handling of flour.

M. G. McCune, of the McCune-Moore Hay Company, extensive handlers of hay and millfeed at Omaha, Nebr., was a visitor in Kansas City the past week.

Many congratulations have been received by C. D. Carlisle of the Kansas City hay market over his election as first vice-president of the National Hay Association at Detroit last week. The election of Mr. Carlisle gives to the market important recognition in the official family of the National Hay Association. Mr. Carlisle is now chairman of the transportation committee of the Kansas City Hay Dealers' Association. He has long been a friend and active worker in the National, and doubtless will aid in adding to the membership of the association in the West in the next year, as in other years. J. D. Cole is the only other hay dealer of Kansas City who has held high office in the National, Mr. Cole being a former president of the organization.

That lower prices will tend to restrict the movement of hay from the country is the opinion held by a majority of market interests in Kansas City. "Producers are not readjusting their ideas of prices in line with the changes recorded in the past few weeks, and, consequently, they are reluctant to part with their hay," commented Roy North of the Midwest Hay Company. "It is not uncommon to hear of offers in the country at $5 to $10 a ton above the actual market. The farmer still is thinking in terms of two cents a pound for hay."

"Prairie hay has reacted sharply since the inauguration of the movement of new crop offerings, but the market now gives signs of having reached a stable basis," declared J.

ver, of J. C. Glover & Co. "The move-
it from the country has recently in-
ased sharply, with free selling in
isas. How long the movement will
l up at its present rate is doubtful,
he drain on the car supply for mov-
wheat to market from producing
s of the Southwest may restrict the
me of loadings. Still another fac-
is the sharply reduced range of
es prevailing on the forage, the
ket having had a break of 50 per
from its high mark. This may in-
ace some producers to hold their
rie for later marketing. So far as
demand for the wild variety of for-
is concerned, the outlook is bright.
movement of grass cattle is begin-
to reach a normal summer vol-
, which will force the stock yards
rs to enter the market for prairie.
Northwest, which is suffering from
of rain, also will provide an out-
or prairie."

ed of rain over the important hay
ucing areas of the Southwest is
ming general and is the source of
e or less concern in the trade. "Hot
her was general over the state the
week, with temperatures above 100
ees on one or more days in nearly
arts of the state," says the weekly
her and crop bulletin issued in
sas. "There was no rain until the
r part of the week, when local
ers, some of which were fairly
y, fell in many places. The sec-
cutting of alfalfa hay is about fin-
l in the eastern half of the state,
but little damage from rain. In
localities the third cutting has
n. Prairie hay harvest will soon
in the southeastern counties."
Missouri report says: "During the
week the temperature, sunshine
rainfall, save in a few localities,
ample for fine growth, and, ex-
for temporary interruptions by
noon showers, hay making pro-
ed satisfactorily. Much fine mead-
as been saved, and there is plenty
ass." Nebraska—"The week was
with an abundance of sunshine
generally light rainfall. Rain
l be beneficial in many southeast-
counties. The second cutting of
a is in progress with generally a
crop. Pastures in many places are
ning dry."

HAY IN TOMPKINS COUNTY, N. Y.

NEW YORK (5).—We are giving you only an estimate of the general conditions. The hay crop is about as usual, except that we are going to have a great deal more clover hay this year than in most of the years past. The old meadows were badly killed out two years ago, while those that were not plowed this spring and the crop gathered from them are going to be quite weedy. The hay meadows that were clover last year have come in very nicely this year and we ought to get some very good hay from them. As we have had good weather so far this season, the crop will be gathered in very good shape, but the farmers who have not been able to gather their hay so far are going to have some ripe hay, as the rains of last week ripened up the hay very fast for the time of year.

Old hay is entirely cleaned up with us and the new hay will not be ready to bale before the middle of August, if then.

We are getting inquiries for the new crop, but as yet we are unable to form any definite idea about what the market will be at the time of delivery. We hear that a price of $25 is being offered for the new crop, but we do not know that this is verified, and we would not care to take the chances on that price.—*Blackman & Stanton, Freeville, N. Y.*

Hay Markets

NASHVILLE.

July 21.—Receipts of hay are light, arrivals last week being 17 cars. Demand is moderate. Quotations, car lots, delivered at Nashville: Timothy, $40@42; clover, $38@40; new alfalfa, $34.50.

PITTSBURGH, PA.

July 19.—Receipts and shipments of hay and grain, as compiled by the superintendent of the Pittsburgh Grain and Hay Exchange for the week ending July 19, follow:

Articles.	Receipts.	Shipm'ts.
Corn, bus.	24,000	14,700
Oats, bus.	112,000	71,000
Feed, tons	420	290
Hay, tons	1,032	610
Straw, tons	168	100

BUFFALO.

July 19.—There is no way of getting at a firm price for hay. The regular dealer is stuck with some high priced hay and getting out the best he can. Farmers are anxious to sell old hay as the new crop is far superior. Old is quoted at $34@35 for No. 1; No. 2, $32@33 and No. 3, $28@30, baled. No straw offered.

MEMPHIS.

July 19.—Receipts of hay during the week were 255 cars, nearly all of which was alfalfa from Texas and Oklahoma, although Kansas sent a little. A few scattering lots of old hay and new timothy came from Illinois and Indiana. Demand has been fairly good for the better grades, but prices have weakened some under the weight of more liberal offerings. There is very little timothy here, but July shipment No. 2 was $26 bid and $28.50 asked on call today. Some little No. 1 has been sold around $33 and $34. Choice alfalfa on the spot has been selling at $33, with $32 for No. 1 and No. 2 at a big discount, some going as low as $23 and $24. For standard cash today $28 was asked and $25 bid, while No. 2 was offered at $24. Firmness in other feeds is helping demand for hay.

DETROIT.
